*House Property Sales at the Auction Mart on Thursdays.*  
[Held for 64 years.]

*Special attention given to Rent Collecting, and the entire Management of Real Estate.*

*Valuations made for Compensation Claims, Probates, Mortgages, etc. Surveys for Dilapidations and Plans.*

# THE Scottish Provident Institution.

INSTITUTED  
1837.

INCORPORATED  
1848.

Head Office: 6, ST. ANDREW SQUARE, EDINBURGH.

IN THIS SOCIETY are combined the Advantages  
of **Mutual Assurance** with **Moderate Premiums**.

THE PREMIUMS are so moderate that, at usual ages for Assurance, £1200 or £1250 may generally be secured from the first for the yearly payment which would elsewhere assure (with profits) £1000 only—the difference of £200 or £250 being equivalent to an immediate and certain Bonus of 20 to 25 per cent.

THE WHOLE SURPLUS goes to the Policy-holders, on a system at once safe and equitable—no share being given to those by whose early death there is a *loss* to the common fund.

Examples of Premium for £100 at Death—With Profits.

AGE.	25	30*	35	40	45	50	55
During Life ...	£1 18 0	£2 1 6	£2 6 10	£2 14 9	£3 5 9	£4 1 7	£5 1 11
25 Payments ...	2 10 2	2 13 0	2 17 9	3 4 6	3 14 0	4 8 7	5 6 11
15 Payments ...	3 8 5	3 12 1	3 18 0	4 5 8	4 16 2	5 11 8	6 9 11

\* A person of 30 may secure £1000 at Death by a yearly payment during life of £20<sup>1</sup>/<sub>15</sub>s. This Premium would generally elsewhere secure (with Profits) £800 only, instead of £1000. OR, if unwilling to burden himself with payments during his whole life, he may secure the same sum of £1000 by *twenty-five* yearly payments of £26 10s., being thus free of Premiums before age 55. To **Professional Men** and others, whose income is dependent upon health, the limited payment system is specially recommended.

THE SURPLUS at the last Investigation (1894) amounted to **£1,423,000** More than **One-Half** of the Members who died during the Septennial period were entitled to **Bonuses** which, notwithstanding that the **Premiums** do not as a rule exceed the non-profit rates of other **Offices**, were on the average, equal to an addition of about 50 per cent. to the Policies which participated.

**ACCUMULATED FUNDS** exceed **£10,500,000**.

REPORTS with full information and TABLES of RATES may be had on application.

Nov, 1898.

JAMES GRAHAM WATSON, *Manager*.

Branch Offices in Glasgow, Aberdeen, Dundee, Birmingham, Bristol, Cardiff, Leeds, Liverpool, Manchester, Newcastle, Nottingham, Belfast, and Dublin.

Contains all the best Nursery Rhymes in the English Language. With Original Illustrations by Miss BRADLEY and Mr. BRINSLEY LE FANU. Printed on cartridge paper with wide margin.

**THE REVIEW OF REVIEWS.** In Half-yearly Volumes, from January 1891 to 1898. The NEW VOLUME (July to December 1898). 5s.

The books are handsomely bound, and form in themselves a complete library of current thought, and the most complete history of contemporary politics published.

**"SATAN'S INVISIBLE WORLD."** A Study of Despairing Democracy as it is to be seen in NEW YORK TO-DAY. Bound in red cloth, 2s. post free.

The volume is beautifully illustrated with full-page pictures of the City of New York, and with pen-and-ink portraits of the leading citizens, by the distinguished artist, M. GRIBAYEDOFF.

"IT WOULD BE DIFFICULT TO OVERESTIMATE the enormous benefits which have been derived by the English reading public from so universally valuable a work as CASSELL'S POPULAR EDUCATOR. Over a million complete copies of the work are already in circulation, exercising their educative influence in as many homes. And now Messrs. CASSELL are CONFERRING FURTHER FAVOURS upon the public by re-issuing the publication in Thirty-two Sixpenny WEEKLY PARTS. A SOUND COMMERCIAL EDUCATION was never more urgently needed than at the present time, and if our youth are to compete successfully with the youth of foreign nations they must continue and perfect their education long AFTER LEAVING SCHOOL. CASSELL'S POPULAR EDUCATOR offers them the best and most easily available means of equipping themselves for the BATTLE OF FOREIGN COMPETITION."—*Daily Mail*, Nov. 11TH, 1898.

**A Cheap Issue of**

**Cassell's Popular Educator**

IS NOW BEING PUBLISHED IN

**Weekly Parts, Price 6d.,**

AND ALSO IN

**8 Volumes,**

**The price of which can be obtained of any Bookseller.**

*The Daily Telegraph* says: "This, the latest triumph of cheap excellence in literature, may fairly lay claim to the character of completeness in the practical elucidation of the whole range of elementary and advanced education."

**CASSELL & CO., Ltd., London, Paris, New York, & Melbourne.**

Offices: 4, LUDGATE HILL, LONDON, E.C.

# DR. J. COLLIS BROWNE'S CHLORODYNE

ONLY GENUINE.

ORIGINAL AND

IS THE GREAT SPECIFIC FOR CHOLERA, DIARRHŒA, DYSENTERY. GENERAL BOARD of HEALTH, London, REPORT that it ACTS as a CHARM, one dose generally sufficient.

**C**OUGHs, **C**OLDS, **A**STHMA, **B**RONCHITIS.

**DR. J. COLLIS BROWNE'S CHLORODYNE.**—Dr. J. C. BROWNE (late Army Medical Staff) DISCOVERED a REMEDY to denote which he coined the word CHLORODYNE. Dr. Browne is the SOLE INVENTOR, and, as the composition of Chlorodyne cannot possibly be discovered by Analysis (organic substances defying elimination), and since the formula has never been published, it is evident that any statement to the effect that a compound is identical with Dr. Browne's Chlorodyne *must be false.*

This Caution is necessary, as many persons deceive purchasers by false representations.

**DR. J. COLLIS BROWNE'S CHLORODYNE.**—Vice-Chancellor Sir W. PAGE WOOD stated publicly in Court that Dr. J. COLLIS BROWNE was UNDOUBTEDLY the INVENTOR of CHLORODYNE, that the whole story of the defendant Freeman was deliberately untrue, and he regretted to say it had been sworn to.—See *The Times*, July 13th, 1864.

Dr. GIBBON, Army Medical Staff, Calcutta, states: "2 DOSES COMPLETELY CURED ME of DIARRHŒA."

**DR. J. COLLIS BROWNE'S CHLORODYNE** is the TRUE PALLIATIVE in NEURALGIA, GOUT, CANCER, TOOTH-ACHE, RHEUMATISM.

**DR. J. COLLIS BROWNE'S CHLORODYNE** is a liquid medicine which assuages PAIN of EVERY KIND, affords a calm, refreshing sleep WITHOUT HEADACHE, and INVIGORATES the nervous system when exhausted.

**DR. J. COLLIS BROWNE'S CHLORODYNE** rapidly cuts short all attacks of EPILEPSY, SPASMS, COLIC, PALPITATION, HYSTERIA.

**IMPORTANT CAUTION.**—The IMMENSE SALE of this REMEDY has given rise to many UNSCRUPULOUS IMITATIONS. Be careful to observe Trade Mark.

Of all Chemists, 1s. 1½d., 2s. 9d., and 4s. 6d.

SOLE MANUFACTURER:

## PREFACE.

ONE of the chief aims of the ANNUAL cannot be better described than in that phrase which flowed so smoothly from now vice-regal lips—"an intelligent anticipation of events even before they occur." No man, of course, can see a whole year, or, in these times, a month ahead; but it is reasonable to suppose that the maps of China, the Nile Valley, West Africa and the Transvaal, together with the articles on those regions, and the record of the events that have transpired therein during 1898, will be of service during 1899. At the very moment of going to press, too, attention is being drawn to the proposed enlargement of the powers of the London Vestries. A full account of the movement up to date will be found under the heading London Local Government. The articles on London's Water Supply and the thorny question of Old Age Pensions are other illustrations of the efforts made to anticipate the course of events during the next year.

Turning to another, and not less important, function of the ANNUAL, attention may be drawn to the extraordinarily large amount of space that has had to be devoted to chronicling the events of the year in, *e.g.*, China, where coigns of vantage and railway concessions have been scrambled for by the Powers; Crete, whence the Sultan has at last been driven, bag and baggage; Cuba, now freed from Spanish rule, but with its future uncertain; the Philippines, brought, like Hawaii, under the Stars and Stripes; Egypt, whose authority, strengthened by that of Great Britain, has been re-established over her Soudanese provinces by the overthrow of the Khalifa; and France, where the Dreyfus affair has overshadowed all else, not even excepting the dispute with Great Britain as to Fashoda and the Nile Valley. Foreign affairs have certainly provided the dominant interest of 1898; but there has been much to record also in home affairs—the vicissitudes of the Vaccination question, the details of the Irish Local Government Act, the agitation as to Church affairs, and the popular movement against Ritualism which accompanied and followed the discussion on the Benefices Act, and the end of which apparently is not yet, and the reports of the Parliamentary Committees on Money-lending, Petroleum, and Telephones. All these will be found to be fully dealt with under their proper headings.

One or two changes in the arrangement of the book have been made. Many important articles relating to London have been grouped together, and the various scattered articles on Local Government have been replaced by a new and comprehensive article on the subject, which should be of great value to those who are not closely acquainted with the somewhat intricate details of our local government system.

WILLIAM PALMER.

# THE GENERAL ACCIDENT Assurance Corporation, LIMITED.

[ESTAB. 1885.]

Chief Offices: 42 to 44, TAY STREET, PERTH.

London Offices: 115 & 117, CANNON STREET, E.C.

## KEY TO CONTENTS.

**HAZELL'S ANNUAL**, being compiled on the alphabetical system, is its own index. It has, however, been thought well to give here the following condensed summary of its contents. It will be understood that no pages are mentioned, because when an article is specified it is only necessary to turn to that page, on which it appears in its proper alphabetical place. This summary is a purely arbitrary and not an exhaustive one, but it may give some idea of the enormous variety of the subjects treated of in the **ANNUAL**, and enable the reader, when desirous of gaining information on some special point, to turn to other articles bearing upon it. The list of **New Articles** written specially for the '99 edition will be found on a subsequent page.

### Afforestation.

**Agriculture.** A special article on this subject has been prepared for the '99 edition, embracing the following heads:—

- I. DRAINAGE AND MANURES.
- II. ENCLOSURES.
- III. AGRICULTURAL DEPRESSION.
- IV. AGRICULTURAL STATISTICS.
- V. IMPROVEMENTS EFFECTED BY STATUTE LAW.
- VI. VETERINARY SANITATION.
- VII. AGRICULTURAL LABOURERS.
- VIII. HOLDINGS AND ALLOTMENTS.
- IX. AGRICULTURAL SOCIETIES.

*See also*

Agricultural Rates Act, '96.  
Allotments and Small Holdings Association.

**CLAIMS PAID** upwards of . . . . . **£4,000,000**

Head Office: 64, CORNHILL, LONDON, E.C.

A. VIAN, *Secretary.*

# HAZELL'S ANNUAL, 1899.

## A Cyclopædic Record of Men and Topics of the Day.

A]

**Abbas Pasha**, eldest son of the late Tewfik Pasha, succeeded his father as **Khedive** of Egypt Jan. 7th, '92. He was b. July 14th, 1874, and was thus, counting lunar months, according to the Mohammedan calendar, eighteen years old when he ascended the throne. At the time of his father's death Prince Abbas was studying at the Theresianum Academy at Vienna, where he had been for five years. He married Princess Ikbal Hanem, and has issue by her three daughters. He has a brother, Mohamed Ali, born in '75. His Highness's attitude to England during the earlier part of his reign was not a very friendly one, and his actions during '98 showed that it has not improved. He has an annual allowance of £100,000.

**Abdul Aziz**, the reigning Sultan of Morocco, was born in 1880, and so was only fourteen years of age when he succeeded his father Muley Hassan in '94. Abdul Aziz married a daughter of Muley Ershid, uncle of his father (June 25th, '94), and in a few months made his position secure.

**Abd-ul-Hamid II.**, Sultan of Turkey, was b. Sept. 21st, 1842, and was the second son of Sultan Abd-ul Medjid. He was proclaimed Sultan in succession to his brother Murad V., who was deposed in consequence of his mental incapacity (Aug. 31st, '76). His brother Mehemed-Reshad Effendi, b. Nov. 3rd, '44, is the heir-apparent to the throne, the succession, according to Turkish custom, vesting in the senior male descendant of the house of Othman. The Sultan has several children. Under the rule of Abd-ul-Hamid the Ottoman Empire has been dismembered of some of its fairest regions. The Berlin Treaty, concluded after the disastrous war with Russia in '78, practically deprived the Sultan of Bulgaria, Bosnia, and Herzegovina in Europe, and of Ardahan, Kars, and Batoum in Asia. His recent conduct with regard to his Christian subjects in Armenia and Crete has exposed him to almost universal execration, but amongst his own subjects the successful conduct of the war with Greece in '97 somewhat improved his position. He entertained the Emperor and Empress of Germany at Constantinople in Oct. '98. See **TURKEY**.

**Abdurrahman Khan**, Ameer of Afghanistan, is the eldest son of Mohammed Afzul Khan, grandson of Dost Mahommed, and nephew of the late Ameer, Shere Ali, and was b. 1830. He took sides against his uncle in the civil war of '64, and won the battles of Shaikhabad and Khelat-i-Ghilzai. In '68 he was defeated by Yakoub Khan, son of Shere Ali, and fled for protection to Russian territory. The Russians provided him with a residence at

A

Samarcand, and a pension. In '79 he made his way to the Cabul frontier, and, having gained the allegiance of the leading men of that city, was (July '80) acknowledged **Ameer** by the **British Government**. It was afterwards seen, however, that the Ameer's sympathies were more English than Russian. In Sept. '93 a British mission, sent with the object of settling Anglo-Afghan boundaries and so getting rid of frontier disputes, was received with marked cordiality, and an agreement was come to which has since been carried out. His Highness's subsidy was also increased from 12 to 18 lakhs, and he was appointed a G.C.S.I. in Jan. '94. During the frontier troubles of '97-8 his position was a difficult one, but all his influence was used on the side of the Indian Govt., and he did his best to bring about the submission of the insurgents. See **AFGHANISTAN** and **INDIA**.

**Aberdeen, Lord.** See under **PEERS**.

**Aberdeen University** was founded in 1495 by Bishop Elphinstone as a *Studium Generale*, in which he constituted a college in 1505 known as King's College. In 1593 George Keith, 5th Earl Marischal, founded **Marischal College**, which came to be also a university distinct from the former foundation. In 1860 these two universities were united in one institution, and now form the University of Aberdeen. The arts and divinity classes meet in the old college, while the science, law and medical meet in the new. Chancellor, Duke of Richmond and Gordon. **Lord Rector** (re-elected '96), the Marquis of Huntly. **Principal**, Sir W. D. Geddes, LL.D.; there are 23 professors and upwards of 700 students. In conjunction with Glasgow it sends one representative to Parliament (present member, the Right Hon. J. A. Campbell, LL.D.). It grants degrees in Arts, Science, Divinity, Law, and Medicine, and is now empowered to admit women as well as men to those degrees. It also grants certificates of proficiency to women in the local examinations which it has instituted throughout the northern counties of Scotland. In '92, the Government being appealed to to aid the Buildings Extension Scheme of the University, agreed to grant £40,000 in instalments, on condition of an equal sum being contributed locally. This amount was more than secured, and the University have already expended since '92 in sites and buildings upwards of £100,000. In connection with the four hundredth anniversary of the College several new buildings were inaugurated in Oct. '95. Its degrees are: **M.A., D.Litt., D.Phil., B.D., D.D., B.L., LL.D., M.B., C.M., M.D., B.Sc., D.Sc.**; whereof D.D. and LL.D. are purely honorary.

**Aberystwith College.** See **UNIVERSITY COLLEGE OF WALES (ABERYSTWITH)**.

**Abyssinia** is a country of North Africa, and occupies a highland region S.W. of the Red Sea. Estimated area, 150,000 sq. m.; pop. 3,500,000. The country is made up of semi-independent small states, the chief of which are Tigre in the north, Amhara in the west and centre, and Shoa in the south. Part of Somaliland was ceded to Abyssinia by Great Britain in the '97 treaty, referred to below, and the Emperor also claims jurisdiction over much of the country between Shoa and the Nile. Abyssinian trade passes through Adowa, the present capital, to the port of Massowah, now Italian. Government monarchical, and a sort of feudal military system obtains. Religion a form of the Armenian and Coptic Christian Church, called Monophysite. Manufactures limited to coarse cotton and woollen cloths, leather, pottery, and some iron, steel, and other metal articles. **Exports:** ivory, gold dust, musk, coffee, and some other productions. People a mixed race: Semitic or Arabic type most prevalent; colour yellow-brown to black. There are Mohammedans, and the Jewish Falashas, who number about 250,000, and are the principal agriculturists and manufacturers. After the defeat and suicide of King Theodore, in '68, Prince Kassa of Tigre assumed the chief power as Johannes II. To him, in '89, succeeded Menelik II., King of Shoa; but by the treaty of Ucciali, concluded with Italy in that year, the country was practically made an Italian protectorate. The advances of the Italians from the direction of Erythrea led to war between them and Menelik, and the province of Tigre was annexed by the Italians in Nov. '95, only to be given up again later on, when Menelik inflicted several severe defeats on the Italians. A treaty of peace was signed (Nov. 15th, '96), by which the treaty of Ucciali, mentioned above, was abrogated, and the absolute independence of Abyssinia was recognised. —**History, '98.** The details of the treaty with Great Britain, concluded in May '97, were published (Feb. 11th). The frontiers of the British Somali Protectorate were defined as follows:—Starting from the seashore opposite the well of Hadou (on which the French and the English Governments agreed in Feb. '88), it follows the caravan road by Abbassouen till Mount Somadou; from Mount Somadou to Mount Saw; from Mount Saw to Mount Egu; from Mount Egu to Moga Medir; starting from Moga Medir it goes in a direct line to Eylinta Kaddo and Arran Arrhe, 44° east of Greenwich and 9° north, and again in a direct line until 47° east and 8° north. After this the boundary follows the line on which the English and the Italians agreed on May 5th, '94, until the sea. The caravan route between Zeila and Harar was declared open to the commerce of both nations, the most-favoured-nation treatment was granted to Great Britain and her colonies, and in return the right of free entry at the port of Zeila was given to all material destined for the service of Abyssinia; the Emperor declared the Mahdists his enemies, and engaged to do all he could to prevent arms and ammunition reaching them through his dominions. Lieut. Harrington, the British Diplomatic Agent, arrived at the Emperor's capital (April 20th). It was reported (Oct. 15th) that Ras Mangascia, Governor of Tigre, had shown signs of rebellion against the Emperor's supreme authority, and that an expedition had in consequence been sent against him. But

later (Nov. 7th) it appeared that negotiations had been opened, and that the difficulty between the Emperor and the Ras would be arranged. See EGYPT (Map) and FOREIGN ARMIES.

**Academy.** See ROYAL ACADEMY.

**Academy, The French** (*Académie Française*), was founded in 1635 by Cardinal Richelieu, and is the first of the five academies constituting the "Institut de France," the other four being l'Académie des Inscriptions et Belles Lettres, l'Académie des Sciences, l'Académie des Beaux Arts, and l'Académie des Sciences Morales et Politiques. The Academy consists of forty members, and meets at the Palais de l'Institut every Thursday from 3 to 5 p.m. An annual meeting is held in November. Each of the members receives 1500 fr. a year, and the Secretary 6000 fr. Six members who are appointed as a Dictionary Commission also receive 1000 fr. a year each. Twenty-one "prix littéraires" and forty "prix de vertu" are awarded by the Academy. The list of members is as follows, the dates of their election following the name: MM. Legouvé '55, Duc de Broglie '62, Emile Ollivier '70, Alfred Mézières '74, Gaston Boissier '76, Victorien Sardou '77, Duc d'Audriffet-Pasquier '78, Rousse '80, Sully-Prudhomme '81, Cherbulée '81, Perraud '82, Edouard Pailleron '82, Coppée '84, Joseph Bertrand '84, Ludovic Halévy '84, Edouard Hervé '86, Gréard '86, Comte d'Haussonville '88, Jules Claretie '88, Melchior de Vogüé '88, De Freycinet '90, J. Viaud (Pierre Loti) '91, Ernest Lavisse '92, Thureau Dangin '93, Henri de Bornier '93, Brunetière '93, Sorel '94, Paul Bourget '94, De Herdia '94, Henri Houssaye '95, Jules Lemaitre '95, Anatole France '96, Costa Beauregard '96, Gaston Paris '96, Theuriet '97, Vandal '97, Hanotaux '97, De Mun '97, E. Guillaume '98. The Secretary is M. Gaston Boissier.

**Accountants.** See INSTITUTE OF CHARTERED ACCOUNTANTS, and SOCIETY OF ACCOUNTANTS.

**Acts of Parliament.** All public Acts affecting the United Kingdom, and all local Acts affecting only limited areas, as well as private Acts of Parliament, are published, and can be obtained (if in print) at various prices, from Messrs. Eyre & Spottiswoode, East Harding Street, London, E.C., who also publish at the close of each session a cheap edition of the public Acts in covers. The public Acts passed during the '98 Session are enumerated in the following list, and particulars are given of the more important of them in alphabetical order in Part II. of the article on SESSION.

Appropriation Act, '98 (Ch. 61).

Army (Annual) Act, '98 (Ch. 1).

Bail Act, '98 (Ch. 7). See SESSION, sect. 36.

Benefices Act, '98 (Ch. 48). See SESSION, sect. 38.

Canals Protection (London) Act, '93 (Ch. 16).

See SESSION, sect. 39.

Circuit Clerks (Scotland) Act, '98 (Ch. 40).

Companies Act, '98 (Ch. 26). See SESSION, sect. 43.

Consolidated Fund (No. 1) Act, '98 (Ch. 3).

Consolidated Fund (No. 2) Act, '98 (Ch. 32).

Criminal Evidence Act, '98 (Ch. 36). See SESSION, sect. 49.

East India Loan Act, '98 (Ch. 13). See SESSION, sect. 50.

Elementary School Teachers (Superannuation) Act, '98 (Ch. 57). See SESSION, sect. 51.

Ex-Officio Justices of the Peace (Scotland) Act, '98 (Ch. 20). See SESSION, sect. 53.  
 Expiring Laws Continuance Act, '98 (Ch. 47).  
 Finance Act, '98 (Ch. 10). See SESSION, sect. 55.  
 Greek Loan Act, '98 (Ch. 4). See SESSION, sect. 56.  
 Greenwich Hospital Act, '98 (Ch. 24).  
 Inebriates Act, '98 (Ch. 60). See SESSION, sect. 58.  
 Isle of Man (Customs) Act, '98 (Ch. 27).  
 Kingstown Township (Transfer and Harbour Roads) Act, '98 (Ch. 52).  
 Libraries (Offences) Act, '98 (Ch. 53). See SESSION, sect. 62.  
 Local Government (Ireland) Act, '98 (Ch. 37). See SESSION, sect. 63.  
 Local Taxation Account (Scotland) Act, '98 (Ch. 56). See SESSION, sect. 64.  
 Locomotives Act, '98 (Ch. 29). See SESSION, sect. 65.  
 Marriage Act, '98 (Ch. 58). See SESSION, sect. 68.  
 Merchant Shipping (Liability of Ship Owners) Act, '98 (Ch. 14). See SESSION, sect. 69.  
 Merchant Shipping (Mercantile Marine Fund) Act, '98 (Ch. 44). See SESSION, sect. 70.  
 Metropolitan Commons Act, '98 (Ch. 43).  
 Metropolitan Poor Act, '98 (Ch. 45).  
 Metropolitan Police Courts Act, '98 (Ch. 31).  
 Mussels, Periwinkles, and Cockles (Ireland) Act, '98 (Ch. 28).  
 Outdoor Relief (Ireland) Act, '98 (Ch. 51). See SESSION, sect. 72.  
 Pauper Children (Ireland) Act, '98 (Ch. 30).  
 Parish Fire Engines Act, '98 (Ch. 38). See SESSION, sect. 74.  
 Pharmacy Acts Amendment Act, '98 (Ch. 25). See SESSION, sect. 75.  
 Poor Law (Scotland) Act, '98 (Ch. 21). See SESSION, sect. 77.  
 Poor Law Unions Association (Expenses) Act, '98 (Ch. 19). See SESSION, sect. 78.  
 Post Office (Guarantee) Act, '98 (Ch. 18). See SESSION, sect. 79.  
 Post Office (Guarantee) (No. 2) Act, '98 (Ch. 59). See SESSION, sect. 79.  
 Public Buildings Expenses Act, '98 (Ch. 5). See SESSION, sect. 82.  
 Public Record Office Act, '98 (Ch. 12).  
 Public Works Loans Act, '98 (Ch. 54). See SESSION, sect. 83.  
 Prison Act, '98 (Ch. 41). See SESSION, sect. 80.  
 Registration (Ireland) Act, '98 (Ch. 2). See SESSION, sect. 63.  
 Reserve Forces and Militia Act, '98 (Ch. 9). See SESSION, sect. 84.  
 Revenue Act, '98 (Ch. 46). See SESSION, sect. 85.  
 Rivers Pollution Prevention (Border Councils) Act, '98 (Ch. 34).  
 Seed Supply and Potato Spraying (Ireland) Act, '98 (Ch. 50). See SESSION, sect. 86.  
 Sheriffs' Tenure of Office (Scotland) Act, '98 (Ch. 8). See SESSION, sect. 88.  
 Societies' Borrowing Powers Act, '98 (Ch. 15). See SESSION, sect. 89.  
 Solicitors (Ireland) Act, '98 (Ch. 17). See SESSION, sect. 90.  
 Special Juries Act, '98 (Ch. 6). See SESSION, sect. 91.  
 Statute Law Revision Act, '98 (Ch. 22).  
 Suffragan Bishops Act, '98 (Ch. 11). See SESSION, sect. 92.  
 Telegraph (Money) Act, '98 (Ch. 33). See SESSION, sect. 93.  
 Trusts (Scotland) Act, '98 (Ch. 42).  
 Universities and College Estates Act, '98 (Ch. 55). See SESSION, sect. 95.

University of London Act, '93 (Ch. 62). See SESSION, sect. 96.  
 Union of Benefices Act, '93 (Ch. 23). See SESSION, sect. 94.  
 Vaccination Act, '98 (Ch. 49). See SESSION, sect. 98.  
 Vagrancy Act, '93 (Ch. 39). See SESSION, sect. 99.  
 Vexatious Actions (Scotland) Act, '93 (Ch. 35).

### ADDRESS, FORMS OF.

Below are given the proper modes of addressing, both personally and by letter, those members of the Peerage, the Baronetage, the Church, etc., in regard to whom some difficulty may at times be experienced.

**Archbishop**—commence *My Lord Archbishop*; refer to personally as *Your Grace*; and address letter to "His Grace the Archbishop of —." An **Archbishop's** wife and the other members of his family enjoy no title as such. **Archdeacon**—commence *Venerable Sir*; refer to as *Sir*; address to "The Venerable the Archdeacon of —." **Baron**—commence *My Lord*; refer to personally as *Your Lordship* or *My Lord*; and address letter to "The Rt. Hon. Lord —." **Baroness** or **Baron's wife**—commence *Madam*; refer to personally as *Your Ladyship* or *My Lady*; and address to "The Lady —," or more strictly "The Rt. Hon. the Baroness —." **Baron's son**—commence *Sir*; refer to as *Sir*; and address to "The Hon. John —." **Baron's daughter**—commence *Madam*; refer to as *Madam*; and address, if unmarried, to the "The Hon. Jane —," if married to an esquire to "The Hon. Mrs. —." **Baronet**—commence *Sir*; refer to as *Sir*; address to "Sir William —, Bart." **Baronet's wife**—commence *Madam*; refer to as *Your Ladyship*; address to "Lady —" (without Christian name, unless she be the daughter of a duke, marquis, or earl). **Bishop**—commence *My Lord*; refer to as *Your Lordship*; address to "The Right Rev. the Lord Bishop of —." **Retired Bishops**—commence *Right Rev. Sir*; address to the "Right Rev. Bishop" [then the surname]. **Bishops Suffragan**—commence in the same way, and address to "The Bishop Suffragan of —." A **Bishop's wife** and children enjoy no title whatsoever as such. **Canon**—commence *Rev. Sir*; refer to as *Sir*; address to the "Rev. Canon —." **Cardinal**—commence *Your Eminence*, refer to as same, address to "*His Eminence* —." **Clerk in Holy Orders**—commence *Rev. Sir*; refer to as *Sir*; address to "The Rev. John Jones," or, if the Christian name be not known, to "The Rev. — Jones." **Countess** (see **Earl**). **Dean**—commence *Very Rev. Sir*; refer to personally as *Sir*; address to "Very Rev. the Dean of —." **Diplomatic**: **Ambassador**—commence *My Lord* or *Sir*, according to rank; refer to as *Your Excellency*; and address to "His Excellency Lord — (or Sir Thomas —, as the case may be), H.B.M.'s Ambassador Extraordinary and Minister Plenipotentiary to —." The style of "Excellency" is not used in the case of a minister or minister resident: these should be addressed as "H.B.M. Minister" or "H.B.M. Minister Resident." The same initials are used in the case of a consul. **Dowager**—the widow of a peer or baronet should be addressed as "The Dowager Duchess of —," or "The Dowager Lady —," when her son or grandson succeeds to the title and is married. **Duke**—commence *My Lord Duke*;

refer to as *Your Grace*; and address to "His Grace the Duke of —." **Duchess**—commence *Madam*; refer to as *Your Grace*; and address to "Her Grace the Duchess of —." **Duke's eldest son** as if he held legally the second title of his father. **Duke's younger son**—commence *My Lord*; refer to as *Your Lordship*; and address to "The Lord Henry —." **Duke's daughter**—commence *Madam*; refer to as *Your Ladyship*; and address to "The Lady Ellen —." **Earl**—commence *My Lord*; refer to as *Your Lordship*; and address to "The Rt. Hon. the Earl of —." **Earl's eldest son** as if he held legally the second title of his father. **Earl's younger son**, same as the younger son of a baron. **Earl's daughter**, same as the daughter of a duke. **Countess**—commence *Madam*; refer to as *Your Ladyship*; address to "The Rt. Hon. the Countess of —." **Judge of the High Court of Justice**—commence *Sir*; refer to in letter only as *Sir*, but on the bench as *My Lord*; address to "The Hon. Sir John —." **Judge Scottish**—commence *My Lord*; address to "The Hon. Lord —." **Knight**—commence and refer to as *Sir*; and address to "Sir Thomas —." If a **Knight Bachelor** (Kt., the form of knighthood usually conferred upon a judge, and the law officers amongst others) it is not customary to add "Knight," except in formal documents; but if the person addressed be a K.G. or K.T. or K.P. or G.C.B., etc., etc., it is usual to add the initials after the name. When the person addressed is a knight of several orders, give at least the initials of the most illustrious. **Knight's wife**, same as wife of a baronet. **Lord-Lieutenant of Ireland**—commence *My Lord Marquis* or *My Lord*, according to rank; address to "His Excellency the Lord-Lieutenant," or, if a duke, to "His Grace the Lord-Lieutenant." **Duke Mayor**—commence *My Lord*; refer to as *My Lord* or *Your Lordship*; and address to "The Right Hon. the Lord Mayor of —." **Lady Mayoress**, same as baroness, addressing to "The Rt. Hon. the Lady Mayoress." **Lord Provost of Edinburgh**—commence *My Lord*; address to "The Right Hon. the Lord Provost." **Lord Provost of Glasgow**—commence the same; but address to "The Hon. the Lord Provost." **Marquis**—commence *My Lord Marquis*; and refer to as *My Lord* or *Your Lordship*; and address "The Most Hon. the Marquis of —." **Marchioness**—commence, *Madam*; refer to as *Your Ladyship*; and address to "The Most Hon. the Marchioness of —." **Eldest son** as if he legally held the second title of his father. **Younger son**, same as younger son of a duke. **Marquis's daughter**, same as daughter of a duke. **Mayor**—commence and refer to as *Sir*; and address to "The Mayor of —," or in any formal documents to "The Right Worshipful the Mayor of —." **Military and Naval Officers**.—The professional rank should be given first except in the case of Lieutenants in the Army and sub-Lieutenants in the Navy, whom it is customary to address by their social rank; e.g. Major General Sir Thomas —, G.C.B.; Colonel the Hon. E. J. —; Admiral Sir Henry —, Bart., M.P.; Patrick —, Esq., R.N.; the Hon. George —, 6th Dragoon Guards. **Prince**—commence *Sir*; refer to as *Your Royal Highness*; and address, if a prince, "His Royal Highness Prince —," or, if a duke also, "His Royal Highness the Duke of —." **Princess**—commence, *Madam*; refer to personally as *Your Royal Highness*; and address to "Her Royal

Highness the Princess —," or, if a duchess, to "Her Royal Highness the Duchess of —." **Privy Counsellor**—commence and refer to according to rank, but address to the "Right Honourable —," and if a commoner omit Esq. (e.g., "The Rt. Hon. E. T. —"). **M.P.** should be added after the surname, or after Bart. or Esq., if belonging to the House, a baronet, etc. (e.g., Sir Joseph W. Pease, Bart., M.P.; James —, Esq., M.P.). A Privy Counsellor's wife and children take no title as such. **Queen**—commence *Madam*; refer to personally as *Your Majesty*; and address "The Queen's Most Excellent Majesty." **Viscount**—commence *My Lord*; refer to as *Your Lordship* or *My Lord*; address to "The Rt. Hon. Lord Viscount," or "The Lord Viscount —." **Viscountess**—commence *Madam*; refer to as *Your Ladyship*; and address to "The Rt. Hon. the Viscountess —," or "The Viscountess —." **Viscount's son** or **daughter**, same as son or daughter of a baron. **NOTE**.—A marquis, or an earl, or a viscount by courtesy is addressed as if he were a peer and enjoyed one of those titles by right. In communications upon official business give the office held by the person addressed in a line beneath the name. In '93 it was officially announced that the Queen "has been pleased to approve of the use and recognition throughout Her Majesty's dominions of the title of 'Honourable,' at present appertaining only locally to members of executive or legislative councils in colonies possessing responsible government, for so long as they may remain entitled thereto, whether for life or during tenure of the qualifying office." In '97 Her Majesty directed that in future the children of Legal Life Peers and of Legal Life Peers deceased shall have the courtesy title of "Honourable," and that they shall have rank and precedence immediately after the younger children of Barons and immediately before Baronets.

**Aden.** A town and territory on the S. coast of Yemen, Arabia, 110 miles east of the Straits of Bab-el-Mandeb, forming a British dependency. Total area, 70 sq. m. **Pop.** 41,912. Consists of a rocky promontory not unlike Gibraltar, joined to the mainland by a low isthmus, and is under a **Resident**, who acts as military and civil governor. The harbour, a very fine one, touched at by 1500 ships annually, is the entrepôt of trade for surrounding countries. It is a coaling station for the British navy, and as such is strongly fortified. For statistics see **BRITISH EMPIRE** (table).

**Adler, Hermann, M.A., Ph.D.,** Chief Rabbi, is son of the late Chief Rabbi, and was b. in Hanover, 1839. Educated at Univ. Coll., Lond., B.A. Lond. '59, Ph.D. Leipsic '61. Appointed Principal of the Jews' College in '63, and Minister of the Jewish Synagogue at Bayswater in '64. Dr. Adler is the author of several works of a controversial character, including a reply to Dr. Colenso's "Criticism of the Pentateuch," and "Sermons on Passages in the Bible on which Christian Theologians base their Faith," and has contributed to the principal Reviews. He was elected **Chief Rabbi** of the United Congregations of the British Empire in May '91, and was installed on June 23rd in the Great Synagogue of London. He is an active Member of the Prince of Wales' Hospital Fund. Address: 22, Finsbury Square, E.C.; 6, Craven Hill, W.

**\* Admiralty.** Unlike the other great departments of the Government, the Admiralty is not presided over by a Secretary of State. This is due to the circumstance that the constitutional ruler of the Navy is a Lord High Admiral. But the office has been continuously in commission since 1708, except during the period when it was filled by the Duke of Clarence, afterwards William IV. The commissioners are generally styled "the Lords of the Admiralty" or "the Board." The First Lord is the Minister immediately responsible for the general efficiency of the Navy. Under the First Lord the direction of affairs rests in the hands of four naval lords, a civil parliamentary lord, and the financial or parliamentary secretary. The senior naval lord, who is always an admiral of high rank and general experience, practically fills the position of Commander-in-Chief of the Navy. He is the chief naval adviser of the First Lord, and is especially responsible for the *personnel*, condition, and general movements of the fleet. The naval lords each share the responsibility of maintaining the efficiency of the branches of the service under their immediate supervision. The Controller of the Navy is the naval lord charged with the supervision of the whole of the material of the Navy, including the construction, repair, armament, general equipment, and upkeep of every ship in the service. He is also responsible for the administration of the dockyards, and for the construction of ships and machinery by contractors. Under the naval lords and other members of the Board, the several branches of administration are conducted by permanent officers, who, under the title of directors, deal with naval construction, engineering, ordnance, hydrography, dockyards, stores, victualling, works, hygiene, and contracts. Formerly the Navy was dependent upon the War Department for armaments and ammunition, but the responsibility for this provision has now been transferred to the Admiralty. The Director of Transports, on the other hand, is an Admiralty officer, but the responsibility for the expenditure rests with the War Office. The Works Department of the Admiralty is presided over by officers of the Royal Engineers, its supervision resting with the civil lord. The Department of Naval Intelligence is a recent addition to the establishment of the Admiralty, but one of the most important. The headquarters of the marine forces are at the Admiralty, where its affairs are administered by the Deputy Adjutant-General. The secretariat of the Admiralty is divided into two sections, the executive and the financial. The first-named section is under the direction of the permanent secretary of the Admiralty, who acts as mouthpiece of the Board. The Financial Secretary, being a Minister of the Crown, vacates office with the Administration of which he is a member. The Accountant-General of the Navy, who is the permanent financial officer of the Admiralty, fills the position of Assistant Financial Secretary. At one time the Departments of the Admiralty were scattered in many buildings. The new Admiralty, at Whitehall, has now afforded accommodation for many of the outlying departments, and when the other wing is completed, all will be concentrated under one roof. See NAVY, BRITISH.

**Adulteration Bills.** See SESSION, sect. 32.

**Advertisement Regulation Society.** See NATIONAL SOCIETY FOR CHECKING THE ABUSES OF PUBLIC ADVERTISING.

**Aërial Navigation.** There are two systems of aërial navigation in vogue—viz., ballooning and aviation. The former involves the use of machines lighter than the air; while the latter may be accomplished only by the use of apparatus heavier than the air. For a discussion of the subject, and accounts of various flying machines, see '95 and previous eds. A new method was propounded by Mr. Davidson before the Aëronautical Society in June '98. He proposes to employ rotary fans to lift the machine vertically, and to trust to gravity for his forward motion, his theory being that his machine, which includes large wing surfaces, will, being lifted by the rotary fans, slide forward and downwards, owing to the combined action of gravity and of the resistance offered by the wing surfaces.

**Affidavit.** A written statement sworn to or affirmed before a person having authority to administer oaths. It must be drawn up in the first person, and divided into paragraphs numbered consecutively and dealing each with a distinct portion of the subject. It must be expressed in distinct and positive terms, so as to afford matter for a charge of perjury if false. When used as evidence in an action it must be confined to statements of fact. When used to support applications merely incidental to the conduct of a suit, it may state the deponent's belief as distinguished from his knowledge, but must give the grounds of such belief. It may be sworn (1) in England, in court or before any one of the judges, or before a commissioner appointed to take affidavits; as a matter of practice it is almost invariably sworn before a Commissioner for Oaths, who is entitled to a fee of 1s. 6d. for swearing it; (2) elsewhere in the Queen's dominions before any person authorised to administer an oath; (3) in foreign countries before a British consul or vice-consul. Evidence may be taken by affidavit in any action in which the parties consent to that course; but then leave to try the case with a jury will generally be refused. By the Oaths Act, '88, affirmations may be used in all cases instead of affidavits, and a person may swear in the Scotch form and manner with uplifted hand, instead of kissing the Testament.

**Affirmation.** The law of England requires an oath to be taken by persons about to discharge various public functions—e.g., a person about to give evidence in a court of justice takes an oath that he will speak the truth; a member of Parliament before taking his seat takes the oath of allegiance. By the Oaths Act, '88, which repealed all former Acts and decisions, any person objecting to be sworn, on the ground either that he has no religious belief, or that an oath is contrary to his religious belief, may make his solemn affirmation "in all places and for all purposes" where an oath is or shall be required by law.

**Afforestation.** Forests are useful to a country—firstly, as a source of timber and fuel supply; and, secondly, as regards their sanitary and climatic influences. In Great Britain we have about 3,000,000 acres of woodlands, or less than 4 per cent. of its total area. The national woodlands include about 115,293 acres, but only about 57,304 are under timber crops in the New

Forest, the Forest of Dean, and other smaller tracts. The excess of imports of foreign forest produce in Great Britain over the exports is about £18,000,000; but this sum does not include mahogany, cutch gambier, caoutchouc, and gutta-percha, which are imported to the extent of about £4,500,000. Half our timber imports, at the least, ought to be produced at home. A very reckless destruction of forests has taken place both in England and Scotland during the present century and previously. In many countries forests have also been destroyed without fresh afforestation; and, while the world's demands for timber are yearly increasing, the productive area under forests is steadily decreasing. In the United Kingdom five times as much timber is now consumed as a century ago. In the growing of trees for effect in plantations, and for other ornamental purposes, which is called arboriculture, British landowners are unrivalled; but as for the cultivation of trees on scientific principles for yielding profitable crops, which is *syilviculture*, this is grossly neglected in the United Kingdom. Landowners might make their woods more profitable if better attention were given to the selection of trees suitable to different soils, and to more efficient management after the trees were planted. There is much bad land, unsuitable for growing anything but timber trees, which might be utilised with great advantage for this purpose, particularly in the highlands of Scotland and the west side of Ireland. One discouragement to afforestation in the United Kingdom is that there is no chance of a return for the outlay for very many years. There appears, however, to be no reason why, if the existing woodlands were well and economically managed, they should not produce nearly £2,000,000 per annum. The select committee of the House of Commons on Forestry in '87 recommended the establishment of a Forest Board. There is no such Board at present, but some of the work of the proposed Board has been assumed by the Board of Agriculture by the Act of '80, and various small sums are allotted to four different minor institutions for technical instruction in forestry. The Surveyors' Institution has recently started a Forestry Museum in London, which should have an important educational influence. It also conducts examinations in forestry in connection with its examinations for admission to the class of Professional Associates and for Fellowship of the Institution, and Special Certificate Examinations in Forestry are open to its members. In the event of afforestation in the United Kingdom being carried on on a large scale in the near future, very many unemployed labourers would be engaged in the operation. Much work, too, in connection with tending woodlands and getting in timber can be best done during the winter months, when far more labourers remain unemployed.

**Afghanistan** is an inland country of Asia, forming the north-eastern portion of the great Iran plateau. Its breadth is about 500, and its length, from the Herat boundary to the Khaibar, about 600 miles. Its area is about 300,000 sq. m. It is bounded on the E. by the tribes on the N.W. frontier of India under British control; on the S. by Baluchistan; on the W. by Persia; on the N. by Turkestan as far as the Oxus. By an agreement made with the Ameer by Sir Mortimer Durand in '03, Chitral, Bajaur, Swat, and the neighbouring states in Indus-Kohistan

were left outside the Afghan and within the British sphere, while Asmar and the Kunar valley, north of Jalalabad, were retained by him. Kafiristan was placed under his control (and reduced to submission by his troops in '95), but Waziristan was put wholly under British influence. It was also arranged that the subsidy of 12 lakhs to his Highness should be increased to 18 lakhs, and that all the restrictions on the import of arms, stores, etc., should be removed. Cabul is the capital. There is no Afghan nation; the population (4,000,000) consists of discordant tribesmen, constantly in revolt, and only kept in subjection by frequent military expeditions from Cabul. The chief tribes are the Ghilzais in the province of Cabul, the Duranis between Herat and Kandahar, the Amiahs and Hazaras in the Paropamisus mountains, north of the Duranis, and the Uzbeks and Tajiks. The four principal provinces are Cabul, Turkestan, Herat, and Kandahar. Most of the tribesmen are Suni Mahomedans. The present Ameer is Abdurrahman Khan (*q.v.*). Under his rule much progress has been made, and at Cabul he has established factories where guns are forged and rifles made, and all sorts of manufactures are carried on. A standing army whose war strength is estimated at about 50,000 is maintained. **Exports:** assafetida, madder, fruits, furs, shawls, and chintz. For Agent to Governor-General of India see DIPLOMATIC.

## AFRICA.

The present condition of affairs and the latest details that have come to hand about the various parts of this vast continent will be found dealt with under their proper alphabetical headings throughout the book. Africa is being gradually shared out between various European Powers, chief of whom are England, Germany, France, Italy, Belgium, and Portugal, and the following list will show what colonies and protectorates have been acquired by each power:

### BRITISH.

BASUTOLAND.  
BECHUANALAND PROTECTORATE.  
BRITISH CENTRAL AFRICA PROTECTORATE.  
CAPE COLONY.  
EAST AFRICA PROTECTORATE.  
GAMBIA.  
GOLD COAST.  
LAGOS.  
NATAL.  
NIGER COAST PROTECTORATE.  
NIGERIA.  
RHODESIA.  
SIERRA LEONE.  
SOMALI COAST PROTECTORATE.  
UGANDA.  
WALFISCH BAY.  
ZANZIBAR PROTECTORATE.

### UNDER BRITISH INFLUENCE.

EGYPT.  
THE EGYPTIAN SOUDAN.  
TRANSVAAL.

### FRENCH.

ALGERIA.  
DAHOMY.  
FRENCH CONGO.  
" GUINEA.  
" SOMALILAND.

FRENCH SOUDAN.  
SENEGAL.  
TUNIS.

#### GERMAN.

CAMEROONS.  
GERMAN EAST AFRICA.  
GERMAN SOUTH-WEST AFRICA.  
TOGOLAND.

#### ITALIAN.

ERYTHREA.  
SOMALILAND.

#### PORTUGUESE.

ANGOLA.  
PORTUGUESE EAST AFRICA.  
GUINEA.

#### INDEPENDENT.

ABYSSINIA.  
CENTRAL STATES (*see* SOUDAN).  
CONGO FREE STATE.  
LIBERIA.  
MOROCCO.  
ORANGE FREE STATE.

The area owned by Great Britain in Africa amounts roughly to 2,500,000 square miles; by France, 3,500,000; by Germany, 900,000; by the Congo Free State, 900,000; by Portugal, 800,000; by Italy, 200,000; and by Spain, 250,000. Egypt and Tripoli occupy about 8,000 sq. miles. The chief centres of interest at the present time are the Upper Nile Valley, where the Egyptian and British forces are firmly established, having vanquished the Khalifa, taken Omdurman and Khartoum, and set up posts at Fashoda and Sobat; and West Africa, where the French and British spheres were delimited in '98. Maps illustrating the situation are given under EGYPT and NIGERIA. It has been estimated that the value of the total commerce of Africa amounts to about £100,000,000 per annum. Under the headings of BRITISH EMPIRE (table), and COLONIES, ETC., OF EUROPEAN POWERS, the latest statistics relating to these countries, colonies, etc., will be found. See SESSION, sect. 6.

### AGRICULTURAL RATES ACT, '96.

This Act was passed in accordance with the recommendation of the Royal Commission on Agriculture with a view of relieving agricultural land of a portion of its burden of rates. It provided that for a period of five years from March 31st, '97, the occupier of agricultural land should be liable to pay one-half only of the rate in the £ payable in respect of buildings and other property. Thus, if a rate of 1s. in the £ is levied in a district, agricultural land pays only 6d. while houses and other property pay 1s. in the £. This exemption applies in the case of all rates made—that is, allowed by the Justices—during the five years, except (1) those rates in which agricultural land previously paid only one-half (or less) of the rate in the £ payable in respect of buildings and other property; and (2) those rates which are raised for works for the benefit of the land, such as works for land drainage or for an embankment for keeping out the sea. In effect, the reduced rating of agricultural land extends to nearly all the more important rates, such as the poor rate, county rate, highway rate, borough rate, and school-board rate. The chief exceptions are the general district rate in urban districts; the special expenses rate in rural

districts; and the lighting and watching rate. In these cases land was already assessed at either  $\frac{1}{4}$  or  $\frac{1}{3}$  of the rate on other property, and is obviously not entitled to any further benefit. Agricultural land is defined for the purposes of the Act as being "any land used as arable, meadow, or pasture ground only, cottage gardens exceeding one-quarter of an acre, market gardens, nursery grounds, orchards, or allotments, but does not include land occupied together with a house as a park, gardens other than as aforesaid, pleasure-grounds, any land kept or preserved mainly or exclusively for purposes of sport or recreation, or land used as a racecourse."

The deficiency thus occasioned, owing to the reduced contributions by agricultural land, is made up by grants from Imperial funds, so as to prevent increased rates being levied on other property. By the Act, and by the Regulations which were issued in '96 by the Local Government Board, the procedure was prescribed for arriving at the amount of the grants. By means of returns from the "spending authorities" (county councils, councils of county boroughs, councils of boroughs and other urban districts and of rural districts, boards of guardians, the receiver of the Metropolitan police district, school boards, highway boards and surveyors of highways), and from the overseers of the poor, and the assessment committees, the Local Government Board ascertained the amount which during the year previous to the passing of the Act (*i.e.* the year ended March '96) agricultural land contributed to the expenditure of each spending authority. Half of that amount represented the supposed deficiency to the spending authority in consequence of the exemption of agricultural land from payment of half the rates, and the amount of this deficiency was certified by the Local Government Board as the amount of the annual grant to the authority. The deficiency was calculated in respect of all the rates to which the Act applies (*see* above). The total of the grants certified to all the spending authorities constituted the amount of the annual grant from the Imperial funds, which is met out of the proceeds of the estate duty derived from personal property. The Local Government Board pay the grants to the spending authorities, and the payments are made half-yearly. The first payments were made to meet the deficiency arising during the six months ending Sept. 30th, '97.

Several authorities were intentionally omitted from the list of "spending authorities" given in the Act, and therefore receive no grant. Among these are parish councils and parish meetings, burial boards, and certain joint committees. The rates out of which these authorities pay their expenses will nevertheless be contributed to by agricultural land on the basis of one-half of its value, so that as there is no grant to make up the deficiency, houses and other property than land will be more heavily rated in consequence. The vestries and district boards in London receive no grant; but this hardship is not great, as there is but little agricultural land in the Metropolis.

The total of the annual grants in the case of all the spending authorities was certified by the Local Government Board, in March '98, as amounting to £1,331,116. This represented the amount annually required from Imperial Funds to make up the deficiency occasioned by the

partial exemption from rating of agricultural land. Half of this amount was paid by the Local Government Board in grants to the spending authorities during the half-year ending Sept. '97. During the five years the Act continues in force the same grants will be paid half-yearly to the authorities, except only in cases where in consequence of an error in arriving at the original grant, or an alteration, in the area of an authority the Board vary the amount. This stereotyping of the grant seems open to objection, for as the expenditure of each spending authority varies each year (probably increasing), the grant ceases to represent the amount of rates from the payment of which agricultural land has been exempted; and wherever the rates of a district increase the effect will be to throw a proportionately heavier burden on houses, buildings, and other property than land, than would have been the case if the Act had not passed. In the case of surveyors of highways and school boards for a parish, the grants due to them are paid to the guardians of the union containing the parish, but in all other cases the grants are paid directly to the several authorities concerned. The exemption allowed by the Act to agricultural land applies alike to parish, union, borough, district and county. In London and many of the boroughs there is very little agricultural land; but wherever there is any, it receives the benefit of the Act, and grants are made to the "spending authorities." Of course it is in rural districts that the effect of the Act is felt principally. The rateable value of agricultural land in England and Wales is £24,565,058, and the relief afforded by the annual grants under the Act represents an average rate of 1s. 1d. in the £ on that value. See AGRICULTURE.

## AGRICULTURE.

- I. DRAINAGE AND MANURES.
- II. ENCLOSURES.
- III. AGRICULTURAL DEPRESSION.
- IV. AGRICULTURAL STATISTICS.
- V. IMPROVEMENTS EFFECTED BY STATUTE LAW.
- VI. VETERINARY SANITATION.
- VII. AGRICULTURAL LABOURERS.
- VIII. HOLDINGS AND ALLOTMENTS.
- IX. AGRICULTURAL SOCIETIES.

Agriculture may be defined as the science of cultivating the ground in such a manner as to cause it to produce in plenty and perfection those vegetable products which are useful to human beings and to those animals that are reared and kept for food and labour. This science also includes the breeding and management of such animals. In all countries it is coeval with the first dawn of civilisation, and is the principal industry of the world.

### I. DRAINAGE AND MANURES.

The total expenditure on land improvement in Great Britain, that has been made a charge on the land, from the commencement of the Public Money Drainage Acts in '47, and under the subsequent Improvement Companies Acts

and others up to Dec. 31st, '97, amounts to £16,905,385 11s. 4d., distributed as follows:—

	£	s.	d.
Drainage . . . . .	8,987,560	4	10
Farm buildings . . . . .	4,876,944	14	10
Labourers' cottages . . . . .	1,095,859	2	3
Fencing and embanking . . . . .	443,488	17	5
Roads . . . . .	164,849	9	10
Clearing and reclamation . . . . .	146,442	16	11
Planting . . . . .	96,375	2	10
Other agricultural improvements . . . . .	279,107	13	4
Subscriptions to railways . . . . .	126,923	1	1
Mansion houses, etc. . . . .	687,834	8	0

Total . . . . . £16,905,385 11 4

Four millions of this was public money advanced by the Exchequer under the Public Money Drainage Acts for the draining of agricultural land, nearly all of which has now been repaid by those to whom it was advanced. The remainder has been found through the several Land Improvement Companies, under their special Acts, and by landowners themselves, under the Improvement of Land Act, '64, and the Limited Owners' Residences Acts.

## II. ENCLOSURES.

The General Enclosure Act of '45 was passed to facilitate the enclosure of commons and wastes, and commissioners were appointed under it for England and Wales, now called the Land Commission for England. These officials were to decide whether enclosures were expedient. Every kind of common was subject to be enclosed by the statute; but all lands in the New Forest and the Forest of Dean and village or town greens were excepted from such. It was further provided that no lands within fifteen miles of London and certain specified distances of other large towns could be enclosed. It also required allotments to be appropriated for recreation and others for the poor as field-gardens. Power was given for the appropriation of portions of the ground proposed to be enclosed for public purposes—as the formation of roads and footways, public drains, embankments, watercourses, public ponds, wells, or watering-places, or for enlarging or making burial-grounds, the supply of stone and gravel, or any other purpose of public convenience or usefulness, or for the general convenience of interested persons. The number of enclosures from 1700 up to 1886 amounts to about 8,372,662 acres. Notwithstanding the fact that a large quantity of land, approaching 1,000,000 acres, has been taken into cultivation since '45 in England and Wales, there is reason to believe that about as much agricultural land has been occupied from this period by the increase of cities, towns, roads, and railways.

## III. AGRICULTURAL DEPRESSION.

The long and critical report which was published by the Commissioners on Agricultural Depression, being their "Final Report" on the subject in '97, is an exceedingly important one. It cannot be overestimated, and is applicable to the present time as regards nearly all points. They express their entire concurrence in the

general opinion that the present depression in British agriculture is mainly owing to the fall in prices of agricultural produce. The following are the general conclusions arrived at: (a) That the changes in the price of grain during the past twenty years represent a fall of more than 40 per cent. in the three staple cereals, and of over 50 per cent. in the price of wheat. (b) That the price of beef in the same period has fallen from 24 to 40 per cent. according to quality, and that of mutton since '82-4 from 20 to 30 per cent. (c) There has been a fall in the price of wool of upwards of 50 per cent. during the last twenty years. (d) That in dairy produce, the changes in the prices of milk, butter and cheese as a whole, there has been a fall of nearly 30 per cent. (e) That the price of potatoes has fallen at least 20 to 30 per cent. (f) That notwithstanding the fluctuations in the prices of hops, they have in recent years tended to fall to an unprofitable level. The Commissioners add that "one of the gravest features of the depreciation which has been so manifest in the course of prices of agricultural produce during the period under review has been its persistency." There has been a general correspondence between the fall in prices and the intensity of foreign competition. During this time a very great increase has taken place in the imports of all forms of agricultural produce, a result which has caused in nearly every article imported a reduction of the price of such. The Commissioners have pointed out the remedies for some of the disadvantages to which British agriculture is subject, including the amendment of the Agricultural Holdings Act, '83, the tithe rent-charge system, improved railway rates, compensation to tenants of land for damage to their crops by game preserved by adjoining owners or occupiers, as well as by game preserved by their landlords or the shooting tenants; the prohibition of the sale of adulterated products, as well as the sale of imported goods as home produce. The colouring of margarine abroad, to make it appear as butter, has caused serious injury to British farmers. The Commissioners also recommend that more assistance should be given to the Board of Agriculture for the employment of correspondents both in this country and abroad, and that the Board should be entrusted with more ample powers of control and inspection over the whole system of technical agricultural education. In connection with the rent of agricultural land, the Commissioners state that "the main burden of agricultural depression, whatever may have been the case in its earlier years, now rests upon the owners and not upon the occupiers of the soil; a result which, sooner or later, economically speaking, was inevitable, unless the letting of land stands upon an entirely different footing from similar transactions in other branches of business." The acreage of land occupied by tenants in '96 was 27,913,765, and by owners 4,643,594. In '95 tenants occupied 27,937,470, and owners 4,640,043. As regards their recommendations generally, the Commissioners do not claim that, either singly or in the aggregate, they will be a complete remedy for agricultural depression; but they state that they are in the nature of palliatives, which, if carried out, it is hoped will do something to ease the position of occupiers of land, and enable them to conduct their business to more advantage. Parts I. to IV. of the Final Report referred to constitute the main report, which

is signed by 14 of the 16 Commissioners. Part V., which is the last one, contains a supplementary report, is devoted exclusively to the currency question, and is signed by 10 of the Commissioners whose signatures are appended to the main report. The remaining two Commissioners present separate reports. Among other declarations made in the supplementary report are the following: (a) Agricultural depression is not confined to England, but appeared to be more or less general in Europe and in the Australasian colonies, and to be particularly severe in the United States of America. It prevailed alike in countries with protective duties and those which had adopted the principles of free trade, and the heavy protective duties imposed in Germany and France had failed to give security to either of those countries against severe agricultural depression. (b) That for this widespread complaint, which is so unanimous and so prolonged, there must be, irrespective of foreign competition, some other and some general cause that was common to them all, and such a cause might probably be found in the great monetary changes which were made in certain countries in Europe and in the United States of America in '73 and '74. (c) That the only two countries which appeared to be free from agricultural depression as understood in the United Kingdom, and not to have been similarly affected by those changes, are India and the Argentine Republic; the one with a silver and the other with a paper currency. (d) That a *prima facie* case has been established for the contention that agriculture has suffered, and is suffering severely, from both of two results which have followed from these changes: firstly from the general fall in prices, which is expressed in the term "appreciation of gold," and secondly from the divergence in the value of metals, which gives an artificial advantage to producers in silver-using countries. (e) That the price of wheat in England is being, and has been for some years, in consequence artificially depressed. (f) That putting aside the recommendations before made, which do not touch the question of depression so far as it is due to a collapse in prices, there only remains the question how far relief is possible by the reversal of the monetary policy of '73. (g) That if such a change is to be accomplished, it must be by international arrangement. (h) That, while not suggesting the abandonment of the gold standard in this country, if a conference of the Powers were assembled, and their deliberations resulted in an international arrangement for the reopening of the foreign mints, and the restoration of silver either wholly or partially to the position it filled before '73, it would be of the greatest benefit to agriculture. (i) That to promote such a conference, the Government should co-operate with foreign Powers, and thereby give effect to the unanimous resolution of the House of Commons in February '95. The Commissioners are of opinion that if an international arrangement for the purpose mentioned in their report was arrived at, "the constant and progressive fall in prices . . . would be checked, and that if there should be any further movement in the course of prices, they would tend to rise rather than to fall."

Although the cereal and hay crops in '93 were remarkably good, and have therefore, together with the increased price of wheat during the

last cereal year, greatly benefited British farmers, the root crops, which are the mainstay of stock-feeders throughout the winter, were in a lamentable state, owing to the prolonged drought during August and September, and particularly in England, in certain districts of which they were lost entirely. In consequence also of the great heat and drought in the two months just mentioned, the production of butter and cheese in Great Britain considerably diminished, while the prices of imported butter increased.

#### IV. AGRICULTURAL STATISTICS.

The statistics which we will now notify, nearly all of which have been prepared by the Board of Agriculture, are very interesting and important. The total area of land and water, not including tidal water, in Great Britain, in '97, was 56,773,225 acres. The total acreage under crops, fallow, and grass, not including mountain and heath land, on June 4th, '97, amounted to 32,520,076, of which 7,457,061 were under corn crops; 3,189,508 under green crops; 4,853,808 under clover, sainfoin and grasses under rotation; 16,512,868 under permanent pasture. The acreage of flax was 1419; of hops, 50,863; of small fruit, 69,792; and of bare fallow or uncropped arable land, 384,757. The wheat grown covered 1,889,161 acres; barley, 2,035,792; oats, 3,036,056; rye, 76,486; beans, 228,912; and peas, 190,656. Of green crops, there were 504,914 acres of potatoes; 1,833,145 of turnips and swedes; 354,588 of mangold; 166,661 of cabbage, kohlrabi and rape; 199,424 of vetches; and 130,776 of other green crops. As to the acreage of some of the more important of these crops, later returns were published in the *Journal of the Board of Agriculture* for Sept. '98, as a Preliminary Statement for that year compiled from the returns collected upon June 4th last. From these statistics it appears that the acreage of wheat for '98 was 2,802,220; of barley, 1,903,652; of oats, 2,917,770; and potatoes, 524,591. According to the returns on June 4th, '97, the acreage of mountain and heath land used for grazing in Great Britain was 12,820,401, of which 9,457,120 was in Scotland. There were also 224,116 acres of orchards. As to woods and plantations (according to latest returns published in '95), these are estimated to cover 2,726,116 acres, of which 131,843 are returned as planted from '81 to '95. On June 4th, '97, the horses numbered 1,526,424, of which 458,174 were unbroken, and 1,068,250 were used solely for agriculture, including mares kept for breeding. There were also 65,500,497 cattle, 26,340,440 sheep, and 2,342,302 pigs. According to the Preliminary Statement for '98 referred to, the number of cattle on June 4th of that year was 6,622,364; of sheep, 26,743,194; and of pigs, 2,451,595. On that date the acreage of hay from clover and rotation grasses was 2,381,551, and from permanent pasture, 4,536,425. The acreage of hops was 49,735. The total acreage of permanent pasture, exclusive of mountain and heath land, was 12,915,929 in '73, 15,065,373 in '83, 16,465,069 in '94, 16,610,563 in '95, 16,726,476 in '96, and 16,512,868 in '97; while the total acreage of arable land was in the first five mentioned periods 18,186,691, 17,319,712, 16,164,786, 15,066,957, 15,835,883, and in '97 16,007,208.

The estimated total produce of the principal crops of Great Britain in '97 is as follows: In

bushels: wheat, 54,940,535; barley, 66,814,066; oats, 116,847,179; beans, 6,602,967; peas, 5,239,273. In tons: potatoes, 2,608,193; turnips, 25,651,773; mangold, 6,628,259. In cwt.s: hay from clover, sainfoin, and grasses under rotation, 66,387,421; hay from permanent pasture, 112,708,292; and hops, 411,086.

#### Acreage under Wheat, etc.

According to the figures mentioned in the *Times* on Sept. 26th, '98, the acres of wheat, barley, and oats in Great Britain for the ten years '89-'98 are as under:—

Wheat.	England.	Wales.	Scotland.	Great Britain.
	Acres.	Acres.	Acres.	Acres.
'89	2,321,504	68,464	59,386	2,449,351
'90	2,255,694	68,669	61,973	2,386,337
'91	2,192,393	61,590	53,294	2,307,277
'92	2,102,969	55,278	61,591	2,219,838
'93	1,797,869	54,562	44,093	1,897,524
'94	1,826,626	56,470	44,866	1,927,962
'95	1,339,866	44,036	33,641	1,417,483
'96	1,609,255	46,973	37,729	1,693,957
'97	1,785,562	53,810	49,789	1,889,161
'98	1,987,385	58,960	55,875	2,102,220
Barley.				
'89	1,776,011	122,051	223,468	2,121,530
'90	1,775,666	119,780	215,792	2,111,178
'91	1,772,432	117,101	223,265	2,112,798
'92	1,709,587	114,525	212,703	2,036,810
'93	1,701,602	111,851	211,644	2,025,097
'94	1,766,142	111,572	218,057	2,095,771
'95	1,837,850	111,886	216,543	2,166,279
'96	1,778,779	107,702	218,283	2,104,764
'97	1,698,323	104,371	233,096	2,035,790
'98	1,562,761	102,921	237,970	1,903,652
Oats.				
'89	1,623,667	249,022	1,015,715	2,888,704
'90	1,648,153	241,199	1,013,646	2,902,998
'91	1,672,835	234,055	992,239	2,899,129
'92	1,765,463	233,599	998,683	2,997,745
'93	1,914,373	240,865	1,016,518	3,171,756
'94	1,978,312	250,866	1,024,221	3,253,401
'95	2,045,477	242,107	1,008,388	3,296,063
'96	1,845,730	241,642	1,008,116	3,095,488
'97	1,829,072	238,510	968,474	3,036,056
'98	1,731,167	230,670	959,933	2,917,770

#### Prices of Wheat, etc.

The prices of British wheat, barley and oats for '73, '78, '83, '88, '93, '94, '95, '96 and '97 are as follows:—

Year.	Wheat.	Barley.	Oats.
	Per quarter.	Per quarter.	Per quarter.
	s. d.	s. d.	s. d.
'73	58 8	40 5	25 5
'78	46 5	40 2	24 4
'83	41 7	31 10	21 5
'88	31 10	27 10	16 9
'93	26 4	25 7	18 9
'94	22 10	24 6	17 1
'95	23 1	21 11	14 6
'96	26 2	22 11	14 9
'97	30 2	23 6	16 11

The 1st of September is the opening of a new cereal year. The average price per quarter of British corn for the cereal year '97-'98 was 56s. 2½d. for wheat, 26s. 11½d. for barley, and 18s. 3½d. for oats. The average price of such grain for the week ended Oct. 1st was 25s. 9d. for wheat, 27s. for barley, and 16s. 7d. for oats; and on Oct. 20th, 27s. 4d. for wheat, 28s. 8d. for barley, and 16s. 8d. for oats. It is stated in the *Agricultural Gazette* for Sept. 5th, '98, that the Hungarian Minister of Agriculture, in his annual estimate of the wheat crops of the world, makes its crop this season 2,640,860,000 bushels, as compared with 2,142,425,000 for '97. An estimate of such crop is given by the *Corn Trade News* of the 20th of that month, which is 2,606,400,000 bushels. For nearly all countries the estimates of the yield of wheat are much higher than those for the previous season, and Australasia is credited with producing in Dec. '98, or a little later, a record crop as regards quantity and quality, but which could not be approximately calculated in October.

### Prices of Cattle and Sheep.

The average prices of British cattle and sheep per stone of 8 lb., sinking the offal, at the Metropolitan cattle market, are mentioned in the next table:—

Year.	Cattle.		Sheep.	
	Per stone of 8 lb.		Per stone of 8 lb.	
	s. d.	s. d.	s. d.	s. d.
'73	5 1	to 6 4	5 8	to 6 11
'78	4 6	to 6 0	5 4	to 6 10
'83	4 3	to 6 1	5 6	to 7 3
'88	2 4	to 4 11	3 2	to 5 10
'93	2 10	to 4 9	3 8	to 5 5
'94	2 5	to 4 6	3 7	to 5 10
'95	2 8	to 4 6	3 11	to 5 11
'96	2 4	to 4 5	3 3	to 5 5
'97	2 5	to 4 6	3 8	to 5 8

During the second quarter of '98 the prices of such cattle and sheep ranged from 2s. 4d. to 4s. 2d., and from 2s. 1cd. to 5s. 2d. respectively.

### Numbers of Cattle, Sheep and Pigs.

Another table is published in the *Times* of Sept. 26th, '98, giving the numbers of cattle,

sheep and pigs in Great Britain for the ten years '89-'98, which are as follows:—

Cattle.	England.	Wales.	Scotland.	Great Britain.
	No.	No.	No.	No.
'89	4,352,657	666,101	1,120,797	6,139,555
'90	4,617,641	705,115	1,185,876	6,508,632
'91	4,870,215	759,369	1,223,297	6,852,821
'92	4,968,590	754,467	1,221,726	6,944,783
'93	4,744,019	738,668	1,218,020	6,700,676
'94	4,450,607	695,000	1,201,5 6	6,347,113
'95	4,472,565	703,824	1,177,947	6,354,336
'96	4,573,603	712,979	1,207,300	6,493,582
'97	4,567,834	709,120	1,223,543	6,500,497
'98	4,674,303	701,777	1,246,284	6,622,364
Sheep.				
'89	15,839,882	2,847,689	6,951,449	25,632,020
'90	15,841,288	3,069,711	7,301,461	27,272,451
'91	17,874,722	3,233,936	7,623,9 0	28,732,558
'92	17,093,756	3,197,501	7,543,447	28,734,704
'93	16,805,280	3,101,890	7,373,164	27,280,334
'94	15,509,995	3,078,641	7,272,864	25,861,500
'95	15,557,571	3,000,841	7,233,783	25,792,195
'96	16,031,095	3,207,811	7,466,419	26,705,329
'97	15,721,213	3,190,350	7,423,868	26,340,441
'98	15,886,538	3,268,700	7,587,948	26,743,194
Pigs.				
'89	2,118,385	240,741	151,677	2,510,803
'90	2,355,760	258,175	159,674	2,773,609
'91	2,461,180	270,082	157,506	2,888,773
'92	1,828,542	197,302	112,015	2,137,859
'93	1,793,455	200,676	119,398	2,113,531
'94	2,013,823	227,66	148,535	2,390,026
'95	2,471,020	261,091	153,320	2,884,431
'96	2,476,483	257,698	144,615	2,878,801
'97	1,990,534	216,441	135,321	2,342,302
'98	2,078,898	238,581	134,116	2,451,595

### Agricultural Produce Imported.

Some statistics as to the annual imports of the principal kinds of agricultural produce into the United Kingdom are given in the *Journal of the Board of Agriculture* for Sept. '98, and the value of such produce from figures taken from the "Accounts relating to Trade and Navigation of the United Kingdom," during the cereal year which has just closed, together with the imports of the corresponding period of '96 and '97. The following table relates to grain, flour and meal imported:—

Articles.	Sept. 1st, '96, to Aug. 31st, '97.		Sept. 1st, '97, to Aug. 31st, '98.	
	Quantities.	Value.	Quantities.	Value.
	cwts.	£	cwts.	£
Wheat . . . . .	65,017,490	22,475,628	66,387,590	28,168,148
Wheat meal and flour . . . .	20,023,305	9,537,371	19,969,580	11,405,364
Barley . . . . .	21,666,370	5,454,167	20,257,729	5,427,815
Oats . . . . .	18,382,610	4,575,620	15,364,190	4,263,264
Maize . . . . .	59,726,120	10,113,417	55,641,692	10,751,513

Particulars are not stated in these last-named accounts as to the imports into the United Kingdom during the last cereal year of beans, peas and maize meal.

The quantity of beans, peas and maize meal imported into the United Kingdom in '97,

according to "Accounts relating to Trade and Navigation" for Dec. '97, are 2,840,050 cwts. of beans, of the value of £762,275; and 2,820,135 cwts. of peas, of the value of £771,054. The quantity of maize meal imported in '97 was 1,029,301 cwts., of the value of £261,120; and

of oatmeal 732,495 cwts., of the value of £434,672. The quantity of rye imported in '96 was 982,700 cwts. of the value of £235,306; and the quantity of buckwheat 136,566 cwts., of the value of £36,300. Other imports are as follows:—

**DEAD MEAT IMPORTED.**

Articles.	Sept. 1st, '96, to Aug. 31st, '97.		Sept. 1st, '97, to Aug. 31st, '98.

## HOPS AND WOOL IMPORTED.

Articles.	Sept. 1st, '96, to Aug. 31st, '97.		Sept. 1st, '97, to Aug. 31st, '98.	
	Quantities.	Value.	Quantities.	Value.
Hops . . . . .	cwts. 160,887 lbs.	£ 508,334	cwts. 228,978 lbs.	£ 825,474
Wool . . . . .	743,098,296	24,914,888	691,910,328	23,438,876

The quantity and value of the hay imported is not mentioned in the returns from Sept. 1st, '97, to the end of Aug. '98; but in the returns for '97 the quantity then imported was 121,492 tons, as against 107,987 in the previous year. The value of the hay imported in '97 is not declared.

The number of live stock imported into Great Britain from Ireland in '97 included 38,422 horses, 716,012 cattle, 804,515 sheep, and 695,307 pigs.

## V. IMPROVEMENTS EFFECTED BY STATUTE LAW.

Much good has been done for the progress of farming by the Copyhold Acts. The number of enfranchisements which have taken place under them from '41, when the first statute was passed, to '97, inclusive, is 18,528. The gross sum received by landlords for compensation amounted to £2,430,852 6s. 5<sup>3</sup>/<sub>4</sub>d., and the rent-charges to £19,638 11s. 11<sup>1</sup>/<sub>2</sub>d. The powers given by the Settled Lands Acts, '82 to '90, to a tenant for life for selling settled land, and of making exchanges, partitions, and of granting leases, and of enfranchising copyholds of any settled manor, and of expending the money arising under these Acts for making improvements in agricultural land and premises settled, and of imposing an obligation on his successors to maintain them, have been productive of much good to landowners and farmers. By the Agricultural Holdings Acts of '82 a general right is given to tenants of farms in Great Britain to compensation for improvements made on their holdings at their own expense, and for securing to them the property in any fixtures or machinery they may put up on the premises. Any agreement between landlord and tenant depriving the latter of his right to such compensation is void. The Ground Game Act of '80, the Conveyancing Acts, '81 to '92, the Small Holdings Act of '92, the Destructive Insects Act, the Contagious Diseases (Animals) Acts, '78 to '93, the Wild Birds Protection Amendment Act, the Finance Act, the Merchandise Marks Prosecutions Act, the Locomotive Threshing Engines Act, and the Diseases of Animals Act of '94,

the Diseases of Animals Act, the Agricultural Rates Act (q.v.), the Locomotives on Highways Act (q.v.), and the Finance Act of '96. The Extraordinary Tithe Act and the Land Transfer Act of '97 have been and will be of beneficial interest to agriculturists. So also will be the great number of orders wholly or in part in operation on Jan. 1st, '98, under the Diseases of Animals Acts '94 and '96, incorporating the Contagious Diseases (Animals) Acts '78 to '93.

## VI. VETERINARY SANITATION.

The reports for '97 of the proceedings under the Diseases of Animals Acts by the Chief Veterinary Officer and the Assistant Secretary of the Animals Division of the Board of Agriculture are very important.

In '97 there was no outbreak of foot-and-mouth disease. Compared with '96 there was a decrease in outbreaks of anthrax, sheep-scab, swine fever, and rabies in dogs; but there was an increase in glanders (including farcy), and a slight increase in pleuro-pneumonia. Of the 433 outbreaks of anthrax, the animals attacked comprised 521 cattle, 39 sheep, 284 swine, and 38 horses. The sheep attacked by 2191 outbreaks of sheep-scab numbered 33,546. Swine fever outbreaks occurred 2155 times, which necessitated the slaughter of 40,432 pigs as diseased, or as having been exposed to infection.

Dogs which were affected with rabies, and which died therefrom, or were destroyed by being attacked with this malady, numbered 151, and those which were destroyed as having been exposed to infection were 305. There were 900 outbreaks of glanders (including farcy), which attacked 1629 horses.

The Principal Veterinary Officer, in his annual report for '97, states, on the subject of foot-and-mouth disease, that "it has been a fortunate circumstance for the stock-owners of this country that the United Kingdom is entirely disconnected from the mainland of Europe, and our trade in animals of all classes with the Continent has ceased, for otherwise we should probably have witnessed one of the most extensive outbreaks of foot-and-mouth disease ever recorded in Great Britain. For the last

six years foot-and-mouth disease has been constantly prevalent in Germany and Austro-Hungary. From Germany it has extended, by means of the traffic in animals, into Belgium, Switzerland, and France." As regards rabies, he states that "the returns for the year '97 show such a satisfactory diminution in the number of cases in Great Britain as to encourage the hope that rabies, which has existed in this country from time immemorial, will be entirely eradicated."

The only disease which occurred among foreign cattle, sheep, and pigs imported into Great Britain in '97 was sheep-scab, which affected 1905 of them, as against 7666 in '95. The Diseases of Animals Act of '95 in effect prohibits the importation of foreign animals for food into the United Kingdom, except for immediate slaughter at the place of landing. The statute also minimises the great risks to which cattle, sheep, and swine were formerly exposed from the maladies referred to.

## VII. AGRICULTURAL LABOURERS.

As regards agricultural labourers, their pay, housing and education were very bad and disgraceful until about thirty years ago. From 1800 to '34 their standard of living had sunk

to the lowest scale, and their wages had to be supplemented by parochial relief. Very great improvement has been made in their position during the last twenty years. The average weekly wages of these labourers in England is, about 12s. 11d. per week, and in Scotland about 18s. 9d. In the arable counties, and particularly those of the East of England, a considerable reduction of the number of men employed has occurred since '92, while those still engaged have in many cases suffered from irregularity of employment, which is mainly in consequence of not ploughing so much land as formerly. In '97 there was an upward movement in wages compared with '96. The number of labourers in districts at the current rate of wages in '97 was 87,385, compared with 99,329 in '96. A statement was made in the *Labour Gazette* for last June of the rates of weekly cash wages exclusive of piece work earnings, extra payment for hay, harvest, and all extra allowances in cash and kind paid to ordinary agricultural labourers in June '98 compared with June '97. The general effect of this statement was to show that agricultural wages had risen, especially in the eastern counties. The changes which had occurred in the Poor Law Unions reported upon are mentioned in the following table :—

Districts.	No. of Poor Law Unions reported on.	No. of Agricultural Labourers, in Unions in which there was the undermentioned rise in wages of agricultural labourers, compared with the summer of '97.					
		No rise.	1s. per week.	1s.6d. per week.	2s. per week.	2s.6d. per week.	Total.

During the last twenty years the number of British agricultural labourers have decreased by about 243,000, although the total population has increased by more than 7,000,000.

## VIII. HOLDINGS AND ALLOTMENTS.

The Board of Agriculture has not published any statistics on holdings and allotments for '97; nor do there appear to have been any adequate particulars otherwise published as to their acreage, number, etc. The following remarks, therefore, are limited to the land returned in '95 as under crop or grass, and do not include the surface occupied as grazings of mountain and heath land or the area of woodlands. As regards the classification of holdings, those above 1 acre and not more than 5 were 117,968; others above 5 and not exceeding 20 acres were 149,818. There were 85,663 holdings of more than 20 but not above 50 acres; 66,625 of more than 50, but not beyond 100 acres; 81,245 of above 100, but not exceeding 300 acres; 13,568 of 300, but not more than 500 acres; 4616 of more than 500, but not beyond 1000 acres; and 603 above 1000 acres. Nearly a third in number of all the holdings in Great Britain were areas wholly under grass; but in the small holdings up to 5 acres the proportion of

grass holdings rose to more than one-half. Concerning allotments of 1 acre and under, these numbered 579,133; those of less than 1 acre were 541,990, and of 1 acre 37,143. Allotments are still increasing, although less rapidly than of late. Major Craigie, in his Report to the Board of Agriculture, in the *Agricultural Returns* of '96, states, respecting these allotments, that "the wants of certain counties have apparently been fully met, while a tendency to the amalgamation of small plots, and some surrender of allotments, owing to the low prices of vegetable produce, is reported in others."

## IX. AGRICULTURAL SOCIETIES.

Several societies have been formed for educating all classes connected with agriculture and for the promotion of this science by means of shows, competitions, prizes, meetings for discussion, the publication of journals and transactions, the employment of chemists, botanists, entomologists, veterinary surgeons, the carrying out of experiments in agriculture, and for influencing the legislation in connection with farming. The *Royal Agricultural Society* (q.v.) of England formed in 1838, the Bath and West of England Society started in 1777, and the

Highland and Agricultural Society of Scotland organised in 1784, have done much for thus promoting agriculture. The Smithfield Club, formed in 1798, has also to be credited with excellent services for publicly notifying and encouraging the breed and proper fattening of farm live stock and exhibiting agricultural produce and implements. There are three main institutions in Great Britain where a full course of agricultural education, with a good knowledge of the allied sciences, can be obtained. These are the Royal Agricultural College at Cirencester, the College of Agriculture at Downton, and the University of Edinburgh. There are also important agricultural schools at Aspatria, near Carlisle, and at Alvercot Priory. Occasional lectures are given on agriculture at other educational establishments. The total amount distributed by the Board of Agriculture in grants for agricultural education and research in '97-8 came to £7200, which sum was in addition to other expenditure for the inspection of the educational and experimental work of the institutions assisted, and in visiting and reporting on the educational work of county councils requesting such aid from this Board. As in previous years, the larger portion of the amount mentioned was expended in subventions to collegiate centres in England and Wales; and as regards two of such centres, Durham College of Science and the University College of North Wales, further grants were awarded towards maintaining the college farms.

The Board of Agriculture for Great Britain, established in '89, is one of inestimable utility. One of the most appreciable duties it performs is the collection and preparation of statistics relating to agriculture and forestry, and the inspection of and reporting on technical instruction on these subjects. It consists of the Lord President of the Council, Her Majesty's Principal Secretaries of State, the First Commissioner of the Treasury, the Chancellor of the Exchequer, the Chancellor of the Duchy of Lancaster, and the Secretary for Scotland, with other persons whom Her Majesty may from time to time think fit to appoint during her pleasure. The President of the Board receives a salary of £2000 per annum. The powers and duties of the Privy Council under the Contagious Diseases (Animals) Acts; of the Land Commissioners for England under the Tithe Acts, the Copyhold Acts, the Inclosure Acts, the Metropolitan Commons Acts, the Drainage and Improvement of Lands Acts, or under any other Act; and the Commissioners of Works under the Survey Act '70, have been transferred to the Board. The Board are also charged with the collection and preparation of statistics relating to agriculture and forestry. The Board also make orders relative to the muzzling of dogs and the keeping of them under control. The expression "agriculture" is defined to include "horticulture." Further powers in respect to pleuro-pneumonia were conferred on the Board by an Act of '90. By statutes passed in the session of '93 powers respecting the disease of swine fever were conferred upon the Board; and they have appointed a chief agricultural analyst, and made regulations regarding the analysis of fertilisers and feeding stuffs by district analysts. The President is Rt. Hon. Walter Hume Long, M.P. Offices, 4, Whitehall Place, and 3, St. James's Square, S.W. In Sept. '94 the Board commenced the issue of a quarterly journal for recording

certain statistical and other information which could not conveniently be inserted in the annual publications of the Department.

The National Agricultural Union was formed in '93, in pursuance of a resolution of the National Agricultural Conference in Dec. '92. It is, so far as party is concerned, entirely non-political, and on the question of free trade against protection it still holds a neutral position. Its first programme, which dealt with local taxation, railway rates, old age pensions, adulteration of food, agricultural holdings, etc., was accepted by about 230 members of the present House of Commons. The Union claims, among other achievements, that it was owing to its efforts that the Rating Act, '96, and the reduction of inland parcels post rates were obtained. The British Produce Supply Association was formed under its auspices, and a new and larger Parliamentary programme has been adopted. This includes the following twelve items: (1) To amend and strengthen the law of adulteration, and to prevent the sale of foreign produce as home-grown; (2) Old age pensions for working men; (3) The placing on the whole national income all such charges as correspond to national duties and requirements; (4) Improved parcels post; (5) Appointment of a Select Committee to inquire into the effect on prices of gambling in fictitious produce; (6) Improved Agricultural Holdings Act; (7) Abolition of preferential railway rates on foreign produce; (8) A Tithe Redemption Act; (9) Reform of the beer duties; (10) An International agreement for a stable monetary par of exchange between gold and silver; (11) Facilities for the purchase of holdings by existing tenants; (12) Facilities for the purchase of small holdings. Upwards of 500 local branches and 50 rural councils have been formed over 31 of the agricultural counties. The President, who died Sept. 7th, '98, and who founded the Union, was the Earl of Winchelsea and Nottingham, and the Secretary is Mr. A. T. Matthews. Offices, 30, Fleet Street, E.C.

Alaska, a territory in the extreme N.W. of North America, purchased from Russia by the United States in 1868. The area is 537,000 sq. m., and the population in '90 was given as 32,052. The chief town is Juneau, pop. 3000, a point of departure for the Yukon gold region, so named from the river Yukon, which rises in British territory, and has a course of over 2000 miles to its mouth in Behring Sea. There is a difference of opinion between the American and British Governments as to the exact boundary line between Alaska and British territory, so far as the strip of territory running down the coast from Mount St. Elias to the south end of the Prince of Wales Island is concerned. The boundary was agreed to before the purchase of the territory by the United States in the Russo-British treaty of 1825, and the main question is whether the word "ocean" in the treaty is to include the waters inside the islands, as the Americans contend, or to be limited to the high seas outside them, as the Canadians contend. The importance of this is obvious from the fact that the boundary line is to run at a distance of "ten marine leagues from the ocean." The gold discoveries and the value of navigable inlets giving access to the gold-fields have obviously made this question one of the greatest importance, and it was included amongst those referred to the Anglo-American

Commission in '98. For details as to the gold districts see NORTH-WEST TERRITORIES.

**Albani, Madame**, the vocalist, whose name prior to her marriage with Mr. Ernest Gye was Emma la Jeunesse, was b. in Montreal. No *prima donna* has a more extensive *répertoire*, and her fame is as great on the oratorio platform as on the lyric stage. She studied under Duprez in Paris, and under Lamperti in Milan. She made a successful *début* at Messina in 1870, and subsequently sang in other Italian theatres, coming to the Covent Garden Opera House in '72. Wagner's "Lohengrin" and "Tannhäuser" owe much of the favour they have received in this country to her intellectual and refined impersonation of the heroines. She has sung in Paris, Berlin, Vienna, and other Continental cities, and throughout the United States, and is indispensable at the triennial Handel Festivals. Address: 16, The Boltons, South Kensington, S.W.

**Albania** is a part of the Turkish Empire in Europe, extending along the sea coast between Montenegro in the north and Greece in the south. It includes the four vilayets of Scutari, Janina, Kossova, and Monastir, and the bulk of the population are Mahomedans. There are about 1,500,000 Albanians, divided into the Ghegs who live in the north of Albania, and the Tosks who dwell in the south. Greece and Montenegro are both keenly interested in the future of Albania. See TURKEY.

**Albany, H.R.H. the Duchess of**, daughter of the Prince and Princess of Waldeck-Pyrmont, and sister of the Queen-Regent of the Netherlands, was b. Feb. 17th, 1861. She married H.R.H. Prince Leopold of England, Duke of Albany, April 27th, '82, and became a widow by his sudden death ('84). In '88 the Princess lost her mother. H.R.H. receives a pension of £6000 a year from the British Government.

**Alberta.** A district of the North-West Territories (*q.v.*), and a future province of the Dominion of Canada.

**Albert Medal**, The, was instituted in 1866 and extended in '67 and '77, for the purpose of rewarding acts of heroism performed by civilians at sea or on land. The recipients of the decoration belong to one of two classes. The first class are awarded a decoration consisting of a gold oval-shaped badge bearing the words on a garter "For Gallantry in Saving Life at Sea," or "on Land," as the case may be. Members of the second class, whose acts of bravery, though meritorious, have not been so striking, receive a bronze badge with the same inscription.

**Alexander I., King of Serbia**, was b. 1876, and ascended the throne on the abdication of his father, King Milan (*q.v.*), on March 6th, '89. Privately educated at Belgrade, according to the programme of the German gymnasium or high school. When Crown Prince he accompanied his mother, Queen Natalie, into exile after her separation from the King, but was forcibly removed from her at Berlin, and conveyed back to Belgrade. He was under the guardianship of M. Ristitch and M. Belimarkovitch as Regents until April '93. The country having then for some time been in a state of dissension, the young Prince suddenly assumed the reins of power. In '94 he called his father to Belgrade to aid him in the government of

the country, and has since governed under the old constitution of '69.

**Alexandra, Princess of Wales.** See WALES, PRINCE OF.

**Algeria.** One of the Barbary States of North Africa, now a French province, administered by a Governor-General assisted by a consultative Council. Area, 184,474 sq. m.; pop. ('96), 4,429,421. Inhabitants include, besides the natives, French and European settlers, about 765,000, and about 50,000 Jews. The country is divided into the three departments of Oran, Constantine, and Algiers, capital cities of same names, each sending one senator and two deputies to the National Assembly, and subdivided into twelve *arrondissements*; also the Saharan borders, administered by military authorities. There are 2156 miles of railway. The products of the country include esparto and halfa grass, barley, wine, oil, tobacco, wool, iron and zinc ores, etc. Workable beds of phosphates have lately been discovered in the region between Oran and Tunis. The French forces maintained in Algeria consist of an army corps numbering 54,000 men. The cost of the colony to France has always been far greater than its revenues. Revenue, '98, £2,081,500; expenditure, £2,846,000. Exports, '96, £9,900,000; imports, £11,000,000. For Governor-General, etc., see DIPLOMATIC.—History, '98, The new Governor-General, M. Laferrière, issued a proclamation on arriving in the colony (Aug. 31st). He said that the Government intended to develop Liberal institutions. The colonists, the French taxpayers, and the native Mahomedans would have a special representation under the name of the Algerian Financial Delegations, and no question of taxation would be settled without their being consulted. A certain number of the members of the Delegations would be given places in the Upper Council of the Government along with the elected members representing the general councils of the three departments.

**Aliens Bill.** See SESSION, sect. 33.

**Allen, Grant**, the author of "Physiological Aesthetics," "Colin Clout's Calendar," "Vignettes from Nature," "The Evolutionist at Large," "Charles Darwin," "Babylon," "For Maimie's Sake," and many articles in the leading magazines, was b. at Kingston, Canada, 1848, and ed. at Merton College, Oxford. He is considered one of the best scientific authors of the evolutionary school. He has ably contributed to the exposition of the Darwinian theory. His later works include "What's Bred in the Bone," "The Devil's Die," "This Mortal Coil," "Dr. Palliser's Patient," "Force and Energy," "Dumaresq's Daughter," "Blood Royal," "The Attis of Catullus," "Science in Arcady," "Post-Prandial Philosophy," "At Market Value," "The Woman Who Did," "Under Sealed Orders," "The British Barbarians" ('95), "The Evolution of the Idea of God" ('97), and a series of Art Guides, including "Paris," "Florence," and "The Cities of Belgium." Address: The Croft, Hindhead, Haslemere.

**Allotments and Small Holdings Association.** This Association was founded in '85 to assist rural labourers to obtain small allotments of land and to maintain their rights to the charities bequeathed for their benefit in past years. Where parish councils have been established under the Local Government Act

of '94 a fair area of allotments has generally been provided. However, nearly half the parishes of the country are either included in urban districts, or are too small in population to be entitled to elect parish councils. In these and in urban districts the aid of the Association is found to be as much required as ever to enable the labourers to obtain the much valued plots of land. The President is Sir Walter Foster, M.P., and the Secretary Mr. C. D. Sturge. The Offices are at 35, Moor Street, Birmingham.

**Alma-Tadema, Lawrence, R.A.**, was b. at Dronryp, in the Netherlands, 1836. Originally intended for one of the learned professions, he devoted himself very largely to the study of antiquity; and in '52 entered the Antwerp Academy as a student. Subsequently he assisted Baron Henry Leys in painting several of his large pictures, and finally came to London, where, in '73, he obtained letters of denisation, having resolved to reside permanently in this country. Since then he has delighted the art-world with his productions, in regard to the majority of which he has put to excellent use his early classical training. Honours of all kinds, and by various countries, have been showered upon Mr. Alma-Tadema. He was elected R.A. '79, and *membre associate* in the painting section of the Institute of France '91; Lit. D. Dublin University '92; D.C.L. Durham '93. Mr. Alma-Tadema married in '71 Miss Laura Epps, herself an accomplished artist. Address: 17, Grove End Road, St. John's Wood, London.

**Ambulance Association, St. John.** Established in 1877, by the Duke of Manchester, and the Chapter of the Order of St. John of Jerusalem, for the purpose of disseminating general information as to the preliminary treatment of the sick and injured among all classes of society. A course of instruction is given to students. Those who pass the examination receive a certificate of proficiency. Pupils who have passed the first examination are allowed to attend a second course on home nursing and hygiene. Considerably over 400,000 certificates have been awarded to persons of both sexes. An Invalid Transport Corps has also been formed. On public occasions—as on the day of the wedding of T.R.H. the Duke and Duchess of York, when over 1500 cases were treated in London alone—ambulance stations are formed by the men and nurses belonging to the various corps of the “St. John Ambulance Brigade,” and “first aid” is rendered both in cases of injuries from accidents and of sudden illness. The work has been extended to the East and West Indies, Canada, China, Australia, New Zealand, and different parts of Europe and Africa. President, H.R.H. Prince of Wales, K.G. Chairman, Viscount Knutsford, G.C.M.G. Chief Secretary, Col. Sir Herbert C. Perrott, Bart. Head Offices, St. John's Gate, Clerkenwell, London, E.C.

**America.** See UNITED STATES.

**American Political Parties.** See UNITED STATES, POLITICAL PARTIES OF.

**Anarchy.** This strange revolutionary movement, the participants in which are dignified by the name of Anarchists, appears to have sprung from the rivalry between Marx and Bakounine over twenty years ago; but Bakounine himself was a disciple of Proudhon, who much earlier declared the ideal of government to be Anarchy. Anarchy, of course, literally

signifies a State without rulers. There exist, however, other and somewhat less vague definitions. A conference of Anarchists at Berne in Oct. '76 stated that Anarchist doctrine included a negative and a positive conception. The negative idea was that a clean sweep should be made of the fabric of existing society, that an end should be put to authority of every kind, to international distinctions, and to every form of property and privilege. On the positive side Anarchy declares that “everything is everybody's”; the entire wealth of the community exists for each individual to take from it what he requires, and affirms the right of every individual to do as he chooses. Coming to its more recent manifestations, Anarchy especially means, apparently, hatred of the propertied classes, and of all the *bourgeois* members of society, as the anarchists contemptuously call them. According to one of the milder sort of its professors, it is “a state of society in which men may live together in harmony without laws.” An Anarchist manifesto states that “when men have learned to do without rulers and governments, that is to say, without masters and oppressors, . . . the principles of equality, liberty, and justice will no longer be vain formulas, but by Anarchy, without God or master, all may freely produce according to their strength, while amply consuming according to their wants.” The number and frequency of the outrages that occurred at the end of '93 and in the beginning of '94 led the various Continental governments to adopt severe repressive measures. Concerted international action was much discussed, and there was evinced in certain Continental journals some disposition to blame Great Britain for not taking more vigorous action. The truth of the matter is that the Explosives Act of '83 gives ample power in Great Britain, including the authority to search, for the repression of all criminal attempts at making explosives, and for the punishment of the possession of explosives under suspicious circumstances. Several explosions of bombs took place in Spain in '96, and the Premier, Señor Canovas del Castillo, was murdered in August '97 by an Italian, who professed to have committed the crime to revenge the execution of Anarchists at Barcelona. The Empress of Austria was assassinated at Geneva (Sept. 10th, '98) by an Italian Anarchist named Luccheni, and in consequence of the horror and indignation excited by this act the Italian Government sent out to all the Powers formal invitations to an International Congress to discuss means for the repression of Anarchism (Sept. 29th). The invitation was accepted by most of the Powers, Great Britain making several reservations in accepting. The main points suggested for discussion were that the extradition treaties should be modified to permit of Anarchist criminals being handed over to the country of their origin, and that means should be adopted to prevent Anarchist propaganda by the Press. An Anarchist plot was discovered in Alexandria (October), apparently aimed at the Emperor of Germany during his proposed visit to Egypt, which visit was, however, abandoned.

**Ancient Order of Foresters.** See FORESTERS

**Anegada.** A British West Indian island. Area, 14 sq. m. Belongs to the presidency of the Virgin Islands, under the federal government of the Leeward Islands (*g.v.*).

**Anglican Church, The.** By the Anglican Church is meant collectively that group of autonomous churches which are in communion with or have sprung from the mother Church of England. They are the following: The Church of Ireland, the Episcopal Church of Scotland, the Protestant Episcopal Church of the United States of America, the Church of Canada, the Church of Australia, the Indian Church, and the Church of South Africa, which are all autonomous bodies under the jurisdiction of their own metropolitans, and not amenable to the Ecclesiastical Courts of the Church of England, though they all look to the Archbishop of Canterbury as Patriarch. In addition to these autonomous Churches in connection with the Anglican Communion there are twelve missionary bishops, representing the English Church in various remote regions of Asia, Africa, and America; and three or four representing the Protestant Episcopal Church of America. The Reformed Episcopal Church of America and the Free Church of England are not recognised as authentic branches of the Anglican Church. The American Church possesses 82 bishops in 58 dioceses and 27 missionary jurisdictions, and 4776 other clergy. It has 644,083 communicants, and upwards of 1,650,000 baptised members. The annual offerings for Church purposes in '97 amounted to \$12,666,813. (For the English Episcopate see CHURCH OF ENGLAND.) There are 7 bishops in the Scotch Episcopal Church, the Bishop of Brechin (Rev. Dr. Jernyn) being Primus. The Church of Ireland (*q.v.*) has 2 Archbishops and 11 bishops. India and the various Colonies of the British Empire own 67 bishops of the Anglican Church, while 2 are appointed for Europe. In all essential respects the doctrine and discipline of the Churches in connection with the Anglican Communion is the same, differentiations being rather in detail of development than in form or character (see CHURCH OF ENGLAND). One important difference is the restoration of Diocesan Synods and the general Synodical action which marks the un-Established branches of the Church. The tendency of the American, South African, and Scotch Churches is towards High Churchmanship, and the same may be said in a less degree of the Indian Church; while Broad Evangelicalism is the rule in the colonies. The question of the validity of Anglican Orders, with the declarations thereon of the Pope and of the dignitaries of the Anglican Church, is referred to in the next article.

**Anglican Orders.** The question of the Apostolicity of Anglican Orders, upon which the validity of certain priestly ministrations depends, has been taken up by the Roman authorities and by private individuals. The Pope referred the question to the *Curia* with instructions to inquire into the whole subject; and on Sept. 21st, '96, a Letter was published in which the reasons for reopening the question were stated, the previous decisions by Popes Julius III. and Paul IV. and the Decree of Clement XI. in 1704 were referred to, and the statement was made that the controversy had been already definitely settled. The English Ordinal was pronounced invalid both by its defect in form and its defect in intention, and the Bull proceeded to pronounce and declare that Anglican Orders have been and are absolutely null and utterly void. The Letter concluded with an appeal to the English nation to return to the one only Fold. In Feb. '97 the

Archbishops of Canterbury and York, in reply, addressed a Letter "On English Ordinations" to the whole body of Bishops of the Catholic Church. The Letter, written in both Latin and English, corrected the errors in the Papal Bull, put forward the historical facts, and explained the position of the Church of England. The controversy about the matter and form of Orders and of Anglican Ordinations was not new, but the opinions of the Popes on these things had always been uncertain. The whole judgment of the Pope hinged on two points—the practice of the Court of Rome and the form of the Anglican rite. As regards the former, in the sixteenth century the Pope was as uncertain as the Anglican Church, and if the essentials of the ordinations had not (and it would appear from the present Roman point of view that they had not) been carried out, then the presbyters ordained between March 1550 and November 1552 should have been reordained, which was not thought necessary by Cardinal Pole. The Pope's statement that every trace of the former powers of the priesthood was deliberately removed and struck out of the reformed Ordinal was shown to be untrue from the Preface to the Ordinal and the Eucharistical prayers. The Anglican Ordinal was superior to the Roman in many ways, and was shown to express more faithfully those things which by Christ's institution belong to the nature of the priesthood, by a comparison of the Pontifical with the Ordinal. The Pope's decree overthrew with the Anglican the Orders of the Orientals, as well as those of his own Communion. At the close of '97 the "Cardinal Archbishop and Bishops of the Province of Westminster" published a Vindication of the Bull "Apostolicæ Curæ." It claimed for the Pope his lawful authority to decide the controversy. The previous inquiries were referred to, and the re-ordination question at the time of Mary's accession was quoted, by which it was sought to prove that the Marian prelates did not consider the re-ordinations voluntary, but in all cases necessary. The Letter then proceeded to give the "intrinsic reasons" which impelled Leo XIII. to reject the Orders, "the defects of form and of intention which he finds in them." "The Pope never dreamed of opening an inquiry into the truth of such Catholic doctrines as those of the Sacrifice and of the Priesthood," which admitted of no doubt or dispute. The doctrine of the Real Presence was then defined, as well as that of the Sacrifice of the Mass, and of the Priesthood, and of Transubstantiation. The remainder of the Letter was principally taken up with arguments to show that from the writings of the Anglican divines it was clear that the intention of those who revised the Ordinal, as well as the Bishops who consecrated others with the Edwardine Ordinal, differed from that of the pre-Reformation bishops. The drift of the whole Letter was to leave out of the question practically all matters of form which had been the objection previously raised to Anglican Orders, and to throw all the burden of the defect upon the intention of those who were the chief ministers of the Church at the time. The Archbishops of Canterbury and York sent a reply to this Letter, in which they said they were quite unable to admit the claims made regarding the power and authority of the Pope. The Letter could hardly justify the title given to it of a

Vindication of the Bull, for the Bull made no direct reference to the doctrine of Transubstantiation, whereas in the Cardinal's Letter the acceptance of that doctrine was practically constituted the one sure test of the validity of Holy Orders. If the Pope's Letter had followed that argument, the answer of the Archbishops would have taken a different form.

**Anglo-American Conference.** See CANADA.

**Anglo-American League, The,** was formed July 13th, '98, at a meeting held at Stafford House on that date, the Duke of Sutherland presiding. The object is to give practical effect to the terms of the following resolution passed at that meeting: "Considering that the peoples of the British Empire and of the United States of America are closely allied in blood, inherit the same literature and laws, hold the same principles of self-government, recognise the same ideals of freedom and humanity in the guidance of their national policy, and are drawn together by strong common interests in many parts of the world, this meeting is of opinion that every effort should be made in the interest of civilisation and peace to secure the most cordial and constant co-operation between the two nations." Membership is open to all British subjects and citizens of the United States on payment of a subscription of not less than 1s. and not more than £1 per annum. Donations for a larger sum than £1, however, will be gratefully accepted. A very strong and representative general committee has been formed. The **Executive Committee** consists of the following:—The Right Hon. James Bryce, M.P. (Chairman), The Duke of Sutherland (Hon. Treasurer), The Earl of Jersey, G.C.M.G., Earl Grey, The Earl of Crewe, Lord Coleridge, Q.C., Horace Plunkett, M.P., Sir Stafford Northcote, Bart., C.B., M.P., Sir William Houldsworth, Bart., M.P., Thomas Burt, Esq., M.P., John E. Ellis, Esq., M.P., Percy W. Bunting, Esq., H. W. Massingham, Esq., Alfred C. Harnsworth, Esq., George Wyndham, Esq., M.P., F. J. C. Morton, Esq., M.P., Sir David Dale, Bart., Sir Walter Besant, Sir W. Martin Conway, Thomas H. Ismay, Esq., D.L., Rev. C. A. Berry, D.D., Prof. J. Westlake, Q.C., Prof. A. V. Dicey, Q.C., W. T. Stead, Esq., T. Fisher Unwin, Esq., with power to add to their number. The **Hon. Secretaries** are Sir Frederick Pollock, Bart., T. Lee Roberts, Esq., R. C. Maxwell, Esq., LL.D. The temporary offices are at 6, King's Bench Walk, Temple, E.C.

**Angola.** Portuguese West Africa, or Lower Guinea. It is bounded on the north and east by the Congo State and Rhodesia, on the south by German South-West Africa, and on the west by the Atlantic Ocean. Stated area, 460,000 sq. m.; pop. 2,000,000. Capital, **St. Paul de Loanda**. Divided into the five districts of Congo, Loanda, Lunda, Benguela, and Mossamedes. There were 200 miles of railway in operation in '96. The chief products are coffee, rubber, sugar, oils, and ivory. A company working in Mossamedes has a concession for mining, cattle-rearing, and fish-curing.

**Anguilla.** A British West Indian island. Area, 35 sq. m.; pop. 3699. Belongs to the presidency of St. Christopher, in the federal government of the **Leeward Islands** (*q.v.*). Is low and flat, deficient in wood and water. Produces salt from a lake, phosphate of lime, cattle, ponies, and garden stock.

**Annam.** An empire in S.E. Asia, which became a French protectorate in '84. It formerly included **Tonquin**, French (or **Lower**) **Cochin-China**, and **Cambodia**. Area, 81,000 sq. m.; pop. 6,200,000. Capital, **Huê**, near the coast, garrisoned by French troops. Annam proper stretches northward along the coast from French Cochin-China to Tonquin, and, since the war with Siam in '93, has extended its western boundary to the river Mekong, which now separates it from Siam. **Principal productions:** rice, cotton, tobacco, sugar, tea, coffee, and cinnamon. Coal has been discovered in abundance. There is an Emperor named **Thanh-Taï**, with court and dignitaries, but the government is really in French hands. The various peoples belong to the Indo-Chinese race, a link between Chinese and Malays. Religion chiefly Buddhism. Polygamy prevails generally. In Oct. '88 the towns of Hanoi and Haiphong in the north of Annam, at the mouth of the Red river, and Tourane near Huê, with a considerable district round each, were converted into French concessions, within which the King surrendered all his rights. See **INDO-CHINA**.

**Antarctic Exploration.** See **ARCTIC AND ANTARCTIC EXPLORATION**.

**Anthropology, '98.** Steady progress is being made in the scientific study of Man, but no discovery of sufficient importance to arrest popular attention has marked the past year. An expedition to the islands of **Torres Strait**, conducted by Prof. A. C. Haddon, has been despatched by the University of Cambridge, and it is expected that much exact ethnological information will be brought home by the skilled observers of this expedition. The Rev. A. E. Hunt, who lived as a missionary for nearly three years on the island of **Mer**, in **Torres Strait**, has given a full description of the natives in a paper recently published by the Anthropological Institute. This Institute has also published an essay on the **Tannese** by the Rev. W. Grey, a missionary who based his observations on the manual of instructions issued by a committee of the British Association, and known as the "Anthropological Notes and Queries." Capt. Guy Burrows, who resided for a long time on the Congo, has described to the Anthropological Institute the natives of the **Upper Welle District**, in the heart of Africa, and has brought back a large collection of ethnological objects, now in the British Museum. Several of the tribes in the **Warri district** of the **Niger Coast Protectorate** have been described by Mr. Ling Roth, the well-known writer on ethnology, from information obtained by his brother, Dr. Felix Roth, and Mr. Reginald Granville, who was an official at Warri and afterwards at Benin. It is understood that a work on the antiquities of Benin is in preparation by the officers of the Ethnological Department of the British Museum.—The antiquity of man continues to receive attention from geological observers. Dr. Hicks, in a presidential address to the Geological Society, has discussed the evidence yielded by the bone-caverns of Wales, and concludes that man must have lived there—certainly in the Vale of Clwyd—in pre-glacial, or at least in very early glacial, times. Mr. Newton, in a presidential discourse to the Geologists' Association, summarises our knowledge of palæolithic man, and cites the Galley Hill skeleton as the oldest human relic yet

found in this country. The so-called "eoliths" flints of the chalk plateau of Kent continue to be the subject of much discussion. Mr. W. Cunnington has written a paper, in which he denies that any are older than the palæolithic period. General Pitt-Rivers has issued privately a very fine quarto work, being the fourth volume of a series, descriptive of his researches in Cranborne Chase, in Wilts and Dorset. The author describes his investigation of certain prehistoric relics, including some square camps, or enclosed entrenchments, referred to the bronze age, and a long barrow, which, on the evidence of the skulls dug up, is regarded as neolithic. The General has devised an ingenious craniometer, which enables the profile of a skull to be accurately delineated. The continued exploration of the Glastonbury lake-village, by a committee of the British Association, has yielded further results of much interest. A dozen more dwelling-mounds in the old marsh have been explored, and a great number of human relics obtained. According to Mr. A. J. Evans, the civilisation here represented was introduced into Britain by the Gaulish invaders about the second century B. C.—Prof. Flinders Petrie has called attention to the fact that many towns in North Italy retain, in their plan, traces of the square shape of the original terramare, or primitive settlements in the marshy tracts. Some time ago Prof. E. B. Tylor compared the stone implements which were used by the Tasmanians, now extinct, with certain types of rude stone implements of the palæolithic period, whence he concluded that the culture of the Tasmanians, up to the time of the arrival of Europeans, might represent a phase of palæolithic culture. He has since come to the belief that similar weapons were used in Australia prior to the introduction of the art of grinding stone axes, which seems to have been brought in from the Torres Strait region at a period not very remote. Rudely chipped implements are still used by the natives in parts of Western Australia.—Prof. Tylor has communicated several valuable papers on *totemism* to the Anthropological Institute. The Institute has issued its quarterly journal in a new and enlarged form, starting from November. The Anthropological Section of the British Association, at Bristol, was presided over by Mr. E. W. Brabrook, the former President of the Institute, who delivered an address dealing mainly with the unity of the anthropological sciences.—Anthropology is represented in this country by the Anthropological Institute of Great Britain and Ireland. President for '98-9, F. W. Rudler; Hon. Secretary, T. V. Holmes. Offices, 3, Hanover Square, W.

**Anticosti.** A large island in the Gulf of St. Lawrence under the Government of Canada. It is 125 miles long by 30 wide. Area, 2600 sq. m.; pop. 600. The coast is rocky, barren, and dangerous. The only organised settlements are lighthouses, fishing and refuge stations. The interior is a wilderness of mountain, forest, and swamp, abounding in game. Mineral wealth is reported.

**Antigua**—i.e., "ancient," so called by Columbus. A British West Indian island. Area, 170 sq. m.; pop. about 37,000. With Barbuda and Redonda forms a presidency of the Leeward Islands. Its capital, St. John, pop. nearly 10,000, is the seat of the federal government. English Harbour is a naval station, and one of the finest

harbours in the West Indies. The island, though suffering sometimes from drought, is very fertile. Produces sugar and pine-apples chiefly. Government is administered by the Governor of the Leeward Islands, assisted by a local council of twenty-four members (twelve elected). Four delegates are sent to the Federal Council. The Imperial Government having intimated that it could only grant financial aid on condition that the island should become a Crown colony, a Bill effecting this change in the constitution was carried through all its stages (March 23rd, '98).

**Antilles.** Name of the chain of islands surrounding the Caribbean Sea. They are divided into Greater and Lesser. See WEST INDIES.

**Arabia.** Is a large peninsula in S.W. Asia having an area of about 1,000,000 sq. miles, and a population of about 12,000,000. The provinces of Hedjaz and Yemen, contained in it, are under Turkish rule, while much of the remainder of the country is under British influence, exercised in the case of Oman through the Sultan of Muscat. Hedjaz contains 96,500 sq. m., and a pop. of 350,000. The Hedjaz camels are bred here, and about 20,000 are sent annually to Syria. Yemen has an area of 77,200 sq. m., and a pop. of 750,000. Mecca, besides being the goal of Mahomedan pilgrims, is the chief distributing centre for Central Arabia. The chief exports are sheep and goat skins, mother-of-pearl, and gum, but all in very small quantities.

**Arbitration.** See INTERNATIONAL ARBITRATION LEAGUE, PEACE SOCIETY.

### ARCHÆOLOGY, '98.

The progress of Archæology during the past year has been more in the direction of literary work than of actual excavation or discovery. Its most noteworthy triumphs have been won with the pen rather than the spade, and its work is distinguished above that of other years by the issue of one very great and several other important publications. Frazer's edition of "The Description of Greece," by Pausanias, is the greatest event of the year. The book is monumental, and is one of the most important that has ever been produced. Other books that deserve mention are the 3 vols. of "Statutes of Lincoln Cathedral"; "The Poems of Bacchylides," by Dr. Kenyon (spoils of the papyrus find at Oxyrhynchus); "Historical Manuscripts from the Carlisle and Buccleuch Collections;" Searle's "Monasticon Anglo-Sax.," "Walloon Registers," Vol. V., by the Huguenot Society; Conybeare's "History of Cambridgeshire;" Dr. Budge's "Book of the Dead"; and Leslie on "Langard Fort," besides many volumes of records and transactions to be mentioned later on. Some considerable anxiety has been manifested by archæologists respecting certain of the great monuments of the world. The Parthenon has had to be strengthened, and it was feared at one time that the entire ruin was in jeopardy. The Cambio at Perugia is being restored, and anxious fears have attended the work. The dam at Assouan threatens to destroy with Nile water many of the paintings at Philæ, and some of the beautiful work will, it is feared, have to be sacrificed, after centuries of preservation, in order to give to the people a much needed boon. Nearer home, Strata Florida Abbey ruins have suffered great injury by want of oversight. Tintern Abbey and Raglan Castle are in the market, and may fall into Philistine hands. Haddon Hall has

needed repair and the addition of strengthening work; and Wrottesley Hall, with its invaluable muniments, has been destroyed by fire. The greatest discovery of the year has undoubtedly been in India, where the treasure of Buddha, marking the site of his birthplace 600 years B.C., has been discovered, and his remains are supposed to be contained in the tomb that has been found. The graffito of the Crucifixion, in the Palatine, is of much interest, and provokes curious discussion; and the find of some forty Roman pewter vessels near Andover is another event of importance. A hoard of gold coins has been discovered in Egypt; some unknown human remains, at one time supposed to be those of Edward VI., at Windsor; and some extraordinary ruins of a great city in Central Africa, and of a settlement in Mexico. At Silchester the work has steadily progressed, three large tubs in good condition, and a jar 2 ft. high being the chief treasures of the work. Mount Grace excavation has revealed more and more the structure of a mediæval Charterhouse; and the work at Furness Abbey has not been neglected nor lacking in interest. The Ashburnham Sale should not be overlooked, and its chief items were the five editions of the "Angler," the four Shakespeare folios, ten Caxtons, and many glorious books on vellum. The British Museum has secured, amongst other things, the Morris printing blocks, four Caxtons, ten books by Wynkyn de Worde, and a patera with fifteenth-century painting of a fine order. In local literary work there has been a rich harvest, both in fruit and promise. "Gloucester Parish Registers," in 13 vols.; "Winchester Registers" from Hampshire; "Records" from Bucks and Northampton; additional parts of the great "County History of Hereford"; an important manuscript as to Pepys in the Navy Records Society; the Surtees Society on Beverley; part of the Worcester County History, and good volumes from Surrey, Sussex, Kent, Wales, and Derby must not be forgotten. Good news it is that the Navy Records Society are to catalogue the Pepys MSS. at Magdalen, and that Mr. Gomme is working at his index of archæological papers, 1682-1890, and that two new societies—London Topographical, and Hampstead—are well at work with good promise.

Notable papers have been those on "Metal Enamel Bowls," at the Society of Antiquaries; "Preservation of Antiquities," by Lach Szymra, at the British Archæological Society; "Sir T. Malory," at the Society of Antiquaries; "The Early Age of Greece," at the Hellenic Society; Stephenson on "Brasses," at the Yorkshire Archæological Society; and Gardner on "Sussex Iron." There have been many delightful gatherings: the British Archæological Society at Peterborough, Stamford, and Burleigh; the Royal Archæological at Lancaster and Furness; the Durham at Levens and Stonyhurst; the Cambrian at Ludlow; and the Library Association at Southport and Haigh. *Archæologia* is better than ever; the articles on "The Stalls at Wells," and on "Gold Ornaments in Ireland," particularly valuable. Some charming frescoes by Luini have been sold in London and secured for South Kensington Museum. Two Old English oak rooms and their contents have also been set up in the same Museum, and an effort is being made to preserve monu-

ments and remains in the Isle of Man. The Congress of Archæological Societies met on July 6th, and its chief topic concerned the most important catalogues of effigies and of portraits that it is proposing and pressing forward. The issue of four special volumes by the Bibliographical Society, and some most important papers, must be carefully mentioned, also the discussion on Carfax Tower, and the gift by the King of Serbia to the Royal Historical Society of his great facsimile of the twelfth-century Gospel of Prince Miroslav. Very important is the acquisition by the Asiatic Museum in Russia of a first-century Sanscrit MS. on birch bark, obtained in Tartary, and not only quite genuine, but containing absolutely new information. The salvation of St. Bartholomew's Hospital, at Oxford, the issue of Willis Clark's work on Cambridge, the exhibition of Mediæval and Renaissance Art, especially of bronzes, at Berlin, and the calling in of the mediæval coin in Europe, the kreuzer, from circulation, conclude a brief *résumé* of the work of the year.

**Archbishops, English.** See CHURCH OF ENGLAND, and PEERAGE.

**Archives, Court of.** See ECCLESIASTICAL COURTS.

**Architects, Royal Institute of British.** See ROYAL INSTITUTE OF BRITISH ARCHITECTS.

**Architects, The Society of.** Founded in 1884 and incorporated by the Board of Trade in '93, it appears to be entitled to the credit of having taken the most active and the most efficient steps for the compulsory examination of all persons to be hereafter admitted as architects in Great Britain; and measures have been presented in Parliament for this object, and for the registration of existing architects and their federation. The Society has enrolled 541 members. Applicants for admission into the Society, with only two exceptions, are required in every case to pass either an examination held by the Society, or one or more public examinations held by other bodies, which may be taken in lieu of or partly in the place of the Society's examination. The exceptions referred to are—(a) candidates who are not less than thirty-five years of age, and have been directly engaged professionally in architectural pursuits as principals for at least seven years; and (b) candidates who are not less than the above age, and have been directly engaged professionally in architectural pursuits, as assistants or as assistants and principals, for at least ten years. With the exceptions just mentioned, all candidates who seek election into the Society of Architects will be required to satisfy the Council that they possess a competent knowledge of architecture, building construction and materials, and modern practice. A register of students between the ages of seventeen and twenty-three years has been opened. Such students are to be pupils or assistants in architects' offices, or be nominated by a member of the Society subject to the approval of the Council. Applications as to membership should be sent to the Secretary of the Society, at St. James's Hall, Piccadilly, W.

**Architectural Association, The** (London) is carried on under the authority of the Literary and Scientific Institutions Act of 1854. Its objects are to provide facilities for the study of architecture, and to be a medium of friendly

communication between the members and others interested in architectural progress. Instruction is given by lectures and classes, and a studio, each of which is under the management of a paid instructor or lecturer. This education extends over four years. In the first Division probationers, who are members of the Association, are prepared for the intermediate examination of the Royal Institute of British Architects; and in the second Division members of the Architectural Association are prepared for the final examination, qualifying for candidature as A.R.I.B.A. The Architectural Association numbers 1197 members, and has a good lending library. The monthly numbers of its Sketch Book, which are much appreciated, consist of illustrations from subjects of interest to architects in the various styles of the past, reproduced from measured drawings and sketches by members of the Association, of architectural students, and others. A journal, *Architectural Association Notes*, is also published monthly. The entrance fee is £2 2s., and annual subscription £1 1s. The Association is located at 56, Great Marlborough Street.

**Architecture.** See previous eds.

**Arctic and Antarctic Exploration.** The fascination which Polar research continues to exercise over those who have had any experience of it, as well as in stimulating others to like efforts, is evidenced by the several expeditions which have started northward and southward during the year. Foremost amongst these Arctic voyagers is Lieutenant Peary, who sailed in June last, in the *Windward*, of Jackson-Harmsworth fame, and in August reached Port Foulke, at the entrance of Smith Sound, whence he sailed again for Sherrard-Osborne Fiord. From thence he hopes to reach the north of Greenland, and then forward towards the Pole, over the ice, living in snow huts with the Eskimos who accompany him. Another Arctic hero, Captain Sverdrup, left Tromsø in the *Fram*, on June 24th, the fifth anniversary of the departure of the Nansen expedition, with the special object of laying down the contours of the north coasts, and following Lieutenant Peary's projected Polar route. A Danish expedition led by Lieutenant Amdrup reached Godhavn, in August, on its way up the west of Greenland to examine the coast between the 66th and 70th parallels; while another Danish explorer, Dr. K. J. V. Steenstrup, is investigating the glacial phenomena of Disko Island. A well-equipped American expedition, organised by Mr. Wellman, sailed in the *Fridtjof* in June from Tromsø for Franz Josef Land. Ice conditions proving unfavourable, the vessel was obliged to put back to Vardo. A fresh start was made with better success: Cape Tegetthoff was reached in the beginning of August, and a house erected with materials taken from Cape Flora. Mr. Wellman hoped to push north to Crown Prince Rudolf Land, there to go into winter quarters, and then to start in the spring towards the Pole. A very successful cruise was accomplished during the summer by Dr. A. G. Nathorst and a Swedish party in the *Antarctic*. The circumnavigation of Spitsbergen and the neighbouring islands was effected, probably for the first time. Careful surveys showed that various corrections are required in the cartography of Bear and other islands. Special zoological and hydrographical observations were made, and numerous photographs were taken. A German

expedition led by Herr Theodor Lerner, in the *Helgoland*, has also been conducting investigations in the same region, more particularly in the King Charles group, of which the position has been defined. Herr Lerner found the group to consist of three islands, to one of which, hitherto unrecognised, he gave the name of August Scherl, after the promoter of the expedition. Two small islands were also discovered to the south of the group. Lerner's and other search expeditions, including a Swedish one led by M. Stadling, failed to find any trace of *Andrée's* balloon expedition, and all hope of his safe return has been abandoned. Amongst projected expeditions may be mentioned one organised by the Duke of the Abruzzi, Franz Josef Land to be taken as the base for Polar advance; a plan for the examination of Sannikoff Land, proposed by Baron von Toll; Admiral Makaroff's scheme to reach the Pole by the use of powerful ice-breaking vessels; and an important Swedish geodetic expedition to Spitsbergen, with the object of measuring a degree of latitude in that region.—Antarctic exploration is still largely in the preliminary stages, no expedition on a properly effective scale having been organised. Disappointment was caused by the refusal of Government to subsidise the scheme outlined by the joint committee of the Royal Society and the Royal Geographical Society. The matter has, however, been taken in hand by the latter Society, and it is hoped that funds may be obtained, sufficient to furnish a thoroughly equipped expedition for this great work. Meantime, other expeditions are in the field or projected, the most important being that fitted out by Sir George Newnes, under the leadership of M. Borchgrevink, already known for his visit to Cape Adare, on the Antarctic Continent. The expedition sailed in the *Southern Cross* from London, in August. Of the Belgian expedition, led by Lieutenant de Gerlache, no tidings have been received, since its arrival last year at the Straits of Magellan, and serious doubts are entertained as to its safety.

### ARGENTINE REPUBLIC.

The Argentine Republic is a group of 14 provinces and 9 territories, with an extensive seaboard on the east coast of South America. The constitution closely resembles that of the United States. It vests the executive power in the hands of a President, who is also Commander-in-chief of the troops, elected for six years, not being re-eligible; and the legislative authority in that of a Senate of 30 members, 2 chosen by the capital and 2 by each province, and a House of Deputies of 86 members elected for four years by the people, one-half of the House retiring every two years. The provinces elect their own governors and legislatures, and have complete control over their internal affairs. The economic condition of the country, owing to the depreciated currency and the bloated officialism which prevails, has been and is very bad; but the law promulgated in January '95, authorising the Government to assume the external debts of the provinces, was a step in the right direction. The State religion is Roman Catholic, but all others are tolerated. Education is highly developed. There are 3778 elementary schools, with 330,961 pupils. The climate of the country is temperate and healthy. The

rich mineral resources are beginning to be developed. Farming and stock breeding are, however, the chief industries of the country, and they are extending rapidly. The chief exports are wool, cattle and sheep, hides, skins, and grain. The Army consists of over 120,000 men, with a national guard of nearly 500,000. As to the Navy see FOREIGN NAVIES. Length of railways, 9000 miles, connecting the capital with the principal cities of the Republic. Telegraphs, 25,500 miles, connecting all the Republic. Area, including Patagonia, 1,778,195 sq. miles; population, 4,200,000, the great majority of Spanish origin and of other European countries. Capital of the republic, Buenos Ayres, with 756,000 inhabitants. Capital of the province of Buenos Ayres, La Plata. The total revenue for '96 was £8,705,000, and the expenditure £12,000,000, including an extraordinary naval expenditure. The national debt in '97 was about £62,000,000, but to this must be added the provincial debts, for which the government has been authorised to assume the responsibility, amounting to about £27,500,000. Imports, '96, £22,400,000; exports, £23,200,000. See DIPLOMATIC for President and Ministry.—History, '98. The President's message at the opening of Congress (May 9th) showed that the interest on the external debt had been regularly and fully paid, and that the internal debt had been reduced from \$52,000,000 to \$39,000,000. In the '99 estimates revenue and expenditure balanced. General Roca was elected as the President, and Dr. Quirino Costa as Vice-President, of the Republic (June 12th). New internal duties on alcohol, wines, hats, and oils, estimated to produce \$8,000,000 per annum, were voted by Congress (Aug. 24th). Negotiations as to the settlement of the boundary between the Argentine and Chili were carried on during September, and finally (24th) an agreement was come to that the points of difference between the two countries should be referred to the arbitration of Great Britain, as previously arranged.

Argyll, Duke of. See under PEERS.

#### ARMENIA.

Armenia, together with Khurdistan, forms a part of the Turkish Empire in Asia. The total area is 89,264 sq. m., and the population was recently estimated at from 2,500,000 to about 5,000,000. Large numbers of Armenians have, however, been compelled to emigrate, and in Russian cities and districts and throughout the Turkish Empire a considerable Armenian population is scattered. Thousands also have recently been massacred or have died from starvation. Tradition assigns the cradle of the human race to Armenia. The country contains some mineral wealth, which, however, needs developing. The province is divided into three vilayets or governments—Erzerum, Mamuret ul Aziz, and Diabekr, with the districts of Bitlis and Van. The inhabitants are of the Christian faith, most of them belonging to the Gregorian Church, which greatly resembles the Greek Church in doctrine and ritual. There are many, however, who acknowledge the authority of Rome, though retaining their own distinctive ritual. In '94 terrible atrocities were perpetrated upon the Armenians in the Sasun district. A commission of inquiry was, after much pressure, appointed by the Sultan, and he afterwards issued an Irade declaring his acceptance of a revised scheme of reforms presented by the three Powers. This scheme

ordained that in each vilayet a non-Mahomedan moavin, or deputy-governor, should be appointed. A non-Mahomedan moavin should also be attached to every Mahomedan mutessarif and kaimakam holding office in those sandjaks and cazas where the importance of the Christian population justified such a measure. It was provided that the proportion of the Mahomedan and non-Mahomedan inhabitants of each vilayet should regulate the number of Christians and Mahomedans appointed to public offices. Provision was also made for reforming the councils of the sandjaks, cazas and nahies, for the inspection of the prisons by judicial inspectors, for a mixed police and gendarmerie recruited from the Mahomedan and Christian subjects in proportion to the religions of the inhabitants of each vilayet, for the control and settlement of the Kurds, the regulation of the Hamidieh cavalry, and for the collection of taxes by the sole agency of the mukhtars and tax-gatherers elected by the inhabitants. It was further ordained that a Permanent Commission of Control should be established at Constantinople, consisting of an equal number of Mahomedans and Christians, and the Embassies were given access to this Commission. In spite of this scheme of reforms the atrocities recommenced in November '95, and many villages between the Persian boundary and Van were harried. The Armenian Patriarch estimated that nearly half a million Armenians in the six north-eastern vilayets were homeless at Christmas '95. These were the vilayets in which the scheme of reforms accepted by the Sultan were to be applied, and it was significant that the massacres occurred almost entirely in such districts. During January and February '96, blue-books were issued by the British Government containing correspondence relative to Armenia, which showed that in all the relations between the Powers and the Sultan, Russia, backed by France and Germany, was strenuously opposed to any measures for compelling the Sultan to grant reforms in Armenia, or to cease the massacres which, there was too much reason to believe, were directly due to his instigation. Russia also directly refused to adopt the suggestion, put forward in some quarters, that she should undertake the administration of Armenia. The reports of British consuls and other officials included in these blue-books showed that "the Armenians were absolutely hunted like wild beasts." The massacres having at length ceased, the condition of the population was yet disastrous enough, for starvation and cold killed large numbers of the homeless and destitute wanderers whose villages had been destroyed and whose property had been sacked and removed by the Turkish and Kurdish troops. Forced conversions to Mahomedanism went on all over the country, the sole alternative being death; and conversion even did not bring safety, for cold and hunger still remained. It was estimated that, altogether, 80,000 Armenians perished from the time the massacres commenced up till the spring of '96. In September the atrocities commenced again in Anatolia. Horrible massacres took place at Kharput and Egin. At the latter place over 1000 persons were killed, and both towns were sacked and burned. There was, however, no disposition on the part of the Powers, to take any active steps in the matter, while England's attitude was regarded with the greatest suspicion. Russia plainly

declared that she would oppose separate action on the part of any Power. Mgr. Ormanian, Bishop of Armach, was (Nov. 18th, '96) elected to the Patriarchal See by the General Assembly. Since then there has been much discussion as to the promised reforms, but it was soon seen that these promises meant no more than other promises of the Sultan, and that the Powers either could not or would not compel their fulfilment.

### V. MOBILISATION AND HOME DEFENCE.

### VI. TERMS OF ENLISTMENT AND SERVICE.

### VII. THE INDIAN ARMY.

### VIII. PROGRESS AND EVENTS, '98.

## I. ORGANISATION.

### 1. Central.

The military administration was reorganised, under an Order in Council of Nov. 21st, '95, and the duties of the principal officers were defined in a memorandum presented to Parliament, February, '96. Under the late system the whole of the military departments were in the control of the Commander-in-Chief as supreme head, with the Adjutant-General as his chief staff officer, while the Civil Department was under the Financial Secretary. Under the new system the Secretary of State controls administratively the Army Services, and the heads of departments are responsible to him. There is an Army Board, consisting of the Commander-in-Chief as president, the Adjutant-General, the Quartermaster-General, the Inspector-General of Fortifications, and the Inspector-General of Ordnance. The Accountant-General is an *ex-officio* member as representing the Financial Secretary, and a chief function of the Board is to report upon promotions and appointments of superior ranks and proposals for estimates. There is also a War Office Consultative Council, under the presidency of the Secretary of State, for the consideration of special subjects. The Commander-in-Chief exercises general command, is the principal adviser of the Secretary of State, and is charged with plans of mobilisation, for offensive and defensive operations, etc. In his department are the Military Secretary, the Director of Military Intelligence, and the Officer in charge of Mobilisation Services. The Adjutant-General is charged with discipline, education, training, clothing, recruiting, etc.; the Quartermaster-General with supplies and equipment; and the Inspectors-General of Fortifications and Ordnance with the control and maintenance of those departments. These five officers are the heads of the principal departments. An interesting feature of the system is a Committee of the Cabinet, to which is referred the work of co-ordinating the duties of the naval and

military departments in war time. In July '98 a Committee, appointed by the Secretary of State for War, reported upon the question of Decentralisation. The main object was to assimilate peace and war procedure, and to place in the hands of general officers commanding districts the powers necessary for the proper execution of their duties; and the Committee, with practical unanimity, made a series of recommendations under the heads of "Financial" and "General," the effect of which will be to reduce the routine work of the War Office, and transfer much greater liberty of action to the local commands.

### 2. Local.

Command of the Army is exercised through the general officers commanding districts, save that, in the case of Ireland, the general commanding the forces there is an intermediate authority. There are twelve of these districts, exclusive of Aldershot, Woolwich and the Curragh (which are concerned only with troops quartered locally), embracing 67 regimental districts, each under the command of a colonel, and maintaining 2 battalions, thus accounting for 144 battalions of the line. The Foot Guards are being raised to an establishment of 9 battalions, and a progressive increase of the organic units of the Cavalry, Infantry, and Artillery is still in progress. The regimental district is the recruiting ground of a territorial regiment, with which are linked, as junior battalions, the militia and volunteer corps within the area; and the reserve men are pensioners of their respective territorial regiments. The Royal Artillery, through 9 recruiting areas, and the Royal Engineers, through the Commanding Royal Engineer in each district, have also a territorial organisation; but this is not the case with the Cavalry, which has special recruiters or staff officers located in various districts. In theory, one battalion of each Infantry regiment is at home, as a feeder for the other abroad; but in practice this system cannot be uniformly maintained. The training of men by short service and passing them into the reserve is the vital principle of the Army system.

## II. MAINTENANCE.

### 1. Finance.

The total cost of the Army, on the estimates for the financial year '98-9, is £19,220,500, against £18,340,500 in '97-8. This last sum includes the supplementary estimate of £200,000, dated May 4th, '97. The various heads of expenditure are:—

### Effective Services.

Pay, etc., of army (general staff, requirements, reserve and departmental)	£
Medical establishments: Pay, etc.	6,266,400
Militia: Pay and allowances	295,800
Yeomanry cavalry: Pay and allowances	553,000
Volunteer corps: Pay and allowances	75,000
Transport and remounts	614,200
Provisions, forage, and other supplies	710,400
Clothing establishments and services	3,352,600
	862,000

Warlike and other stores: supply and repairs	£ 1,972,000
Works, buildings and repairs: cost, including superintending establishment	1,020,700
Military education at establishments: pay and miscellaneous charges	118,200
Miscellaneous effective services	54,300
War Office: salaries and miscellaneous charges	245,200
	<b>16,139,800</b>

### Non-Effective Services.

Non-effective charges for officers, etc.	1,567,800
Non-effective charges for men, etc.	1,335,600
Superannuation, compensation and compassionate allowances	177,300
	<b>3,080,700</b>

The total number of men upon the home and colonial establishments of the Army (exclusive of those serving in India), upon which the estimates were based, was 180,513, compared with 158,774 (not including 4795 estimated men not expected to be added to the regimental establishments during the year), in '97-8. The amounts represent the following increases on the sums voted for the year '97-8: Pay, provisions, clothing, transport, etc., of additions to the Army, £578,000; Messing allowance for present force, £550,000; Army Reserve, additional pay for special liability for Army service, and for increased strength, £70,000; Manœuvres, £105,000; Non-effective, officers' pensions, £24,000; Rise in prices abroad and clothing, £70,000. The decreases were: Yeomanry and Volunteer capitation, £14,000; Amounts in Supplementary Estimates for '97-8 (warlike stores, clothing, provisions, forage, etc.), £503,000. Net increase, £880,000, due principally to the considerable addition to the effective, and to additional pay to Reservists who now accept liability for service in small wars, etc.

**Contributions in aid.**—From Colonial Revenues in aid of military expenditure, £257,800; from Government of Egypt, £87,000; Indian Government for deferred pay of soldiers on the Indian establishment, £180,000; and for other effective charges for regular forces serving in India, £541,000; purchase of discharges, £42,000; fines, hospital stoppages, etc., £52,200; also various sums from the Admiralty, etc. The amounts included in the estimates for military purposes in the Colonies and Egypt (exclusive of arms, stores, etc., of proportion for home recruiting, headquarter administration, sea transport, and non-effective charges) are: Bermuda, £124,950; Halifax, N.S., £131,150; Jamaica, £120,250; Barbadoes and St. Lucia, £109,889; Esquimalt, £961; Cape Colony and Natal, £699,850; St. Helena, £42,200; Mauritius, £80,400; West Coast of Africa, £93,600; Hong Kong, £188,950; Straits Settlements, £100,000; Ceylon, £119,550; Gibraltar, £316,900; Malta, £613,000; Cyprus, £12,200; Egypt, £511,050; total, £3,265,000 (compared with £2,545,415 in '97-8).

### 2. Additional Forces.

The establishments in the Estimates of '97-8 showed the additional force then sanctioned

to be raised for the more efficient defence of foreign stations, and for reducing the disparity between the number of battalions of Infantry maintained at home and abroad. The units were as follows:—A battery of Field Artillery; Eleven companies of Garrison Artillery; two battalions of Foot Guards; a second battalion for the Cameron Highlanders; an additional battalion each for the West India Regiment and the Malta Militia.

A progressive increase was provided for by the estimates of '98-9. Two new Cavalry regiments are to be raised in Natal, and the strength of regiments at home on the "low" establishment is to be increased, with an addition of horses to the other regiments. The addition to the Artillery (based on the proportion of 4 guns to 1000 bayonets) is inadequate, and the proportion adopted is now 5 guns to 1000 bayonets. Allowing 20 batteries (horse and field) to each of the 3 Army Corps, and 4 to the 4 Cavalry brigades, a total of 64 batteries will be required (55 was the provision in '97-8); and, it being intended also to maintain 3 batteries of howitzers, the formation of 15 new batteries is proposed, to be spread over three years, and 5 batteries are included in the estimates of '98-9. The establishment of the Artillery dépôts is also being increased. In regard to the Infantry, the additions recently made to the strength employed beyond the limits of the United Kingdom have had the effect of reducing the force at home to a point at which it has ceased to be sufficient, either for the purpose of supporting the battalions abroad or for providing the force which, in the opinion of the military authorities, it is necessary to maintain for home defence; therefore during the year the position is to be further considered, with the view of adjusting the balance between the battalions at home and abroad.

The following table shows the ultimate increase in the numbers of the Army (all ranks) under the main proposals of '97-8 and those now adopted, amounting in all to 25,000 men, excluding minor miscellaneous changes:—

	Pro- gramme of '97-8.	Pro- gramme of '98-9.	Total Increase.
Cavalry	—	684	684
Horse and Field Artillery	196	3,257	3,453
Garrison Artillery	2,641	73	3,714
Foot Guards	2,861	—	2,861
Infantry	185	12,045	12,230
West India Regiment	1,011	—	1,011
Total	7,894	16,059	23,953
Malta Militia	1,130	—	1,130
Total	<b>9,024</b>	<b>16,059</b>	<b>25,083</b>

### 3. Recruiting.

The considerable additions to the forces have caused much activity in the department of the Inspector-General of Recruiting. Large numbers have been enlisted under the standard, the proportion, which fell from 30.6 in '92 to 18.0 in '96, having risen again to 29.0 in '97.

The total number of recruits raised was 35,015, as compared with 28,532 in '96; but, owing to waste by discharge, transfer to reserve, and casualties, the net increase was only 162. The recruits who joined were 1985 for 12 years with the colours, 30,866 for 7 with the colours and 5 in the reserve, and 2164 for 3 with the colours and 9 in the reserve. For purposes of comparison the number of recruits during four previous years is given; '93, 35,195; '94, 33,698; '95, 29,583; '96, 28,532. The following table shows the arms of the service joined by recruits and men from reserve, etc., during '96 and '97.

	'96.	'97.
Household Cavalry . . . .	195	163
Cavalry of the Line . . . .	2,769	2,569
Royal Artillery . . . . .	4,433	6,883
Royal Engineers . . . . .	922	835
Foot Guards . . . . .	1,263	2,113
Infantry of the Line . . . .	17,246	22,216
Colonial Corps . . . . .	723	1,316
Army Service Corps . . . .	522	575
Army Ordnance Corps . . . .	70	99
Medical Staff Corps . . . .	372	264
Army Post Office Corps, etc.	17	46
	<b>28,532</b>	<b>37,084</b>

### III. EFFECTIVES, ESTABLISHMENTS AND DISTRIBUTION.

#### 1. Effectives and Establishments.

The following was the strength and establishment of each arm of the service in rank and file on Jan. 1st, '98:—

	Effectives.	Establishments.
Household Cavalry . . . .	1,051	1,029
Cavalry of the Line . . . .	15,377	15,154
Royal Artillery . . . . .	32,272	33,141
Royal Engineers . . . . .	5,586	5,697
Foot Guards . . . . .	5,852	6,092
Infantry of the Line . . . .	122,639	123,105
Colonial Corps . . . . .	5,083	5,262
Army Service Corps . . . .	2,753	2,714
Army Ordnance Corps . . . .	666	708
Medical Staff Corps . . . .	2,242	2,214
Army Pay Corps . . . . .	184	188
Total . . . . .	<b>194,705</b>	<b>195,304</b>

The general total of the Regular Army, first-class Army Reserve, Militia and Volunteers, rose from 577,740 in '86, to a maximum of 645,306 in '95, fell to 640,625 on Jan. 1st, '96, and rose again to 643,674 on Jan. 1st, '97, and to nearly 660,000 of all ranks on Jan. 1st, '98.

#### 2. Distribution.

The following table shows the distribution of all ranks of the Army, including drafts on passage out, Jan. 1st, '98:—

	At Home.	Egypt.	Colonies.	India.
Household Cavalry! . . . .	1,317	—	—	—
Cavalry of the Line . . . .	9,934	602	1,056	6,129
Royal Artillery {	1,799	—	—	1,843
	6,785	217	531	7,144
	217	—	271	973
	8,188	168	5,669	3,805
Royal Engineers . . . . .	5,368	143	1,924	344
Foot Guards . . . . .	5,607	—	984	—
Infantry of the Line . . . .	53,359	4,203	23,489	54,278
Army Service Corps . . . .	3,359	60	169	—
Army Ordnance Corps . . . .	860	61	280	107
Medical Staff Corps . . . .	1,977	91	550	—
Army Pay Corps . . . . .	488	8	80	—
Totals . . . . .	<b>99,258</b>	<b>5,553</b>	<b>35,003*</b>	<b>74,623</b>

\* In addition to 5665 colonial forces. There were also 900 of all arms in Crete.

The regular troops, as will be seen, are now principally confined to the home country, India, and the Crown colonies. Canada and Australia have no Imperial troops, beyond some 1500 in Nova Scotia. A large body of British troops has been engaged in the operations of the Sirdar against Omdurman, not of course shown in the table, which indicates what may be regarded as an established force.

#### IV. THE ARMY RESERVE.

The Reserve is a vital element of our Army organisation, the Reserve men being liable, by the terms of their agreement, to general service with the arms in which they were enrolled with the colours. There are two classes of the Reserve, of which the second is inconsiderable, and is dying out. On Jan. 1st, '98, the numbers were: Class I. 82,005; Class II. 58, as compared with 78,100 and 82 on Jan. 1st, '97. A new branch of the Army Reserve (Section A) has been created from Nov. 1st, '98, to consist

of men of "good" character, not to exceed 5000 in number, who receive one shilling a day. They are liable to be called out on active service during their first year in the section, under the Reserve Forces and Militia Act, '98, and there are other provisions to make them available for employment during "small wars." First-class reservists, who have served their period with the colours, and who are of the best soldiering age, and available for service if required, are an excellent set of men, and all the Infantry have been made acquainted with the handling of the Lee-Metford magazine rifle, introduced since many of them left the ranks. The Infantry form the chief part of the Reserve, and number 58,074 men, of whom 5083 belong to the Foot Guards, whose men serve a shorter period with the colours than do the men of the Line regiments. The Cavalry Reserve numbers 6094; the Royal Artillery—including horse, field, and mountain batteries, and the garrison companies—

has 10,918; the Royal Engineers, with the Submarine Miners, 2845; the Army Service Corps, 2638; the Medical Staff Corps, 969; and the remainder of the Reserve men are distributed over the smaller departmental corps of the Army. The Reserve men are pensioners of the respective territorial regiments, and look to the officer commanding the district as their commanding officer. About 47,000 of them are under thirty years of age, and 31,000 more between thirty and thirty-five. A further Reserve force connected with each regimental district is the Militia Reserve, to be embodied with the Militia upon mobilisation. It is a very popular force, and forms the connecting link between the Regular Army and the Militia. On Jan. 1st, '98, the force numbered 29,961 men, being a slight decrease compared with the previous year. See MILITIA.

### V. MOBILISATION AND HOME DEFENCE.

The paper scheme of Home Defence, which to begin with was something of a working hypothesis, has now taken definite shape. The requirements of the various points have been considered, and the garrisons are appointed with a small nucleus of Regulars, with which are associated, first the local Militia and Volunteers, and where these are insufficient others drawn from more remote sources. There remain, then, the larger portion of the Regulars at home, the Yeomanry, and a considerable proportion of Militia and Volunteers, to form the Field Army. The scheme is incomplete, but in the several military districts, to give it practical value, a Standing Defence Committee exists, with the general officer commanding as its president, and out of these committees Defence Commandants, responsible for the preparation, custody and revision of local defence schemes, are selected. The scheme thus described has not been fully elaborated in every district. For further particulars of the mobilisation scheme see ed. '96.

### VI. TERMS OF ENLISTMENT AND SERVICE.

A recruit is enlisted for any regiment of Cavalry or Infantry for which the recruiter to whom he offers himself is authorised to raise men, or he may enlist for general service in the Cavalry or Infantry, in which case he is appointed to a Cavalry or Infantry regiment, but is liable to be transferred, within three months of the date of his attestation, to any corps of the same arm of the service. The Army Service Corps is composed of drivers, clerks and artificers. Recruits for the corps will, as a rule, be trained as mounted men, and when dismissed drill with those who are qualified as clerks, bakers, butchers, wheelers, saddlers, shoeing smiths, carriage smiths and drivers, will be employed, as far as possible, in those trades. The Medical Staff Corps is under the immediate command of the Director-General of the Army Medical Department, and is intended for the performance of duties connected with the management of military hospitals, and for rendering assistance to sick and wounded in time of war. The Corps of Ordnance Artificers is established for the purpose of providing qualified artificers for the repair and maintenance of the material belonging to the Garrison Artillery, Siege Train, etc. Men enlisted for the corps are required to serve on probation for a period not exceeding twelve months. They must be men of good character,

and must be competent "fitters," with some knowledge of mechanical drawing. Recruits for the Post Office Corps are selected from the members of the Post Office Rifle Volunteers, 24th Middlesex R.V.C., who on enlistment will cease to belong to that Volunteer Regiment, but will remain attached to it as supernumeraries. The requirements as to age and height are varied from time to time, and may be obtained at any recruiting station. In practice, for "growing youths," the standards are slightly modified, but it is disappointing to find that, in '97, not less than 29 per cent. of recruits were below the standard. This falling back is mainly due to the large demand for recruits, owing to the new formations. On the other hand, 66 per cent. of those enlisted under standard during the first six months of '97 were found to have reached the full standard on Jan. 1st, '98.

**The Terms of Service are:**—Long service, *i.e.*, 12 years' Army service; or short service, *i.e.*, 7 years' Army and 5 years' Reserve service, which is extended to 8 years' Army service and 4 years' Reserve service if the period of Army service expires whilst the man is serving abroad. In the Foot Guards short service consists of 3 years' Army service and 9 years' Reserve service, and an additional year with the colours if abroad. Particulars concerning re-engagement, pensions, etc., were given in the ed. of '98.

**Service in Army Reserve.**—Men enlisted for short service, who are not permitted to extend their Army service, are transferred to the Army Reserve on expiration of their period of service with the Colours. Men serving at home may, should the exigencies of the service permit, be allowed to pass to the Reserve after 5 years' service. While in the Reserve a man receives pay at the rate of 6d. a day—*viz.*, 4d. a day ordinary pay, and 2d. a day deferred pay. They are liable to be called up annually for training for a period not exceeding 12 days or 20 drills. While in the Reserve they are liable to be recalled to the colours in case of national danger or great emergency, and if so recalled are treated in every respect as soldiers, and are allowed to regain the rank they held on transfer to the Reserve. For the new section of the Army Reserve "A," see above (IV.). It is embodied, from Nov. 1st, '98, under the Reserve Forces and Militia Act, '98, which enables 5000 Army Reservists to contract themselves into a liability to be called out for twelve months' permanent service during the first twelve months of Reserve service, and dispenses with the necessity of Parliament being summoned for the purpose of being informed of the step, though it is added that any exercise of this new power must be reported to Parliament as soon as may be. Men may revoke their agreements by three months' notice in writing. The same Act enables any part of the Militia to make an offer, certified by their commanding officer, to serve in any place out of the United Kingdom.

### VII. THE INDIAN ARMY.

The strength of the British forces in India on Jan. 1st, '98, is given above (III. 2) as 74,623. Upon the estimates of '98-9 the total establishment is 73,162 of all ranks. The troops are: Cavalry, 9 regiments; Artillery, 11 Horse, 42 Field, and 8 Mountain Batteries, with 27

Garrison Companies; Infantry, 52 battalions; Engineers, 353 officers; artificers, 113. The native army numbers about 148,000 men; Cavalry, 40 regiments; Infantry, 133 battalions; Artillery, 13 batteries and companies; also Sappers, Miners, etc. The cavalry regiments are as follows: 19 Bengal, 3 Madras, 7 Bombay, 5 Punjab Frontier Force, 2 Central India Horse, 4 Hyderabad Contingent. A force of Khyber rifles for service in the pass has lately been raised. The system of class regiments and companies is being developed, and gives a better class of men than was obtainable when Brahmins, Rajputs, Jats, and Mohammedans were indiscriminately mixed together. The enrolled Volunteers are some 30,000 men, of whom 24,000 are efficient, and by an Act of '96 can be called out for active service in case of emergency. In addition to these are the vast regular and irregular armies of the native states. The Government of India has now definitely adopted the policy of encouraging the native rulers to maintain armies fit to take the field, and with this view the plan of embodying "Imperial Service troops," under agreement with the feudatory states, was adopted during Lord Dufferin's viceroyalty. The result has been admirable, and the native Princes have been enthusiastic in their prosecution of the plan. A splendid reserve has been created, numbering at least 19,000 well trained men, located thus: Kashmir, 4350; Punjab, 4950; Rajputana, 4000; other states of Central and Western India, 4500; Southern India, 1400. Some of these troops have displayed the utmost hardihood and courage in the Frontier operations. On April 1st, '95, the Presidency System was abolished. Many high authorities had pronounced it to be a source of danger, and with the reorganisation four army corps have been created. Under General Sir William Lockhart, who has succeeded Sir George White as Commander-in-Chief in India, the Bengal army is divided into two portions, the Punjab and the Bengal; and these, with the armies of Madras and Bombay, form the four commands. In '98 the four commands have fallen vacant, and Sir A. P. Palmer has been appointed to the Punjab, Sir George Luck to Bengal, Sir George Wolseley to Madras, and Sir R. C. Low to Bombay. The Punjab command contains three first-class districts, Lahore, the Punjab Frontier Force and Rawul Pindi, and two second-class, Peshawar and Sirhind; the Bengal two first-class, Meerut and Oude, and six second-class, Allahabad, Assam, Bundelkund, Nerbudda, Presidency and Rohilkund; the Madras two first-class, Burma and Secunderabad, and six second-class, Bangalore, Belgaum, Madras, Mandalay, Rangoon and Southern; and the Bombay three first-class, Mhow, Poona, and Quetta; and five second-class, Aden, Bombay, Deesa, Nagpore and Sind. Each of the four commands reckons in its strength the British troops stationed within its borders. The Indian Army has developed rapidly in efficiency, notwithstanding caste prejudices and financial difficulties. An excellent system of mobilisation has been created during the past five years, and by the end of March '97 it is hoped the entire equipment and stores required for the whole field army will be in readiness. The defences of the north-west frontier, including the lines of Quetta and the bridge-heads on the Indus at Sukkur and Attock as well as a strong series of forts at

Rawal Pindi, have been completed. The horse and field batteries have received the 12 pr. B.L. guns, the British Infantry the Lee-Metford rifle, and the native troops the Martini-Henry. India now turns out her own small-arm ammunition, and the manufacture of steel and steel projectiles has been introduced at Cossipur. The horsing of the cavalry and artillery has been improved. Much attention has recently been directed to the question of transport in India, and it must be said that the Commissariat Department acquitted itself well during the great strain of the Tirah operations, in which not less than 74,000 animals were employed. The regimental transport exists; but, outside this, a great organisation is required, which needs to be formed, as an adequate framework for mobilisation, in time of peace. The health of the army in India has very greatly preoccupied the public mind lately, and statistics of the disastrous prevalence of venereal disease were given in the '98 ed.

### VIII. PROGRESS AND EVENTS, '98.

The most important circumstance concerning the internal organisation of the Army in '98 has been the decision of the Government to add still further to the forces (see above, II. 2). The last two years are the first since '71 in which the Army has been increased by a single battalion. Recent events in various parts of the world, and a reconsideration of requirements, which was forced upon the Government, have demonstrated that the proposals of '97-8 were inadequate. At the end of '97 an attack upon War Office administration was made by Mr. Arnold Foster in the *Times*, which raised a long discussion, continued in a desultory fashion in the papers until the debate upon the Army Estimates in the House of Commons. The chief grounds of the attack were the centralisation and circumlocation of the War Office, the defects of the linked-battalion system as applied, and the alleged inadequacy of the reserve. In a general way the Secretary of State for War admitted the justice of many of the criticisms. The committee upon War Office reorganisation and decentralisation which has been alluded to (I. 1), after hearing the opinion of many experienced officers, who gave almost ludicrous illustrations of centralisation, made over two hundred recommendations, with the view of delegating greater power and responsibility to the general officers in command of districts, nearly all of which immediately received the sanction of the Secretary of State. In regard to the failure of the linked-battalion system, the present expansion of the Army, which promises to be continuous, is intended to bring about a proper balance between the force at home and that permanently required abroad. The Reserve Forces and Militia Act (see VI.) is intended, by increasing the readiness of the forces, to remove another of the evils pointed out. Provision has been made by Act of Parliament for the holding of manoeuvres on an extended scale, and the Salisbury manoeuvres of '98 were the largest ever held in England. The area included nearly the whole of Dorsetshire and a great part of Wilts, and 53,600 men, 9400 horses, 242 guns and machine guns, and 486 waggons were assembled, forming the Southern Army or attacking force, under Sir Redvers Buller, and the Northern (or defending) Army under the Duke of Connaught. This

last included practically the whole of the Aldershot command. The general arrangements left little to be desired, and though the weather was excessively hot, the troops showed excellent qualities. Military criticism of the operations tends to the conclusion that the careful programme of the manoeuvres deprived them of the character of reality as warlike movements. The commissariat arrangements were entrusted to contract, an arrangement which was experimental, but aroused some adverse comment.

The work of the **Tirah Expeditionary Force**, under command of Sir William Lockhart, was carried to a triumphant success, and was a splendid example of good organisation and of soldierlike energy and endurance in the presence of stupendous difficulties, and in conditions of great hardships and exposure, in which the men were constantly harassed at night by assaults at close quarters and distant rifle fire, and engaged in long and trying rear-guard actions. The approximate strength engaged was 1010 British officers, 10,882 British troops, 491 native officers, 22,123 native troops, 19,558 followers, and a large number of hospital attendants, clerks, and others, with 8000 horses, 18,384 mules and ponies, and 1440 hospital riding ponies, in addition to a vast number of animals working on the line of communications. An excellent account of the operations will be found in Col. H. D. Hutchinson's "Campaign in Tirah, '97-8" (Macmillan). Even more remarkably successful has been the Nile campaign, ending with the victory of Omdurman and the placing of posts at Fashoda and in the Bahr-el-Ghazal (see EGYPT) by the British and Egyptian forces under command of Sir Herbert Kitchener (now Lord Kitchener of Khartoum). The advance was exceedingly rapid and well-regulated, and preparations for the final operations were worked out with machine-like precision. The greater part of the British division was brought from Cairo to within 50 miles of Omdurman within three weeks. In the battle of Omdurman, as in the earlier engagement at the Atbara, both British and Egyptian troops displayed the best military qualities. The operations are described in "The Egyptian Soudan, its Loss and Recovery," by Lieuts. Alford and Sword (Macmillan), and "With Kitchener to Khartoum," by G. W. Stevens (Blackwood).

**Arnold, Sir Arthur**, Hon. LL.D. Cambridge, J.P. and D.L. for County of London, Alderman of London County Council, is the third son of R. C. Arnold, Esq., and was born 1833. He acted as Assistant Commissioner to administer the Public Works Acts during the Cotton Famine, '63-6. Afterwards he wrote "The History of the Cotton Famine." Other literary productions have been, "From the Levant" ('68), "Through Persia by Caravan," "Social Politics," and "Free Land." He sat as a Liberal member for Salford, '80-85. He established, and was President of, the Free Land League from '85 to '95. Chairman London County Council '95 and '96; knighted in June '95. Reform Club. Address: 45, Kensington Park Gardens, W., and Hyde Hill, Dartmouth.

**Arnold, Sir Edwin**, K.C.I.E., poet, orientalist, and journalist, was b. 1832. Educated at King's School, Rochester; King's Coll., London, and Univ. Coll., Oxford, where he graduated in honours, '54. He was subsequently appointed second master of King Edward the Sixth's School, Birmingham, and afterwards

proceeded to India as Principal of the Government Sanskrit College at Poona. On his return to England, in '61, he joined the *Daily Telegraph*, with which he has been connected editorially for many years. He has devoted much attention to the study of Oriental literature. Among his best known works are "The Indian Song of Songs," a metrical paraphrase from the Sanskrit, "Sâdi in the Garden," "The Song Celestial," and "The Light of Asia," an epic poem upon the life and teaching of the great Indian prophet, Buddha, which has gone through more than a hundred editions. Sir Edwin's later productions include a volume of poems entitled "Lotus and Jewel," "Selected Poems: National and Non-Oriental," "Death and Afterwards," "In my Lady's Praise," "Seas and Lands," "Japonica," "The Light of the World," "Adzuma" ('93), "Wandering Words" and "East and West" ('94). Created a Companion of the Star of India '77, and K.C.I.E., Jan. '88. Sir Edwin is the bearer of many foreign orders, including the "White Elephant" of Siam and the "Rising Sun" of Japan. Northbrook, Indian, and Royal London Yacht Clubs. Address: 31, Bolton Gardens, South Kensington, London.

### ART, '98.

The National Gallery benefited by rearrangement due to transference of numerous British pictures to other national collections. The most important acquisitions were Millais' portrait of Gladstone, two Rembrandts, and the shutters to Da Vinci's "Vierge aux Rochers." The National Portrait Gallery gained a "Gladstone" and "Sir Peter Grant" by Mr. Watts, also a portrait of Huxley by Mr. J. Collier. Most of its other additions were drawings, including many by G. Dance. Lord De l'Isle and Dudley, deceased, was succeeded as trustee by Viscount Peel. Draftings from Trafalgar Square enriched the Gallery of British Art, whose chief independent gain was Millais' "The Order of Release." A parliamentary inquiry as to the management of South Kensington Museum revealed abuses and suggested reforms. Rooms formerly given to the Chantry pictures were hung with drawings. An exhibition of lithographs in commemoration of the Arts Centenary was held in November. Notable gains were a quantity of old silversmithery, chiefly German, and an old English room of 1606 date. At the British Museum a fine display occurred in the autumn of prints representing Rembrandt's art. Government voted £25,000 for alterations of Hertford House, the home of the Wallace Collection. The private Horniman Museum at Forest Hill was made over to London by its owner.

**Honours** were headed by the baronetcy given to Mr. Henry Tate. The Hon. D.C.L. degree of Cambridge was conferred on Sir E. Poynter. At the end of '97 Mr. A. Waterhouse was elected treasurer of the Royal Academy, *vice* Mr. Horsley, resigned. Mr. Gregory, Mr. Aitchison, Mr. Leader, Mr. Seymour Lucas, and Mr. E. A. Abbey were elected R.A.'s; and Mr. Lionel Smythe, Mr. La Thangue, and Mr. Napier Hemy became A.R.A.'s. Mr. Frank Walton was chosen as president of the Society of Oil Painters (late Institute of Painters in Oil), Mr. Alma Tadema and Mr. Sargent joining its roll as hon. members. Similar rank in the Royal Society of British Artists was received by Mr. Holman

Hunt and Mr. A. Gilbert, and likewise accepted by Princess Louise in the Royal Society of Painter Etchers. At the end of '97 the presidency of the Royal Water-colour Society fell to Mr. E. Waterlow (Mr. Herkomer *proxime accessit*), *vice* Sir John Gilbert, deceased. A gold medal and £300 were awarded at Pittsburg, U.S.A., to Mr. J. Shannon; and 1st class gold medals at Vienna devolved on Messrs. Abbey, Onslow Ford, Hacker, and Alex Harrison. Prof. Legros undertook the presidency of the Society of Medallists; Mr Gerald Robinson that of the Society of Mezzotint Engravers; Mr. G. F. Watts that of the Society of Pastellists, these three being new Societies. Fresh appointments were those of Mr. Walter Crane, *vice* Mr. Sparkes, retired, as Principal of the Royal College of Art; Mr. A. Crofts, *vice* the late Mr. P. Calderon, as Keeper of the Royal Academy; Mr. Hawes Turner, *vice* Mr. Eastlake, retired, as Keeper of the National Gallery; and Mr. J. T. Michelthwaite, *vice* Mr. Pearson, deceased, as architect to the Abbey.

Exhibitions began with a splendid loan collection at Burlington House of 242 works by Millais, 56 of which were drawings, a large number subsequently going to Whitechapel. The Royal Academy spring show, although not unprecedentedly good, derived interest from the prevalence of the Franco-American, Scottish, Newlyn, and the frankly decorative element. Perhaps Mr. Abbey's "King Lear" was most nearly the picture of the year. Sculpture was of a high general level, though *minus* anything heroic or finely classical. Mr. Frampton's "A Bronze Memorial" was full of distinction, and there were many beautiful decorative objects. The hangers were Messrs. Goodall, Oulless, Crofts, and Sargent. Few sales were effected, less than £14,000 being totalled, and of this only Mr. Dicksee's picture reached four figures. Some of the highest prices went for Chantrey purchases of "The Lament for Icarus" (£840), by Mr. Draper; "Milking Time" (£525), Mr. Yeend King; "In Realms of Fancy" (£520), Mr. Melton Fisher; "Ethel" (£105), Mr. Peacock; "Haymaking" (a water-colour, £157 10s.), Mr. Glendening. The New Gallery opened in January with a fine collection of British and Continental paintings, ancient and modern, one room being devoted to Rossetti. The spring exhibition was of higher quality than ordinarily, although such pillars of this gallery as Sir E. Burne-Jones, Mr. Watts, and Mr. Sargent did not surpass themselves. As an autumn show there were pictures and enamels by living French artists, together with a valuable loan collection of art objects, mainly Renaissance, from Signor Bardini of Florence. In April Australian art was exploited in the Grafton Galleries, the National Galleries of Sydney, Melbourne, and Victoria, as well as individual artists, contributing to make a very interesting show. Later the rooms were assigned to the Society of Portrait Painters. A magnificent loan collection of past and present French art was arranged at the Guildhall, and during the three months it was on view drew 206,988 visitors. An International Exhibition of Painting and Graving, with Mr. Whistler as chairman of its executive and a mainstay among exhibitors, was held in May at Prince's Club, but hardly met with the success its organisers expected. France, Germany, and Glasgow were best represented. The Royal Society of Painter Etchers rarely had a finer display. Mezzotints were much in

evidence, Mr. Frank Short's completion of the Liber plates conducing much to the value of this section. The New English Art Club still further subdued the ultra-eccentricities of its earlier life in the two shows it had. Mr. C. H. Shannon and Mr. Furse were its strongest exhibitors in April. Chief of the Fine Art Society's shows were caricatures by Caran d'Ache, old miniatures and drawings by Cosway and Downman, rare books, and early engravings. The Royal Society of British Artists made no departure from its liberalism of acceptances for its open spring show, and in the winter received works by its members only. The Society of Lady Artists again made handicrafts an important feature, and during the year changed its name to the Society of Women Artists. Valuable pictures of the Milanese and Lombard schools were lent to the Burlington Fine Arts Club. Drawings by Laurence and by Richmond, together with old shagreen and piqué work, gave special character to the Royal Amateur Art Society. Drawings by the late Sir John Gilbert formed an *in memoriam* at the Royal Water-colour Society previous to its members' usual exhibition of finished drawings. This, though of generally poor quality, was much sustained by Mr. Melville, Mr. Hale, and Mr. Paterson. The customary winter show—nominally of sketches and studies—occurred. The Royal Institute of Painters in Water-colours did not reach a high standard in the spring. Its galleries were used in October by the Institute of Painters in Oil Colours under the new designation of the Society of Oil Painters. Of distinct artistic worth was the Landscape Exhibition made by half a dozen artists at the Dudley Gallery, and given a room to itself in the autumn at Liverpool.

In Ireland the Royal Academy was good, less by its native work than by British. This came chiefly from Scotland, whose own Royal Academy record was fair. There was an increase of exhibits, and weight was lent by Mr. Orchardson's and other work previously shown in London. Excellent loans and force of the younger native painters made the Scottish Society of Artists exhibition strong. Foreign loan pictures and fire water-colours by local artists marked the Royal Glasgow Institute show. Three statues were placed on the exterior of the National Portrait Gallery. Peebles Fine Art Society was rich with loans of old English masters. In the provinces the Walker Art Gallery, Liverpool, had arts and crafts in the spring, and an excellent picture exhibition in the autumn. The Society of Artists at Birmingham was cosmopolitan, and local talent produced nice water-colours, "The Catapult," by Sir E. Poynter, lending strength to the painting division. The permanent collection at the Art Gallery was enriched by a statue of Dr. Dale and other things, and in the autumn forty French works migrated from the Guildhall were on view. Oxford Art Society, now restricted to Oxford men by birth, residence, or education, had its show in the new Municipal Buildings. Manchester Art Gallery had a collection of works by Mr. Clarence Whaite in the summer. The most notable exhibitions at *proprietary galleries* were of French art at Obach's, paintings by Carrière at the Continental Gallery, colour-etchings by Mr. Menpes at Dowdeswell's, sketches by Sir Frank Lockwood at Mendoza's, masterpieces of the English school at Agnew's. In the Colonies Melbourne dropped

its usual spring exhibition of the Society of Artists, Adelaide held its Easel Club show at the end of '97, and at Sydney the two rival art societies were not vigorous.

Sales were not of magnitude, exclusive of the £121,550 given by Mr. Asher Wertheimer for the Hope heirloom pictures, which the Court of Chancery decided should be sold by private tender. The Ruston and Burne-Jones sales were those of the most importance at Christie's. At dispersal of the first-named, Burne-Jones's "Mirror of Venus" realised 5450 gs., and his "Chant d'Amour" 3200 gs.; Rossetti's "Dante at the Bier of Beatrice," 3000 gs., "La Ghirlanda," 3000 gs., "Veronica Veronese," 1550 gs.; Gainsborough's "Lady Clarges," 1850 gs.; and Rembrandt's "Nicholas Ruts," 5000 gs. At the Burne-Jones sale his "Love and the Pilgrim" made 5500 gs., and "The Fall of Lucifer" 1000 gs. At the Kenton sale Millais' "Order of Release" commanded 5000 gs., his "Black Brunswicker" 2650 gs., and "Afternoon Tea" 1300 gs. Other pictures well into four figures were Corot's "La Chevière," 1600 gs.; Morland's "Postboy's Return," 1250 gs.; Romney's "Mrs. Crouch," 1300 gs.; Romney's "Madam Susan Jouenne," 3000 gs.; Nattier's "Portrait of the Duchesse de Rohan," 1100 gs.; and Rubens' "The Repose of the Holy Family," 1300 gs. Panel pictures by Mr. Seymour Lucas and by Mr. Goetze were unveiled at the Royal Exchange by the Lord Mayor in October.

### ARTILLERY.

In the matter of ordnance the chief progress to be noted, both in naval and military guns, is the application of quick-fire. In the Navy the reaction against heavy guns is complete. The *Royal Sovereign* and her sisters carry 67-ton guns, and the *Magnificent* and *Majestic*, with the battleships of the new programme, have 46-ton guns for their heaviest armament. It is the introduction of the wire-wound gun, offering greater resistance and permitting greater energy, which has made possible the diminution of weight and size. The principle of the new gun is a system of hooping by steel wire, now generally accepted as increasing the admissible maximum pressure from 40 to 50 per cent.

An account of the armament of the *Majestic* will illustrate some of the latest developments in naval guns. The *Magnificent* and the improved *Renowns* have the same armament. The ship carries 4 12-in. 46-ton Woolwich wire guns, on each of which 102 miles of rectangular wire are wound, with an average tension of 40 tons to the square inch, covered by a steel jacket; 12 6-in. Elswick quick-firing (wire) guns; 16 12-pounder Elswick quick-firers; and 12 3-pounder Hotchkiss quick-firers on Elswick recoil mountings. The mounting of the 12-in. guns is upon a new and advantageous principle; "thrust rings," fitting into grooves in the cradle, transmit the longitudinal thrust of recoil, and the guns are kept in their places by well-protected fittings, instead of by bands passing over them. Each gun, with its complete mountings, is balanced in the firing position upon trunnions fitting into the slides (in which position it is loaded, thus allowing more room in the rear than under the old arrangement), and can be elevated or depressed by hand, as is the case, where necessary, in every operation. The guns may be run out or in by hydraulic pressure, but the recoil will always bring them in after the discharge, and they can be loaded in any position, the loading of one gun in a barbette not interfering with the working or firing of the other—a vast improvement upon the former system. The 6-in. guns are upon pedestal mounts, and the *Majestic* was the first ship to carry the 12-pounder. A new wire 9·2 in. gun has been introduced for the cruisers *Powerful* and *Terrible*. The system of electric gear for the turret-movement of heavy guns has been largely adopted in the French navy, and has been introduced in this country in the *Barfleur*, *Powerful*, *Terrible*, *Prince George*, etc. All the new guns are vastly more powerful than their predecessors, and the following table will illustrate their character and capabilities. The 6-in. quick-firer described is the new Vickers wire gun, of which 200 have just (Nov. '98) been ordered. The gun has a vastly greater muzzle energy than its predecessor. The breech mechanism is special, and the obturation so complete that the metal cartridge case commonly used in such guns is dispensed with:—

	12-in.	9·2-in.	6-in. Q.F.	4·7 Q.F.	12-pr. Q.F.	3 Pr. Q.F.
Calibre . . . . . ins.	12	9·2	6	4·7	3·0	1·85

Turning to guns for the military forces, we note a re-armament of the Royal Artillery. The Horse Artillery has received the new 12-pr. (6 cwt.) wire-wound gun, and the 12-prs. thus made available for the Field Artillery, as well as the guns now possessed by that branch, have been converted to 15-prs. In this way a reserve of 6 fully equipped batteries and 10 spare guns has been created. Two batteries have received a new 5-in. howitzer. Mountain

batteries have each 4 muzzle-loading rifled 7-pounder jointed steel guns, 2·5-in. calibre, the whole, gun, carriage and wheels being carried by mules. Position batteries, each 4 muzzle-loading rifled 40-pounder guns, 4·75-in. calibre; also 2 6·3-in. howitzers. The new wire gun for the horse batteries claims to be superior to any foreign gun of similar size and weight. The new 20-pounder is a powerful gun, but it is intended for heavier work than

that of regular field batteries. Some, however, would no doubt be equipped with it in time of war.

A very powerful wire fortress gun of 9·2-in. has been introduced, similar to the naval gun of the same calibre, but 38 feet in length compared with 33 feet.

Reduced calibre and quick-firing field guns are prominently discussed. The Germans and French have already adopted quick-firing guns for their field artillery, and are busy with the work of completing the batteries. There can be little doubt that our own artillery will presently be provided with a fully satisfactory weapon of the kind. The Ordnance Committee has long been occupied with the question.

**Authorities.**—Lloyd & Haddock, "Artillery: its Progress and Present Position"; Garbett, "Naval Ordnance" (Royal Navy Handbooks); Dredge, "Modern French Artillery," reprinted from *Engineering*, '91; Longridge, "The Application of Wire to the Construction of Ordnance," '89, "Interior Ballistics," '89, "Smokeless Powder and Gun Construction," '90, "The Artillery of the Future," '91, and "The Field Gun of the Future," '92; Wille, "Das Feldgeschütz der Zukunft"; criticism of the same by Captain Moch, *Revue d'Artillerie*, '92; "Modern Naval Artillery" (Griffith); Veyrines, "Artillery at the Paris Exposition of '89"; "Operations of the Division of Military Engineering of the International Congress of Engineers" (Columbian Exhibition), official, Washington, '94. There is a large literature concerning the tactical employment of guns. Consult Pratt, "Field Artillery"; May, "Guns and Cavalry." The "Field Artillery Drill" was revised, Nov. '96.

**Artillery Association, The National**, was formed in 1865, and has as its objects the advancement and promotion of the science and practice of Artillery, primarily amongst volunteers in the United Kingdom; and especially the formation of an annual camp of instruction and Prize Meeting for Volunteer Artillery. Subscribers of £1 rs. per annum become members subject to the approval of the Council; a subscription of £10 rs. qualifies for life membership. The Council consists of certain *ex-officio* members and 30 members elected at the annual general meeting, held in March every year. There are 394 members. The annual Prize Meeting in '98 was held July 30th—August 6th at Shoburness. The results of the principal competitions were as follows:—

**Cinque Ports Challenge Cup:** 3rd Kent, Battery 1, 256 points; 3rd Kent, Battery 2, 223 points; 3rd Middlesex, Battery 3, 207 points.

**Corporation and City Companies' Challenge Cup:** 3rd Kent, Battery 2, 338 points; Shropshire and Staffordshire, Battery 1, 296 points; 3rd Kent, Battery 1, 270 points.

**Stradbroke Challenge Cup:** Shropshire and Staffordshire, Section 1, 68 points.

**The Dewar Challenge Trophy:** 1st Essex, Group 4, 225 points; Argyle and Bute, Group 1, 224 points; 2nd Glamorgan, Group 6, 195 points; 1st Essex, Group 1, 190 points.

**Corporation and City Companies' Challenge Cup, No. 1 (Group Firing):** 1st Essex, Group 1, 130 points; 1st Essex, Group 5, 120 points; 1st Hants, Group 3, 117 points; 1st Hants, Group 3, 115 points; 4th Durham, Group 4, —

**Turnbull Challenge Shield:** 1st Essex, Group 2, 98 points; 1st Forfar, Group 1, 96 points; 2nd

Middlesex, Group 2, 96 points; 4th Durham, Group 1, 85 points.

**Garrison Artillery Competition, "A" Shift:** 8th Lancashire, Detachment 3, 98 points; 4th Durham, Detachment 1, 97 points; 1st Essex, Detachment 1, 96 points.

**Harcourt Challenge Cup:** (awarded to the detachment of nineteen men making the highest aggregate number of marks during the meeting in the Repository Competition "A" Shift, and the 4 Garrison Artillery Competition combined): 8th Lancashire, Group 2, 189 points.

**The Queen's Prize (Position Artillery), a Silver Cup for the Corps and Silver Badge for each man, value £50, with cash added by National Artillery Association £30:** 3rd Kent, Battery 2, 561 points; The Prince of Wales' Prize, £21: 3rd Kent, Battery 1, 525 points.

**The Queen's Prize (Garrison Artillery), with £10 added by the National Artillery Association, a Silver Cup for the Corps and Silver Badge for each man, value £50, and cash £60:** 1st Essex, Group 1, 321 points; second prize 2nd Glamorgan, Group 6, 300 points.

**The President of Council** is Lord Stradbroke; **the Secretary** is Major H. Vane Stow, and **the offices** are at 24, Bedford Street, Strand, W.C.

**Artists, Musicians, and Actors Deceased (Nov. '97—Nov. '98).** See OBITUARY.

**Ascension Island.** In the South Atlantic, 960 miles from African coast, and is a British possession. The port is called Georgetown, and is furnished as a naval station with batteries and storehouses. Used as a coaling depot for the West African squadron. **Area**, 35 sq. miles; **population**, 434. Turtles, for which the island is famous, are found in abundance between December and May. The Governor is a naval officer appointed by the Admiralty. See BRITISH EMPIRE (table).

**Ashanti.** See GOLD COAST.

**Asiatic Society of Bengal.** Founded 1784. The Society consists of ordinary, associate, corresponding and honorary members. Meetings are held on the first Wednesday of every month (except in September and October). The Society publishes the well-known series of "Bibliotheca Indica," being a collection of rare and valuable Oriental works in Sanskrit, Arabic, Persian, and Thibetan. The Society's library is peculiarly rich in rare manuscripts. It has also a large and valuable collection of ancient coins, etc., besides a museum known as the Indian Museum.

**Asquith, Rt. Hon. H. H., Q.C., M.P.** See under COMMONS.

**Assiniboia.** A district of the North-West Territories (*q.v.*), and a future province of the Dominion of Canada. **Area**, 95,000 sq. m. **Capital**, Regina, which is the present seat of government for the Territories generally.

**Association of Chambers of Commerce of the United Kingdom.** This Association was formed in 1860, and incorporated in '75, for the purpose of discussing and considering questions concerning trade, commerce, manufactures, and shipping; and for the collection and dissemination of information from time to time on matters affecting these subjects and the general commercial interests of the country. The Association is in direct communication with various Government departments, and has been instrumental in passing several Acts of Parliament. Amongst the subjects dealt with by the Association may be mentioned bank-

ruptcy law reform, consolidation of the partnership law, postal reforms, bills of sale, parliamentary procedure, commercial union with the colonies, county court jurisdiction, treaties of commerce with foreign countries, etc. It holds an annual meeting early in the year in London, and an autumnal meeting in the provinces, at both of which resolutions suggested by the various local chambers of commerce are discussed, with a view to action being taken thereon. At these meetings the President of the Board of Trade and a representative of the Foreign Office usually attend in order to ascertain the views of the commercial community on important mercantile topics. The membership of the Association consists not of individuals, but of chambers of commerce, 92 of which are members and send delegates to the meetings of the Association. President, The Hon. Sir H. Stafford Northcote, Bart., M.P.; Secretary, E. W. Fithian. Offices, 1, Great College St., Westminster, S.W.

**Astronomer Royal.** See CHRISTIE.

### ASTRONOMY, '98.

The astronomical event of the year—viz., the total solar eclipse, Jan. 21st, '98—was a complete success, despite the plague in India. Fine weather favoured the parties, and an enormous mass of material in the shape of photos of the Corona and of the Spectra of various portions has been secured, and is now being digested. The chief objects sought were—(1) Photos of the spectrum of the thin layer of gases lying immediately above the photosphere. These are called "Flash Spectra." Very successful plates have been obtained, but will take considerable time to measure and interpret. (2) Photos of the Corona to determine its extension, (3) to determine its structure. The photos taken for detail give clear indications that in the region of prominences the coronal matter is, as it were, thrust aside, causing the leaf-like or dome-shaped structure noticed also in previous eclipses. The greatest extension of corona ever shown on a photo was also secured, the corona being traced to eleven solar diameters distant. Being within two years of the minimum activity of sun spots, the sun's surface is expected to be quiescent; but this last period of decline from maximum has been phenomenal throughout, and thus the outburst of Dec. '97, and March and Sept. '98 have not caused so much astonishment. On Dec. 6th, '97, a group appeared on the N.E. limb, which soon became visible to the naked eye, being distributed over a length of 159,000 miles, the chief spot being 27,000 miles in length. By the 13th it began to shrink, and soon became insignificant. The spot in Sept. '98 caused more stir, Londoners accusing it of being in some way implicated in the water famine. This group was heralded on Sept. 3rd by one large spot, which was already on Sept. 6th attended by numerous smaller ones. The group reached central meridian on Sept. 9th, when great magnetic disturbances and auroral displays took place. By Sept. 10th it had reached its maximum development, covering  $18^{\circ}$  of long. and  $5^{\circ}$  lat. It gradually declined, and had vanished Sept. 16th. The zodiacal light, owing to its prominence during the time the eclipse parties were in the equatorial zone, has received more than ordinary attention, and it is hoped that some solution of this phenomenon will be arrived at.

Captain Molesworth has succeeded in securing a photograph. The adoption of a new value for the "Constant of Aberration" by the *Nautical Almanac* has given rise to much criticism, it being considered somewhat premature, especially as the adopted value is so slightly different from the one in use. Some of the values of this constant are:—1843 Struve  $20^{\circ}44'5''$ , '44 Peters  $20^{\circ}50'3''$ , '50 Maclear  $20^{\circ}53'1''$ , '61 Main  $20^{\circ}53'5''$ , '83 Nyren  $20^{\circ}49'2''$ , '95 Newcombe  $20^{\circ}51'1''$ , '98 Doberck  $20^{\circ}47'7''$ .

Lowell's monograph on *Mercury* puts forward in a lucid manner the observations made with his 24-in. refractor in the clear skies of Mexico. The markings resemble closely those on Mars, and the results tend to show that this planet is worn out like our moon. Its diameter is 3400 miles—i.e., somewhat larger than was thought. Its rotation on its axis coincides with its revolution round the sun, and occupies 87.969 days. There is no evidence of water, vegetation, or organic life.

Schiaparelli's fifth memoir on the planet *Mars* embraces the observations of '96. He found that the diameter of the N. polar cap covered  $30^{\circ}$  in the beginning of Jan. and but  $8^{\circ}3'$  by end of Feb., when it seems to have remained constant to June, at which time observations were discontinued. According to terrestrial analogies, the greatest diameter would be expected near the solstice (March 20th). Prof. Joly, starting with the supposition that, when the rotation period of Mars was much shorter than at present, the planet captured small bodies, such as minor planets, which then circulated round him for a time and ultimately fell on its surface, argued that when near the surface the stress caused two parallel ridges along its course, and so gave rise to the double canals. From Nov. 19th, '97, to Sept. 13th, '98, ten minor planets were added to our already long list—one of which, discovered by Herr Witt on Aug. 13th, is of exceptional interest. These minor planets (about 450) revolve round the sun in the space between the orbits of Mars and Jupiter. The new planet known as DQ has a very eccentric orbit, and actually approaches, at perihelion, nearer the sun than Mars. Beyond this, it passes nearer the Earth than any other member of the solar system—except, of course, the moon—and hence affords an excellent means for determining the sun's parallax. Its own parallax is over one minute of arc. Of periodic comets due during '98 three were detected—viz.: '92 iv. (Winnecke), period 5.5 years; Encke, 3.3 years; '84 (Wolf), 6.8 years. Those not yet seen are—'92 v. (Barnard), 6.3 years; '81 v. (Denning), 8.3 years; '89 vi., 8.5 years; '86 iv. (Brooks), 12 years; '67 (Temple), 6.5 years; '58 (Tuttle), 6.6 years. New comets discovered are—'98 i. (Perrine), March 20th; '98 vii. (Coddington), June 11th; '98. vi (Perrine), June 14th; '98 v. (Giacobini), June 19th; '98 viii. (Perrine), Sept. 13th; '98 ix. (Brooks), Oct. 20th; so that in June no less than seven comets were under observation. The star  $\beta$  Lyrae has attracted attention owing to the peculiar irregularities of its light. It would seem that it has a satellite moving round it in a nearly circular orbit; the large star being 21 times the mass of the sun while the satellite is 9 times the mass of the sun. Recent parallax investigations show that the stars composing the Great Bear are about 200 light-years distant from us, while the distance from  $\beta$  to  $\gamma$  is at least 4,000,000 times the dis-

tance of the earth from the sun, or 14 times the distance separating us from a Centauri. The Leonid meteor shower in Nov. '97 was a disappointment, the meteors being few and observation spoiled by cloud and moon. The formal dedication of the Yerkes Observatory took place Oct. 10th, '97.—The most important works issued are—Second edition of "Young's Astronomy," "Todd's New Astronomy," Meyer's "Das Weltgebäude," See's "Catalogue of 500 Southern Doubles." For current knowledge see *Monthly Notices R.A.S.*, *The Observatory*, *Astronomische Nachrichten* (Continental).—**Future Events.** Total lunar eclipse—'98, Dec., 27d. 9h. 39m. (even.); Partial solar eclipse—'99, June, 8d. 4h. 43m. (morn.); Partial lunar eclipse—'99, Dec., 16d. 11h. 45m. (even.); Occultation of Neptune by Moon—'99, Nov., 19d. 6h. 10m. (even.), and Dec., 17d. 3h. 36m. (morn.). Mars and Neptune will come into good position for observation in January. The November meteors (13th) both in '98 and '99.

**Books of Reference.**—"Mars" (Lowell), "Spectrum Analysis" (Frost's Schellen), "Moon" (Elger), "Sun" (Young), Miss Clerke's Works; and for current knowledge, *The Observatory*, *Monthly Notices of the R.A.S.*, *Journal of the B.A.A.*, and *Astronomische Nachrichten* (Continental).

**Athabasca** (Indian, "swampy"). A district of the North-West Territories (*q.v.*), and future province of the Dominion of Canada. Lies north of Alberta and east of British Columbia. Area, 122,000 sq. m.

### ATHLETICS, '98.

The principal competitions resulted as follows:—On Dec. 5th, '97, in a match between C. Harper and J. V. Cunliffe over a 130-yards course, the former having  $1\frac{1}{2}$  yards start, the result was so close that it was impossible to say who won, though the referee gave his decision in favour of Cunliffe. On Dec. 9th Cambridge University easily defeated Oxford in the Cross-country running. Middlesex won the Southern Counties Cross-country Race, Surrey being second. On January 22nd C. H. Kilpatrick, the famous American runner, beat G. B. Tincler on a half-mile course at Rochdale after a splendid race, time 1 min.  $5\frac{1}{2}$  sec., and on January 29th, Tincler, in a  $\frac{3}{4}$ -mile race, beat Kilpatrick by 5 yards in 3 min.  $13\frac{1}{2}$  sec. at Blackburn. The Midland Counties Cross-country Championship was held at Kettering on Feb. 11th, when the Birchfield Harriers were the winners, S. J. Robinson, Northampton, coming in first in 44 min. 23 sec. On Feb. 25th Crossland met Hurst on a 10-mile course, in which the latter was successful, Crossland not finishing the distance. The North of the Thames Junior Cross-country Championship was won by the Tee To Tum A.C., C. S. Selsby, Hampstead Harriers, coming in first. The South of the Thames Champions are the Wandale Harriers, W. H. Cornelius, St. Mark's A.C., being the individual winner. The National Cross-country Championship was run on March 5th, the Salford Harriers being the winners, C. J. Robinson, Northampton, being first in 61 min. 8 $\frac{1}{2}$  sec. The Clydesdale Harriers won the Scottish Cross-country Championship for the ninth time, Paterson, Watsonians, being first. On March 5th, E. C. Bredin beat A. R. Downer on a 500-yards course in the British professional record time of 59 $\frac{1}{2}$  sec. On March 12th, over a 10-

mile course, the Cardiff Harriers secured the Cross-country Championship of Wales, R. G. Brookes, of the same club, covering the course in the Welsh record time of 58 min. 4 sec. On March 20th, over a course of 145 kilometres (nearly 9 miles), the French and English athletes had an international race near Paris, when the latter hopelessly beat the French—all the seven Englishmen coming in before the first Frenchman. C. J. Robinson, of Northampton, was the winner. The Irish Cross-country Championship was won easily by the Haddington Harriers. The Ten Miles Amateur Championship at Stamford Bridge, on April 2nd, was won by C. J. Robinson, of Northampton, in 53 min. 12 sec. On April 9th W. Endeau, Polytechnic Harriers, walked 44 miles 960 yards in 7 hrs. 33 min. 20 sec. on the road from Ilford to Chelmsford and back in infamous weather. On April 10th, in a 2-miles match between G. B. Tincler and J. J. Mullin at Dublin, the former won in 9 min. 30 sec.; and on April 12th, in the 4-miles race for the Irish Championship, Mullen was the winner in 21 min. 10 $\frac{1}{2}$  sec. The Scottish Ten Miles Amateur Championship was won by W. Robertson, Clydesdale Harriers, in 55 min. 10 sec. Leonard Hurst lowered the professional twenty miles record by running that distance in 1 hr. 55 min. 33 sec. Three races for £600, one, two, and three miles, were arranged between F. E. Bacon and G. B. Tincler. The first was won by Tincler easily in 4 min. 16 $\frac{1}{2}$  sec., the second also in 9 min. 14 $\frac{1}{2}$  sec. An International Match between Welsh, of Scotland, and Tysoe, representing England, over one mile, resulted in the victory of Welsh, who created a fresh amateur record for Scotland of 4 min. 23 $\frac{3}{4}$  sec. On June 23rd a 1000 yards race was decided between F. E. Bacon and E. C. Bredin, when the former won in 2 min. 20 $\frac{1}{2}$  sec. on a grass course. The Marathon race at the Olympian Games at Athens took place on June 25th, when a Frenchman named Champion covered the 40-kilometres course in 2 hrs. 30 min. The Oxford and Cambridge Sports were to have been held as usual on the day before the Boat Race, but a gale of wind and snowstorms necessitated their postponement, and they eventually came off on June 29th, ending with the victory of Oxford in 7 out of the 9 events. The results were as follows:—High jump: H. S. Adair (Oriol, O.), 5 ft. 9 in. Putting the weight: F. E. Snowball (Queen's, O.), 37 ft. 4 in. Hundred yards: C. R. Thomas (Jesus, O.), 10 $\frac{1}{2}$  sec. One mile: A. L. Dawson (Balliol, O.), 4 min. 25 $\frac{1}{2}$  sec. Hurdle race: E. T. Garnier (Oriol, O.), 16 $\frac{1}{2}$  sec. Long jump: G. C. Vassall (Oriol, O.), 22 ft. 5 $\frac{1}{2}$  in. Throwing the hammer: L. O. T. Baines (Trin. Hall, C.), 102 ft. 7 in. Quarter-mile: F. L. Carter (Caius, C.) and C. G. Davidson (Sidney Sussex, C.), dead heat, 50 $\frac{1}{2}$  sec. Three miles: J. M. Freemantle (Hertford, O.), 15 min. 34 sec. The Amateur Athletic Association Championship Meeting was held at Stamford Bridge on July 2nd, when the principal events were as follows:—One mile: H. Welsh, 4 min. 17 $\frac{1}{2}$  sec. Hundred yards: F. W. Cooper, 10 sec. Putting the weight: D. Horgan, 45 ft. Hundred-and-twenty yards hurdle race: H. E. Parkes, 16 $\frac{1}{2}$  sec. High jump: P. Leahy, 5 ft. 11 $\frac{1}{2}$  in. Half-mile: A. E. Relf, 1 min. 56 $\frac{1}{2}$  sec. Throwing the hammer: T. F. Kiely, 140 ft. 1 in. Four miles: C. Bennett, 20 min. 14 $\frac{1}{2}$  sec. Long jump: W. J. M. Newburn, 23 ft. 7 in. Four miles walking race:

W. J. Sturgess, 29 min. 10 sec. Quarter-mile: W. Fitzherbert, 50 sec. Pole jump: H. Poole, 10 ft. 3 in. Two miles steeplechase: G. W. Orton, 11 min. 48½ sec. The Rev. W. E. Lutyens ran 1000 yards on July 5th at Stamford Bridge in the British record time of 2 min. 14½ sec., his 900 yards being 2 min. 0½ sec.—a world's record. In the *Ireland v. Scotland Contest*, on July 11th, the former won by 9 events to 2 with some very good performances, including W. J. M. Newburn's record long jump of 24 ft. 0½ in. A few days afterwards Newburn jumped the marvellous distance of 24 ft. 6¾ in. at Mullingar. A. R. Downer beat H. Hutchens in a 200 yards race (giving him 7 yards start) in 20½ sec. at Rochdale on Sept. 10th. Two matches between F. E. Bacon and L. Hurst were run in October; the first, over a course of 10 miles, was won by Bacon, the second, over a 15-mile course, was won by Hurst.

**Auctioneers' Institute of the United Kingdom (Incorporated)** The, has for its objects the provision of a central organisation for auctioneers, valuers, and land, estate, and house agents, and the promotion of the efficiency and usefulness of the profession. Branches of the Institute have been established in (1) Yorkshire; (2) South Wales and Monmouthshire; (3) Lancashire, Cheshire, and Derbyshire; (4) Northumberland and Durham; (5) Kent, Surrey, and Sussex. Lectures and papers are given at the Institute monthly during the session—October to March. Membership, either as Fellow, Associate, or Student, may be obtained by examination or under the "Practice" qualification. The examinations are held annually in March or April. **President**, Mr. Edward Dobson (Dobson & Son), Bradford. **Secretary**, Mr. Charles Harris. **Offices**, 57 and 58, Chancery Lane, W.C.

**Austin, Alfred**, appointed Poet Laureate on New Year's Day '96, was b. 1835 at Headingley, near Leeds. He was ed. at Stonyhurst College and St. Mary's College, Oscott, and took his degree at the London University in '53. He was called to the bar of the Inner Temple, '57. His bent, however, was always towards literature, and he published his first acknowledged poem, entitled "The Season," in '61, having already published, anonymously, a poem called "Randolph," in his nineteenth year. His best-known works are "The Human Tragedy," "Savonarola," "The Tower of Babel," "Prince Lucifer," "Fortunatus the Pessimist" ('92), "The Garden that I Love" ('94), "In Veronica's Garden" ('95), "England's Darling," ('96), and "The Conversion of Winckelmann" ('97). For many years he was a writer in the *Standard* and the *Quarterly Review*. He was also one of the founders of the *National Review*, which he edited, in conjunction with Mr. W. J. Courthope, during the first years of its existence. A collected edition of his works was issued in six volumes in '02. Address: Swinford Old Manor, Ashford, Kent.

**Australasia**, A loose term variously applied. It usually signifies (1) the Australian colonies, together with Tasmania, New Zealand, and Fiji; or (2) Australia, Tasmania, New Zealand, New Guinea, New Britain, and New Ireland, Solomon Islands, New Caledonia, and New Hebrides.

**Australasian Association for the Advancement of Science.** The Association was formed in '86, and is modelled on the British Association. The sections include Astronomy,

Mathematics and Physics, Chemistry, Geology and Mineralogy, Biology, Ethnology and Anthropology, Geography, Economic Science and Agriculture, Engineering and Architecture, Sanitary Science and Hygiene, Mental Science and Education. The eighth session will be held at Melbourne in 1900, and the ninth at Hobart (Tasmania) in 1902. The **Permanent Hon. Secretary** is Professor Liversidge, and his address is The Chemical Laboratory, the University, Sydney, N.S.W.

### AUSTRALIA.

Australia is the largest island in the world about one-fifth less than Europe, and about as large as the United States, excluding Alaska. It is situated south-east of Asia, dividing Pacific from Indian Ocean; extends 2400 miles west to east, and 1971 miles north to south. **Area** computed at 3,031,169 sq. miles, or twenty-six times the size of Great Britain and Ireland. **Present total population** about 3,445,000. Wholly British possession. Divided into the colonies of **Queensland**, pop. 493,704, capital Brisbane; **New South Wales**, pop. 1,335,800, capital Sydney; **Victoria**, pop. 1,174,888, capital Melbourne; **South Australia**, pop. 361,483 (including the Northern Territory), capital Adelaide; and **Western Australia**, pop. 170,021, capital Perth. (For separate accounts of these colonies see under their respective alphabetical headings. For latest statistics see *BRITISH EMPIRE*, table.) Australia is a great plateau, elevated on the east and inclined towards the west. The eastern half and most of the other territories bordering the coasts on north and west are extremely fertile, and well adapted for grazing. Wool still continues to be the staple export, but the trade in frozen and tinned meat is fast increasing. A wine industry appears to be rapidly growing up, especially in South Australia. The great central depression is sterile, and almost impassable on account of want of water, together with prickly growths. Coal abounds in various districts, particularly in New South Wales and Queensland. Gold, silver, tin, iron, and copper are extensively worked. Climate varies from tropical to temperate. There are over 11,000 miles of railroad open and 65,000 miles of telegraph. The black aborigines are few, and rapidly decreasing, but their present strength is probably about 200,000. The progress of the country during the last fifty years has been wonderful. But this progress has not been attained without considerable expenditure, and the Australian colonies have gone very far in this direction. The aggregate debt of the colonies in '98 amounted to about £180,000,000, most of the expenditure, however, being reproductive.

**Australasian Federation.**—The question of federation has attracted attention more or less ever since '52, but the recent history of the movement began in '86, when a Federal Council, sanctioned by the Imperial Parliament, met at Hobart. In Oct. '89 Sir Henry Parkes, the then Premier of New South Wales, took the initiative in calling together "a national convention for the purpose of devising and reporting upon an adequate scheme of Federal Government." The matter was taken up by all the Australasian governments, with the result that on Feb. 6th, '90, a conference met in Melbourne, and carried resolutions in favour of such a scheme. The **Australasian Federal Convention**, which met at Sydney (March 2nd, '91),

marked a great advance. Its object was to frame a constitution for the Dominion of Australia. Sir Henry Parkes was unanimously selected as President, and the chief governmental representatives of New South Wales, Victoria, Queensland, South Australia, Tasmania, New Zealand, and Western Australia were present. This Convention, on April 9th, passed a Bill which proposed to establish a Federal Constitution for the Commonwealth of Australia. By the Bill it was provided that a Governor-General should be appointed by the Sovereign, and that each colony (or state) should contribute to the Commonwealth Parliament representatives from its individual Legislature. This Parliament should consist of a directly elected House of Representatives and a Senate composed of delegates from all the colonies. A salary of £500 should be paid to the members of both Houses. Seven Ministers, to be known as "the Queen's Ministers of State for the Commonwealth of Australia," should assist the Governor-General. There should be a Supreme Court, as in the United States, whose functions would render unnecessary the Privy Council. Freedom of Trade between the various colonies was also agreed to.

In '94, after a period of inaction, there were signs of renewed activity. A conference of Australian Premiers, summoned by Mr. G. H. Reid, the Premier of New South Wales, met at Hobart (Jan. 29th, '95), and adopted a bill entitled "The Australasian Federation Enabling Act," which provided for the inclusion of New Zealand, if that colony should so desire. The procedure laid down was that ten representatives of each colony should form a convention to frame the Federal Constitution, and as soon as three or more colonies had elected their representatives the Governors of those colonies should summon the convention. The Constitution, having been framed and adopted, should be referred to the direct vote of the electors for acceptance or rejection, and if three colonies accepted it it should be presented for Imperial enactment. Delegates to the Federal Convention were accordingly elected by New South Wales, Victoria, South Australia, West Australia and Tasmania early in '97, Queensland standing aloof. The Convention opened at Adelaide (March 22nd), Mr. C. C. Kingston, Premier of South Australia, was chosen President, and Mr. Barton, of New South Wales, having been deputed to prepare resolutions embodying the principles of the new Constitution, submitted the following resolutions, which were carried by a unanimous vote:—

1. That the powers, privileges, and territory of the Colonies shall remain intact, except in respect of voluntary surrenders with a view to secure uniformity of law and administration.
2. That after the creation of a Federal Government there shall be no alteration of boundaries without the consent of the Colony concerned.
3. That the exclusive power of imposing and collecting customs and excise be vested in the Federal Parliament.
4. That the exclusive military and naval control be vested in the Federal Parliament.
5. That trade and intercourse between the federated Colonies be absolutely free.
6. That, subject to the above conditions, the Convention shall approve the framing of a Constitution whereby a Parliament shall be established, consisting of a States Assembly or

Senate, and a National Assembly or House of Representatives, the former to consist of representatives of each Colony chosen in the manner best calculated to secure perpetual existence, with responsibility to their own people, and the latter to be elected in districts formed on a population basis, and to possess the sole power to originate revenue Bills and impose taxation. The executive shall consist of a Governor-General appointed by the Queen, as well as of such persons as shall be appointed as his advisers, and of the Supreme Federal Court, which shall also be the High Court of Appeal of the Federated Colonies.

The Convention, having resolved to take the Bill of '91 as a basis, remained in session till April 23rd, '97, and sat in Sept. '97, and again from Jan. 20th to March 17th, '98; and at these sittings the form of the Constitution Bill was vigorously and exhaustively debated. There were three main points on which the discussion turned. The first was that of the representation of the colonies in the Upper House. The smaller colonies stood out stoutly for equal representation independently of the numbers of the population, and this was finally conceded; but the larger colonies insisted that the Upper House should have no power to amend money bills. Eventually a compromise was arrived at, and it was agreed that the Upper House might suggest alterations to the Lower. It was further provided that all powers not definitely vested in the commonwealth should be retained by the individual colonies. The second difficulty was as to the means of settling a deadlock in case of disagreement between the two Houses. This was met by a clause providing for simultaneous dissolution, and, if that should not settle the matter, for a joint sitting of both Houses and a two-thirds majority. The third point arose in connection with the financial arrangements. The Convention agreed that the customs revenue of the colonies should be applied to defray federal expenditure, but the question was how should the surplus not required (if there should be any) be divided amongst the colonies. The Convention decided that a uniform tariff should be established for the federated colonies within two years, and that within the borders of this tariff trade should be free. The just contribution of each colony to the general trade and the just share in the general expenditure of the Commonwealth should then be ascertained by careful examination during a period of five years, and on the data so obtained the division of the surplus customs revenue should be made.

The Bill was then referred to a *plébiscite* in each colony, and strong opposition to some of its provisions was manifested in New South Wales (*q.v.*). The result of the voting was as follows:—

Colony.	For the Bill.	Against the Bill.
New South Wales ..	70,990	65,619
Victoria .. ..	93,473	20,570
Tasmania .. ..	13,496	2,900
South Australia ..	35,771	17,300

Some particulars as to the conflict in New South Wales will be found in the article under that heading. When the New South Wales Parliament was opened (June 21st), the Governor said that the Government were preparing proposals for the amendment of the Bill in the following respects:—

1. That a bare majority instead of three-fifths

be effective at joint sittings of the Houses, or that provision be made for a national Referendum to solve deadlocks.

2. That some of the financial provisions be recast and the Braddon clause omitted.

3. That the Senate should not amend money Bills.

4. That there should be the same protection for the territorial rights of each State as there is for the representation of each State in the Federal Parliament, including more definite provisions regarding inland waters.

5. That regarding the seat of government, the Canadian plan, slightly modified, be adopted.

6. That appellate jurisdiction be remodelled.

Mr. Reid, the Premier of New South Wales, asked the other Premiers to meet him in conference, to see if the Bill could be amended, but his proposal was not accepted.

**Austria, Emperor of.** See FRANCIS JOSEPH.

### AUSTRIA-HUNGARY.

Austria-Hungary is an empire under the rule of Francis Joseph I. of Hapsburg, Emperor of Austria and King of Hungary, and is composed of a Cisleithan portion, officially known as Austria, and a Transleithan portion known as Hungary, each having its own constitution, a limited monarchy, and each possessing a separate parliament, but uniting under a common sovereign in the establishment of a common army, navy, financial, diplomatic, postal, and telegraphic services. Legislation in regard to common affairs is accomplished by a supreme body known as the *Delegations*. Of these there are two, each composed of 60 members, representing the legislative bodies of Austria and Hungary, the upper houses returning 20 and the lower houses 40 delegates. The members of the Delegations are appointed for one year, and are summoned annually by the Emperor alternately at Vienna and at Budapest. Subject to the Delegations are the three executive departments for common affairs—Foreign Affairs, War, and Finance. The agreement between the two countries termed the *Ausgleich* embraces the regulation of their fiscal and commercial affairs, of the quota paid by them to the common expenses of the Empire, and the privileges of the Austro-Hungarian Bank. The customs and commercial treaty is renewable every ten years, and was denounced in Dec. '96 by the Hungarian Government in order to secure, if possible, more favourable terms for the future. After several months spent in negotiations, it was found impossible to arrive at any satisfactory understanding, and the deputations appointed for that purpose separated (May 4th, '97). The representatives of Hungary urged that their share of the common expenses should be based on the revenue derived from taxation in each half of the Monarchy; whereas the Austrian delegates argued that the basis should be the number of the population. The former contributions of Austria and Hungary were 68.6 per cent. and 31.4 per cent. respectively, and it was sought to raise Hungary's share to 43.14, or at the least to 36 per cent., whereas Hungary declined to pay more than 33.2 per cent. The treaty was provisionally prolonged for one year (Oct. 21st, '97), and the subsequent negotiations are set out below. **Austria** (capital Vienna)—area, 115,903 sq. m.; estimated population in '96, 25,249,701—is governed by an Emperor and by the *Reichs-*

rath, or Council of the Empire, consisting of an Upper House and a Lower House. The *Reichsrath* has its own ministers and government, and exercises full parliamentary functions on all matters within its competence—from which, however, **Foreign Affairs** and **War** are excluded. The present Upper House contains 225 members. It is composed of the Princes of the Imperial family who are of age, of whom there are 21, of 67 hereditary nobles, of 17 archbishops and bishops, and of 120 life-members nominated by the Emperor for distinguished services in science or art, or to the Church or State. The Lower House contains 425 members, who are the popular representatives of the sixteen provinces which comprise the Austrian Empire. According to the present system they are elected for six years by five groups: the large landed proprietors, who choose 85 members; the Chambers of Commerce, who choose 21; the inhabitants of towns who pay 50 fl. in direct taxation or who have a vote for the provincial diet, 118; the inhabitants of country districts similarly qualified, who choose 129; and the general body of electors, including roughly all male citizens over twenty-four with a residential qualification of six months, who choose 72. In these four groups there are comprised about 1,700,000 voters. Purely provincial matters are administered by the seventeen provincial diets (viz., of Upper and Lower Austria, Salzburg, Styria, Carinthia, Carniola, Trieste, Tyrol, Vorarlberg, Görz and Gradiska, Istria, Dalmatia, Bohemia (*q.v.*), Moravia, Silesia, Galicia and Bukovina), while local matters are dealt with by communal councils.—**Hungary** (capital Budapest)—area, 125,039 sq. m.; population, '96, 18,550,512—embraces the kingdoms of Hungary, Croatia-Slavonia, and Transylvania, and is governed by a King (the Emperor of Austria), and a *Reichstag*, consisting of a House of Magnates and a House of Representatives. The former comprises 181 hereditary peers, paying land tax of at least 3000 fl. a year, some 52 high ecclesiastical dignitaries of the Roman Catholic, Greek, and Protestant Churches, 84 life-peers, all the archdukes who have attained their majority, 3 delegates from the Diet of Croatia-Slavonia, and 17 state dignitaries and judges. The House of Representatives contains 453 members, elected for five years by male citizens over 20, with a low property qualification. Of these 413 represent Hungary, and 40 Croatia and Slavonia. Transylvania is in full legislative and administrative union with Hungary, but Croatia-Slavonia has its own provincial diet, consisting of 90 members, for the transaction of provincial matters. The population of Transylvania is largely Roumanian, and much discontent exists amongst them on account of the persecution and injustice which they allege they suffer at the hands of the Magyar rulers of Hungary.—**Bosnia-Herzegovina** (*q.v.*), though in strictness still a province of the Porte, has since the Treaty of Berlin in '78 been occupied and administered by Austria-Hungary, and may fairly be considered as belonging to that empire. Its area is 23,262 sq. miles, and the population is about 1,600,000.—The chief religious bodies in Austria, where religious liberty is the ruling principle, are Roman Catholics, Old Catholics, Lutheran and Reformed Evangelicals, Armenians and Jews. In Hungary much the same divisions exist, and full liberty and equality prevail.

Attendance in the elementary schools is compulsory in both countries, though the period of attendance varies in different districts, and the educational fabric includes also gymnasia and other preparatory schools, universities and colleges, and technical schools. The larger half of the population in both countries are engaged in and dependent upon agriculture, cereals, beet, wine and silk being produced. There are extensive and valuable forests, and mining is also carried on very largely. The chief exports are sugar, grain, and other agricultural produce, timber, woollen and leather goods. The estimated revenue and expenditure for common affairs for '98 amounted to £13,766,667. For Austria alone the revenue was £60,170,167, and the expenditure £59,835,834; for Hungary alone the revenue was £41,649,084, and the expenditure £41,639,250; for Bosnia-Herzegovina the revenue was £1,519,250 and the expenditure £1,579,416. The common debt of Austria-Hungary amounted in '98 to about £250,000,000; the special debt of Austria to £124,200,000, and of Hungary to £181,475,000. The imports for '97 (excluding precious metals) amounted to £63,552,917, and the exports to £63,829,392. See FOREIGN ARMIES, FOREIGN NAVIES, and DIPLOMACY.

**Political Parties.**—Austria. The Lower House of the Reichsrath includes members of widely varying race and creed. After the general election of '91, for instance, there were German Liberals, National Germans, Anti-Semites, Poles, Ruthenians, Young Czechs, Old Czechs, Independent Czechs, Left Centre, Clericals, Slavonians and Serbo-Croats, Bohemian Feudal Conservatives, Moravian Central Party, Italians, Roumanians, and German Conservatives. The chief parties, however, were the German Liberals, the Poles, and the German Conservatives and Clericals. Count Taaffe, long the Prime Minister, in Oct. '93 lost the support of the German Liberals, the Poles, and the Conservatives, because of his Electoral Reform measure, which practically amounted to a measure of universal suffrage; and he finally had to resign. He was succeeded by Prince Windischgrätz, who, with the help of the Poles, the German Liberals, and the Conservatives, managed to form a Coalition Cabinet, which held office throughout '94. The Conservative and Clerical element, however, prevailed in the coalition, and in consequence it did not hold together long. Prince Windischgrätz resigned in June '95, and was succeeded by a provisional administration under Count Kielmansegg until a non-party Cabinet was formed in September under Count Badeni, who at the outset declared his absolute independence of the various parliamentary groups. During '96 the Anti-Semites, the party of ultra-Clerical reaction, obtained great prominence, chiefly through the efforts of Dr. Lüger, who was again and again elected Burgomaster of Vienna, though the Emperor would not allow him to fill the post. The old German Liberal party also collapsed, and in place of it there arose a party called the German Progressist party, strongly opposed to the Clerical reactionists. At the general election of March '97, held under the reformed electoral law, the main features were the striking increase in the Socialist vote, and the still remarkable strength of the Anti-Semites, or "Christian Socialists," as they prefer to call themselves, together with the disappearance of the Old German party, which split into

the German Progressives, with 77 members, and the National Germans, with 43. A split also occurred in the Polish party, the Agrarian Socialists having gained many adherents in Galicia, and the Social Democrats in the towns. The Poles, the Moderate German Liberals, and the Young Czechs formed the majority upon which Count Badeni relied during '97. His famous language ordinance, allowing the official use of the Czech language in Bohemia and Moravia, alienated the Germans, and provoked a racial conflict of a most bitter character between the Germans and the Czechs. In '98 the relations of parties became more confused than ever, the Clerical and Polish groups co-operating with the Czechs, and the Social Democrats joining their forces with the Germans. As the year went on, however, the Germans of all shades of opinion showed an increasing tendency to combine against the Slavs, the German Clericals falling more into line with the other German sections—the German People's party, including about 40 members returned mainly from the Alpine provinces; the German Progressives, numbering about 50 members, coming mainly from Bohemia and Moravia; the German landed proprietors, numbering about 25; and the German Nationalists, a small but influential group of 5, including the redoubtable Herr Wolf. The Social Democrats joined with these numbered 14. The attitude of resistance to the Government taken up by the German People's party was influenced, not only by the strong wave of pan-Germanic sentiment, but by the belief that the failure of the negotiations for the renewal of the *Ausgleich* would be beneficial to the agricultural interests of Austria.—**Hungary.** Parties are distinguished as Liberals, Independents, the Croatian delegates, who usually vote with the Liberals, and the Nationalists, who vote now with one party and now with another. After the '92 election the Liberals numbered 240; the Independents, who aim at the liberation of Hungary from all but the monarchical tie with Austria, 61; and the Nationalists 49. M. Tisza, who commanded the support of the majority in the Chamber during his seventeen years' leadership, retired in '91. His colleague, Count Szapary, succeeded him, but fell in Nov. '92, over the civil marriage question, and was succeeded by Dr. Wekerle, who formed a strong ministry, and entered office pledged to a reform of the marriage laws. This reform he in great part accomplished, but owing to the persistent attacks of the Clericals he was compelled to retire during '95, and Baron Banffy took his place, and completed his programme of reforms, the Liberal party proving strong and homogeneous enough to overcome all opposition. A new party, called the Hungarian People's Party, was formed in Jan. '95, with a showy programme, but with the real object of organising Catholic opposition to Liberal measures. This party has since openly adopted Anti-Semitism as part of its programme. During '95 also a split occurred in the Independent Party, owing to M. Ugron's objections to M. Kossuth as leader. M. Ugron is the head of the Clerical section of the party. At the general election in Oct. '96 the Liberals gained a decisive victory. There were returned 282 Liberals, 37 Nationalists, 48 Kossuthists, 7 Ugronists, 20 of the People's Party, and 10 owing allegiance to no party. The net Liberal gain was estimated to be 65 seats, while all the other parties except the Kossuthists, led

by M. Franz Kossuth, lost ground. The Kossuthists showed a disposition to take advantage of the difficulties during '97 and '98 over the *Ausgleich* negotiations to urge that the country's independence should be declared.

**History, '98.—Austria.** The violent scenes in the Reichsrath, caused by the opposition offered by the Germans to Count Badeni's language ordinance, at last led to the resignation of the Count and his Cabinet (Nov. 28th, '97), who thus virtually confessed their defeat. It appeared that unless the Cabinet had resigned there would have been dangerous popular disturbances. The Reichsrath was at the same time prorogued, and Baron Gautsch, a former Minister of Education, was named as the new Prime Minister. This, however, did not bring about peace, for the triumph of the Germans involved the defeat of the Czechs, and they expressed their displeasure by demonstrations which at Prague assumed the proportions of a popular rising (Dec. 1st). The German minority there were subjected to every kind of outrage and plunder, till severe measures were taken by the Government to restore order. The session of the Reichsrath was eventually closed by Imperial decree, and, all attempts at a renewal of the *Ausgleich* by parliamentary means having failed, the Emperor further directed that Austria should contribute to the common expenditure for '98 the same sum as in the previous year (31st). The Government made a suggestion for a compromise to the Bohemian Diet sitting at Prague (Jan. 17th). They suggested that the country should be divided into three districts, German, Czech, and mixed, and that in each district official and public business should be conducted in the German, the Czech, or in both languages. The intention of the Government to arrange for the teaching in the intermediate schools of Bohemia of the Czech language was also announced, and awoke great indignation amongst the Germans, the various sections of whom drew together in their common hatred of the Czechs. The Upper Austrian Diet carried a resolution declaring the language ordinance to be opposed to the rights of the German people (27th). Meanwhile vigorous efforts were made by the Government to effect a compromise between the opposed parties, but these were absolutely without avail, and Baron Gautsch resigned office (March 6th). Count Franz Thun, ex-Stattholder of Bohemia, was then asked by the Emperor to form a Cabinet, and for a time the prospect was more hopeful, but when the Reichsrath reassembled (21st) the obstructionists seemed as irreconcilable as ever. To the hatred evoked by the language ordinance was added the irritation caused by the Lex Falkenhayn, or the modification of the standing orders effected by Count Badeni in order to permit of the ejection of members by the police. Various speakers made it abundantly clear that until the Government satisfied the Germans on the language question neither the *Ausgleich* nor any other measure would be considered. Bills for the renewal of the *Ausgleich* were, however, introduced (April 20th), and the provisions contained in them awoke great indignation because of their alleged injustice to Austria. A motion for the impeachment of Count Badeni in respect of the Lex Falkenhayn was carried by a majority of 8 votes (26th). Count Thun then made an appeal to the Reichsrath to unite in trying to

solve the language difficulty in a legal and constitutional way. He promised the help of the Government if a representative committee were appointed, and said that the modifications of the Badeni ordinances proposed by the Gautsch ministry could be altered or abolished if a better solution of the difficulty were arrived at (27th). The official celebration of the jubilee of the Emperor's reign commenced (May 8th) with the opening at Vienna of a commemorative exhibition, illustrative of the progress made during His Majesty's reign in all branches of industry and agriculture. Events which occurred at Gratz, where the Government employed Bosnian troops to quell disturbances, and took severe measures against the Germans, led to further embitterment, and the Reichsrath was prorogued (June 13th). Anti-semitic disturbances which led to outrages on Jewish life and property took place in Western Galicia, notably at Neu Sandec and Limanowa, and the whole district was placed under the *Standrecht*, a process of summary jurisdiction giving the Government very large and drastic powers (20th). The Premier made one more effort to bring about an understanding on the language question, by submitting to both Czechs and Germans a scheme for its legislative settlement, the details of which, however, were not made public (July 11th). The Czechs promised their consideration of the scheme, but the bulk of the Germans declined to discuss it, or even to confer on the question, until the language ordinance had been abrogated. This having failed, the session of the Reichsrath was closed. Negotiations as to the *Ausgleich* were then carried on by the Austrian and Hungarian Premiers, and at last it was announced that the Emperor had left the solution of the difficulty to the two Premiers (Aug. 15th). They arranged (30th) that the *Ausgleich* should once more be submitted to the Reichsrath, and if that produced no result, that a bilateral arrangement should be made whereby Hungary should regulate her customs and economic relations with Austria independently and in accordance with her own laws, while the Austrian Ministry should arrange how the corresponding provisions in Austria should be put into force. The details of these provisions were not made public. The Empire was profoundly shocked and moved by the news of the assassination of the Empress at Geneva by an Italian Anarchist (Sept. 11th), and from the whole world messages of sympathy were sent to the bereaved Emperor. In consequence of this sad event the Jubilee festivities arranged for November and December were abandoned. The body of the Empress was conveyed to Vienna and interred there (18th), and for a time it appeared that the political situation might improve through the sobering influence exercised by the death of the Empress on all parties. But a demand for the disclosure of the details of the arrangement with Hungary referred to above brought about the resignation of Dr. Barnreither, the representative of the Constitutional Landed Proprietors (29th), and though the Opposition refrained from preventing by obstruction the introduction of the *Ausgleich* proposals of the Government, their hostility was made very evident. The intention of Count Thun was to take advantage of the anticipated obstruction in the Reichsrath to close the session and conclude an arrangement

with Hungary in virtue of Article XIV. of the Constitution. This policy was upset by the abandonment of obstruction, with the evident aim of debating the *Ausgleich* Bills as long as possible and then rejecting them, thus depriving the Government of any excuse for resorting to Article XIV. A member of the extreme Clerical party, Baron Dipauli, was appointed to fill Dr. Bärnreither's place in the Cabinet (Oct. 6th), and this was regarded as evidence that Count Thun had made up his mind to rely on the Clerical groups in the Reichsrath (except the Anti-Semites) for a majority.—**Hungary.** The Premier introduced a Bill authorising the prolongation of the *Ausgleich* (Dec. 5th, '97), although the Austrian Parliament had not come to any decision on the matter. The Bill provided that a definite agreement should be come to by May 1st, and in case it should not be arrived at, that Hungary should itself settle the arrangements for its commercial relations with Austria. The extreme party of independence, led by M. Kossuth, obstructed it to such a degree as to prevent this for a time, but ultimately it was adopted (Jan. 4th). From time to time symptoms of a grave state of affairs in many of the agricultural districts appeared, and the peasants in the neighbourhood of Hatzfeld near Temesvar broke out in open revolt (March 31st), and put to flight the *gendarmierie* sent against them. In view of the state of affairs in Austria and the apparent impossibility of the *Ausgleich* being renewed

in a constitutional manner, the Government drew up a customs tariff for Hungary alone and submitted it to a conference of those most interested in the matter during July. The majority in numbers of those attending the conference were in favour of setting up an independent customs system, but the weight of influence was on the other side, and the Government took up the same position. When the Reichstag met after the conclusion of the arrangement between the Austrian and Hungarian Premiers (see above) Baron Banffy declared that the Ministry and the whole Liberal party were convinced that the economic relations with Austria ought not to be severed. The Extreme Left, however, declared that they would energetically oppose any Bill which did not provide for the independent settlement of the economic relations with Austria (Sept. 6th).

**Authors, Society of.** See INCORPORATED SOCIETY OF AUTHORS.

**Azores, The.** A group of islands in the North Atlantic; belong as an integral part to the kingdom of Portugal. **Area**, 1005 sq. m.; **pop.** 255,594. **Capital**, Ponta Delgada, on San Miguel Island; but the Governor usually resides at Angra, in the island of Terceira. People Portuguese and Spanish, mostly very poor. Governed as a province of Portugal. Discovered 1439. Called also Western Islands or Terceiras. See COLONIES, ETC., OF EUROPEAN POWERS.

## B

**Baden.** See FREDERICK, GRAND DUKE OF, and DIPLOMATIC.

**Bahama Islands.** A chain of islands, 600 miles in length, lying between the S.E. corner of Cuba and Florida. **Area**, 5450 sq. m. **Pop.** 52,316. Twenty islands of the group are inhabited, but there are besides about 3000 islets and rocks. The chief island politically is **New Providence** (area, 85 sq. miles), on which is the capital, **Nassau**, pop. 12,000, a favourite winter health resort for Americans and West Indians. Other islands are Andros, Eleuthera, Great and Little Bahama, Abaco, Inagua, etc. Much forest and valuable timber. Cattle largely reared. San Salvador (either Cat Island or Watling Island—probably the latter), where Columbus first landed in America in 1492, is one of the Bahamas. **Chief exports**: sponges, turtles, pineapples, oranges, hemp, cotton, and coconut. The Government is representative. There is a Governor and Executive, a Legislative Council and a House of Assembly. Education is free, compulsory, and unsectarian. For Governor, etc., see DIPLOMATIC; for latest statistics see BRITISH EMPIRE (table).

**Bahr-el-Ghazal** is the name of the old Egyptian province which encloses the district watered by the southern tributaries of Bahr-el-Arab and Bahr-el-Ghazal. It was under the control of the Arabs till 1879, when a settled government was established under Gordon by Gessi Pasha on behalf of Egypt. The province remained in the possession of Egypt till the

Mahdi's rebellion cut off all communication with Khartoum and Egypt, and compelled the then ruler, Lupton Bey, who made a most gallant fight, to surrender in '84. Lupton Bey claimed in '83 that he was the only one of the Soudan governors who could show a profit on his administration. This he accomplished through the richness of the province in ivory, rubber, gum and other products. It is said to be a good cotton-growing country, and abounds in timber. Slatin Pasha has drawn attention both to the fertility of the province and to its strategical importance. To the west of it lies the Ubangi district of French Congo; and it was thence that Major Marchand made his way through the Bahr-el-Ghazal to Fashoda in the summer of '98. Details as to what took place there after the fall of Omdurman, and the subsequent communications between the French and British Governments, will be found under EGYPT (see map), FRANCE, FRENCH CONGO and SOUDAN.

**Balfour, Rt. Hon. A. J., M.P.** See under COMMONS.

**Ball, Sir Robert Stawell, LL.D., F.R.S.,** was b. at Dublin July 1st, 1840, and was ed. at Chester and Trin. Coll. Dublin. Formerly Andrews Professor of Astronomy in the University of Dublin, and Royal Astronomer of Ireland ('74), now **Lowndean Professor of Astronomy** at Cambridge ('92). He is the author of several works, besides many papers on mathematics, astronomy, and physical science

in various publications. Knighted '86. "Starland," "In Starry Realms," "The Story of the Sun," "In the High Heavens," and "Great Astronomers," are amongst his chief works. Address: Observatory, Cambridge; Athenæum Club.

**Baluchistan.** A country in southern Central Asia, lying to the south of Afghanistan, and extending to the Persian Gulf. It includes (1) Independent Baluchistan, (2) Quetta and the Bolan, held on a perpetual lease from the Khan of Kelat since '83, and administered by the British Government; (3) British Baluchistan, which includes Sibi, Pishin and other districts assigned to Britain by the treaty of Gundamak; and (4) Afghan and Baluch tribal territories. The total area is about 130,000 sq. m.; population some 500,000 tribesmen. Quetta, administrative centre. The principal chief of Independent Baluchistan is Mir Mahmoud Khan, Khan of Kelat, who receives an annual subsidy from the Indian Government of 100,000 rupees a year. The valley is of great strategic importance, commanding the numerous passes to the south of the great caravan route through the Gomal to Ghuzni, Cabul, and Candahar.

**Bancroft, Sir Squire,** was born in London May 14th, 1841, educated privately, and made his first appearance as an actor at Birmingham, '61. After a successful career in the provinces, he played at the Prince of Wales's Theatre in London '65, and in '67 married Miss Marie Wilton, then the manager of the theatre, and herself a brilliant actress. Together they continued a most successful career till '80, when they opened the Haymarket, after rebuilding it internally, with Lord Lytton's comedy *Money*. After five years of further success they retired from management in July '85, but have since appeared occasionally. A book of reminiscences, jointly written by them, "Mr. and Mrs. Bancroft on and off the Stage," appeared in '88. Mr. Bancroft was knighted on the occasion of the Jubilee, '97. Address: 18, Berkeley Square, W.

**Banffy, Baron,** Premier of Hungary, was b. '42, at Klausenburg, and ed. at Leipzig and Berlin Universities. He travelled after leaving the latter university, and then took office in the Transylvanian Administration. In '75 he entered on an important task as a provincial prefect in Transylvania, and did his best to spread the spirit of Hungarian nationality in the district over which he ruled. When the Hungarian Upper Chamber was reformed he was elected a life peer. He had formerly been a member of the House. In '92 he was returned to the Reichstag, and was at once made president, and on the retirement of Dr. Wekerle he was appointed premier. He is a strong Liberal, and took office on the distinct understanding that he should be free to carry out Dr. Wekerle's programme. His energy and firmness were shown in the dispute with Count Kalnoky, which led to the resignation of the latter during '95, and the approval of his country was strongly manifested at the general election in Oct. '96, and has apparently been retained since.

**Bangor, Bishop of.** See under PEERS.

**Bank Holidays.** The Act, which declared that certain days in the year should be kept as public holidays, was brought in by Sir John Lubbock, and passed May 25th, '71. The holidays are, in England and Ireland: Easter

Monday, Whit Monday, First Monday in August, and Boxing Day (unless Sunday). Scotland: New Year's Day, Christmas Day (but should either fall on Sunday, then the following Monday), Good Friday, First Monday in May, and First Monday in August.

## BANKING.

### I. THE UTILISATION OF DEPOSITS AND CAPITAL BY PRIVATE AND JOINT-STOCK BANKS.

British and Irish bankers trade with the money deposited with them, by making profits in discounting bills of Exchange for short periods, and in obtaining interest for loans on Exchequer bills and other Government securities, and on railway and other debentures and the stock of public companies, dock warrants, and bills of lading, etc. To a much less extent money is lent by them on real and leasehold property, as the advances on such are generally unpaid for years. Considerable amounts are also lent by bankers on promissory notes, without further security, to highly trustworthy persons. They have frequently advanced large sums to merchants and manufacturers on insufficient security, to sustain their credit, in the hope that they might retrieve their affairs, and thus pay in full both the old and the new loans. By this proceeding many banks have been ruined in England, Scotland, and Ireland. For proper banking by private and joint-stock banks, the better method is that their capital should not be used for making profits on loans as the deposits are, but it should nearly all be invested in first-class securities, subject to little fluctuation in value, and which can at once be converted into money in the event of any large and unexpected demand by depositors. It is highly important also that a sufficient reserve should be kept to provide against commercial depression or panic. All persons of means avail themselves of the services of bankers in receiving and making payments on their account. In connection with this business, bankers not only cash and pass cheques, but present and receive payment for bills and drafts, and collect dividends and annuities, etc. For these services a percentage is charged, or an agreement is made that the customers shall keep an average balance of cash in the bank in proportion to the amount of business transacted for him. Some of the money paid therein is intended to meet the cheques and orders drawn against them in the ordinary course of business, and other sums are deposited for safe custody until required for investment. The former are generally placed under drawing or current, and the latter under deposit accounts. Those portions of either which banks do not keep in their coffers are used in discounting bills, and for loans on securities for short dates. Some provincial banks allow interest at a low rate on daily balances of their customers, but the general rule is to allow interest only on sums specially placed on deposit, this interest varying according to the London rate for the time being. When a person has an account current at a bank its proprietors are bound to pay his cheques to the full amount of the money held in hand on his account. Bankers are also bound to know their customers' signatures, and if the former cash a cheque with a forged signature they will have to suffer the loss;

and if they refuse to cash one from a wrong supposition that the drawer has no funds or insufficient money in the bank to meet it, the bankers will, if any injury results to him from this error, be liable to pay him damages.

## II. BANKERS' LIEN.

When a customer has placed any banking securities, as bills, notes, exchequer bills, stock, coupons, foreign bonds, and others of a similar kind, with his bankers without specifically appropriating them to any purpose, the bankers have a right to retain them until their customer has discharged all debts which may be due to them, even if the debt was not incurred or the loan made on the deposit of the securities. This right of retention of securities which are unconditionally placed in banks is termed a banker's general lien, which is part of the law merchant; but it does not, in the absence of a special contract, extend to such securities as are not banking or negotiable. If a banker takes a security payable at a future date his lien has gone. He has no lien on a customer's balance for bills discounted for him during the currency of the bills, nor on any plate, jewels, cash, or securities contained in a box deposited with him in his character of warehouseman and not as banker.

## III. THE SCOTCH BANK CREDIT SYSTEM AND UNPAID BILLS PROCEDURE.

The old practice adopted in Scotland of bankers making advances on cash credit has very greatly added to the progress and prosperity of the inhabitants of that part of Great Britain. This method of lending money is by allowing an account current to be regularly overdrawn to a certain specified limit. The advances are secured by two or more sureties, and interest is paid on actual over-drafts. As the London branches of the Scotch banks conduct their business on the London methods, the system does not generally obtain with them. As regards protesting unpaid bills, the Scotch banking law differs from the English. In Scotland, within six months after their dishonour, the bills and protests can be registered in the Court books, and in six days thereafter execution can be issued against the debtor without any further process.

## IV. PRIVATE AND JOINT-STOCK BANKS OF ISSUE.

By the Bank Charter Act of '44, only those bankers in the United Kingdom who were entitled to issue notes on May 6th in that year are allowed to do so. It was provided by this statute that the issue of English banks is to be limited to the average amount of notes which they had in circulation during the twelve weeks preceding April 27th, '44, provided that on an average of four weeks they were not to exceed the average ascertained; and no such notes are to be issued in London, or within sixty-five miles thereof, except by the Bank of England. While, therefore, the English banks have a fixed limit of issue, the Scotch and Irish are allowed to issue notes to any amount, provided they hold an equal amount of coin above their authorised amount. Thirty-eight private and thirty-one joint-stock banks in England and Wales issue their own notes. All the banks in Scotland which are joint-stock, and six

banks of this kind in Ireland, also do so. The majority of joint-stock banks in England and Wales, including the largest and most important, do not issue their own notes. No note payable to bearer on demand can be issued in these parts of Great Britain for less than £5, but the minimum value of Scotch and Irish bank notes allowed to be issued is fixed at £1. Bank of England notes are legal tender for all sums over £5, except at the Bank and its branches, and in Scotland and Ireland. The Bank of England, however, is not liable to pay cash at any of its branches for those notes not made specially payable at the branch at which they are presented for payment, but it is bound to pay in London all notes, whether those of the Bank of England itself or any of its branches. The holder of a bank note is, *prima facie*, entitled to its prompt payment, and he is not affected by the previous fraud of any former holder in obtaining it in the absence of evidence to show that he was privy to such fraud. Country bank notes are generally received as cash, but though taken as such, if they are presented in proper time and not paid, they do not amount to a payment, and the transferrer of the notes is still liable to the holder.

## V. REGISTRATION OF BANKING COMPANIES AS "LIMITED" OR "UNLIMITED."

By the Companies Act of '62, which has been amended by subsequent statutes, and especially the Companies Act of '79, it has been provided that no company or association consisting of more than ten persons shall transact banking business unless registered either as "limited" or "unlimited" under the Companies' Acts, or unless it has been formed in pursuance of some other statute or of letters patent. It has been further enacted that a banking company registered as "unlimited" may convert itself into a "limited" one. Any unlimited company may increase the nominal amount of its capital, by increasing the nominal amount of its shares, but no part of such increased capital shall be capable of being called up except in the event of and for the purposes of the winding-up of the company. When no such increase of nominal capital is made, the company may provide that a part of its uncalled capital shall not be capable of being called up except for winding up the company. A limited company may declare that any part of its still uncalled-for capital shall not be capable of being called up except for the company being wound up. A bank of issue registered as a limited company, either before or after the passing of this Act, is not to be entitled to limited liability in respect of its notes, but the members are, as to these, to continue liable as if it had been registered as unlimited, and if the bank is wound up, and the general assets are insufficient to satisfy the claims of both the note-holders and the general creditors, then the members of the banking company, after satisfying the note-holders, are to be liable to contribute towards payment of the debts of the general creditors a sum equal to the amount received by the note-holders out of the general assets of the company, *i.e.*, out of the funds available for the general creditors, as well as for the note-holders. Nearly all the joint-stock banks of England soon afterwards registered them-

selves as limited companies under the provisions of the '79 Act. The Bank of Scotland, the Royal Bank of Scotland, and the British Linen Company, established last century, were created Corporations before the Crown was empowered by statute law to create trading corporations with unlimited liability. Therefore they have always been limited banks, and therefore did not require to avail themselves of the recent Act to enable them to become so. All the other Scotch banks, which were carried on by Corporations with unlimited liability, registered themselves without delay as limited companies.

#### VI. NUMBER OF BANKS AND BRANCHES, BRANCHES OPENED AND CLOSED, BANKS IN LIQUIDATION, AND AMALGAMATIONS.

The total number of banks in the United Kingdom, private and joint-stock, up to Nov. '97, as stated in the *Banking Almanac*, '98, was 352. The new banks and branches opened in London and suburbs were 22, and those out of London 201. The branches closed out of London were 14. The number of amalgamations was 9, of those in liquidation 4, and the note issues of 7 banks lapsed.

#### VII. THE BANK OF ENGLAND.

This is the most important bank in the world. It was established in 1694 with a capital of £1,200,000, which has been increased from time to time until it reached £14,553,000 in 1816, at which amount it now stands. It has also a rest, or reserve, of about £3,000,000. Under the Bank Charter Act of '44, the Bank is divided into the Issue and Banking Departments. From the former the Bank is permitted to issue £14,000,000 of notes of its own upon certain securities of which the debt owing to it by the Government, amounting to £11,015,100, formed part. Every note issued in excess of £14,000,000 was ordered to be represented by gold coin or gold and silver bullion in the vaults of the Bank. It was also provided that, if any of the note-issuing banks discontinued issuing their own notes, Her Majesty in Council could authorise the Bank of England to increase its securities in the Issue Department by an amount not exceeding two-thirds of these lapsed issues. The fiduciary issue of the Bank has so risen at different periods from '44 that it now stands at £16,800,000. The last addition of £350,000 was made by Order in Council on Jan. 20th, '94. The aggregate amount of the notes of other banks which have ceased to issue up to this date from '44, and against two-thirds of which Bank of England notes have been substituted, is £4,276,168. The annual sum payable by the Bank for its exclusive privileges has been increased from £120,000, as settled in '33, to £180,000, and all profit from the increase of the issue of their notes beyond £14,000,000 is directed to go to the public. The profit on this amount was, up to '92, the interest at 3 per cent. after deductions for stamp duties and expenses. By the Bank Act of '92 the rate of interest on the Government debt to the Bank of £11,015,100 is to be at the rate of 2½ per cent. per annum until April 5th, 1903, and after that date 2½ per cent., unless the Bank give

notice in writing six months before that day that they decline to accept such rate, when the debt may be paid off without further notice, and until payment the interest will continue at 2½ per cent. As regards what are called dead bank notes it is enacted that, when Bank of England notes issued more than forty years have not been presented for payment, the Bank may write off the amount, or any portion of the amount, of these notes from the amount of such issued from the Issue Department, and the Bank Charter Act of '44 is to apply as if the amount of notes thus written off had not been issued. The Bank will, however, be liable to pay any note so written off if it is presented for payment. Another source of profit to the Department is the gain made in the purchase of foreign coin and bullion brought to it, for which under the Act of '44 the Bank pays at the rate of £3 17s. 9d. per oz., being 1½d. per oz. under Mint price.

In the Banking Department the Bank of England, in addition to transacting business as other large English banks do, acts as the banker of the Government in the management and payment of dividends on the National Debt, the issue and withdrawal of Exchequer bills and bonds, the issue of Government loans, and the banking operations connected with the Government offices, the Indian Government, and much of the financial business of Colonial Governments. By the Bank Act of '92 the remuneration to be paid to the Bank of England for the management of the National Debt is to be a yearly sum at the rate of £325 per million pounds of such debt up to five hundred millions, and at the rate of £100 for every million above this amount up to and including the year ending March 31st, 1912, and thereafter from year to year until Parliament otherwise directs. During such period this annual sum is not to be less than £160,000. For the management of Exchequer bonds and Exchequer bills the Bank is to receive £100 per million, and for the management of Treasury bills £200 per million outstanding on the last day of the previous financial year. The Bank also takes charge of the reserves of other bankers in connection with clearing-house transfers, and in consequence of this the reserves of the Bank are generally the only unused money in the country that can be had on a sudden demand. This institution also derives much profit from the employment of its deposits, on which it allows no interest. It is the ultimate resort of all large merchants and traders and others who wish to borrow and cannot get accommodated at other banks. In '47 a great commercial crisis had arisen: the Bank of England was unable to meet all applications for discounts and loans on approved securities, without exceeding its statutory limits. The Governor and Company were, however, informed by the Government that it was prepared to propose a bill to Parliament to indemnify them from such excess. Bank of England notes were therefore issued in exchange for securities beyond the amount limited by law, and Parliament afterwards passed an Act indemnifying the Bank in that respect, and for a short suspension of so much of the '44 statute as limited the amount of such securities. A similar crisis occurred in '57 and in '66, when Government took the same course; although in the latter year no infringement of the law took place, because the

commercial panic subsided before the Bank had made advances beyond the legal limits.

The Bank Charter Act of '44 requires a weekly account to be published of certain particulars of the Issue and Banking Department. The one for the week ending Oct. 26th, '98, is as follows, viz. :—

DR.	Issue Department.	£
Notes issued . . . . .		46,155,890

CR.		£
Government debt . . . . .		11,015,100
Other securities . . . . .		5,784,900
Gold coin and bullion . . . . .		29,355,890
		46,155,890

DR.	Banking Department.	£
Proprietors' Capital . . . . .		14,553,000
Rest . . . . .		3,146,611
Public deposits, including Exchequer, Savings Banks, Commissioners of National Debt, and dividend accounts . . . . .		6,696,030
Other deposits . . . . .		36,848,357
Seven-day and other bills . . . . .		103,469
		61,347,467

CR.		£
Government Securities . . . . .		10,501,640
Other Securities . . . . .		29,607,671
Notes . . . . .		18,985,615
Gold and silver coin . . . . .		2,252,541
		61,347,467

Besides the head office and two branch offices in London, the Bank of England has branches at Liverpool, Manchester, Birmingham, Leeds, Hull, Bristol, Newcastle, Plymouth, and Portsmouth. The management of the Bank is in the hands of a governor, deputy-governor, and twenty-four directors, elected by stockholders who have held £500 worth of stock for at least six months previous to the election. In future, it is provided by a supplemental charter, where stock stands in the joint names of two or more members, the first name in a joint account will be able to vote, unless the other or other members nominate one of such to do so. The supplemental charter also provides for the abolition of the "shuttings" of the transfer books of bank stock, and henceforth the stock may be transferred "ex div." the day after the balance for the dividend has been struck. A director is required to hold £2000, a deputy-governor £3000, and a governor £4000 of the stock. Custom has excluded English bankers from this body, but members of leading firms negotiating foreign loans and engaged in foreign bill broking appear to be eligible. The Court, or Board of Directors, meet every Thursday, when the weekly account is presented. The two governors have the chief administration of the institution, and attend daily at the Bank.

At the half-yearly general Court of the Directors and Company of the Bank of England held on Sept. 22nd, '98, the net profits of the half-year ended Aug. 31st were £731,219 as against £731,748 for the corresponding period of '97, and a half-year's dividend of interest and profits was made of £5 per cent. without deduction on amount of income tax.

## VIII. FIXED ISSUES AND CIRCULATION OF NOTES.

The present fixed issues of bank notes are as follows, viz. :—

England, Bank of England . . . . .	£16,800,000
" 38 Private Banks . . . . .	1,374,376
" 31 Joint-Stock Banks . . . . .	1,762,961
Scotland, 10 Joint-Stock Banks . . . . .	2,676,350
Ireland, 6 Joint-Stock Banks . . . . .	6,354,494
	£28,968,181

The average weekly circulation of the banks of the United Kingdom to Oct. 1st, '98, is as follows :—

	£
Bank of England for month ending Oct. 5th . . . . .	27,553,362
Private Banks . . . . .	386,952
Joint Stock Banks . . . . .	897,259
Total in England . . . . .	28,837,573
Scotland . . . . .	7,550,232
Ireland . . . . .	5,874,280
United Kingdom . . . . .	42,262,085

The *Bankers' Magazine* for November '98 states that in comparison with the corresponding period of last year the returns show a decrease in the Bank of England circulation of £198,214, a decrease in private banks of £18,612, and a decrease in joint-stock banks of £15,227; in Scotland an increase of £275,547, and in Ireland a decrease of £284,099, thus showing that the month ending Oct. 1st as compared with the corresponding period of '97 presents a decrease of £232,053 in England and a decrease of £240,605 in the United Kingdom.

## IX. THE CLEARING-HOUSE SYSTEM.

A clearing house is an establishment in large cities in which the business of banks with other banks is adjusted. Each bank which deals with the London Clearing House sends clerks daily, who take with them the various bills and cheques in possession of their bank or drawn on other bankers. This adjustment establishment, and the bankers connected with it, have accounts at the Bank of England, and the balances, which were formerly settled by cash or notes of this bank, are now settled by transfers from one account to another. The arrangements for clearing are directed by a committee appointed by the banks. There are two paid managers or inspectors to better carry out these arrangements. Accounts are closed at four o'clock. Three-quarters of an hour is allowed for the banks to consider drafts upon them, and to determine whether they are to be honoured. In the meantime the bills and cheques have been classified at the Clearing House, and by 5.30 accounts are adjusted, each bank paying or receiving the balance due to it. The notification of the total amount of bills, cheques, and drafts, passing through the Clearing House is an indication of the state of trade, and as the Metropolis is the main cosmopolitan centre of commerce, this record has a world-wide range. The sums passed through the London Clearing House for '97 reached the

enormous total of £7,491,281,000, as against £7,574,853,000 in '96. In the provincial clearing houses cheques are drawn not only on the members' banks actually presenting, but also on their branches within a specified distance of the centre. There are clearing houses at Liverpool, Manchester, Birmingham, Leeds, Newcastle-on-Tyne, and Leicester; and in Scotland at Edinburgh, Glasgow, Aberdeen, Dundee, Greenock, Leith, Paisley, and Inverness. In Ireland the only clearing house is in Dublin.

## X. DISCOUNT MARKET.

As a good store of bills of exchange is declared to be the best reserve in banking, there is always a greater demand for them, when they are good, than the supply, and billbrokers cannot provide anything like the quantity which banks require. The chief reasons why these bills are not created commensurate with the increase of business, as they were some years ago, are—firstly, because the custom of obtaining loans from bankers, instead of accepting bills, has greatly increased; secondly, because foreign bills drawn on London by traders residing abroad have materially diminished, owing to the development of the system of telegraphic transfers, whereby very large sums are now paid without a bill. In consequence of the insufficient supply of these negotiable instruments, large holders have frequently the discount market under their control, for which reason the Bank minimum rate no longer guides the market for important periods. It is stated that, although about thirty years ago the Bank of England was one of the largest holders of bills of exchange, it is now thought to be the smallest among the large holders. This change, it is alleged, is the result of the immense increase of deposits of other banks which are largely invested in bills, and as these become due are re-invested in other bills, which causes a reduction in discount rates. In consequence of these transactions, and as deposits have increased far more than bills in proportion, longer periods of cheap money have been experienced in recent years than have ever existed. The bank rate of discount was 3 per cent. on Oct. 14th, '97, 4 on April 7th, '98, 3½ on May 26th, 3 on June 2nd, 2½ on June 30th, 3 on Sept. 22nd, and 4 on Oct. 13th. The money market has responded to this last rise by lifting the rate for the best bills. On Oct. 15th loans from day-to-day, and for short periods, were 3½ per cent., 3½ to 3¾ for two, three, and four months', and 3¾ per cent. for six months' bills. On this increase of the Bank rate, the Banks and Discount houses also raised their allowance on deposits to 2½ per cent. on call and 2¾ on notice. On Nov. 1st interest for floating money or loans from day to day and for short periods was 3½ per cent.; the market rates for best bills were then 3¾ for two months, 3⅞ for three months, 3⅞ for four months, and 3⅞ to 3¾ for six months.

## XI. CAPITAL AND RESERVE FUNDS, AND BALANCE SHEETS.

It appears that in October '98 the whole banking capital commanded in the market an average premium of 234 per cent., and in October '97 the premium was 222 per cent. The average market value of banking capital

at the beginning of October, for the past three years, is as follows:—

	'98.	'97.	'96.
	Premium.	Premium.	Premium.
England . .	238 %	225 %	210 %
Scotland . .	228 „	226 „	207 „
Ireland . .	209 „	196 „	186 „
Total United Kingdom .	234 %	222 %	207 %

The total amount of the paid-up capital of all the joint-stock banks of the kingdom and the Bank of England is £76,927,072. Beyond their capital these banks hold reserves to about £40,722,480, which amounts are held in the following proportions by these institutions in different divisions of the country, viz. :—

	Capital, Paid-up.	Reserve Funds.
	£	£
By English Banks, including Isle of Man and Channel Island Banks . . .	60,491,417	31,202,966
„ Scotch Banks . .	9,310,735	6,167,932
„ Irish Banks . .	7,124,920	3,351,582
	£76,927,062	£40,722,480
	£117,649,542	

The 23 private banks which publish accounts have capital and reserves to the amount of about £7,017,632, and the remainder about £3,000,000, so that the total paid-up capital and reserves for all our home banks is nearly £128,000,000. The amount of deposit and current accounts in all the banks of the United Kingdom are estimated to have been in July '98 from £800,000,000 to £810,000,000, and in January last from £780,000,000 to £790,000,000.

## XII. INSTITUTE OF BANKERS.

This Institute was founded in '79, and is an association of gentlemen connected with the various branches of banking. Its objects are to facilitate the consideration and discussion of matters of interest to members of this branch of commerce, and to afford opportunities for the organisation of a knowledge of the theory of banking. It has at present in London, the provinces, in India and the Colonies over 3000 adherents: viz. 410 Fellows, who are partners, directors, or managers of banks, 620 Associates, consisting of officials of over 10 years' standing, and about 2200 ordinary members, drawn from the juniors on bank staffs. These different classes subscribe £2 2s., £1 1s., and 10s. 6d. per annum respectively. Papers on banking and financial subjects are read and discussed before the Institute from time to time and published in the official *Journal of the Institute of Bankers*, which also contains matter of interest to bankers generally. The annual examinations for the certificate of the Institute are held in

May in London and numerous provincial centres, and attract between 500 and 600 candidates. The subjects of examination are political economy, practical banking, commercial law, mathematics and bookkeeping, and most of the leading banks give prizes in connection with these. The offices are at 34, Clement's Lane, Lombard Street, where there is an excellent library and reading-room. The President is Robert Williams, Esq., M.P., and the Secretary is Mr. W. Talbot Agar.

**Bank of England.** See **BANKING**.

### **BANKRUPTCY.**

This is mainly regulated in England and Wales by the Bankruptcy Act, '83, the Bankruptcy (Discharge and Closure) Act, '87, the Bankruptcy Act '90, and the rules made thereunder. In all its branches this system is subject to the control of the **Board of Trade**. For the proper administration of the system there is the Bankruptcy Division of the High Court of Justice, which has jurisdiction in the City of London and its liberties, and also within the districts of the Metropolitan County Courts. Outside these boundaries the County Courts have bankruptcy jurisdiction. A great portion of this in both the High Court and County Courts is exercised by the registrars, who hear petitions for adjudication in bankruptcy, hold public examinations of the debtors, approve of compositions, and grant discharges when these are unopposed. The Bankruptcy Department of the Board of Trade consists of **Official Receivers**, and a central staff under the **Inspector-General**, who audit trustees' accounts, and overlook the conduct and dealings of these persons, and the other local officials. There is an official receiver appointed to each district, but the same individual may be appointed to this position for two or more districts, or two or more of such receivers may be appointed to the one district. The official receiver is to investigate the conduct of the debtor, and to report the Court respecting it, to take such part as to the Board of Trade may order in his public examination, and to assist when required in his prosecution. It is also the duty of the official receiver to become interim receiver of the debtor's estate, pending the appointment of a trustee, and as manager when a special manager is not appointed, to summon and preside at the first meeting of creditors, to issue proxies, to report to the creditors on any offer by the debtor for a composition or scheme of arrangement, to advertise the proceedings, and to act as trustee during any vacancy in that appointment. In order to be made a bankrupt, it is essential that the debtor shall have committed one or more of the recognised acts of bankruptcy (see ed. '96). The act of bankruptcy on which the petition against the debtor is founded must have occurred within **three months**. An infant, though engaged in trade, cannot be made bankrupt, but a **married woman** can be, and in respect of her separate property if she carries on a trade distinct from her husband, or when he is a convict or in exile; as in such cases she is liable to be sued personally as a *feme sole*.

A **Petition for Adjudication in Bankruptcy** may be filed by the debtor, or by any single creditor whose debt amounts to £50 or upwards, but any two or more creditors whose debts in the aggregate amount to £50 may be the petitioning creditors. The first result of a proper

bankruptcy petition is the making of a **Receiving Order** by the Court, which does not divest the debtor of his property, but puts the Official Receiver in charge of such, and stays proceedings by unsecured creditors. When this order is made the debtor is bound to give the official receiver full information concerning his affairs and failure, and to make out a proper statement of his assets and liabilities for submission to the first meeting of creditors, which should be held within fourteen days of the receiving order. The debtor may propose at this meeting that his insolvency should be ended by a **composition or scheme of arrangement**, whereby the disabilities of bankruptcy proper may be avoided. If the creditors refuse to assent to this proposal the debtor is to be adjudged bankrupt; but if it is assented to, the assent is provisional. In either event the debtor must still undergo a **public examination**. When the public examination is finished, the matter then goes before the Court for its approval. The composition or scheme being approved by the Court, is binding on any dissentient minority of creditors, the receiving order is rescinded, and the debtor is remitted to the full control over his affairs. But if the provisions of the composition or scheme are not performed by the debtor he is still liable to be adjudged bankrupt. A debtor who has been thus adjudged bankrupt may, under similar terms and conditions as before bankruptcy, propose a composition or scheme of arrangement with his creditors, and if the offer is sanctioned by the Court the adjudication in bankruptcy is annulled. When it has been resolved that a debtor's property shall be administered in bankruptcy proper the creditors elect a **trustee**, an official holding a certificate of the Board of Trade, to whom he has given security for the due discharge of his duties. All the debtor's property then vests in the trustee, as well as any further property that he may acquire before obtaining his discharge, except his personal earnings. The trustee realises the debtor's estate as quickly as convenient, and distributes it ratably among the creditors. Within certain limits priority is given to rates and taxes, and claims for the pay of clerks, servants, and workmen. From the assets available for distribution, property held by the bankrupt in trust, and his trade tools, and the necessary wearing apparel and bedding of himself and family to the value of £20, are excepted, but not goods in his reputed ownership though belonging to another. The trustee generally exercises his duties under the guidance of a **Committee of Inspection** appointed by the creditors, and if no such committee is appointed their duties are performed by the Board of Trade. When the bankrupt's public examination is concluded he may apply for his discharge. The discharge is not given if the bankrupt has committed any of the **statutory offences**, such as not keeping proper books for three years before the bankruptcy, continuing to trade after knowledge of insolvency, contracting a debt without any reasonable expectation of being able to pay it, bringing on bankruptcy by rash and hazardous speculations, or extravagant living, causing unnecessary expense by frivolous or vexatious defences to an action, having given within three months before bankruptcy an undue preference, having previously been adjudged bankrupt, fraud or fraudulent breach of trust, etc. The **crimes** connected with bankruptcy,

for which a bankrupt can be committed for trial, and their punishment, are set out in ed. '96. In small bankruptcies, when the property of the bankrupt is not likely to exceed £300, the official receiver becomes trustee, unless the creditors supersede him. There is no Committee of Inspection, and the proceedings are more summary than in the other bankruptcies. If judgment has been obtained in a County Court against a debtor unable to pay, but whose whole indebtedness is less than £50, the Court may administer his property and order the payment of his debts by instalments.

According to the report of the Inspector-General in Bankruptcy for the year ending March 31st, '98, the number of receiving orders made in England and Wales was 4074, involving liabilities of £5,678,498; and the assets realised £2,756,079, leaving an estimated loss to creditors of £3,791,196. The deeds of arrangement registered were 3208, the liabilities thereunder being £3,930,615, and the assets £1,910,492, causing an estimated loss to creditors of £2,706,954. Amongst the failures in which an increase of liabilities is noticeable are bankers, whose liabilities amounted to £814,240, as against £34,585 in '96. This large increase is due to the failure of a private bank having several branches in the south of England. The only other trades in which the liabilities exceed half a million are grocery and provisions, £633,356; and leather trades, £544,575. The former amount is slightly less than the similar liabilities in the preceding year, but the leather trades show an increase of over £200,000. The liabilities of directors and promoters of public companies have increased by £154,000, and those of drapers and haberdashers by £182,000. It is regrettable to observe that the liabilities of solicitors, whose failure so often involves great loss or ruin to many of their clients, have increased to over £460,000. Beer, wine, and spirit trades, farmers, shipping trades, cotton, wool, and timber merchants show a considerable decrease in liabilities, but the most marked diminution occurs in the class described in the proceedings as merchants, whose liabilities are £347,256, as compared with £936,163 in '95—a decrease of no less than £648,907. During the year '97 there was a further diminution in the more important failures with unsecured liabilities of £20,000 and upwards, the number being 32 in '97, against 34 in '96, and 39 in '95.

**Baptists.** The Baptists hold that the only Scriptural mode of baptism is by immersion, and that the proper subjects are "believers"—persons of an age to exercise belief. Any other baptism they consider to be contrary to the original institution, contrary to the example of Christ, and also opposed to the spiritual design of the ordinance. Historians, themselves not Baptists, have shown that through many centuries these views have been held amongst the Waldenses, the Albigenes, the Vaudois, the Lollards and Wycliffites. Formerly, on the Continent and in England, they were opprobriously called *Anabaptists*. In 1537 Henry VIII. issued a proclamation against their heresy, as persons who rebaptised themselves. As early as 1611, many Baptists, because of persecution, fled to America, and the feeble remnant in London published a *Confession of Faith* (1611) to vindicate their orthodoxy. In 1620 they memorialised the king for liberty of worship. *Confessions of Faith* they published again in 1644 and 1646. In 1689 a *General Assembly* of

Baptists in London published a *Confession* in thirty-two articles, and a *Baptist Catechism*, after the model of the Assembly's Catechism. The latest returns ('97) give, in the United Kingdom, 2947 churches, 3842 chapels, with 1,293,459 sittings, 2006 pastors, 5021 local preachers, 364,779 Church members, 527,616 Sunday scholars, 51,800 teachers. The colleges for training the rising ministry are: Bristol, founded 1770; Midland, 1797; Rawdon, 1804; Regent's Park, 1810; Pastors', 1856; Manchester (Brighton Grove), 1866; Cardiff, 1807; Aberystwith, 1839; North Wales, 1862; Scotland, Theological College, 1894; Ireland, Training Institute, 1892. The Baptist Foreign Mission was originated in 1792 (see *MISSIONARY SOCIETIES*). Baptist churches are congregational in government, holding to the order of pastors (bishops) and deacons. The interests of different counties are cared for by local associations; and the wider affairs of the denomination are attended to by the Baptist Union of Great Britain and Ireland, formed in 1812—which Union, while it has no legislative authority, is adapted to secure united action throughout the whole country. In connection with the Union, the General Expenses, Literature, Home Mission, Church Extension, Annuity, Augmentation, and Education Funds have been established. These societies represent the distribution of upwards of £15,400 per annum by the Council of the Union, under one executive. Outside the Baptist Union there are the Scotch Baptists, with a plural eldership. In England there are some 300 Hyper-Calvinistic churches. It is computed that in the world at large there are 50,978 Baptist churches, 33,236 pastors and missionaries, and 4,705,953 Church members. The election of a vice-president for the Baptist Union takes place at the Spring Assembly of the Union. There is no nomination, and in the ballot a majority of the total votes given is necessary to election. The Vice-President for one year becomes in the ordinary course President during the next year. President of the Baptist Union for the year '98-9, Rev. S. Vincent; Vice-President, Rev. J. A. Spurgeon, D.D., LL.D.; Secretary, Rev. J. H. Shakespeare, M.A. Offices of the Baptist Union, 10, Farnival Street, London, E.C. Consult *The Baptist Hand-Book*.

**Barbados.** A British West Indian island; geographically but not politically one of the Windward group. Area, 166 sq. m.; population, 189,000. Capital, Bridgetown. Barbados is of coral formation, and rises in a succession of limestone and coral terraces to a height of 1104 ft.; while it is almost encircled by coral reefs, which render the approach to it dangerous to mariners. The climate is healthy; but violent hurricanes occur and cause much damage. It is administered by a Governor, with Executive Committee, a Legislative Council, and a House of Assembly of 24 members, elected annually. Barbados is the headquarters for the British troops in the West Indies. The chief exports are sugar and its products. For latest statistics see *BRITISH EMPIRE* (table). See *WEST INDIES SUGAR COMMISSION*.

**Barbuda.** A British West Indian island; a dependency of Antigua, and under the federal government of the Leeward Islands.

**Bar, General Council of the.** The Council is the accredited representative of the Bar, and its duty is to deal with all matters affecting the profession, and to take such action thereon as may be deemed expedient. The Council

consists of: (1) the Attorney General and Solicitor General for the time being, and every former Attorney General or Solicitor General whilst remaining in actual practice at the Bar; (2) 48 practising barristers elected by the whole Bar (not less than 12 of the Inner Bar and not less than 24 of the Outer Bar), one-half of the total number retiring from office at the time for the close of the election in each year. The Council has power to appoint additional members, not exceeding 6 in number, as the Council may consider desirable by reason of their Parliamentary or professional position. Such members go out of office at the time for the close of the election following their appointment. The time of the annual election is fixed by the Council, and is held as soon as possible after the annual general meeting of the Bar. The Council appoints a Chairman and Vice-Chairman and an Executive Committee, and such standing committees and sub-committees as they may think fit, from time to time delegating to any such committee or sub-committee any of the powers or duties of the Council which the Council may deem desirable. The Standing Committees of the Council are the Executive Committee and the committees on matters relating to professional conduct, on the business and procedure of the Courts, and on Court buildings. The annual general meeting of the Bar is held in the Old Dining Hall of Lincoln's Inn at 4.15 p.m. on the second Tuesday in the Easter sittings; but the Council has power, with the concurrence of the Attorney General, to alter the date, time, and place of the annual general meeting. Any member of the Bar is at liberty to bring forward for discussion at the annual general meeting any resolution, provided that notice thereof shall have been given in writing to the Secretary of the Council not less than seven clear days before the day of meeting, and that in the opinion of the Executive Committee of the Council such resolution is a matter of general interest to the Bar. A statement of the proceedings of the Council is published annually, and copies thereof are supplied to every barrister having an address in the Law List. Surplus copies may be obtained on application to the Secretary. The Council has recently received recognition at the hands of the Legislature. **Chairman, '98-9, Mr. H. H. Cozens Hardy, Q.C., M.P.; Vice-Chairman, Mr. Joseph Walton, Q.C.; Hon. Treasurer, Mr. E. P. Wolstenholme; Secretary, Mr. Henry C. A. Bingley; Clerk, Mr. C. Worthy. Offices of the Council, 2, Hare Court, Temple, E.C.**

**Baring-Gould, Rev. Sabine, M.A.,** Rector of Lew-Trenchard, North Devon, since '81, and formerly Vicar of Dalton, Yorks, and Rector of East Mercia, Essex. He is the eldest son of the late Mr. E. Baring-Gould, of Lew-Trenchard, and was b. at Exeter, Jan. 28th, '34, and ed. at Clare Coll. Camb. His literary activity has been and still is phenomenal. Fiction, theology, history, mythology, archæology, folk-lore, art, music: in all these provinces he has won great triumphs, though perhaps he is best known by his novels. "Mehalah," first published in '80, achieved for him widespread fame, and more recently he has published "Mrs. Curgenven," and "Cheap Jack Zita," '93, "Noëmi," '95, "The Broom Squire," '96, "Guavas the Tinner" and "Bladys," in '97. A charming "Garland of Country Song"

appeared in '94, "Old English Fairy Tales" in '95, a life of "Napoleon" in '96, and "A Study of St. Paul" in '97.

**Barnardo's, Dr., Homes for Orphan Waifs.** This work was begun in the year 1866 by Dr. Barnardo, at that time a young medical student attached to the London Hospital. On his own responsibility he opened a small house in Stepney Causeway, and the pressing need for some such effort was soon evidenced by the numerous applications for admission which began to flow in. Year by year the Homes have extended and multiplied, and their scope has been correspondingly enlarged. From the first the central principle of the Institutions has been: No destitute child, boy or girl, ever refused admission, irrespective of age, creed, nationality, or physical defects. At present the Homes comprise twenty-four Mission Branches, and eighty-six distinct Homes dealing with every age and class of destitute and needy childhood. Four of these Homes are situated in Canada, one in Jersey, seventeen in the English counties, and the remainder in London. There are 1000 inmates in the **Village Home at Ilford, Essex**, which contains fifty-two detached cottages, and is solely devoted to the upbringing of girls on the family system, under "mothers." The boys are reared in branch Homes according to age, or boarded out in rural districts under the supervision of local committees and of lady visitors. About 1500 boys and girls are now so boarded out. **Industrial training** is imparted to the older boys in the Homes, fourteen different trades being taught in the shops at Stepney Causeway. An **Emigration agency** furnishes an important adjunct to the work. After training, many of the boys and girls are placed out in situations throughout the United Kingdom; but every year some 700 selected inmates, who have proved themselves honest, decent and industrious, are emigrated to the colonies, chiefly to Canada, where three Distributing Homes (in Ontario and Manitoba) are now in operation. There is also an **Industrial Farm of 10,000 acres (in Manitoba)**, which is now being developed by older lads sent out from a special Home, the **Youths' Labour House**, which is open to lads of seventeen years of age and over. No fewer than 10,055 tested and trained boys and girls have by this means been placed out in colonial situations, and of these 98 per cent. have proved successful. Over 36,000 young people, of all ages, from infancy to the threshold of adult age, have passed through the Homes. The daily expenses of maintenance and food alone amount to at least £140. Experienced agents are at work day and night in the slums searching for and rescuing homeless children from the common lodging-houses and the streets. **Head Offices, 18 to 26, Stepney Causeway, London, E.**

**Baronetries Conferred, Nov. '97—Nov. '98.** **Samuel, Sir Saul, K.C.M.G., C.B.,** formerly Agent-General for N.S.W. in England.

**Wigan, Sir Frederick,** of Clare Lawn, Mortlake, Surrey.

**Durning-Lawrence, Mr. Edwin, M.P.**

**Maclure, Mr. John Wm., M.P.,** of Manchester.

**Holder, Mr. John Charles,** of Pitmaston, Moseley, Worcestershire.

**Wilks, Dr. Samuel,** Fellow and Pres. of the Roy. Coll. of Physicians in London, one of H.M. Physicians Extraordinary.

**Ellis-Nanney, Mr. Hugh John,** of Gwynfryn, Carnarvonshire.

De la Rue, Mr. Thomas Andros, of Cadogan Square, Chelsea.

Dundas, Mr. Robert, of Arniston, Midlothian.

Rankin, Mr. James, M.P.

Tate, Mr. Henry.

**Barotseland.** See RHODESIA.

**Barrett, Wilson**, is the son of an Essex farmer, and entered the profession in which he has achieved so many triumphs at the age of 17. He became manager of the Burnley Theatre in '74, and has since leased the Grand Theatre, Leeds, and the Court and Princess's Theatres in London. In '96 he scored a great success with "The Sign of the Cross" at the Lyric. This play was written by himself, for he is a dramatist as well as an actor and manager. Other works of his are "Pharaoh," "Now-a-Days," and "The Daughters of Babylon," and he has collaborated with Mr. H. A. Jones, Mr. Sydney Grundy, Mr. W. G. Wills, Mr. Hall Caine, and Mr. G. R. Sims. In '97 he produced "Othello" at the Lyric, and afterwards visited Australia with phenomenal success.

**Barrie, J. M.**, whose writings under the pseudonym of "Gavin Ogilvy" have raised him to great literary eminence in the last few years, was b. at Kirriemuir, Forfarshire, in 1860. He was ed. at Dumfries Academy, and graduated M.A. at Edin. Univ. in '82. After holding a journalistic position in Nottingham he came to London. The introduction to the public of Mr. Barrie's peculiar genius for depicting Scotch village life was accomplished through the columns of the *British Weekly*, and he contributed also to the *St. James's Gazette*, the *Speaker*, and the *National Observer*. His first volume, "Better Dead," appeared in '87; "Auld Licht Idylls" and "When a Man's Single" were published in '88; "A Window in Thrums" and "An Edinburgh Eleven" in '89. In '90 Mr. Barrie issued "My Lady Nicotine," during '91 his first lengthy story, entitled "The Little Minister," was published, and a new story entitled "Sentimental Tommy," and "Margaret Ogilvy," a Memoir, in '96. Mr. Barrie's work for the stage includes an amusing comedy entitled "Walker, London," which had a tremendous run at Toole's Theatre in '92; "Jane Annie," written with Mr. Conan Doyle, and brought out at the Savoy in '93; "The Professor's Love Story," first played in America, and afterwards brought to England by Mr. Willard; and "The Little Minister," produced Nov. 6th, '97, at the Haymarket. Mr. Barrie was, in '94, married to Miss Mary Ansell, who played charmingly in "Walker, London," when it was first produced. Address: Kirriemuir, N.B.

**Basutoland.** A native province of British South Africa, situated to the north-east of Cape Colony. It lies inclosed between Natal, the Orange Free State, and Cape Colony. Basutoland was disannexed from Cape Colony in 1884, and has since been administered by a Resident Commissioner, under the High Commissioner for South Africa. Area, 10,293 sq. m.; pop. 250,000, including about 600 Europeans. Capital, Maseru. The chief products are wool, wheat, mealies, and Kaffir corn. The natives keep large herds of cattle. The revolt in Basutoland led by Masupha came to an end (Feb. 1st, '98), and Masupha was fired 200 head of cattle, banished from his stronghold at Thaba Bosigo, and deposed from his chieftainship. See BRITISH EMPIRE (table).

**Bath and Wells, Bishop of.** See under PEERS.

**Bath, The Most Honourable Order of the.** Originally established by King Henry IV., at his coronation, 1399, this order fell into neglect in the seventeenth century, but was revived in 1725, under George I. It was remodelled by the Prince Regent in 1815, to commemorate the auspicious termination of the long and arduous contest in which the empire had been engaged, and was further enlarged in 1845, and now has three classes:—

G.C.B. . Knight Grand Cross Bath.

K.C.B. . Knight Commander Bath.

C.B. . . Companion Bath.

Members of the first two classes, being knights, are, after knighthood, entitled to the prefix "Sir." The G.C.B.s are not to exceed 55 for military service, exclusive of the sovereign and princes of the blood, and those distinguished foreigners upon whom may be conferred the honorary dignity, and 27 for the civil service; of the second class there may not be more than 145 for military and 100 for the civil service, excluding those admitted as honorary members, and except in certain special circumstances when there is power to increase the numbers. Of Companions there may be 988, of whom 705 may be for military and 283 for civil service. An officer must have received a medal or some similar honour, or have been specially mentioned in despatches for distinguished service in action, before he can be nominated. The badge is suspended by a crimson ribbon, with motto *Tria juncta in uno* (Three joined in one). The Dean of the Order is the Dean of Westminster. Sir Albert W. Woods, K.C.M.G., C.B., is Registrar and Secretary; General Lynedock Gardiner, C.B., is Bath King of Arms; and Charles George Barrington, C.B., is Gentleman Usher of the Scarlet Rod.

**Bavaria.** See GERMANY; and for Ministry see DIPLOMATIC.

**Bayreuth**, in Bavaria, is the home of Wagnerism. A magnificent theatre is there erected for the performance of Wagner's operas, on a scale which can nowhere else be approached. Full justice to the dramatic richness and scenic possibilities of the master's music can only be done at the Bayreuth theatre, and there is probably no finer orchestra in the world than the Wagner orchestra. Frau Wagner takes an active part in the management of the Festival. In Nov. '92 the school for instruction in musical style, one of Wagner's favourite ideas, was opened for teaching and training artists gratuitously in the performance of Wagner's works.

**Bechuanaland Protectorate.** Bechuanaland until '95 included the Crown Colony of British Bechuanaland and the Bechuanaland Protectorate. In Nov. '95, however, the Crown Colony was annexed to Cape Colony, the Bechuanaland Protectorate being at that time, by an agreement made in '94, under the administration of the British South Africa Company. The Protectorate (area about 213,000 sq. m., pop. 200,000) extends from the Molopo river in the south northwards to the Zambesi, and is bounded on the east by the South African Republic and Matabeleland, and on the west by German South-West Africa. It includes the lands of Khama, chief of the Bamangwato, lying south-west of Matabeleland, of Sebele, chief of the Bakwena, Bakoen, chief of the

Bangwaketsi, and of Montsioa and Ikanning, all lying to the north of the Molopo. These chiefs, by an arrangement made in '95, when Khama and others visited England, hold their land under the protection of the Queen, an Imperial officer residing with each, and discharging certain judicial and other functions. The boundaries of the territory assigned to each chief have been carefully designated, and a hut tax is levied. The railway from Cape Town to Kimberley is continued through Vryburg and Mafeking to Palachwe, Tati, and Bulawayo. See CAPE COLONY.

**Bedford Grammar School, founded 1566**; reorganised 1873. Annual income, £3500. Eight leaving exhibitions of £70 and £60 for four years. Two fall vacant annually. The new buildings were opened Oct. 19th, '91. Pupils 800. The school is divided into five sections: (1) Classical, (2) Civil and military, (3) Technical, (4) Junior Department, (5) Preparatory Department. There are regular Woolwich and Sandhurst Classes. Alumni include Sir Henry Hawkins, Lord Farnborough (Sir T. Erskine May), Professor Piazzi Smyth, Professor Warrington Smyth, and Col. Burnaby. **Head Master, J. S. Phillpotts, M.A., B.C.L.**

**Bedford Modern School, founded 1566**; new scheme 1873. Large endowments. Six exhibitions of £55 and £45 for three years. Two exhibitions annually. Fees £4, £6, and £9, according to age, for boys residing with parents or near relations. Boarders received. Preparation for London matriculation, Cambridge locals, army, engineering, and business generally. Large chemical and physical laboratories, museum, workshop, and smithy. About 570 boys. **Headmaster, Rev. R. B. Poole, D.D., F.C.P.,** and 30 assistant masters.

**Beerbohm-Tree, Herbert,** the actor, is the son of a grain merchant named Beerbohm, and was b. in London in 1853. Shortly after entering his father's office in '70 he became a member of the Irrationals Amateur Dramatic Club, and gradually drifted into the profession. His first hit was as the timid curate in "The Private Secretary," at the Prince of Wales's; and immediately after he played the grim spy Macari in "Called Back." Taking the Comedy Theatre ('87), he produced "The Red Lamp"; and in the autumn of the same year took the Haymarket Theatre, where "Captain Swift," "A Man's Shadow," "The Village Priest," "Hamlet," "The Dancing Girl," "Hypatia," Mr. H. A. Jones' "The Tempter" ('93), "A Bunch of Violets," "John-a-Dreams" ('94), "Trilby" ('95), and "Henry IV." ('96) have been notable successes. In April '97 he opened his new theatre, "Her Majesty's," in the Haymarket. His wife, an admirable Greek scholar formerly connected with Queen's College, is a very refined actress. Address: 77, Sloane Street, London, W.

**Behring Sea Question.** The Behring Sea lies between Alaska on the east and Siberia on the west, the Aleutian Islands bounding it on the south, while on the north Behring Straits lead to the Arctic Ocean. In the south-east corner of the sea lie the Pribyloff Islands, a great haunt of seals at certain times of the year. The right to slaughter these seals to the number of 100,000 annually is let to the North American Commercial Company by the United States. Other seal hunters come from British Columbia, and kill perhaps about

25,000 a year. At certain seasons the seals leave the islands and go southwards, and here comes the opportunity for pelagic sealing, as it is called. The dispute between Great Britain, Canada and the United States originated as far back as 1886. As to its settlement by the Arbitration Treaty between Great Britain and America in '93, see eds. '94 and '95. From a very early date after the settlement, a desire was apparent on the American side to reopen the question, on the ground that the regulations of the award had failed in their object—the preservation of fur seals. It was alleged that the species would, unless the regulations were changed, very soon disappear. The United States Government therefore urged the appointment of an International Commission to revise the regulations, and meanwhile suggested some very drastic rules, which would practically have prohibited sealing in the Behring Sea itself. These, however, the British Government could not accept, and replied that there was no ground for curtailing so materially the period (five years) for revision of the regulations fixed by the Arbitration Tribunal. In April '97, Mr. J. W. Foster and Mr. Hamlin were appointed as Special Commissioners by the United States to negotiate with reference to the matter, and an effort was apparently made to get Russia and Japan to join with the U.S.A. in an agreement closing Behring Sea for a certain number of years. Diplomatic correspondence with Great Britain also took place, for full particulars of which see ed. '98. On July 28th, '97, Lord Salisbury wrote agreeing to a meeting of experts nominated by Great Britain, Canada and the United States in October, "to arrive, if possible, at correct conclusions respecting the numbers, conditions and habits of the seals frequenting the Pribyloff Islands at the present time, as compared with the several seasons previous to and subsequent to the Paris Award." It was subsequently proposed to include Russian and Japanese representatives in the conference; but to this Lord Salisbury objected, as these countries had no *locus standi*, and he finally definitely declined to take part in any conference at which they should be present. In reply the U.S. Government, while expressing its astonishment at the refusal, suggested a conference in the terms of Lord Salisbury's letter, at the same time preparing for a separate conference, which was held in October, between the United States, Russia and Japan. To this suggestion Lord Salisbury assented. The representatives were: for the British Government, Professor D'Arcy Thompson; for the Canadian Government, Mr. J. M. Macoun; and for the United States, Professor Starr Jordan. The separate conference between the United States, Russia and Japan agreed to a temporary suspension of pelagic sealing, on the condition that Great Britain should also consent to such a step. The conference of experts agreed to by Lord Salisbury came to an end (Nov. 17th, '97). The experts agreed that the Pribyloff herd had declined; that pelagic sealing, though responsible for the decrease, was within the law; that the herd was not in danger of extermination provided land killing were not excessive; but that the death-rate among females and pups was great owing to indiscriminate sea killing. Mr. Foster then, on behalf of the United States, put forward the proposal that if Canadian sealers were pro-

hibited from pelagic sealing for the season beginning Jan. 1st, '98, the United States would stop the killing of seals on the Pribyloff Islands, and would agree to a joint Commission for discussing other pending questions. To this the Canadian Government replied that the United States, as owners of the Pribyloff Islands, had everything to gain by the suspension of all sealing for a year, while the Canadian sealers would have everything to lose and nothing to gain. They could not therefore consent to the proposed suspension, but they were quite willing to refer all pending questions to a joint Commission. An Act was afterwards passed by Congress, and came into force on Jan. 1st, '98, prohibiting the import of sealskins, whether raw, dressed, dyed or otherwise manufactured, taken anywhere but on the Pribyloff Islands. The effect of this was to give the North American Commercial Company an absolute monopoly of the sealskin business in the States. American sentiment towards Great Britain and Canada, however, improved considerably as the year went on, and the whole question was included in the list of those referred to the Anglo-American Commission. See CANADA.

### BELGIUM.

A kingdom under Leopold II. of Saxe-Coburg, and by the constitution of '31 declared to be a constitutional, representative, and hereditary monarchy. The executive power is vested in the King, the legislative power jointly in King, Senate, and Chamber of Deputies. According to the law passed in '93 amending the Constitution, on the principle of manhood suffrage, tempered by the plural vote, all citizens over 25, who have lived at least a year in the same commune, have a vote. An additional vote is accorded them if they are (1) either 35 years of age, married, with legitimate offspring, and pay a tax of at least 5 fr. to the State; or (2) are 25 years old and own immovable property to the value of at least 2000 fr., or have an income of that value from such property, or for two years have received at least 100 fr. a year from Belgian funds. Two additional votes are given to citizens of 25 years of age, who possess a diploma of higher education or have filled a public or private position implying the possession of such education. No citizen can have more than three votes. From this electorate both Houses of the Legislature are chosen, save for those Senators who are elected indirectly. The Senate is elected for 8 years. The number of members elected directly is equal to half the number of Deputies. The indirectly elected Senators are chosen by the provincial councils, 2 for each province with less than 500,000 inhabitants; 3 for each with more than 500,000 and less than 1,000,000; and 4 for each with over 1,000,000. The Deputies are elected for 4 years, in the proportion of 1 to every 40,000 inhabitants, and number 152. One half retire every 2 years. Senators must be 40, and Deputies 25 years of age. Each Deputy receives 4000 fr. yearly, and a free pass between his home and the capital. Local government is carried on by provincial and communal councils. The country is divided by a difference of language, the Flemish inhabitants in the north using the Flemish tongue in all its varieties of local *patois*, while the Walloons of the southern provinces speak French. The north, too, is chiefly agricultural, and the south

industrial. Almost the entire population is of the Roman Catholic faith, but full religious liberty prevails, and grants are made from the national treasury to all denominations. There are about 6400 elementary schools, and the higher branches of education are well provided for. There is no State religion. Agriculture, mining, iron, sugar, and textile manufacturing are the chief occupations; and textiles, sugar, machinery, and agricultural products are the chief exports. There are 2839 miles of railway in operation. Area, 11,373 sq. m.; pop. 6,586,593. Revenue, '97, £17,083,000; expenditure, £16,617,250; imports, '97, £123,832,000; exports, £113,492,000; debt, £102,663,000. For army and navy see FOREIGN ARMIES and FOREIGN NAVIES; and for Ministry see DIPLOMATIC.

**Political Parties.** The scheme for the revision of the Constitution which occupied the country during '93 and '94 did much to alter the old division of parliamentary parties. Before '93 there were practically only two parties—the Clerics or Catholics, and the Anti-Catholics or Liberals. Gradually, however, the Liberals separated into three groups, the rank and file calling themselves Liberals still, and known as the *Ligue Liberals*, the more advanced Liberals, comprised in the *Association Liberals*, and known as *Progressists*, and the extreme Socialists, forming the *Fédération Ouvrière*, or Labour Party. The result of the general election which took place in Oct. '94 was the return of the Catholics to power with an overwhelming majority over both the Liberals and the Socialists. The official returns showed that 104 Catholics, 19 Liberals, and 29 Socialists and Progressists had been elected. As a general rule, the Socialists are stronger in the Walloon provinces, and the Catholics in the Flemish provinces. At the election of one-half of the Deputies (July 5th, '96) the Clericals made still further gains, the ultimate distribution of parties in the Chamber being 111 Catholics, 12 Liberals, and 29 Socialists. After the May '98 elections the Chamber included 112 Catholics, 28 Socialists, 6 Liberals, and 6 Radicals.

**Belgium, King of.** See LEOPOLD II.

**Belize** (Bay-leez?). Capital of British Honduras (*q.v.*) and a port. Pop. 6972.

**Benefices Act, '98.** See SESSION, sects. 37 and 38.

**Bengal.** See INDIA and DIPLOMATIC.

**Benguela.** A province of Portuguese West Africa. See ANGOLA.

**Beresford, Lord Charles.** See COMMONS.

**Bermuda Islands.** A group of small islands and coral reefs, situated in the North Atlantic, 600 miles east of Cape Hatteras. Area of group, 20 sq. m., the principal island containing 16 sq. m. Pop. 17,500. Administered by a Governor with an Executive Council of 6 members, and Legislative Council of 9 members, and an elected House of Assembly of 36 members. It is a naval station, and is becoming a favourite winter resort for Americans and Canadians. There is regular steam communication between Bermuda and New York, Halifax, Jamaica, etc. The chief products are early vegetables, bulbs, and arrowroot. For latest statistics see BRITISH EMPIRE (table).

**Bernhardt, Mme. Rosine Sarah,** was b. in 1844, at Paris; the most distinguished French actress of her day. She is of Jewish

descent. She entered the Paris Conservatoire at the age of fourteen, where she studied tragedy and comedy. Joining the staff of the Théâtre Français, she made her *début* in Racine's "Iphigénie," and in Scribe's "Valérie," but was not very successful, and retired for a time from the stage. Her first grand success was as Marie de Neuberg, in Victor Hugo's play of "Ruy Blas." Becoming very popular by her representations in "Junie," in "Andromaque," and in "La Sphinx," she was replaced on the staff of the Théâtre Française. She has frequently visited London since '79, and of late has appeared at one of the London theatres every year. She is also the authoress of a one-act play entitled "L'Aveu," produced in '88.

**Berry, Rev. Charles Albert, D.D.**, was b. at Leigh, Lancs., in 1852. He received his ministerial training at Airedale College, Bradford. On completion of his college course, in '74, he became pastor of one of the most influential churches in Bolton (St. George's Road), and removed in '83 to a still more important sphere—Queen Street Church, Wolverhampton, where he yet remains. In '87 he received a pressing invitation to succeed the late Rev. Henry Ward Beecher as pastor of Plymouth Church, Brooklyn, U.S., an invitation he did not accept, still preferring his Wolverhampton sphere. The degree of D.D. was conferred upon him in '95 by the St. Andrews University. His address, from the chair of the Congregational Union of England and Wales in '97 delivered at the City Temple, and entitled "Congregational Churchmanship," attracted widespread notice. Dr. Berry has published a volume of sermons, "Vision and Duty," in the "Preachers of the Age" series, and also a small volume of short essays in the "Small Books on Great Subjects" series of James Clarke & Co., entitled "Mischievous Goodness, and other Papers." Address: 13, Parkdale, Wolverhampton.

**Besant, Sir Walter**, was b. at Portsmouth, 1836. Educated at King's College, Lond., and Christ's College, Camb. Accepted the appointment of Senior Professor in the Royal College of Mauritius, but resigned in consequence of ill health. He made his *début* as an author in '68 with "Studies in Early French Poetry," which was followed five years later by the "French Humourists." In conjunction with the late Mr. James Rice he commenced a successful career as a romance writer; the most popular production of their joint authorship was "Ready Money Mortiboy," which they also dramatised and put on the stage at the Court Theatre. Of the novels which Sir Walter Besant has published in his own name the best known are, "All Sorts and Conditions of Men," "All in a Garden Fair," "Children of Gibeon," "The World went very well Then," "Katherine Regina" ('87); "Herr Paulus," "The Inner House" ('88); "For Faith and Freedom," "The Bell of St. Paul's," "To Call Her Mine" ('89); "The Holy Rose," "The Demoniac," "Armored of Lyonesse" ('90); "St. Katherine's by the Tower" ('91); "The Ivory Gate" ('92); "A History of London," "The Rebel Queen" ('93); "Beyond the Dreams of Avarice" ('94); "The Master-Craftsman" and "The City of Refuge" ('96); "A Fountain Sealed" and "The Changeling" ('97). He was for many years Secretary to the Palestine Exploration Fund, and in '71 produced, jointly with the late Professor

Palmer, a History of Jerusalem. Sir Walter has also interested himself in questions affecting the rights of authors, and was appointed first Chairman of the executive committee of the Incorporated Society of Authors. The establishment of the People's Palace, in the East End of London, was inspired by Sir Walter Besant's book, "All Sorts and Conditions of Men." He received the honour of knighthood, May '95. Address: Froggnal End, Hampstead.

**Bible Society, The British and Foreign**, was established in 1804, its object being the circulation of the Scriptures. Up to '98 more than 155,500,000 Bibles and portions of the Bible, in 345 languages and dialects, had been issued under its auspices. The expenditure of the Society in '97-8 was nearly £222,000. Work abroad is carried on not only through the missionary societies, but by some twenty-six agents in foreign countries, under whom a large staff of colporteurs is engaged in distributing the Scriptures. Bible House, 146, Queen Victoria Street, E.C. Secretaries, Rev. J. Sharp, M.A., and Rev. J. G. Watt, M.A.

**Bills of Sale.** The statute law relating to bills of sale in England is contained in the Acts of 1878, '82, and '90. A bill of sale upon goods or chattels corresponds to a mortgage of real estate; and the above Acts are chiefly directed to prevent the fraudulent granting of bills of sale. Every bill of sale given by way of security for the payment of money is void unless made in accordance with the form in the schedule of the Act of '82. It must be duly attested by one or more credible witnesses not being a party or parties thereto. It must be registered within seven days after making, and the registration must be renewed once every five years. When first registered, a copy of the bill, together with an affidavit of the time of such bill being given, of its due attestation, and of the residence and occupation of the person giving the same, and of every attesting witness, must be presented to the registrar and filed by him. If the bill of sale be given subject to any defeasance, condition, or declaration of trust, such defeasance, condition, or declaration must appear, if not in the body of the bill, at least on the same paper, and must be set forth in the copy filed. A transfer or assignment of a registered bill of sale need not be registered. Bills of sale comprising, in whole or in part, the same chattels, take priority in order of registration. Delays, omissions, or mistakes in the registration of bills of sale may be rectified by the order of any judge of the High Court. A bill of sale executed within seven days after the execution of an unregistered bill of sale will be held void, in so far as it affects the same chattels, unless it is proved not to have been executed for the purpose of evading the law. Any bill of sale not complying with the conditions of attestation and registration, is void as against the giver's trustee in bankruptcy, etc. A bill of sale given in consideration of a sum less than £30 is void. A bill of sale is void except as against the grantor with respect to any personal chattels acquired by him after its execution. But this provision does not apply to growing crops or fixtures or machinery subsequently acquired in substitution for fixtures or machinery specified in the bill. Chattels assigned under a bill of sale are not liable to be seized by the grantee unless (1) the grantor make default in

paying the money thereby secured, or in fulfilling any condition necessary to the security; (2) the grantor become a bankrupt, or allow the goods comprised in the bill to be distrained for rent, rates or taxes; (3) the grantor fraudulently remove, or suffer to be removed, from his premises the goods comprised in the bill; (4) the grantor refuse, without reasonable excuse, to produce to the grantee his last receipts for rent, rates, and taxes; (5) execution has been levied on the grantor's goods under any judgment. The Bills of Sale Act '90 exempts letters hypothecating or declaring trusts of imported goods during the interval between the discharge of the goods from the ship in which they are imported and their deposit in a warehouse or reshipment for export, or delivery to a purchaser, from the Bills of Sale Act '82. See report of Committee on money lending under SESSION, Part III.

**Bills, Parliamentary**, are divided broadly into two classes—(1) public, and (2) private; the one consisting mainly of measures of general application, while the other includes bills for the construction of railways or street improvements (for a list of public acts passed '96, see heading). See PARLIAMENTARY PROCEDURE.

### BIMETALLISM.

This is the term currently used to denote a Joint Monetary Standard of Value. Mr. Balfour, who is a convinced bimetallist, has defined the contention of the bimetallists as being "that if they could by international arrangement fix some ratio of exchange between gold and silver coin they would create an automatic system by which the demand and supply for gold and silver respectively would maintain that ratio at the point they fixed it." Bimetallists assert that the exceedingly unsatisfactory condition of the productive industries and of commerce generally in this country is largely due to the appreciation of gold and the violent fluctuations and uncertainty of exchange between gold standard and silver standard countries; and that the best and most effective remedy is to be secured by an agreement on a broad international basis to reopen the mints of the leading nations of the world to the unrestricted coinage of both gold and silver. Its supporters claim that bimetallism is essentially a Free Trade movement, and repudiate the suggestion that it has anything to do with Protection. A detailed discussion of the question appeared in the '87 edition. A Royal Commission on currency appointed in '86 issued its report Nov. '88 (see ed. '89). An International Monetary Congress held at Paris in Sept. '89 discussed the subject academically, and an International Monetary Conference which was convened by the United States, "to consider by what means, if any, the use of silver can be increased in the currency system of the nations," and which met at Brussels in Nov. '92, separated without coming to any conclusion. On March 17th, '96, the House of Commons passed a resolution urging upon the Government the advisability of doing all in their power to secure by international agreement a staple monetary par of exchange between gold and silver. A Bimetallic Congress was held at Brussels in April '96, representatives from Great Britain, France, the United States, Germany, Austria-

Hungary, Belgium, Denmark, Holland, Roumania, and Russia being present. Ultimately the members constituted themselves a permanent committee, and expressed their opinion that a preliminary and immediate agreement might result from the re-establishment of bimetallism by the United States, the reopening of the Indian mints for the coinage of silver, the turning into silver of part of the metallic reserve of the Bank of England, and the absorption of a sufficient amount of silver by the various European States. The currency question in the United States influenced very materially the fight for the Presidency in '96. It appeared, as the year wore on, that Free Silver doctrines had captured a majority of the Democratic party, and at the Chicago Convention (July 7th) this majority swept everything before them, and adopted a platform demanding "the immediate restoration of the free and unlimited coinage of gold and silver at the present legal ratio of 16 to 1 without waiting for the aid or consent of any other nation," and that "the standard silver dollar shall be full legal tender equally with gold for all debts, public and private." Mr. Bryan (*q.v.*) was nominated for the Presidency, but was decisively beaten by Mr. McKinley, the Republican candidate, who opposed the free and unlimited coinage of silver, though he pledged himself to promote action by international agreement. To this end he sent Senator Wolcott and two other commissioners to France, Great Britain, and Germany in '97, and they, together with the French Ambassador, laid various proposals before the British Government, the chief of which were that the Indian mints should be reopened, and that Great Britain should annually purchase £10,000,000 of silver. The Indian Government, however, declined to agree to the first suggestion, and so no action resulted. See INDIAN CURRENCY.

The Bimetallic League is a society which specially devotes itself to the propagation of bimetallic principles. An indication of its position is afforded by the following resolution, which it passed at its annual meeting in Feb. '94: "That the finances, agriculture, industries, and trade of the British Empire—home, colonial, and Indian—are harassed and embarrassed by the constant appreciation of gold and the great instability and uncertainty of exchange between gold and silver standard countries; that there is no sound remedy for the grave and growing evils resulting therefrom except bimetallism on a broad international basis at a common ratio, to be mutually agreed upon; that, as experience has proved that the remedy would be sound, practical, and effective, and as it has been approved by a majority of the members of the Royal Commission on Gold and Silver, it is the duty of Her Majesty's Government to negotiate without delay with other leading nations for a monetary union on these lines." The President is Lord Aldenham, the General Secretary Mr. Henry McNeil, and the Head Offices are at 29, Cornhill, E.C., with branch offices at Manchester, Birmingham, and Bristol.

The Irish Bimetallic League—President, Mr. Wm. Field, M.P.; Hon. Sec., A. Gore Cuthbert—has offices at 50, Lower Sackville Street, Dublin, and there are Bimetallic Leagues in South Australia, Victoria, New South Wales, New Zealand, and China, with headquarters, respectively, at Adelaide, Melbourne, Sydney

Dunedin, and Shanghai, while in India there are branches at Calcutta, Lucknow, and Karachi. There is also a Scottish Monetary Reform Association, with offices at Glasgow, and an East of Scotland Monetary Reform Association, with offices at Edinburgh, which advocate bimetalism.

The Gold Standard Defence Association is the corresponding society on the other side formed "to oppose the policy of bimetalism and to unite in defence of the gold standard all those who believe that an adherence to that standard is essential to the commercial position of our country and to the due discharge of contracts . . . One leading object of the Association is to explain the principles which should govern a sound currency and a trustworthy standard of value; and to show that whilst our present system is in conformity with those principles, the proposals of the bimetalists are in conflict with them." The Association issued a statement in June '95, in which it declared that the evils attributed by bimetalists to the existing currency system either do not exist or are much exaggerated, and that, so far as they do exist, they are not due to the gold standard; that the interests of foreign nations who are possessed of a large amount of over-valued silver, and who owe debts to this country, are not necessarily the same as the interests of this country. The President of the Association is Sir John Lubbock, Bart., M.P.; the Secretary, the Hon. George Peel, 11, Clement's Lane, E.C.

### BIOLOGY, '98.

The significance of Professor Karl Pearson's exact methods in what may be called mathematical biology, and the study of the problems of organic evolution, has been signally recognised by the award of the Royal Society's Darwin medal, information of which reaches us as we go to press. Adaptation and environment, and studies in so-called "variation," continue to prove of fascinating interest in the science under review, and, it is needless to say, excite very dissimilar criticism. The first instalment of the zoological report of Mr. J. Moore's highly successful Expedition to Lake Tanganyika has been published in the *Quarterly Journal of the Microscopical Society*, while a later contribution refers to the hypothesis that the lake represents an old Jurassic sea. The new zoological evidence adduced undoubtedly upsets the older geological theories, while the results of Mr. Moore's researches mark them out as of high importance, and this, coupled with literary style, lends a peculiar interest to his writings. The committee entrusted with the exploration of the Sandwich Islands (Dr. D. Sharp, secretary) have concluded active local exploration, and the working out of the very considerable collections brought home by Mr. R. Perkins will be at once begun. A very large sum of money will be required for this purpose, towards which the trustees of the Bernice P. Bishop Museum, at Honolulu, have contributed most liberally. Probably by next year something will be heard of the publication of reports. And we must not forget here the newly organised and specially equipped expedition to explore the island of Socotra, under the experienced guidance of Dr. H. O. Forbes and Mr. Ogilvie Grant. This island is stated to be the largest in the world of which it can be said that nothing is

known of its mammal fauna. Dr. Noël Paton has drawn up for the Scottish Fishery Board a "Report of Investigations on the Life-History of the Salmon," in which the migrations of this fish, and its metabolism, as well as many points of economic interest, are treated.

In this connection attention may be drawn to the discontent expressed in the public prints at the condition of the Frank Buckland collection of fish deposited as a trust at South Kensington Museum. A departmental report having suggested its abolition, it is urged that it ought to be handed over to other hands, the Natural History Museum authorities being indicated as suitable curators. Professors Herdman and Boyce have been investigating healthy and unhealthy green oysters, showing the causes of their colouration, the connection between oysters and disease, as well as the bacteriology of the oyster. The odours and tastes of surface waters are of biological as well as chemical interest. In the *Technology Quarterly* it is shown that many of the disagreeable odours of drinking waters are not alone due to organic putrefaction, but to that of living or undecomposed microscopical organisms, either animal or vegetable, which afford an odour of growth as opposed to one of decay. It was found that miscellaneous tastes and odours—and these range from fishy and oily to aromatic—might be preserved for a time by putting the concentrated organisms into pure glycerine. The peculiar features are put down to organisms which secrete compounds of the nature of essential oils. A very important investigation has been initiated by Mr. Chamberlain in the appointment of a committee to thoroughly inquire into the pathology, transmission, and preventive remedies of tropical diseases, and especially of malaria, so prevalent in Africa. Two skilled observers are now in Africa (one from the new biological and pathological laboratory attached to University College, Liverpool, endowed by Mr. Thompson-Yates, and recently opened), while an observer has proceeded to India under the authority of the Colonial Office. Space forbids more than a reference to the remarkable researches in botany by Mr. Walter Gardiner on the histology of the cell-wall in plants, demonstrating the continuity of protoplasm, a discovery which, it has been said on high botanical authority, essentially modifies the whole conception of vegetable organisation. Professor Plateau is heterodox, and has traversed ("Comment les Fleurs attirent les Insectes") many of Sir John Lubbock's and other observers' most cherished views, that while honey is the real attraction of flowers for insects, colour and scent guide them. He attributes the special attraction to scent; but Sir John Lubbock is not inclined to materially alter his conclusions (*Journal Linnæan Society*).

**Birkbeck Institution, The**, was founded by the late Dr. Birkbeck in 1823, as a mechanics' literary and scientific institute. The foundation stone of the present building, Bream's Buildings, E.C., was laid by the Duke of Albany in '83, and the building was subsequently opened formally by the Prince of Wales. The Institution was incorporated during '91 as part of the City Polytechnic, under a scheme formulated by the Charity Commissioners, and in this way its building debt was removed and a substantial endowment secured.

**Birmingham, King Edward's School**, comprises three grammar schools for boys, four grammar schools for girls, a high school for boys and a high school for girls. Founded 1552, reorganised 1878; income, £30,000. Numerous scholarships and exhibitions both for boys and girls. The pupils number over 2600. Head Master, Rev. A. R. Vardy, M.A. Motto, *Domine*,

*Salvum fac Regem*. Some alumni: the late Archbishop of Canterbury (Dr. Benson), the late Bishop of Durham (Dr. Lightfoot), the Bishop of Durham (Dr. Westcott), Sir Alexander Mackenzie, the late Sir E. Burne Jones, etc.

**Birmingham Water Supply**. See ENGINEERING.

### BISHOPS AND DEANS.

The following is a list of the territorial prelates of the Church of England, with the date of their appointment to the see, and with the annual income. The table, it will be seen, includes the Suffragans appointed for each see; and the names of the Deans. For biographies of the Bishops see under the alphabetical heading of each in PEERS, HOUSE OF, where also it is shown which Bishops actually sit in the House of Lords:—

See.	Bishop.	Appointed.	Income.	Bishop Suffragan and Title.	Dean.
Canterbury	Temple (Abp.)	1896	£15,000	Dr. W. Walsh, Bp. of Dover	F. W. Farrar, D.D.
York ... ..	Maclagan (Abp)	1891	10,000	{ Dr. Crosthwaite, Bp. of Beverley. Dr. Blunt, Bp. Suff. of Hull. Dr. Earle, Bp. of Marlboro'. Dr. Winnington Ingram, Bp. of Stepney.	A. P. Purey-Cust, D.D.
London ... ..	Creighton ..	1896	10,000	{ Dr. Turner, Bp. of Islington Dr. T. E. Wilkinson, Asst. Bp. for British subjects in N. and C. Europe.	R. Gregory, D.D.
Durham ..	Westcott ...	1890	8,000	Dr. Sandford, Assistant Bp...	G. W. Kitchin, D.D.
Winchester	Davidson ...	1895	6,500	Dr. Sumner, Bp. of Guildford.	W. R. Stephens, B.D.
Bangor ... ..	Lloyd ... ..	1890	4,200	Hon. A. T. Lyttelton, Bp. of Southampton.	E. Lewis, M.A.
Bath & Wells	Kenyon ... ..	1894	5,000	Dr. Bromby, Assistant Bishop	T. W. Jex-Blake, D.D.
Bristol ... ..	Browne ... ..	1897	3,000	Dr. S. Marsden, Asst. Bishop	Francis Pigou, D.D.
Carlisle ... ..	Bardsley ... ..	1892	4,500	Dr. Ware, Bp. of Barrow-in-Furness.	W. G. Henderson, D.D.
Chester ... ..	Jayne ... ..	1889	4,200	... ..	J. L. Darby, D.D.
Chichester ...	Wilberforce ...	1895	4,200	... ..	R. W. Randall, D.D.
Ely ... ..	Compton ... ..	1886	5,500	... ..	C. W. Stubbs, D.D.

**Bisley Meeting, '98.** See NATIONAL RIFLE ASSOCIATION.

**Bismarck Archipelago.** A group situated N. of the eastern part of New Guinea, including islands formerly called New Britain, New Ireland, and New Hanover. They have been a German possession since '84. Area 20,000 sq. m.; pop. 188,000. Chief exports copra and cocoa-nut fibre. See COLONIES, ETC., OF EUROPEAN POWERS.

**Bismarck, Prince.** See OBITUARY.

**Black, William,** novelist, b. at Glasgow 1847. Commenced his career as a journalist, and was successively connected with the London *Morning Star* (acting as special correspondent during the war between Prussia and Austria in '66), and the *Daily News* (of which he was assistant editor). His first book was "Love or Marriage," published in '67, but his reputation was made by "A Daughter of Heth" ('71), after which came "A Princess of Thule," "Madcap Violet," "Adventures of a House Boat" ('88), "Yolande," "White Heather," "In Far Lochaber," "The Penance of John Logan" ('89), and "The New Prince Fortunatus." His recent novels are "Stand Fast, Craig Royston," "Donald Ross of Heimra," "The Magic Ink, and Other Tales," "Wolfenberg" ('92), "The Handsome Humes" ('93), "Highland Cousins" ('94), "Briseis" ('96), and "Wild Eelin" ('98). Address: Paston House, Brighton, and Reform Club, London.

**"Black and White."** An illustrated weekly record and review, which made its first appearance on Feb. 6th, '91, and has hitherto had a most successful career. Editor, Mr. James N. Dunn. Commercial manager, Mr. W. D. Ross. Office, 33, Bouverie Street, E.C.

**Blackmore, Richard Doddridge,** the novelist, was b. in 1825. Ed. at Blundell's School, Tiverton, and Exeter Coll., Oxford. Intending to follow the legal profession, he was called to the bar at the Middle Temple ('52), and commenced his career as a conveyancer. After publishing "Clara Vaughan" in '64, and "Cradock Nowell" two years later, he at once leapt into fame, in '69, by "*Lorna Doone: a Romance of Exmoor*," a book whose popularity is still very great. Other books from his pen include "Alice Lorraine" ('75), "Mary Anerley" ('80), "Kit and Kitty," "Springhaven," "Perlycross" ('94), "Tales from the Telling House" ('96), and "Dariel" ('97), all sustaining his reputation for poetic description and careful delineation of character. Mr. Blackmore has translated the *Georgics* of Virgil, and has also written verses, including "The Fate of Franklin," and "Fringilla," a volume of verse, which appeared in '95. Address: Teddington, Middlesex.

**Black Rod, Gentleman Usher of the.** An officer of the House of Lords appointed by the Crown, who assists at the introduction of peers, has charge of the arrangements for the maintenance of order below the bar, near the Throne, and in the strangers' gallery, and who summons the Commons whenever their attendance is required in the House of Peers. Gen. Sir Michael Biddulph, G.C.B., was appointed to this office in '95 in succession to the late Admiral Sir J. R. Drummond, G.C.B.

**Blackwall Tunnel.** See ENGINEERING.

**Blake, Hon. E.; M.P.** See under COMMONS.

**Blind.** See ROYAL NORMAL COLLEGE FOR THE BLIND.

**Bloemfontein.** Cap. Orange Free State (*q.v.*).

**Blue Books.** See PARLIAMENTARY PAPERS.

**Board of Agriculture.** See AGRICULTURE IX.

**Board of Trade.** See TRADE, BOARD OF.

**Bohemia.** The population of this province consists of about 4,000,000 Czechs and 2,000,000 Germans. It possesses a Provincial Diet of 242 members, which is competent to legislate in all matters not specially reserved to the Reichsrath. Recently there has been much unsettlement politically in Bohemia, owing to the demands of the Young Czech party for the elevation of the province to the same status as that of Hungary. The decree which authorised the official use of the Czech language, in '97, led to bitter opposition to the Austrian Government on the part of the Germans. See AUSTRIA-HUNGARY.

**Bokhara.** A feudatory Central Asian State attached to the Russian province of Turkestan. Conquered in '68, it has been rapidly losing all independence since, and the completion of the Transcaspian railway to Samarcand practically incorporated it with the Czar's dominions. It is the most populous khanate of Turkestan, possessing 2,500,000 inhabitants, while Bokhara (75,000) is the principal trade centre of the region. Area, 92,000 sq. m. The railway station of Bokhara is situated ten miles from the city, and here the Russians have built a "*New Bokhara*," allowing the older city, for political reasons, to fall into decay. The *Ameer*, Sayid Abdul Ahad, is allowed to maintain an army of 20,000 troops for administrative purposes, and these are being drilled by Russian instructors. The products of the country are fruit, tobacco, cotton, corn, silk, and hemp, and the trade is almost entirely in the hands of the Russians.

**Bolivia.** Bounded on the north by Peru and Brazil; on the east by Brazil and Paraguay; on the south by the Argentine Republic and Chili; on the west by Chili and the Pacific Ocean. Bolivia has no sea-coast, having ceded her own to Chili by treaty, but the latter country is under obligation to procure her an outlet to the sea. Capital, Sucre, pop. 20,000. La Paz, pop. 40,000, Cochabamba, pop. 25,000, and Oruro, pop. 15,000, are also important towns. It is ruled over by a President, elected for four years, with a Congress of two Chambers, elected by universal suffrage, as is also the President. Area, 567,360 sq. m.; pop. about 2,000,000. Revenue, '97, £609,273; expenditure, £593,740. Average value of imports, £1,000,000; exports, £2,500,000. Total debt, '95, £830,698. The Roman Catholic is the State religion, but liberty prevails. Education is free and obligatory, though the law is not strictly enforced. The standing army is fixed at 1500 men. It is a very rich country, abounding in minerals, especially copper and silver; the production of silver is about £2,000,000 per annum. It produces potatoes, barley, grapes, coffee, cacao, etc.; and exports wool, rubber, coffee, and minerals. But industry is wanting in the country, which offers a wide field to European labourers. For Ministry see DIPLOMATIC.

**Bombay.** See INDIA; and for Ministry see DIPLOMATIC.

**Booth, Rev. William**, better known as General Booth, the founder of the Salvation Army, was b. at Nottingham, 1829. Entered the Methodist New Connexion Ministry '50. He resigned, however, in '61, preferring to work as an evangelist amongst those who never attended a place of worship at all. In '65 he established in the East End of London the **Christian Mission**, out of which grew the world-wide organisation known as the **Salvation Army**, which has invaded almost every town of England and Wales, and sent missionary contingents into various foreign countries, including France, Switzerland, Holland, Belgium, Scandinavia, Finland, Italy, India, Japan, Australasia, U.S.A., Canada, S. America, W. Indies, Java, and Japan. His eldest son is the Chief of the Staff, and his eldest daughter has greatly aided the progress of the movement in Switzerland, France, Belgium and Holland. Other members of his family have also co-operated with him in his missionary enterprise, one son having charge of the work in Australia, a daughter in Canada, and the youngest daughter having been appointed to France. He has latterly been much occupied in the attempt to maintain and develop the scheme of social amelioration initiated in Nov. '90 on the lines of his famous book "In Darkest England and the Way out." Address: 101, Queen Victoria Street, E.C.

**Borneo**. A large island of the Malay archipelago, divided into various states. Estimated total area 300,000 sq. m.; estimated pop. 1,846,000. Holland claims as a possession 203,714 sq. m. of territory on the south, east, and west of the island, with a population of about a million. In reality this immense tract is parcelled out into various native states. Those on the coast are more or less under Dutch influence. Of the interior little is even known. The principal Dutch settlements are at Sambas, Pontiana, Banjarmasin, and Koti. On the north-west coast is the State of Sarawak (area 50,000 sq. m., pop. 300,000), which in '88 was constituted an independent state under the protection of Great Britain, all its foreign relations being conducted by Her Majesty's Government. Capital Kuching. Sea-board extends 380 miles. Revenue, '96, £105,000; expenditure, £117,500; imports, '96, £771,120; exports, £741,220. The government was intrusted to Sir James Brooke in '41, who ruled as Rajah till '68, when he was succeeded by his nephew, His Highness the Rajah Charles Johnson Brooke, G.C.M.G. Under the just and equitable rule of the Brookes, Sarawak has been reclaimed from barbarism. North-east of Sarawak is the independent State of Brunei, or Borneo Proper, a territory of less extent. Area about 3,000 sq. m. Capital, Brunei. It is ruled by a Sultan, who, however, is not vested with despotic authority, certain officers of his court having powers similar to a constitutional ministry. A protectorate was proclaimed over Brunei by England in '88, the internal administration being left to the Sultan, but all foreign relations conducted by Her Majesty's Government. Beyond it lies **British North Borneo**, area 32,000 sq. m., pop. 200,000, which is not an official dependency, but is the property of the British North Borneo Company, to whom a royal charter was granted in '81. In '88 a formal protectorate was proclaimed over British North Borneo. Labuan was made subject to the Com-

pany in '89. The administration of the territory is in the hands of a Governor, who is assisted by a Council, and by Residents appointed to preside over provinces and districts; the machinery being similar to that in Crown colonies. The British North Borneo Company sells or leases its lands to planters, and derives its revenues from the proceeds of sales and taxes. About 1,000,000 acres have been alienated, and there are about fifteen estates planting tobacco. For latest statistics see **BRITISH EMPIRE** (table). Between this and the Dutch territories on the east is the native state of Sulu. The whole island is rich in valuable timber, woods, fruits, spices, drugs and gums, and has a varied fauna. **Minerals**: coal, iron, gold, diamonds, antimony, quicksilver, etc. Soil exceedingly fertile, and well adapted for the cultivation of all tropical products. **Principal exports**: sago, beeswax, edible birds'-nests, camphor, hides, rattans, tortoiseshell, cinnabar, tripang, antimony, coal, gold, diamonds, pepper, indigo, arrow-root, caoutchouc, gutta-percha, spices, drugs and dyes, etc. The people belong to various races—Malays, Dyaks, Kyans, Negritos, Bugis, and Chinese. Tattooed races, Kanowits, Pakatans and others, inhabit the interior.

**Bosnia and Herzegovina**. See **AUSTRIA-HUNGARY**. There are two Turkish provinces situate south of the Danube, with Servia on the east and Dalmatia on the west. They were placed under Austrian rule by virtue of the Treaty of Berlin, '78, and have since then been immensely improved in every way. Their united area (including the Sandjak of Novi bazar) is 23,571 sq. m., and the population 1,504,091, of whom two-fifths are Mohammedan, two-fifths Russo-Greek, and one-fifth Roman Catholic.

**Bosphorus**. A channel, nineteen miles long, and from half a mile to a mile and a quarter wide, connecting the Sea of Marmora with the Black Sea, and separating Europe from Asia.

**Boyd, Rev. Andrew Kennedy Hutchison**, was born 1825 at the manse of Auchinleck, of which parish his father was minister, and educated at Glasgow University, where he graduated B.A. in '46, and King's College, London. He studied for the bar, and was a member of the Inner Temple, but entered the ministry of the Church of Scotland, and was ordained at Newton-on-Ayr in '51. Afterwards he was minister of Kirkpatrick Irongray, St. Bernard's, Edinburgh, and St. Andrews, where he still is. In '64 he received the degree of D.D. from Edinburgh, and in '89 of LL.D. from St. Andrews. In '90 was moderator of General Assembly. Under the signature of A. K. H. B. he wrote essays for *Fraser's Magazine*, and these, when reprinted as "Recreations of a Country Parson," had a wide circulation in England and America. He has published upwards of forty books, of which the best known are: "Graver Thoughts of a Country Parson," "Sunday Afternoons in a University City," "A Scotch Communion Sabbath," "Towards the Sunset," "The Best Last," "Twenty-five Years of St. Andrews."

**Boys' Brigade, The**. A movement set on foot fifteen years ago by Mr. W. A. Smith of Glasgow. The aim of the promoters is "the advancement of Christ's Kingdom among boys"

and the promotion of habits of obedience, reverence, discipline, self-respect, and all that tends towards a true Christian manliness." Companies are formed in connection with churches, missions, and Sunday schools in all parts of the United Kingdom, and the boys are trained largely by means of military drill and discipline. They wear, with their ordinary clothes, a simple uniform of cap, belt, and haversack. The total number of boys enrolled in the United Kingdom is 35,000, and their ages vary from 12 to 17. The officers number 2,850. The movement has spread to America and the colonies. In the United States of America there are 550 companies with 25,000 boys, and in Canada there are 120 companies with 4500 boys. The Duke of York is Patron, the Archbishop of Canterbury is Vice-Patron, and the Earl of Aberdeen is Honorary President. *Brigade Secretary*, Mr. W. A. Smith. *Headquarters* for the United Kingdom, 162, Buchanan Street, Glasgow.

**Braddon, Mary Elizabeth**, daughter of Mr. H. Braddon, solicitor, was b. in London in 1837. Is a prolific writer, for besides many contributions to general literature, she is the author of between fifty and sixty novels, the best known of which are "Aurora Floyd," "Lady Audley's Secret," "Eleanor's Victory," and "Henry Dunbar," whilst her more recent works are "Vixen," "Ishmael," "Mohawks," "Gerard," "The Venetians," "All Along the River," "Thou art the Man," "Sons of Fire" ('95), "London Pride" ('96), "Under Love's Rule" ('97), "Rough Justice," and "In High Places" ('98). Miss Braddon formerly edited the *Belgravia* magazine, to which many of her stories were contributed. A drama by her, "Griselda," was produced at the Princess's Theatre, '73. Her husband, Mr. John Maxwell, died early in '95. Address: Annesley Bank, Lyndhurst, New Forest; and Lichfield House, Richmond.

**Braddon, Sir E. N. C.**, K.C.M.G., the son of Mr. Henry Braddon, of Cornwall, was b. June 11th, 1829, and ed. privately and at University College, London. He spent some years in India, and was given various appointments in the Civil Service there. The experience thus gained served him in good stead later, and enabled him to write "Life in India," '70, "Thirty Years of Shikar," etc. In '78 he went to live in Tasmania, and, being elected to the House of Assembly, he was made a Minister in '87. He served as Agent-General '88-93, and in '94 became Premier, a post which he has held ever since. He came to England for the '97 Jubilee celebrations, and was made a Privy Councillor.

**Bramwell, Sir Frederick**, D.C.L., LL.D., F.R.S., was b. 1818, and served his time as a mechanical engineer with John Hague. He is a brother of the late Lord Bramwell, and son of the late George Bramwell, banker. He was elected Associate of the Institution of Civil Engineers in '56, member in '62, a member of the Council of that body in '67, and its President in '84. He has also been President of the Institution of Mechanical Engineers (in '74). *Hon. Secretary to the Royal Institution* since '85. Chairman of the Executive Council of the Inventions Exhibition '84. Sir Frederick was knighted in '81, was created a Baronet in '89, and was in '88 elected President of the *British Association for the Advancement of Science*.

## BRAZIL.

A republic on the west coast of Central South America, comprising the vast valley of the Amazon and its affluents, as well as the watershed of other great rivers. Until '90 it was an empire under Emperor Pedro II., of the house of Braganza. A revolution then, however, broke out, a National Congress was assembled by the Provisional Government, and a new Constitution was drafted, and finally adopted in Feb. '91. The chief feature of this was the establishment of the old provinces as twenty-one separate states, self-governed except for federal purposes, but with all fiscal matters, the maintenance of order, the defence of the country, the currency, reserved to the Federal Government. This consists of a legislative authority, the National Congress, composed of a Senate of 63 members, and a Chamber of Deputies of 212 members. Congress meets annually on May 3rd for a four months' session. Deputies and senators are paid. The former must have been citizens for four and the latter for six years. Deputies are elected directly, with provision for minority representation, for three years, one member being chosen for every 70,000 of the population. The senators are directly elected, three for each state, for nine years (one-third retiring every three years). The executive authority is in the hands of the President, elected for four years only by the people directly. The connection between Church and State has been abolished, and all religions are now tolerated, but the Roman Catholic prevails. Education is free but not compulsory. The chief products are coffee, rubber, sugar and cotton. *Area*, 3,218,082 sq. m.; *pop.* 17,500,000. *Capital*, Rio Janeiro, *pop.* 500,000. It is, however, an article of the Constitution that the capital of the Republic shall at some future time be built on the central plateau of Brazil; and a lofty plateau in the state of Gorgaz has been suggested for the purpose. The revenue, '96, was £13,182,850; expenditure, £13,697,850; imports, '95, £30,000,000; exports, '96-7, £24,500,000; total debt, '97, £113,280,000. See FOREIGN ARMIES AND NAVIES; and for Ministry see DIPLOMATIC.

**History, '98.** It was announced (Nov. 27th, '97) that the Government had arranged an international loan of 60,000,000 milreis at 6 per cent., issued at 95. Martial law was proclaimed in Dec., to allow the Government to suppress a conspiracy which had been discovered. The operation of this decree was extended till Feb. 23rd. Dr. De Campos Selles and Senhor Rosa Silva were elected President and Vice-President (March 2nd). In opening Congress the President stated that the receipts for '97 amounted to 312,000 contos of reis, and the expenditure to 315,444 contos. The revenue for '98 was estimated at 338,120 contos (May 3rd). The foreign payments had been punctually made, but only at the cost of very great sacrifice, owing to the fall in exchange, the fall in the price of coffee, and political disturbances. It was announced (June 11th) that the Government had effected an arrangement with seven native and five foreign banks to guarantee the conversion of the 4 per cent. gold loan of '90 into 5 per cent. currency bonds, holders accepting the Government terms to receive a 25 per cent. bonus; those not accepting to receive the nominal value of their holding

in currency. The outstanding amount was 124,655,000 milreis currency, the interest on which was nearly 6,000,000 milreis gold.

**Bridge, Sir Frederick**, Mus. Doc., organist of Westminster Abbey, was b. at Oldbury 1844. Educated at the Cathedral School, Rochester, he subsequently became a pupil of the late Sir John Goss. In '69 he was appointed organist of the Manchester Cathedral, and in '71 Professor of Harmony at Owens College. He has been connected with Westminster Abbey since '75, and was appointed in '90 Professor of Music at Gresham College, and in '96 Conductor of the Royal Choral Society. His compositions, mainly produced at the great provincial festivals, include the "Hymn to the Creator," "Rock of Ages," "Callirhoë," "The Repentance of Nineveh," and "The Cradle of Christ." He was entrusted with the duty of setting to music Tennyson's poem "Crossing the Bar," which was sung at the funeral in Westminster Abbey (Oct. '92). His most successful work is a setting of Rudyard Kipling's "Flag of England" for chorus and orchestra, performed at the Albert Hall in the Diamond Jubilee year with remarkable success. In addition to the above compositions, Prof. Bridge has written many anthems and services, carols, etc., and is the author of four of Novello's Primers on the subject of Counterpoint, Organ Accompaniment, and "Musical Gestures." The latter is a novel system of teaching the rudiments of music by physical exercises. He was knighted in '97. Address: The Cloisters, Westminster Abbey.

**Brisbane**. Capital of Queensland (*q.v.*), on river Brisbane, about 25 miles from its mouth, in Moreton Bay; pop. with suburbs, 101,554.

**Brisson, Henri**, is the son of a barrister, and was b. at Bourges July 31st, 1835. Having joined the Paris Bar, he took up journalism and founded the *Avenir National*. After the fall of the empire he was appointed a deputy-mayor of Paris '70, and in '71 became a deputy. He was elected Vice-President of the Chamber in '79, and President in '81, succeeding Gambetta in that position. In '85 he became Premier, but had to resign after holding office for a few months. M. Brisson, however, retained a prominent position as a Radical leader, and was appointed to preside over the Panama Inquiry Committee. In '96 he was again elected President of the Chamber, and held that office till after the '98 elections, when he was defeated by a small majority in favour of M. Deschanel. M. Méline's ministry then resigned, and after several others had failed, M. Brisson formed a Radical administration in June '98, which only lasted till October in the same year.

**British and Foreign Anti-Slavery Society**. Founded 1830, its first President being Thomas Clarkson. The objects of the Society, which carries on the work of previous anti-slavery societies, the need for which had ended in the emancipation of slaves in British colonies, are: "The universal extinction of slavery and the slave trade; and the protection of the rights and interests of the enfranchised population in the British possessions, and of all persons captured as slaves." Patron, the Prince of Wales; *Journal*, *The Anti-Slavery Reporter*; Hon. Sec., Chas. H. Allen. Secretary, Travers Buxton. Office, 55, New Broad Street, E.C.

**British Association**. Founded at York in

1831, at the suggestion of Sir D. Brewster, for the purpose of stimulating scientific inquiry and for promoting the intercourse of scientific men. The Association meets annually for a session of one week, in some large provincial town, but never in London. An annual volume is issued containing not only the addresses and abstracts of papers communicated to the several sections, but also reports on the state of science, prepared by committees specially appointed, and often assisted by grants of money for conducting researches. The Association is now divided into ten sections, distinguished by letters as follow: A, Mathematics and Physics; B, Chemistry; C, Geology; D, Zoology; E, Geography; F, Economic Science and Statistics; G, Mechanics; H, Anthropology; I, Physiology (established in '93); and K, Botany (established in '94). The section of Physiology will only meet in those towns where there are Laboratories suitable for demonstrations. Each section is governed by a president, vice-presidents, secretaries, and committee. (For list of the successive presidents of the whole Association see last "Report." The last meeting was held at Bristol in Sept. '98, under the presidency of Sir William Crookes, and the attendance was about 2500. Nearly one-half of the President's address was taken up by calculations intended to prove that the amount of fixed nitrogen was insufficient to meet the rapidly increasing demands made upon it by the production of wheat. The President said that a world-wide wheat famine would occur in the next century unless chemists discovered some easy and cheap method of fixing the nitrogen of the atmosphere. The rest of the very interesting and valuable address treated of low temperature researches, new gases—to which the President added one, to be called "Monium"—wireless telegraphy, the Röntgen rays, radiant-matter spectroscopy, and psychic research. The president of Sec. A. (Prof. Ayrton) described some novel and valuable researches in the physics of smell. The president of Sec. B. (Prof. Japp) gave an address on "Stereo-chemistry and Vitalism," contending that the phenomena of life are not wholly explicable in terms of chemistry and physics, but point to the existence of a directive force which enters upon the scene with life itself. In Sec. C. the president (Mr. W. H. Hudleston) gave an address on the "Geology of the South-west of England." In Sec. D. the president (Prof. Weldon) insisted upon the statistical treatment of problems in connection with variation, inheritance, and selective destruction among animals. "Argentine Geography and the Ancient Pampean Sea" was the subject of Col. Church's presidential address in Sec. E. In Sec. F. the president (Dr. Bonar) discussed "Old Lights and New in Economic Study." Sir J. W. Barry's presidential address in Sec. G. dealt with the growth of British shipping, the demand for dock accommodation, and the necessity for experimental research as the basis of engineering science. In Sec. H. the president (Mr. E. W. Brabrook) insisted upon the unity of the anthropological sciences, and asked for an ethnographical survey of the British Empire. In Sec. K. the president (Prof. F. O. Bower) discussed the question of "Homology in the Alternation of Generations." The most sensational incidents during the session were the reading by M. de Rougemont of two papers

descriptive of his alleged enforced exile of twenty-eight years among the cannibal blacks of the Cambridge Gulf region of unexplored Australia. The papers were listened to with evident incredulity on the part of some of the auditors, and, as it afterwards appeared, the incredulity was justified. Mrs. Bishop gave an interesting and valuable paper on the Upper Yang-tse basin; and Miss Mary Kingsley one on the peoples of West Africa. Prof. Petrie drew a large audience to listen to his lantern address on "Egypt under the First Three Dynasties, in the light of Recent Discoveries." The remains in the recent excavations carried back our knowledge to 5000 B.C., the close of the Neolithic period and the introduction of metals; and showed that Egypt was an originator in the arts and not a borrower. All the Sections were crowded with papers of high interest, many of them making a real advance. The Association is to meet in Dover in '99, in Bradford in 1900, and in Glasgow in 1901. **Secretary, G. Griffith, M.A.** Offices, Burlington House, W.

**British Astronomical Association**, founded Oct. '90 for "the encouragement of a popular interest in astronomy, the association and organisation of amateur observers for mutual help, and the circulation of current astronomical information." It was also intended to meet the requirements of those who found the subscription of the Royal Astronomical Association too high, or its papers too advanced, or who were, as in the case of ladies, practically excluded from becoming Fellows. It already numbers upwards of 1100 members, and about 12 "Observing Sections" are in active operation for the combined study of the sun, the moon, the various planets, and for other astronomical research. The meetings are held on the last Wednesday of the month, from October to June inclusive, at Sion College, Victoria Embankment, E.C. The subscription is 10s. 6d. per annum; entrance fee 5s. The first President was Captain W. Noble, F.R.A.S., a well-known amateur astronomer of many years' standing; he was succeeded by Dr. A. M. W. Downing, D.Sc., M.A., F.R.S., F.R.A.S., Superintendent of the *Nautical Almanac*. The present President is Mr. W. H. Maw, F.R.A.S. The senior Secretary is Mr. James G. Petrie, F.R.A.S. A flourishing branch was started in Manchester in March '92, under the presidency of the Rev. W. Sidgreaves, F.R.A.S., Director of Stonyhurst Observatory. The Association has since established prosperous branches in Glasgow for the West of Scotland, Edinburgh for the East of Scotland, and in Sydney, N.S.W., and Melbourne, Victoria, for the Australasian Colonies. Inquiries and applications for membership should be made to the **Assistant Secretary, Mr. T. F. Maunder, F.S.A.A. Office, 26, Martin's Lane, Cannon Street, E.C.** A journal is published every month during the session, besides occasional memoirs, under the editorship of Mr. E. Walter Maunder, F.R.A.S., of the Royal Observatory, Greenwich.

**British Central Africa.** See RHODESIA.

**British Central Africa Protectorate, The.** A portion of British Central Africa lying round the shores of Lake Nyasa, and extending to the banks of the Zambesi. It includes all British Nyasaland, as well as the Shire Highlands and the greater part of the basin of the

river Shire. The expenses of administering the Protectorate are partly met out of revenue locally raised, and further by an annual grant from the Imperial Government. The administration is in the hands of a Commissioner acting under the Foreign Office. The port of British Central Africa is Chinde, at the mouth of the Zambesi, where a small concession has been granted by the Portuguese Government. The area of the Protectorate is about 38,000 sq. m.; the European inhabitants number about 300, and the native inhabitants are about 850,000. A number of forts recently erected guard the frontier in all directions, especially on the north and south-east, from the ingressions of the slave-trading Arabs and Yaos. The armed forces of the Protectorate consist of 200 Sikhs and 800 negroes. Most of the officers of this force are Indian officers lent, together with the Sikhs, by the Indian Government. The principal occupation of the European settlers is planting; and many thriving plantations of coffee, sugar, cinchona, and tobacco have been established. The chief towns are: Blantyre (pop. 6500), Zomba (headquarters of the Administration), Fort Johnston (the principal port on Lake Nyasa and naval dépôt), Karonga (north end of Lake Nyasa), the starting-point for Tanganyika, and Kotakota (west coast of Lake Nyasa). The Protectorate is divided into 12 Districts, and these are managed by a number of Collectors and Assistant Collectors, Judicial Officers, etc. There is at least one Judicial Officer, and in some cases two or three, in each District. Almost the entire trade of British Central Africa is with the United Kingdom. There is telegraphic connection through Umtali with the South African system. See DIPLOMATIC, RHODESIA, etc.—**History, '98.** The report for the year '97-8 of Lieut. Col. Manning, Acting Commissioner for the Protectorate (Aug. 6th), after referring to the progress of the African Trans-Continental telegraph, stated that the survey of a line of railway from Chiromo to the navigable waters of the Upper Shire river had been completed.

**British Columbia.** A province of the Dominion of Canada which lies between the Rocky Mountains and the North Pacific Ocean, and from the United States boundary to 60° N. lat. Pop. 130,000. Minerals consist chiefly of coal, silver, and gold. Vancouver Island contains large deposits of good steam coal, over 1,000,000 tons per annum being raised; and there are other large deposits in the inland parts of the colony. Gold has been found in the Kootenay, Cariboo, and Cassiar districts near the Columbia river in great abundance, and a rush thither set in in '95 and '96. The town of Rossland became the centre of the district. The gold output in '97 was £527,268; silver, £654,567; copper, £53,252; and lead, £278,102. There were also 882,854 tons of coal raised. An important industry is carried on in tinned salmon. There are also valuable timber and fruit-growing industries established. Capital, **Victoria**, on Vancouver Island, pop. 21,000. Vancouver City on the mainland is the terminus of the Canadian Pacific Railway (*q.v.*). The government of the colony is administered by a Lieut.-Governor and a responsible ministry. There is a Legislative Assembly consisting of 33 members. Three members are sent to the Dominion Senate, and six to the House of Commons. Manhood suffrage prevails in

provincial elections.—**History, '98.** The Lieut.-Governor dismissed the Turner Administration (**Aug. 9th**), alleging as his reason the friction between Mr. Turner and himself, and instructed Mr. Robert Beaven to form a ministry. This proved a task beyond his power, however, and so it was entrusted to the leader of the Opposition, Mr. Semlin (**13th**). See **BRITISH EMPIRE** (table), and **DIPLOMATIC**.

**British East Africa.** See **EAST AFRICA PROTECTORATE**.

**British Empire League, The,** was established in '94, with the object of maintaining and strengthening the connection between the United Kingdom and the outlying portions of the Empire, by the discussion and promotion of questions of common interest, more particularly those relating to trade arrangements and mutual defence. Its founders had been for the most part active members of the Imperial Federation League, who felt that the dissolution of the League, without anything being done to replace it, would be a misfortune. The objects and constitution of the League (which have been adopted by the Imperial Federation League in Canada, now known as the British Empire League in Canada) are officially stated as follows:—1. The Association to be called "The British Empire League." 2. It shall be the primary object of the League to secure the permanent unity of the Empire. 3. The following to be among the other principal objects of the League: (*a*) To promote trade between the United Kingdom, the Colonies and India, and to advocate the holding of periodical meetings of representatives from all parts of the Empire for the discussion of matters of general commercial interest, and the consideration of the best means of expanding the national trade. (*b*) To consider how far it may be possible to modify any laws or treaties which impede freedom of action in the making of reciprocal trade arrangements between the United Kingdom and the Colonies, or between any two or more British colonies or possessions. (*c*) To promote closer intercourse between the different portions of the Empire by the establishment of cheaper and, where required, more direct steam and telegraphic communication, preference to be given to routes not traversing foreign territory. (*d*) To develop the principles on which all parts of the Empire may best share in its general defence; endeavouring to bring into harmony public opinion at home and in the Colonies on this subject, and to devise a more perfect co-operation of the military and naval forces of the Empire with a special view to the due protection of the trade routes. (*e*) To assimilate, as far as local circumstances permit, the laws relating to copyright, patents, legitimacy, and bankruptcy throughout the Empire. 4. The League shall use every constitutional means to bring about the objects for which it is established, and shall invite the support of men of all shades of political opinion throughout the Empire. 5. The League shall advocate the establishment of periodical Conferences to deal with such questions as may appear ripe for consideration, on the lines of the London Conference of '87 and the Ottawa Conference of '94. Particulars of the proceedings of the League, and the steps which are being taken to carry out its objects, are given in *Britannia*, the monthly organ of the League, price 3d. Secretary, Mr. C. Freeman Murray,

Office, 112, Cannon Street, London, E.C. See **IMPERIAL FEDERATION**.

**British Guiana.** A British colony in north of S. America. Coast extends from Orinoco to Corentyn river, 300 miles, and the colony runs inland 400 miles. The area of the colony, including the territory up to the Schomburgk line which is claimed by Venezuela, is estimated at about 109,000 square miles. In connection with the long-standing frontier dispute between the two countries, it was agreed in Nov. '96 between Great Britain and the United States, Venezuela concurring, that 50 years' holding, whether by political control or actual settlement, should be regarded as giving a valid title, all disputed points being referred to arbitration. The treaty of arbitration was signed (Feb. 2nd, '97), Lord Herschell and Mr. Justice Collins being appointed arbitrators for England, and Chief Justice Fuller and Justice Brewer for the United States, with the right to choose a fifth arbitrator. Professor Maertens, of St. Petersburg University, was afterwards selected as the fifth arbitrator and president of the arbitral tribunal. For the provisions of the treaty see article on **VENEZUELA**. Pop. 285,315. Divided into three counties—Essequibo, Demerara and Berbice. Capital, Georgetown (Demerara), pop. 53,000, a picturesque, well-built city and port, provided with various excellent modern institutions; second town and port, New Amsterdam (Berbice), pop. 9000. The population is mixed, including whites, negroes, aboriginal Indians, East Indian coolies, and Chinese. Rich alluvial low-lying plains extend forty to seventy miles from the coast, and are the seat of cultivation and settlement. The staple article cultivated is sugar-cane, but this industry has been terribly damaged by the competition of bounty-fed beet growers on the Continent. Gold mining is now attracting considerable attention. The chief lack of the colony is labourers to develop its great agricultural and mineral resources. The gold output in '96-7 was worth £466,143. Government representative. Executive in hands of Governor and Executive Council; legislation conducted by Court of Policy of fifteen members, seven official and eight elected. For finance measures six elected representatives are added, forming Combined Court. Civil law is modified Roman-Dutch; criminal law is English. Exports consist chiefly of sugar, gums, molasses, and gold.

**British Honduras.** A Crown colony in Central America, bounded by Yucatan on N., Guatemala W. and S., and Caribbean Sea E. Area, 7562 sq. m. The population (33,811) includes whites, aboriginal Indians, Caribs, negroes, East Indians, and Chinese. The chief towns are Belize (6972), Corosol (1514), and Orange Walk (1967). Near the coast the country is swampy, with numerous lagoons abounding. The northern district is a flat plain; but on the west, away from the coast, hills and valleys, clothed with timber, abound, and rich grassy plains afford excellent pasturage. The chief rivers are the Hondo, the New river, and the Old or Belize river. The products are chiefly logwood and mahogany, with bananas, coconuts, plantains, rubber, and sponges. The Government is composed of the Governor, an Executive Council and a Legislative Council of three official and five unofficial members. See **BRITISH EMPIRE** (table) and **DIPLOMATIC**.

## BRITISH EMPIRE,

We furnish below a table of the British Empire, with its Colonies, Dependencies, and Protectorates, throughout the world, showing the geographical distribution of the various parts of it, their respective capitals, area, population, public revenues and expenditure, imports and exports, the dates at which they were acquired, and their political status and government. The dependencies are classified thus:—(a) Colonies possessing a full constitution, with responsible government; (b) colonies in which the legislature is partly elective and partly controlled by the governor, styled representative government; (c) Crown colonies, which are ruled directly by the Imperial Government, through their respective governors and local officials; (d) dependencies subordinate to the government of others, provinces and parts of colonies, administered by functionaries appointed by the governments on which they are dependent; (e) protectorates, internally independent, but more or less subject to British control, by treaty and otherwise; (f) places nominally belonging to Great Britain, but either unoccupied or not under authority. Territories occupied by troops, but not declared to be actually British possessions (e.g., Egypt, Soudan), have not been included in this table, and many small possessions, like the numerous

# COLONIES, ETC.

islands in the Pacific, are not given a place. Details of various dependencies will be found under their respective headings elsewhere. The figures given in the Table are as far as possible the latest received in England. The British Empire extended over an area of 8,329,000 sq. m. in '37, but it covered an area of 11,250,000 sq. m. in '97: that is, in 60 years it increased by 2,921,000 sq. m. Of the total 11,250,000 sq. m., 9,115,000 sq. m. are under settled government. The population, which was in '37 168,000,000, had increased to about 400,000,000 in '97. In '37 there were about 25,750,000 British in the United Kingdom and about 1,500,000 in the Colonies, making a total of 27,250,000. In '97 there were 39,500,000 in Great Britain and 10,500,000 in the Colonies, giving a total of 50,000,000. The total revenues of the Empire amounted to about £75,000,000 in '37, the United Kingdom having a revenue of £50,000,000, and India and the Colonies about £25,000,000. In '97 the revenue of the United Kingdom was, roughly, £110,000,000; India, £62,500,000; Australasia, £30,000,000; Canada, £8,000,000; Cape Colony and Natal, £7,000,000; other Colonies, £7,500,000; making a total of £225,000,000.

(Included in general figures.)

**British Medical Association.** First formed at Worcester, July 19th, 1832, and called the Provincial Medical and Surgical Association. Its name was changed at Birmingham in '56 to the present one. Its principal objects are:—(1) Collection of useful information, whether speculative or practical, through original essays or reports of provincial hospitals, infirmaries, or of private practice; (2) increase of knowledge of the medical topography of England through statistical, meteorological, geological, and botanical inquiries; (3) investigations of the modifications of endemic and epidemic diseases in different situations and at various periods, so as to trace, so far as the present imperfect state of the art will permit, their connections with peculiarities of soil or climate, or with the localities, habits, and occupations of the people; (4) advancement of medico-legal science, through succinct reports of whatever cases may occur in provincial courts of judicature; (5) maintenance of the honour and respectability of the profession generally in the provinces by promoting friendly intercourse and free communication of its members, and by establishing among them the harmony and good feeling which ought ever to characterise a liberal profession. The Association now numbers more than 18,000 members, and expends upwards of £1500 a year in scientific investigation, scholarships, and committees,—such as examination of the action of chloroform; a committee on therapeutics, which recently issued a valuable report; a committee on railway servants' eyesight, which is now turning its attention to mariners' eyesight; a committee on the investigation of feeble-minded school-children; a committee to investigate the clinical evidence with regard to anæsthetics on the human subject; and other topics. The Association in the United Kingdom is divided into thirty-eight branches, and there are also thirty-two Colonial branches, the Association extending its influence throughout Greater Britain. The annual subscription is one guinea per annum. The organ of the Association is the *British Medical Journal*. General Secretary, Francis Fowke. Offices, 429, Strand, London, W.C.

### BRITISH MUSEUM.

This Museum was founded in the year 1753, when the collection of Sir Hans Sloane and the Harleian collection of manuscripts were acquired, and an Act of Parliament was passed "for providing one general repository for the better reception and more convenient use of the said collections, and of the Cottonian Library, and of the additions thereto." The famous collection of MSS. made by Sir Robert Cotton, which was presented to the nation by Sir John Cotton, his descendant, in 1700, was virtually, however, the beginning of the Museum.

**Growth of the building.**—The above collections were then designated "The British Museum," deposited in Montagu House, Bloomsbury, in 1754, and opened to the public on Jan. 15th, 1759. Admission at first was very restricted, but gradually extended, till the present arrangement, by which the Museum is opened on every week-day (and on Sunday afternoons since May '96). It was soon found that as the collection grew the space available was insufficient, and in 1816 temporary additions had to be made to the old building

to accommodate the Elgin marbles. In '23 it was determined to erect a new building in place of Montagu House, and by '45 the four sides of the present Museum, designed by Sir Robert Smirke, were erected, and Montagu House removed. Further additions afterwards became necessary, and in '57 the magnificent reading-room, with its book-galleries, was built. During the years '80-83 the transference of the natural history collections was made to the new Museum in Cromwell Road, South Kensington. In '79, with the White Bequest of £65,411, a new gallery was built for the Mausoleum marbles, and the White wing was erected on the south-east side, for the accommodation of the Prints and Drawings Department, a reading-room for newspapers and parliamentary papers, two exhibition galleries, and working-rooms for the Department of Manuscripts. Space for the future extension of the buildings has been provided by the purchase in '95 of the rows of houses, with their gardens, which abut on the Museum on the east, north, and west; the ground thus secured forming, together with that already occupied, an isolated square plot of 13 acres.

**Departments.**—Originally there were only three departments in the Museum: viz., MSS., Printed Books (including coins and medals, and prints and drawings), and Natural History. The MSS. Department has been considerably increased by the addition of private collections, including the famous collection of Royal MSS. presented by George II. in 1757, and by purchase, till it now contains upwards of 55,000 volumes, besides Greek, Coptic, and Latin papyri, charters, and seals. The Printed Book Department now contains the enormous number of about 2,000,000 volumes, and receives, under the Copyright Act of '42, a copy of every book published in the United Kingdom. The annual increase from all sources amounts to about 46,000 volumes, exclusive of continuations, music, newspapers, etc. The most important additions to this department have been the collection given by George II., containing books collected by English sovereigns from Henry VII.'s time; the Civil War and Commonwealth Tracts, 1641-60, given by George III. in 1762; the Garrick collection of plays, bequeathed by David Garrick in 1779; the Cracherode bequest, 1799; the natural history library of Sir Joseph Banks, Bart., given in 1820; the "King's Library" of George III., '23; and the Grenville collection received in '47. The National Library contains not only the finest and most extensive collection of English literature in the world, but also the best library in each European language existing out of the country in which that language is spoken. The progress of printing is splendidly illustrated by the collections in this department. In consequence of the inconvenient extent to which the manuscript catalogue of the printed books had attained (altogether nearly 3000 large folios), it is now being put into print as rapidly as the funds will permit. It is hoped that the new printed catalogue will be complete in about 600 parts by the year 1900. An Oriental Printed Books and MSS. Department has been recently created. The Antiquities Department was formed in 1807, and in '61 was subdivided into three departments—viz.: 1. Greek and Roman Antiquities, which include the Hamilton collection, purchased in 1772, the Townley marbles, purchased in 1805, and, by later additions, the

Parthenon sculptures, better known as the Elgin marbles, the Phigaleian marbles, the Payne-Knight collections, the Lycian marbles, the Mausoleum remains, and many other choice specimens of Greek sculpture, bronzes, fictile vessels, gems, and ornaments. 2. **The Coins and Medals**, originating in the Cottonian and Sloane collections, which have grown to be a very large and interesting department, and include magnificent specimens of Anglo-Saxon, English, Greek, Roman, Oriental, and other coins. In '72 the finest specimens of Greek and Roman coins in the Wigan collection were purchased for £10,000. 3. **The Egyptian and Assyrian Antiquities**, known up till '86 as the Oriental Antiquities Department, which are an especially valuable and complete collection of Egyptian, Babylonian, Assyrian, Phœnician, and Semitic antiquities. The names of Sir Henry Layard, Sir Henry Rawlinson, and other explorers are inseparably connected with this department, which contains vast stores of invaluable information as to the history, the literature, and the social life of the peoples named. The **British and Mediæval Antiquities and Ethnographical Collections** were, till '66, attached to the last-named department, but in that year they were formed into a separate department. It contains all antiquities found in the British Isles, Anglo-Saxon, Celtic, or Roman, and glass-work, pottery, arms, ivories, and other antiquities illustrating life in the Middle Ages. There are also fine collections of glass, pottery, and majolica, of prehistoric antiquities, of ethnographical objects, and of Oriental antiquities. The **Prints and Drawings Department** contains one of the most noted collections of its kind. The original drawings of old masters, etchings, and engravings of the various schools of eminence, are of extreme interest and value. The famous collection formed by the late Mr. John Malcolm, of Potalloch, has been recently purchased by special parliamentary grant, and added to the Department.

The Museum is open on weekdays from 10 a.m. to 6 p.m.; after 4 p.m. in January, February, November, and December, and after 5 p.m. in March, September, and October, only certain of the galleries remain open: viz.,—on Mondays, Wednesdays, and Fridays, exhibitions of manuscripts, printed books, prints and drawings, porcelain, glass, majolica, pre-historic, British, mediæval and ethnographical collections; on Tuesdays, Thursdays, and Saturdays, Egyptian, Assyrian, Semitic, Greek and Roman galleries; religious and American collections. On Sunday afternoons the Museum is open from 2 to 4 p.m. in January, February, November, December; from 2 to 5 p.m. in October; from 2 to 5.30 p.m. in March, September; from 2 to 6 p.m. in April; from 2.30 to 7 p.m. in May, June, July, August. The Museum is closed on Good Friday and on Christmas Day. Students are admitted to the several departments under regulations to be obtained from the Director.

Admission to the reading-room is by ticket. A reader's ticket is granted to persons over twenty-one years of age on a written application, stating object of researches, etc., and accompanied by a recommendation from a householder, who must be a person of recognised position, and who must certify that the applicant will make proper use of the reading-room. The authorities will not accept the recommendations of hotel and lodging-house

keepers in favour of their lodgers. The total number of visitors to the Museum in '97 (exclusive of readers) was 586,437, of whom 522,569 attended during the day, 26,254 in the evening, and 37,594 on Sundays. The average daily number of visitors in the daytime was 1686, in the evening 85, on Sunday afternoons 723. The visitors to the reading-room numbered 188,628, a daily average of 624; the total number in '96 was 191,363.

**British New Guinea.** See NEW GUINEA.

**British North Borneo.** See BORNEO.

**British South Africa Company.** On Oct. 29th, '89, a Royal Charter was granted to this Company, conferring upon it large administrative powers in the region north of Cape Colony, now known as Rhodesia, and authorising it to promote trade and commerce and to work mineral and other concessions in those regions. Rhodesia includes British Central Africa, north of the Zambesi, and Mashonaland and Matabeleland, south of the Zambesi, and covers a total area of about 750,000 square miles. Dr. Jameson was the Administrator of the Company's territories till the incursion into the Transvaal, when he was succeeded by Earl Grey, and the control of the military forces of the country was placed entirely in the hands of the Imperial Government. The directors of the Company in Jan. '96 asked the Government "to institute an inquiry into the circumstances under which Dr. Jameson crossed the Border." This was afterwards done, for a Select Committee of the House of Commons was appointed in August '96 to inquire into the origin of the Johannesburg incursion, and into the administration of the Company, and to report thereon; and further to report what alterations are desirable in the government of the territories under the control of the Company. The proceedings and the report of the Committee were given fully in the article on SESSION, sect. 9, in the '98 ed. The authorised share capital of the Company amounts to £5,000,000. The London Office is at 15, St. Swithin's Lane, E.C. For officials see DIPLOMATIC. See also article on RHODESIA.

**Brooke, Rev. Stopford A., M.A.,** was b. 1832. Educated at Trin. Coll., Dublin, where he graduated ('56), winning the Downe Prize and Vice-Chancellor's medal for English verse. He was formerly Chaplain to the Queen and Chaplain to the Empress Frederick of Germany. In '80 Mr. Brooke seceded from the Church of England because he could not accept the orthodox views on miracles, and became minister of Bedford Chapel, Bloomsbury. In '95, however, after a lengthy illness, he found himself compelled to retire from the post. He is the author of several works, among which are "Life and Letters of the late F. W. Robertson," a "Primer of English Literature," an able review of which is to be found in Mr. Matthew Arnold's "Miscellaneous Essays," "The Early Life of Jesus," several volumes of sermons, a volume of poems issued '88, a "History of English Poetry," a work on Early English Literature, which subject he has made peculiarly his own, a lecture delivered in '93 entitled "Theology in English Poetry," an able criticism of "Tennyson: his Art and Relation to Modern Life" ('94), and "The Old Testament and Modern Life" ('96).

**Brunel.** See BORNEO.

**Bryan, William Jennings,** was born at Salem, Marion County, Illinois, March 19th,

1860. Educated first at a public school at Salem, he afterwards went to the Whipple Academy at Jacksonville, and then to Illinois College, where he took high honours in classics. Deciding to follow a legal career, he studied at the Union Law College, Chicago, and first practised for himself at Jacksonville. In '87 he removed to Lincoln, Nebraska, and in '90 he was elected to Congress as an extreme Free Silver man. Re-elected in '92, he afterwards lost his seat because of his uncompromising views on the Silver question, which alienated some of his own supporters. His oratorical abilities were then made good use of in advocating the Silver cause, while he still kept up his law practice and edited an Omaha newspaper. In '96 he attended the Democratic Convention at Chicago, and after a speech full of impassioned rhetoric, which roused the delegates to almost frenzied enthusiasm, he was nominated for the Presidency, but was beaten at the election on Nov. 3rd, when Mr. McKinley received an overwhelming majority of votes. At the beginning of the Spanish-American war he was appointed Colonel of the Nebraska Volunteers (June 4th, '98), but saw no fighting.

**Bryce, Rt. Hon. J., M.P.** See under COMMONS.

**Buckhounds, Master of the.** Has control of the royal hunts, and charge of the royal inclosure at Ascot. The office is in the department of Master of the Horse. See MINISTRY.

**Buckle, George Earle,** son of the Rev. George Buckle, canon of Wells Cathedral, was b. near Bath 1854. He is editor of the *Times*, to which post he was appointed in '84, having previously been connected with the editorial staff of that journal. He was educated at Honiton Grammar School, Winchester, and New Coll., Oxford, of which he was a scholar. He won the Newdigate Prize for English Verse in '75, took a First Class in *Literæ Humaniores* '76, and a First Class in Modern History in the following year. He was subsequently elected to a *Fellowship of All Souls' Coll.*, and was called to the bar at Lincoln's Inn in '80.

**Budget.** See FINANCE NATIONAL, and SESSION, sect. 55.

**Building Societies.** For a critical article on these societies and their legal position, see ed. 94. For the Building Societies Act of '94, see SESSION, sect. 54, in ed. '95.

## BULGARIA.

Bulgaria is bounded on the north by the Danube, on the west by Servia, on the south-west and west by Turkey, and on the east by the Dobruja. By the Treaty of Berlin, '78, it was constituted an autonomous and tributary principality under the suzerainty of the Porte. The executive power is vested in the Prince, assisted by a council of ministers, and the legislative power in a single chamber, the *Sobranje* or National Assembly, elected for five years by manhood suffrage in the proportion of one member to every 20,000 of the population. There is also a Great *Sobranje*, consisting of delegates elected in the proportion of one to 10,000 of the population, to which constitutional and other questions must be referred. In '85 Eastern Roumelia was united to Bulgaria, and

the amount of tribute and the share of the Turkish debt to be assumed by Bulgaria were left to be fixed by the Powers. Prince Alexander of Battenberg was the first ruler of the country, but he was overthrown in '86, and succeeded by Prince Ferdinand of the House of Coburg, who was elected unanimously by the National Assembly as Prince in '87. The State religion is that of the Orthodox Greek Church, but there are many Mahomedans amongst the inhabitants. Education is free and obligatory. The chief exports are corn, wine, wool, tallow, and other agricultural and pastoral produce. The bulk of the trade is with Turkey, Great Britain, and Austria. Railways connect Sofia with Constantinople and Belgrade, and Rustchuk with Varna. Area (including Eastern Roumelia), now also known as Southern Bulgaria), 38,390 sq. m.; pop. 3,310,713. Capital, Sofia, pop. 47,000. Revenue, '98, £3,382,308; expenditure, £3,379,519; imports, '97, £3,359,769; exports, £2,391,62; public debt, '98, £7,600,000.—History, '98. The Sultan's *berats* for the creation of Bulgarian bishoprics at Monastir, Divra, and Strumnitza were granted (Jan. 4th), after the most urgent representations on the part of Bulgaria, and protracted resistance on the part of the Porte. See DIPLOMATIC AND FOREIGN ARMIES.

**Buller, General Sir Redvers Henry, V.C., G.C.B., K.C.M.G.,** was b. 1839. Ensign '58. Served in the campaigns in China ('60), Ashanti ('73-4), South Africa ('78-9), Egypt ('82-4), and Soudan ('84-5). Has received four medals with seven clasps, and five other decorations. All his regimental service has been in the 60th King's Royal Rifles. He has held twelve staff appointments, and was Quartermaster-General of the Army '87-90, and Adjutant-General of the Army '90-97. He was under-Secretary for Ireland for a short time in '87. Address, Downes, Crediton, Devon.

**Bülw, Bernhard von,** was born in 1850, and is a son of Herr von Bülw, who was Foreign Secretary of Germany, under Prince Bismarck, '73-9. He entered the German Foreign Office in '73, and acted as Secretary of Embassy in Rome, St. Petersburg, and Vienna, holding the important post of *Chargé d'Affaires* to Greece during the Russo-Turkish war. At the conclusion of that war he was appointed one of the Secretaries of the Berlin Congress, and after more diplomatic service in Paris and St. Petersburg, he was appointed Minister to Roumania '88, and to Italy '93. During '97 he acted as Foreign Secretary for a time, while Baron von Marschall was on leave, and was at last definitely appointed to that office.

**Bundesrath.** See GERMANY and GERMAN POLITICAL PARTIES.

**Burial Grounds.** For report of Committee on this subject, see SESSION, sect. 101.

**Burial Laws Amendment Act, '80.** This is an Act to enable the burial of Nonconformists and others in Church of England burial-grounds without the service of the Church of England, and in some cases with other services. It was long opposed by churchmen on the ground that its advocates had no real grievances, but regarded it as a stepping-stone towards Disestablishment. It provides that any one responsible for the burial of a deceased person may give forty-eight hours' notice in writing, and in the form prescribed in the first schedule

to the Act, to the incumbent of any place or his substitute, that it is intended to bury the deceased in the churchyard of such place without the rites of the Church of England, and that the incumbent or his substitute shall then be free to permit such burial. The burial shall take place in accordance with such notice, and the public are to have free access to such burial, which may be carried out either with the service of any Christian Church or without any service. But the proceedings are not to be made the occasion of bringing into contempt any church or denomination. Ministers of the Church of England are empowered to use the burial service of the Church of England at a burial in unconsecrated ground. In cases where that burial service is not allowed to be used, or when requested so to do by the person responsible for the burial of the deceased, they are empowered to use such service, consisting of prayers taken from the Book of Common Prayer and portions of Scripture, as may be approved of by the Ordinary. The Act extends to the Channel Islands, but not to Scotland or Ireland. See SESSION, sect. 101.

**Burma** comprises a vast tract of country in southern Asia, bounded on the north and west by the mountainous ranges of Thibet, Assam and Manipur, on the east by Chinese territory, and partly on the south-east by Siam. An agreement between Great Britain and France in Jan. '96 made the Mekong the boundary between the Shan States and Indo-China. There are three great tribal families in the country, the chief of which is the Mran-má (from which the word Burma is derived); and while distinct from the Aryans in India and the Chinese on the other side, the natives to some extent partake of the peculiarities of both. The country politically is regarded and governed as part of the Indian Empire, a Lieut.-Governor being appointed by the Viceroy, with a Legislative Council of five official and four non-official members, all nominated. The country is fertile, especially in the valley of the great river Irrawaddy. Gold, amber, and jade are found, and ruby mines exist in North Burma. Buddhism is the prevailing religion; it is of a peculiar type, which allows perfect tolerance to all other creeds, but prevents proselytism. **Upper Burma** was annexed by proclamation on Jan. 1st, '86. The system of district administration is now perfected, passing upwards from the township, through the subdivisions to the district and the commissionership. The **Chins** or **Kachins** are inhabitants of the outlying highlands of the Bhamo and Katha districts of Upper Burma. The Shan States lie between Burma and Indo-China. With regard to railways, at the beginning of '98 it was stated that the Burma railways at present sanctioned were the following lines:—The Irrawaddy section, from Rangoon to Prome, with suburban line at Rangoon, 170 miles open; the Sittang section, from Rangoon to Tounghoo, 166 miles; the Mandalay section, Tounghoo to Mandalay shore of Irrawaddy, with branches from Myoboung to Amarapura shore of Irrawaddy, and from Thazi to Meiktila, 242 miles; Mu Valley Railway, Sagaing to Mogoung, 294 miles; Mogoung to Myitkina (now under construction), 37 miles,

and the branch to Katha, 14 miles; and the Mandalay-Kunlon (under construction), 224 miles; making a grand total of 1148 miles, of which 261 miles were either in progress or sanctioned for construction, and 887 open for traffic. The estimated expenditure during the official year '97-8 was returned at 53 lakhs for the Mandalay-Kunlon, 25½ lakhs Sagaing branch, while 13½ lakhs was the estimated cost of completing the Meiktila-Myingyan branch. The important statement came from Rangoon (Oct. 11th) that the survey of the Burma-Yangtse Railway was expected to be commenced shortly, one party starting from Burma and the other from Chungking. The former is under Mr. Bagley, chief engineer of the Salween Railway, and Capt. Davies and Capt. Pottinger will accompany the parties. A map shewing the proposed new lines is given under CHINA. **Area**, including both Upper and Lower Burma, 171,430 sq. m.; pop. 7,605,560.

**Burnand, F. C.**, the editor of *Punch*, was b. Nov. 1836. Educated at Eton and Trin. Coll., Cambridge. Called to the bar '58, and practised for two years, then took to dramatic work, principally devoting himself to burlesque, of which "Ixion" and "Black-eyed Susan" may be said to have inaugurated the era of "long runs." Wrote several musical pieces for the German Reed Entertainment. Wrote "Contrabandista," "Cox and Box," and "The Chieftain" ('94) comic operas, music by Arthur Sullivan. Among his travesties, "The Ride to Khiva," "One and Three," "Chikkin Hazard," "Gone Wrong," "Across the Dark Continent," and "Strapmore," went through a considerable number of editions. Among plays, of which he has written about a hundred, "The Turn of the Tide" and "Our Club" enjoyed great popularity. Author of "Happy Thoughts" in *Punch*. Became, after some years' connection with *Punch*, its editor ('80). Later productions include "Very much Abroad," "Quite at Home," "Rather at Sea," which form part of the "Happy Thought Series," and the "Zigzag Guide to Kent Coast," illustrated by Phil May.

**Burns, John, M.P.** See under COMMONS.

**Butt, Clara**, was b. in Sussex in 1872. After studying at Bristol she gained a Royal College of Music scholarship, and in '92 appeared for the first time in London at the Albert Hall in the "Golden Legend," and directly afterwards at the Lyceum in the opera "Orfeo." Her success was at once assured, and she became in great demand as a singer. She has taken part in the two last Handel Festivals.

**Butter.** See TRADE, '98.

**Buxton, Sir Thomas Fowell**, Governor of South Australia, was b. 1837, and is the son of the late Sir Edward North Buxton, M.P. His grandfather was the distinguished philanthropist and advocate of the abolition of slavery. He was ed. at Harrow and Trinity College, Cambridge (M.A. '59), and sat as Liberal M.P. for King's Lynn '65-68. He succeeded to the baronetcy in '58, and married, in '62, Lady Victoria Noel, daughter of the first Earl of Gainsborough. He was High Sheriff of Norfolk in '76, and is well known as a philanthropist and an Evangelical Churchman. In April '95 he was appointed Governor of South Australia in succession to the Earl of Kintore.

C

**Cabinet, The Present British.** See MINISTRY.

**Cabinets, Colonial and Foreign.** See DIPLOMATIC.

**Caicos Islands.** Southern islands of the Bahama group. With Turk's Island are under government of Jamaica. Salt raking, sponge fishing, and the cultivation of sisal grass for hemp, are the chief industries.

**Caine, Thomas Henry Hall,** the eminent novelist and dramatist, was born of Manx parentage in 1853, and commenced his career as an architect in Liverpool. From contributing to both the *Builder* and the *Building News* he became connected with journalism, joined the staff of the *Liverpool Mercury*, and wrote in the *Academy* and the *Athenæum*. Resided with Dante Rossetti in London till the poet's death in '82. Published "Sonnets of Three Centuries" ('82), and also "Recollections of Rossetti," while in '83 "Cobwebs of Criticism" appeared. During the last twelve years his skill as a novelist has been exemplified in "The Shadow of a Crime" ('85), "A Son of Hagar" ('86), "The Deemster" ('87), which was dramatised under the title of "Ben-my-Chree" ('87), "The Bondman" ('90), "The Scapegoat" ('91), and "The Manxman" ('94), a dramatic version of which was also performed by Mr. Wilson Barrett. The last-mentioned work began the era of the one-volume novel. His latest work, "The Christian," was published on Aug. 9th, '97, and nearly a hundred thousand copies were sold in England, and as many more in the United States, within the first year after publication. On both continents it provoked great discussion, the verdict in this country being generally unfavourable to the motive of the book, while in America it was generally favourable. It was immediately translated into most of the languages of Europe, and provoked the same divided opinion everywhere. Mr. Hall Caine has travelled in Iceland ('90), in Russia ('92) on behalf of the persecuted Jews; and in '95 visited the States and Canada, where he represented the Society of Authors, and obtained important concessions from the Canadian Parliament as to the Canadian Copyright demands. In Sept. and Oct. '98 he visited the United States again in order to produce a dramatic version of "The Christian," which first appeared in Washington Sept. 26th, and in New York Oct. 3rd. Address: Greeba Castle, Isle of Man.

**Calcutta, Bishop of.** See WELLDON, REV. J. E. C.

**Cambodia.** A province of Indo-China, and a French protectorate since '63. Capital, Pnompenh, on the Mekong. The reigning sovereign is King Norodom, but there is a French Resident at Pnompenh, and each of the eight provinces into which the country is divided is under the political and administrative control of a French Resident. The chief products of the country are rice, cotton, and fish. Area, 46,000 sq. m.; pop. about 2,000,000. See COLONIES, ETC., OF EUROPEAN POWERS and INDO-CHINA.

**Cambridge, H.R.H. George William Frederick Charles,** 2nd Duke of, K.G., P.C., K.P., G.C.M.G., G.C.H., G.C.B., G.C.S.I., (creat. 1801), grandson to George III. and first cousin to the Queen, was b. at Hanover March 26th, 1819. He became a colonel in the British army in '37, and succeeded his father Adolphus Frederick, 1st Duke of Cambridge, in '50. Four years later ('54) he was raised to the rank of major-general, on his appointment to command the two brigades of Highlanders and Guards united to form the first division of the army sent against the Czar Nicholas of Russia in the Crimean war of '54-6. In '56 he was promoted to the rank of General; in '61 appointed Colonel-in-chief of the Royal Artillery and Royal Engineers; and in '62 raised to the rank of Field Marshal. He was subsequently appointed Commander-in-chief of the British army, and the appointment perpetuated by letters patent '87. It came to an end, however, with the scheme of Army Reform evolved during '95, and the Duke retired in the autumn. He is Ranger of Hyde Park and Richmond Park.

**Cambridge University.** About the middle of the thirteenth century students began to collect in hostels. The endowed colleges gradually absorbed the hostels, the last of which was annexed to Trinity in 1540. The legislative bodies are the Senate, which consists of graduates, and the Council, a smaller body elected therefrom. Like Oxford, the University underwent important changes in 1882, as did also many of the colleges in both universities. The following is the list of colleges: (Founded 1257), Peterhouse—Head, J. Porter, D.D.—Undergraduates, 56; (1326), Clare Hall, E. Atkinson, D.D., 187; (1347), Pembroke, C. E. Searle, D.D., 145; (1348), Gonville and Caius, N. M. Ferrers, D.D., 209; (1350), Trinity Hall, H. Latham, M.A., 242; (1352), Corpus Christi, E. H. Perowne, D.D., 62; (1441), King's, A. A. Leigh, M.A., 128; (1448), Queens', H. E. Ryle, D.D., 82; (1473), St. Catherine's, C. K. Robinson, D.D., 65; (1496), Jesus, H. A. Morgan, D.D., 112; (1505), Christ's, John Peile, Litt.D., 162; (1511), St. John's, C. Taylor, D.D., 251; (1519), Magdalene, Hon. L. Neville, M.A., 60; (1546), Trinity, H. M. Butler, D.D., 703; (1548), Emmanuel, W. Chawner, M.A., 179; (1595), Sidney Sussex, Charles Smith, M.A., 74; (1800), Downing, Alex. Hill, M.A., M.D., 58. Hostels (1882), Selwyn, J. R. Selwyn, D.D., 113; (1884), Non-Collegiate, 122. Total, 3019. The examinations necessary for the degree of Bachelor are the Previous ("Little Go"), General, and Special examinations. Candidates for Honours have to pass an additional examination in Mathematics, French or German with their Previous. The Triposes, which for Honour candidates take the place of the General and Special, are Classical, Mathematical, History, Law, Theology, Moral Science, Natural Science, Oriental Languages, and Mediæval and Modern Languages. A Mechanical Sciences Tripos was established in '92. Women are admitted to the examinations for honour students, and reside mostly in

Newnham College and Girton College. (See article WOMEN, HIGHER EDUCATION OF.) Vigorous efforts have been made to secure the advantages of degrees for women by resident and non-resident members of the University, but hitherto without success. Students of not less than two years' standing at an affiliated college, on being admitted members of the University, may, under certain conditions, be deemed to have already kept three of the terms required for any degree; it is the same with adult students under a committee working in concert with the University in places where there is no affiliated college. **Affiliated colleges are:** University College, Nottingham; St. David's, Lampeter; Firth, Sheffield; University College of Wales, Aberystwyth; and the Universities of New Zealand, Adelaide, Calcutta, and Cape of Good Hope; University of Allahabad; Punjab University; University of Bombay; University of Toronto; St. Edmund's College, Old Hall, Ware; University of Madras. **Affiliated centres:** Hull, Derby, Scarborough, Newcastle-upon-Tyne, Sunderland, Norwich, Exeter, Plymouth, Stonehouse and Devonport. Many public schools are inspected by the University, and thousands of scholars in the Grammar and High Schools of the country compete in the **Cambridge Local Examinations**, while those who attend the University local lectures are also to be numbered by thousands. (See also **UNIVERSITY EXTENSION**.) The undergraduates have a most able organ, called the *Granta*, edited by Mr. R. C. Lehmann. **Degrees:** D.D., Sc.D., Litt.D., B.D., M.A., B.A., D.Sc., M.D., M.B., M.Ch., LL.D., LL.B., LL.M., Mus.D., Mus.B. Chancellor, His Grace the Duke of Devonshire, K.G., LL.D. Vice-Chancellor, A. Hill, M.D. (Downing); High Steward, Lord Walsingham. **Parliamentary representatives,** Prof. R. C. Jebb, LL.D. (*q.v.*), and Sir J. E. Gorst, M.A. **Proctors,** '98-9: J. H. Gray, M.A. (Queens'), W. T. Southward, M.A. (St. Catharine's). **Registrary,** John Willis, Clark M.A. **Consult Camb. Univ. Calendar.**

**Cameroons.** A territory on the Bight of Biafra, West Africa, annexed by Germany in 1884. Its coast line extends for about 200 miles along the Bight. An agreement was concluded in April '93 settling the boundary between the territory and the Niger Coast Protectorate. In November of the same year an agreement was signed at Berlin fixing the boundary line between the Cameroons and the Niger Territories. This agreement gave Germany the command of the Benue and access to Lake Tchad. The boundary between the French and German sphere was settled by an agreement made in Feb. '94. Starting from the point where the southern boundary of the Cameroons meets 15° E. long., the frontier runs in a N.E. direction to a point about 30 miles E. of Yola, and thence on to Lake Tchad. Cacao and tobacco are grown, and a flourishing trade is carried on in ivory and palm-oil. Cocoa is becoming a considerable export. The area is 101,130 sq. miles, and the population 4,570,000. The exports for the year '96 amounted to £266,566, and the imports to £277,184. See **COLONIES, ETC., OF EUROPEAN POWERS.**

**Campbell, Mrs. Patrick,** the actress, was b. late in the sixties, at Kensington. Appeared as an amateur for several years in Norwood. First professional appearance was in "Tares," with Mrs. Bandmann Palmer, on tour. Also toured with Mr. Vezin, in "Bachelors," and as

a member of Mr. Ben Greet's company gained valuable experience, particularly in Shakespearean and other poetic rôles. In London, she first attracted attention as Rosalind at a *matinée* at the Shaftesbury. This led to her engagement in the autumn of '91 to play Astræa in "The Trumpet Call" at the Adelphi. She remained here till the spring of '93, when Mr. Pinero secured her for "The Second Mrs. Tanqueray," at the St. James's. In this play Mrs. Campbell's success was immediate. She has since appeared as Agnes in "The Notorious Mrs. Ebbsmith," as "Fedora," as Juliet in a revival of "Romeo and Juliet" by Mr. Forbes Robertson at the Lyceum in Sept. '95, as the slave girl in "Pour la Couronne," as "Magda," as Lady Teazle in "The School for Scandal," as Ophelia in "Hamlet," and as Lady Macbeth in '98.

## CANADA, DOMINION OF.

The Dominion of Canada consists of the upper portion of the North American continent except Labrador, which belongs to Newfoundland, and Alaska, which belongs to the United States, and is 3,456,383 sq. miles in extent. In 1867 the provinces of Ontario, Quebec, Nova Scotia, and New Brunswick united under one federal government; in '70 Manitoba and North-West Territories were added, the latter by purchase in '69 from Hudson Bay Company; British Columbia joined in '71, and Prince Edward Island in '73. In '80 an Order in Council was issued, annexing to the Dominion such British possessions in North America, other than Newfoundland, as were not previously in the Dominion. Newfoundland remains independent. Federal capital, Ottawa, Ontario, pop. 44,154; chief cities, Montreal, 216,650; Toronto, 181,220; Quebec, 63,090; Halifax, 38,556; St. John, 39,179; Winnipeg, 25,642. The population in '98 amounted to about 5,250,000. The French number 1,415,090, or 29¼ per cent. The Indians number about 100,000. Canada is the largest of all the British possessions, embracing nearly one-half the whole empire, and is 500,000 sq. miles larger than the United States without Alaska. All the provinces are well watered by rivers. The climate varies, being in the east cold but clear in winter, warm in summer; while the climate of British Columbia resembles that of England. The winter is dry, healthy, and invigorating. The mineral deposits are practically inexhaustible, particularly coal, iron, copper, and gold. The recent discoveries of gold in British Columbia are referred to in the article under that heading. During '97 extraordinarily rich finds of gold were made on the banks of the Klondike river, in the extreme N.W. of the Dominion. The scene of these finds lies actually in the North West Territories (*q.v.*), near where the British section of the Cordillera belt of mountains touches the international boundary between Alaska and Canada, and about 53 miles S.E. of the junction of Forty Mile Creek with the river Yukon. The mineral output of '97 included gold, £1,228,000; silver, £664,581; copper, £300,332; coal, £1,457,251 (3,876,201 tons), making, with other smaller mineral products, a total of £5,757,827. The fisheries on both the Atlantic and Pacific coasts are extremely valuable, and the timber supply is very rich. Agriculture is successfully carried on in all parts, and in Manitoba and the territories the wheat-growing as well as general farming

capabilities are immeasurable. Ranching has in late years also proved profitable. **Government.** The federal parliament is modelled after that of the United Kingdom, with a Senate of 81 members nominated for life, 24 from Ontario, 24 from Quebec, 10 from Nova Scotia, 10 from New Brunswick, 4 from Manitoba, 3 from British Columbia, 4 from Prince Edward Island, and 2 from the Territories. The House of Commons consists of 213 members elected quinquennially on a low suffrage, 92 coming from Ontario, 65 from Quebec, 20 from Nova Scotia, 14 from New Brunswick, 6 from British Columbia, 5 from Prince Edward Island, 7 from Manitoba, and 4 from the North-West Territories. The number of members sent by the provinces is in proportion to the population, and a readjustment takes place every ten years after each census. The senators and members are paid. The Governor-General, representing the Queen, receives £10,000 yearly. In each of the provinces a Lieut.-Governor, appointed by the Governor-General in Council, represents the executive authority. In Quebec and Nova Scotia the legislature consists of two Houses, with a responsible Ministry. In New Brunswick, Ontario, Manitoba, British Columbia, Prince Edward Island, and the North-West Territories there is only one Chamber, the Legislative Assembly, and a responsible Ministry. The limits of federal and provincial jurisdiction are regulated by the British North America Act, which passed the Imperial Parliament in '67, and is the constitution of the Dominion. There is no State church, but the Roman Catholic Church in the province of Quebec has secured to it the privileges enjoyed by it previous to British rule, of collecting tithes, etc. The estimated strength of the chief religious bodies is: Roman Catholics, 1,992,017; Methodists, 847,765; Presbyterians, 755,326; Church of England, 644,059; Baptists, 303,830. Elementary education is free, and is liberally supported by the provincial Governments, the schools in British Columbia and the N.W. Territories being wholly supported by Government. There are altogether 17,272 public schools of all grades, with 20,832 teachers and 1,017,688 pupils. Besides these there are many private schools, and each province has one or more universities. The Governor-General appoints the judges of the Superior Courts, and county courts in the provinces, and over all is the Supreme Court at Ottawa, with appellate civil and criminal jurisdiction throughout the Dominion. The military establishment consists of (1) an Imperial military and naval garrison at Halifax, and a naval station at Esquimaux, on the Pacific, altogether comprising about 2000 troops; (2) a militia force—the active division, in which the term of service is three years, and which numbers about 35,000 men, and the reserve, consisting of all between the ages of 18 and 60 who do not serve in the active force. The Imperial Government takes charge of the naval defence of the country. There were in '97 sixty-five main lines working in the Dominion of Canada, with a total mileage of 16,387. The two principal systems are, of course, those of the Canadian Pacific and Grand Trunk of Canada Railways. **Revenue,** '97-8, £8,390,771; **expenditure,** £8,062,463; **exports,** '97-8, £33,226,200, an increase over the previous year of £5,309,000; **imports,** £29,230,400, an increase over the previous year of 4,375,000; **net debt,** £54,427,200.

**Public works** cost £36,343,596. For Ministry see DIPLOMATIC; see also BRITISH EMPIRE (table).

**Political Parties.**—The two chief political parties in Canada are known by the time-honoured names of Conservative and Liberal. From the date of confederation, in 1867, the Liberals were only in power once till their signal victory in '96. The late Sir John Macdonald, the leader of the Conservative party, held office from '67 to '91, with the exception of five years, when a Liberal administrator under Mr. Mackenzie was in power. When Sir John Macdonald died he was succeeded by Sir John Thompson; and Sir Mackenzie Bowell followed him on his death, Dec. 12th, '95. The Manitoba Schools question and other questions shook the Government's position during '95 and '96, and after some internal dissensions Sir Charles Tupper became Premier on the eve of the dissolution of Parliament in April. At the General Election which followed there were the following parties in the field—the Conservatives, led by Sir Charles Tupper, advocating protection and preferential trade, if possible, with Great Britain and the Colonies, new steam and cable services, the strengthening of the defences of the Dominion, and the redress of the grievances of the Catholics with regard to the Manitoba Schools; the Liberals, led by Sir Wilfrid Laurier (*q.v.*), advocating fiscal reform in the direction of free trade, modified only by revenue requirements, the extension of the franchise, the enlargement of the trade of Canada, and a policy of non-interference with provincial politics, especially with regard to Manitoba; the McCarthyites, seceders from the Conservative party; and the Patrons of Industry, forming practically the Labour party. In the electoral fight all the Catholic influence was thrown on the side of the Conservatives, chiefly because of the Manitoba schools issue; but this intervention probably did more harm than good, for in Quebec, where it might possibly have been expected to have effect if anywhere, the Liberals triumphed signally. There were finally elected 118 Liberals, 86 Conservatives, and 8 Independents, the latter being on the whole supporters of the Liberals. Subsequent bye-elections showed that Sir Wilfrid Laurier's hold on the country had increased in strength, and his tariff legislation in the Jubilee year, involving preferential trade with Great Britain, aroused the enthusiasm of the country.

**History, '98.**—The firm of Mackenzie, Mann & Co. signed a contract with the Government (Jan. 25th) for the construction of 150 miles of railway from Glenora on the Stickeen river to Teslin Lake, whence there is a navigable water route to Klondike and all the Yukon district. The consideration was a grant of 5000 sq. m. of mineral lands in the Yukon district. A Bill embodying these proposals was debated at great length in the House, and was read a second time (March 11th) by 111 votes to 72, and finally passed. The Senate, however, rejected it (31st). The rush westwards to Klondike from Canada and the United States brought about an unprecedentedly heavy traffic, which was accelerated by a rate war between the C.P.R. and the Grand Trunk Companies. The Finance Minister in his budget speech announced that from the date of the abolition of the German and Belgian treaties with Great Britain—viz., August 1st, the reciprocity section of the tariff would only apply to the

United Kingdom, India, New South Wales and the British West Indies (April 6th). Bermuda, British Guiana, Ceylon, and the Straits Settlements were afterwards added, and it was announced that the preferential tariff would be extended to any other British colony or possession, the Customs tariff of which was as favourable, on the whole, to Canada as Canada's tariff was to such colony. [After the outbreak of the American war with Spain a much more friendly feeling than had previously existed was manifested by Americans generally towards Great Britain and Canada. One result of this was the agreement (May 30th) to appoint a Commission to adjust all controversial matters between Canada and the United States.] In the speech from the Throne at the prorogation an expression of rejoicing at these improved relations with America found a place. Both Houses also presented farewell addresses to Lord Aberdeen, whose retirement from the position of Governor-General was received with great regret (June 13th). The subjects submitted for the consideration of the Joint Commission were officially determined as follows:—"The Behring Sea sealing question, reciprocal mining regulations, the Alaskan boundary, restrictive regulations for the preservation of the fisheries of the Great Lakes, the North Atlantic fishery question, the boundary question, the Alien Labour Laws, and reciprocity of trade." Lord Herschell, Sir Wilfrid Laurier, Sir Richard Cartwright, Sir Louis H. Davies, and Mr. J. Charlton, a member of the Dominion Congress, were appointed as British Commissioners (30th). The American Commissioners were Mr. Fairbanks, Mr. Gray, Mr. Dingley, Mr. Kasson, and Mr. J. W. Foster. The Commission met at Quebec (Aug. 23rd), Lord Herschell being appointed chairman; Mr. W. C. Cartwright, of the Foreign Office, and Mr. H. Bourassa, M.P. for Labelle County, Quebec, were chosen British secretaries, and Mr. C. P. Anderson American secretary. A vote was taken throughout the Dominion as to whether the liquor traffic should be prohibited or not (Sept. 29th). Ontario, Nova Scotia, British Columbia, New Brunswick, Prince Edward Island, Manitoba, and the N.W. Territories voted for prohibition, and Quebec against. The total of votes for prohibition was 278,463, and the total against, 264,579, showing a majority for prohibition of 13,884. The proportion of votes polled was small, the number of voters enrolled being 1,233,849. The Anglo-American Commission decided to adjourn (Oct. 8th) to Nov. 1st, and then to meet in Washington. Their meetings had been of a most cordial character, and it was stated on good authority that the Behring Sea controversy would be settled by the abolition of pelagic sealing, with suitable indemnities to Canadian sealers.

**Canadian Copyright.** See INTERNATIONAL COPYRIGHT.

**Canals.** See eds. '95 and '96 for an article giving particulars as to the mileage, traffic and revenue of the canals in the United Kingdom, and as to the canals of France and Germany. See also ENGINEERING.

**Canary Islands.** Off N.W. African coast. Belong to Spain, and are ruled as an integral province of the kingdom. Bananas, potatoes, and tomatoes are the most valuable products. The population of Teneriffe is 95,000, of Grand

Canary 75,000, and of Palma 32,000. See COLONIES, ETC., OF EUROPEAN POWERS.

**Canons.** See CHURCH OF ENGLAND.

**Canterbury, Archbishop of.** See under PEERAGE.

**Cape Breton Island.** A portion of Nova Scotia (*q.v.*). See BRITISH EMPIRE (table).

### CAPE COLONY.

Cape Colony occupies the extreme southern portion of Africa. Its boundaries are: west, the Atlantic Ocean; north, the Orange river and the Bechuanaland Protectorate; east, the Orange Free State, Basutoland, and Natal; south, the Indian Ocean. The area of the colony is 292,000 sq. m., and the pop. 2,011,305. Whites number about 400,000, and the greater number of them are of Dutch descent. Capital, **Cape Town**, pop. 83,718; other chief towns, Port Elizabeth, pop. 23,266, the chief commercial port; Grahamstown, pop. 10,498, the capital of the eastern province; **Kimberley**, pop. 28,718, the seat of the diamond trade; Queenstown, King Williamstown, and Panmure, or East London. Simon's Bay is an Imperial naval station 22 miles south of Cape Town. The **Transkeian Territories** and **Walfisch Bay** have some separate provincial status. The Transkeian Territories are ruled by resident magistrates under the direct control of the Government of the colony; and Walfisch Bay, an isolated port on the coast of Damaraland, is also administered by a resident magistrate. **Pondoland**, which up till then had been a protectorate, became an integral portion of the colony in March '94, and the Crown colony of **Bechuanaland** in '95. Executive in the hands of a Governor and responsible Ministry of five principal ministers. The Parliament consists of a Legislative Council of 24 members, and a House of Assembly of 79 members. Members of the Legislative Council are elected for seven years, and of the Assembly for five years. The members of both Houses are paid. The electors are the same in each case, and are qualified as occupiers of property worth £75, or receiving a salary equivalent to £50. The laws are founded on a modification of the Roman-Dutch Law. Both English and Dutch languages are used in Parliament and the Courts. The colony possesses a complete system of local self-government, elective councils maintaining the roads in all its divisions. The status of certain of the natives as to land tenure is regulated by the Glen Grey Act, passed in Aug. '94. By it certain districts are set apart for the natives by proclamation, and divided into allotments of about eight acres per head for each family at a quit-rent of 15s. yearly. The titles to these allotments are inalienable and non-transferable, except with the consent of the authorities; but on death they pass according to native usage. A labour-tax of 10s. a year is imposed on every able-bodied male in the settlement, unless he can show that he has been at work for three months in the year. The sale of liquor is prohibited under severe penalties. Existing electoral rights are maintained under certain conditions, and district councils, with extensive powers of local self-government, exist in each proclaimed district. The natives elect half the members on the district council, the other half being nominated by the governor.

All the natives are gradually being placed under the operation of the Act. There is a University at Cape Town (Royal Charter 1877), and there are a large number of State-aided elementary schools, besides private and religious institutions, but education is not compulsory. The principal denominations are Dutch Reformed, Episcopalian, Presbyterian, Wesleyan, and Roman Catholic, which receive from the Government small annual appropriations "for religious worship." For defence, besides the Imperial troops, who in '97 numbered 545 officers and 8240 non-commissioned officers and men, there is a force of Cape Mounted Rifles, numbering 838 officers and men; Volunteers, 6535; and every able-bodied man between 18 and 50 is liable to be called out for military service. The colony possesses 2250 miles of Government railway open, and extensions are being laid into Matabeleland and elsewhere. Government lands are granted, leased, or may be rented on easy terms. The chief minerals worked in the colony are copper, coal, and gold. The principal exports are gold, diamonds, wool, Angora hair, ostrich feathers, sheep and goat skins, wines, spirits, hides and skins, copper ore, and aloes. Revenue, '97, £7,389,965; expenditure, £6,851,985. Imports, '97, £17,931,878; exports, £19,436,304. Public debt, '98, £27,282,405. See BRITISH EMPIRE (table), and for Ministry, etc., see DIPLOMATIC.

**Political Parties.**—For some years previous to the Jameson Raid and the fall of Mr. Rhodes there were three political parties at the Cape, including the regular Ministry and Opposition, and a third party, holding much the same power as the Irish party held under Mr. Parnell. This third party was the Afrikaner Bond, under Mr. Hofmeyr, and it was through the support which it rendered to him that Mr. Rhodes was enabled to carry out his great schemes for opening up Rhodesia and British Central Africa. All this was changed, however, by the Raid. When Mr. Rhodes resigned office in Dec. '95 he was succeeded by Sir Gordon Sprigg, who still could count upon the support of some of the more moderate members of the Bond. Other parties, however, speedily formed themselves, for the furtherance of ultra-British or ultra-Dutch views, and eventually the members of Parliament were grouped somewhat as follows: the Government party, including several progressive Dutch members; the Opposition, consisting largely of the Afrikaner Bond members with pronounced Dutch sympathies; and a third party of Independents, under Mr. Rose-Innes, insisting, nevertheless, upon the supremacy of Great Britain in South Africa. The election for the Legislative Council in March '98 was won by the Progressive party, led and inspired by Mr. Rhodes, on a policy of free food products, compulsory education, railway development, and restricted sale of liquor to natives, as to internal affairs; coupled with the larger policy of the federation of the Cape, Natal and Charterland under the British flag. Many Dutch voters must have cast in their lot with the Progressives in order to give the majority. In April a split from the Bond took place, the seceders calling themselves the Colonial Union, and adopting the maintenance, and vindication of British supremacy in South Africa, and of equal rights to the different European nationalities in the

country, especially the Dutch and English, and promotion of a good understanding and co-operation between the different races, and removal of all racial feeling. The elections for the Assembly, later in the year, were very closely fought, the main struggle being between the Bond and the supporters of Mr. Rhodes, or the Progressives, as they termed themselves. Ultimately there were elected 40 Bond candidates and 39 Progressives, though a large majority of the votes were cast for the Progressives. The Independent party, led by Mr. Rose-Innes, practically disappeared.

**History, '98.**—The Governor, Sir Alfred Milner, reported (Jan. 22nd) on the course that had been taken with regard to the rebellious Bechuanas after the Bechuanaland rebellion had been suppressed. They had been given the choice of indenturing themselves for five years to farmers and others, under Government inspection and supervision, or of standing their trial for treason. Mr. Rose-Innes had personally superintended the system, and the Government were well satisfied of its success and humanity. The elections for the Legislative Council held in March resulted in a small majority for the Progressives or Rhodesians, who secured 13 seats. The Afrikaner Bond returned 10 members, and there was one Independent. A Redistribution Bill was introduced in the Legislative Assembly, creating three new electoral divisions, and increasing the number of members by 15 (May 10th). The second reading of this Bill was carried (June 20th) after a struggle as to whether it should or should not have precedence of a motion of want of confidence. On this the Government won, but when the motion was brought on they lost by 36 votes to 41 (22nd). The Premier thereupon resolved on the dissolution of the Assembly (23rd). In the general election which followed Mr. Rhodes was returned for both Barkley West and Namaqualand, and elected to sit for the former constituency. When all the returns came in it was found that there were 40 Bond candidates returned and 39 Progressives (Sept. 15th). A resolution of want of confidence in the Government was moved by Mr. Schreiner soon after the House met, and was carried by 39 votes against 37 (Oct. 11th). Sir Gordon Sprigg and his colleagues thereupon resigned, and Mr. Schreiner, with the support of the Bond, formed a new Ministry (14th). He stated in the House (17th) that the Government regarded Rhodesia as part of the South African system, and therefore Mr. Rhodes need not fear hostility. They would recognise the autonomy and independence of the Republics, and work harmoniously with them, leaving external relationships to the High Commissioner. Redistribution would be postponed till the next session. To that Sir Gordon Sprigg and the Opposition strenuously objected, Mr. Rhodes urging a conference of leaders in view of the almost equal numerical strength of the Government and the Opposition. Some of the Bond members sided with the Progressives as to the necessity for redistribution, and a vote on a motion for adjournment resulted in a tie (Nov. 2nd). Finally an amendment in favour of a conference between the leaders of parties was carried by the casting vote of the Speaker (4th).

**Cape Verde Islands.** Lie 350 miles from Cape Verde, the westernmost point of Africa. Belong to Portugal. Coaling station, St. Vincent.

**Area**, 1650 sq. m.; pop. 120,000. **Imports** about £60,000; **exports** about £50,000. **Chief products** coffee, tamarinds and millet. The people are Portuguese and Negro. See also **COLONIES, ETC., OF EUROPEAN POWERS.**

**Carlisle, Bishop of.** See under **PEERAGE.**

**Carlos I., King of Portugal,** is the son of King Louis I., and was born Sept. 28th, 1863. Prior to his accession to the throne he was known as the Duke of Braganza. In May '86 he married Marie Amélie, daughter of the Comte de Paris. He succeeded his father as King of Portugal in Oct. '89. During the financial difficulties of '92 the King and the royal family renounced 20 per cent. of the endowments paid them by the nation, a sacrifice of £23,000 a year. He visited England in Nov. '95.

**Caroline Islands.** This archipelago, or group of islands, in all numbering five hundred, lies to the east of the Philippines, in the Pacific Ocean. After the Spanish-American war, negotiations as to its ownership took place, and were not concluded at the time of going to press. **Area**, 560 sq. m.; pop. 36,000. See **COLONIES, ETC., OF EUROPEAN POWERS.**

**Cathedrals, English.** See article on the **CHURCH OF ENGLAND.**

**Cayenne.** A French settlement in Guiana, South America. Pop. 13,000. See **COLONIES, ETC., OF EUROPEAN POWERS AND FRENCH GUIANA.**

**Celebes.** A large island of the Asiatic archipelago. **Area**, 72,000 sq. m.; pop. about 2,000,000. Part of the island is an "Outpost" of Dutch India, containing the towns of Menado, Port Rotterdam, and Vlaardingen or Macassar. The remainder broken up into native states, which, however, recognise the authority of the Dutch. See **DUTCH EAST INDIES.**

**Census of '91 (England and Wales, Ireland and Scotland).** On April 6th, 1891, when the last enumeration was taken, the total population of the United Kingdom consisted of 37,732,922 persons, being an increase of 2,848,074 upon the enumerated population in '81. The decennial rate of increase was 8·2 per cent., lower than in either of the two next preceding decennia, in which it had been 8·8 and 10·8 per cent. respectively. The population of England and Wales was returned as 29,002,525, being an increase of 3,028,086, equal to 11·65 per cent. on the number returned at the previous census of '81. Of the 29,002,525 enumerated, 14,052,901 were males, and 14,949,624 females. This excess of 286,723 females would be greatly reduced if the army, navy and merchant service abroad were not excluded from the enumeration. The number of males so serving is 196,541. The rate of increase in the population of England and Wales during the last decennium was not only less than in the previous one, but lower than in any previous decennial period since the first enumeration in this country in 1801. The population of London—i.e., the London of the Registrar-General, which, with the exception of the parish of Penge, coincides with the administrative county of London—was at the last enumeration 4,211,056, being an increase of 395,512, or 10·4 per cent. upon the population of '81. The population of Ireland at the time of the census was 4,704,750, including 2,318,953 males and 2,385,797 females. The decrease in the decade from '81 to '91 was 470,086 or 9·08 per cent., though the number of English in Ireland during that time had increased from

69,382 to 74,523, and of Scotch from 22,328 to 27,323. The returns for Scotland showed that the population on census day '91 was 4,025,647, including 1,942,717 males and 2,082,930 females. The total increase of the decade '81 to '91 was 260,074, or 7·77 per cent. The final report on the returns, analysing them in many different ways, was published as a Parliamentary paper in Jan. '94. The population of the United Kingdom in the middle of '98 was estimated at 40,188,927; that of England and Wales at 31,397,078; that of Scotland at 4,249,946; and that of Ireland at 4,541,903.

**Central America, United States of.** This Republic is formed by the federation of the Republics of Honduras, Nicaragua, and Salvador, which are described under their respective alphabetical headings. On June 28th, '95, by the treaty of Amapala, they had already united under the title of the **Greater Republic of Central America.** This union has now been perfected by a new treaty signed at Managua on Aug. 27th, '98, by which the name is changed to the **United States of Central America.** The three States composing the Confederation retain full liberty in all matters except those set forth in the treaty. They retain their autonomy in their internal administration, but are united in their international relations as a single body, for the security of their common independence, their rights, and their dignity. The President will be elected in Dec. '98 for a period of four years, and will assume office on March 15th, '99. Neither of the three States is allowed to alienate any portion of its territory to, or appeal to the protection of, any foreign nation. The three States cede gratuitously a portion of their territory for the formation of a Federal District, where the capital of the Union will be established. The Federal executive disposes of the army and navy, posts and telegraphs, custom houses, and public highways. The Federal Legislature is composed of a Senate and a House of Representatives. The senators are elected by the Congresses of the several States in equal proportions. The deputies are elected by direct suffrage at the rate of one deputy for 30,000 electors. On June 15th, '97, Costa Rica and Guatemala proposed to join the Confederation, a treaty being agreed upon by all five Republics as the basis of union; but the ratifications of this treaty have never been exchanged. It is, however, expected that Costa Rica and Guatemala will ultimately join the union. See **DIPLOMATIC.**

**Ceylon.** An island almost joined to the southern extremity of India by a chain of reefs and sandbanks called Adam's Bridge. Its extreme length is 266 miles, and its width 140 miles. It is a British Crown colony. **Area**, 25,365 sq. m.; pop. 3,235,432. Divided into nine administrative provinces. Capital, Colombo, pop. about 127,000. **Chief production** for export was formerly coffee; now tea is the chief staple, and more attention is paid to cocoa, coconut, and other palms. Grain and rice are cultivated, with cinnamon, caoutchouc, etc. Manufactures limited to native or local requirements, including ironware, cordage, etc. Railways extend over 296 miles. Crown lands are sold at an upset price of Rs. 10 per acre, but often realise much more. **Bulk of population** Cingalese, then Tamil coolies, Moormen (Arabs), Eurasians, and Malays. Europeans

about 6000. An aboriginal nomadic race, the Veddahs, occupy the interior, but they only number about 2000. The Government is in the hands of a Governor nominated by the Crown, an Executive Council of 5, and a Legislative Council of 17 members, which is composed of the Executive Council, 4 other official members, and 8 non-official members. The basis of the law is Roman Dutch, but the criminal law has been remodelled from the Indian Penal Code. More than half of the population are Buddhists. The Hindus also are strong, and the Mohammedans and Christians about equal one another. Education is unsectarian, and in the case of vernacular schools free. The number of scholars under the cognisance of the Education Department in '96 was 175,658, but there is also a large number of native schools. The interesting question of joining up the railway systems of the mainland and the island was again discussed at length in the *Engineer* of Aug. 20th, '97. From this article it appears that Mr. E. J. Shadbolt, reporting to the Madras Government, was in favour of a line on the narrow or metre gauge, while Mr. F. J. Waring, chief engineer of the Ceylon Railway Extension, preferred a permanent way similar to that of the existing Ceylon lines; viz., 5 ft. 6 in. Both engineers estimated the cost of the crossing of Adam's Bridge at a little over 28,000,000 rupees. In the spring of '98 it was announced that Mr. Chamberlain, Colonial Secretary, had authorised the initiation of the northern extension of the Ceylon railways by the construction of a light line, on the normal or 5 ft. 6 in. gauge, between Kurnegalle and Anuradhapura. He added the following conditions:—(1) That one-third at least of the cost of the section, say, a sum of 1,500,000 rupees, and, if possible, a larger proportion, shall be defrayed from current revenue. (2) That no initial step shall be taken until there are at least 500,000 rupees in hand for the purpose.

**Chagos Archipelago.** A large scattered group of coral islands in the Indian Ocean, being a southward extension of the Maldivé group, 1200 miles from Mauritius and 800 from Ceylon. A dependency of the former, which supplies a Resident Magistrate and police force. Chief of the group are the Oil Islands, of which **Diego Garcia** is the largest and most important.

**Chairman of Committee of Ways and Means.** A member of the House of Commons who is elected when the House goes into Committee of Ways and Means, or Supply, for the first time in a new parliament, and holds office until the dissolution of that parliament. He is nominated by the Government, but is regarded as an officer of the House. The salary of the office is £2500 a year. The Chairman of Ways and Means usually presides when the House is in committee, whether on financial business or on a bill, but he may request one of several temporary or deputy chairmen nominated by the Speaker at the commencement of each session to act for him. His place is not in the chair of the Speaker, but at the table where the Clerk, who retires with the Speaker, has sat. When the House is informed of the unavoidable absence of the Speaker, the Chairman of Ways and Means performs his duties, and exercises his authority in relation to all proceedings of the House as Deputy Speaker until the next meeting of the House,

and so on from day to day on the like information being given to the House. He may also take the chair as Deputy Speaker, when requested to do so by the Speaker, without any formal communication to the House. The recent holders of the office include the late Mr. Raikes, '74-80; Sir Lyon (now Lord) Playfair, '80-83; Sir A. Otway, '83-5; Mr. Leonard Courtney, '85-92; Mr. Mellor, '93-5; and Mr. James William Lowther, the present chairman, who was elected in '95. The Chairman of Committees in the House of Lords is appointed at the commencement of every session. The holders of the office have been the late Lord Redesdale, '51-86; the late Duke of Buckingham and Chandos, '86-9; and the Earl of Morley since '89.

**Chamberlain, Rt. Hon. J., M.P.** See under COMMONS.

**Chambers of Commerce.** See LONDON CHAMBER OF COMMERCE and ASSOCIATION OF CHAMBERS OF COMMERCE.

**Chancellor, Lord High,** who is appointed by mere delivery of the Great Seal to him by the sovereign, is principal legal adviser of the Crown, is by prescription Speaker of the House of Lords, and may act in that capacity even though he be not a peer; he is by virtue of his office a privy councillor, and as the first existing great officer of State he takes precedence of all but royal dukes and the Archbishop of Canterbury. He presides, if present, when the House of Lords is sitting as an appellate court. He is president of the Chancery Division of the High Court and of the Court of Appeal, and is one of the Judicial Committee of the Privy Council. In the absence of the sovereign he reads the Queen's Speech at the opening and prorogation of parliament, and he is always one of the Commission for giving the royal assent to bills. He is visitor of all hospitals of royal foundation, the general guardian of all infants, idiots, and lunatics, and has the general supervision of all charitable trusts. His patronage is very extensive. He nominates the puisne judges and county court judges; and, except for Lancashire, he appoints the county magistrates, generally accepting the nominations of the lords-lieutenant and the borough justices. He is the patron of twelve canonries and a large number of livings. On retiring from office he receives a pension of £5000 a year, but in such case he commonly assists the Lord Chancellor and the Lords of Appeal in Ordinary in the transaction of the judicial business of the House of Lords. Any one who has filled the office of Lord Chancellor may also, at the request of the Lord Chancellor, sit in the Court of Appeal, but he shall not be required to sit and act in the Court unless upon request he consents so to do. The holder of the office may not be a Roman Catholic. The present Lord Chancellor is Lord Halsbury (see PEERAGE).

**Chancellor of Ireland, Lord,** is head of the Irish judicial establishment, principal legal adviser of the Lord-Lieutenant, and exercises in Ireland many of the powers which in England are vested in the Lord High Chancellor. The office may be held by a Roman Catholic. See MINISTRY.

**Channel Islands, The,** lie in the southern part of the English Channel, 10 to 30 miles from the French coast. Anciently an appanage of the Duchy of Normandy, they have belonged to

England since the Conquest. Total area about 76 sq. m.; pop. 92,272. Divided into two separate governments, called Bailiwicks, that of Jersey (area 45 sq. m., pop. 54,518), and that of Guernsey (area, with Alderney, Sark, Herm, Jethou, etc., 31 sq. m., pop. 37,754). The capitals are respectively St. Heliers and St. Pierre. Granitic rock is the foundation of the islands. They are extremely fertile and picturesque. Agriculture is largely carried on, fruit and vegetables being raised for export. Industries are farming, market gardening, and fishing. Much cider is made. Dairy farming is a great feature, and the breed of cattle is celebrated. The fisheries are important, embracing lobster, oysters and cod. The climate is moist and mild. Each Bailiwick enjoys a kind of autonomy. The Crown appoints a Lieutenant-Governor and a Bailiff to each, and each has its representative legislature called the States. The English Church is the established religion, and the islands are included in the see of Winchester. Relics of Norman custom survive in the administration. Taxation is exceedingly light. The people are an intermixture of French and English. Both languages are spoken, but the former is official. For Lieut.-Governors, etc., see DIPLOMATIC.

**Channel Tunnel, Bridge, etc.** See ENGINEERING.

### CHARITABLE SOCIETIES.

The following list includes most of the principal charitable and philanthropic institutions that have offices in London, and are either wholly or in part dependent upon voluntary contributions. The figures indicate the last reported annual receipts. The list does not include charities connected with the City of London (see CITY GUILDS). Hospitals and Dispensaries will be found in an article under that heading.

**Actors' Benevolent Fund** (£3893), C. I. Coltson, 8, Adam Street, Adelphi.

**After-Care Association for Poor Persons discharged recovered from Asylums for the Insane** (£572), H. T. Roxby, Church House, Westminster, S.W.

**Aged Pilgrims' Friend Society and Asylums** (£14,148), J. E. Hazelton, 83, Finsbury Pavement.

**Aged Poor Society and Almshouses** (Aged Poor Society, £1632; Almshouses, £488), J. B. Corney, Hon. Sec., 42, Gerrard St., Soho, W.C.

**Alexandra Orphanage and Orphan Working School** (£11,407), A. C. P. Coote, M.A., 73, Cheapside.

**Annuity's Homes, Miss Sheppard's** (£712), Mrs. Chadwick, Hon. Sec., 27, Ossington St., Bayswater.

**Apprenticeship Society for Assisting the Apprenticing of Children of Dissenting Ministers of Evangelical Churches** (£432), A. A. Knight, Memorial Hall, E.C.

**Architects' Benevolent Society** (£795), Percivall Currey, Hon. Sec., 9, Conduit St., Hanover Sq.

**Army Scripture Readers' and Soldiers' Friend Society** (£6299), Col. G. Philips, 112, St. Martin's Lane, W.C.

**Artists' Benevolent Fund** (not stated), Percy Edsall, 5A, Pall Mall East, S.W.

**Artists' General Benevolent Institution** (£5101), D. H. Gordon, 19, St. James's St., S.W.

**Association for Placing Orphans in Private Families** (£40), W. N. Senior, 98, Cheyne Walk, S.W.

**Association for Promoting the General Welfare of the Blind** (£1553), Lieut.-Col. H. Lewis, 258, Tottenham Court Rd., W.

**Asylum for Fatherless Children** (see Reedham Orphanage).

**Asylum for Idiots** (£23,000), H. Howard, 36, King William St., London Bridge.

**Asylum for the Support and Education of Deaf and Dumb Children** (£8089), W. Resbury Few, 93, Cannon St., E.C.

**Baptist Tract and Book Society** (£1499), H. G. Dallimore, 16, Gray's Inn Rd., Holborn, E.C.

**Dr. Barnardo's Homes for Orphan Waifs** (£144,008), J. Odling, 18 to 26, Stepney Causeway, E. With 85 Rescue Branch Homes and 24 Mission Branches.

**Benevolent Society of Blues for the Relief of Persons Educated in Christ's Hospital, their Widows and Orphans** (£1479), G. Wilkins, Lyndhurst, Greenhill Park, Harlesden.

**Benevolent or Strangers' Friend Society** (£669), B. H. Gerrans, 52, Finsbury Pavement.

**Benevolent Society of St. Patrick, for Educating, Clothing, Partly Feeding, and Apprenticing Poor Children born of Irish Parents in or near London** (£2787), A. F. R. Daniel, 61, Stamford St., S.E.

**Biggs's Charity to Printers** (£15,434), Joseph Mortimer, 20, High Holborn.

**Blind Female Annuity Society** (see Royal Blind Pension Society).

**Booksellers' Provident Institution** (£1465), G. Larner, 48, Paternoster Row.

**Boys' Home Industrial School** (£6952), H. James, Regent's Park Rd., N.W.

**British and Foreign Sailors' Society** (£27,977), Rev. E. W. Matthews, Sailors' Institute, Shadwell.

**British Home for Incurables** (£16,779), R. G. Salmond, 72, Cheapside.

**British Medical Benevolent Fund** (£3708), Dr. S. West, F.R.C.P., 15, Wimpole St., W. (Finance); Joseph White, F.R.C.S. Eng., D.C.L., 6, Southwell Gardens, S.W. (Cases).

**British Orphan Asylum** (£7671), C. T. Hoskins, 62, Bishopsgate St. Within.

**Brixton Orphanage for Three Hundred Fatherless Girls** (£2398), Mrs. A. Montagu, Founder and Hon. Superintendent; Mrs. Greenwood, Hon. Sec., 57, Barrington Rd., Brixton.

**"Brown" Animal Sanatory Institution, The, for the Treatment and Study of the Diseases of Domestic Animals**, Wandsworth Road, S.W. (£1040), T. Le Marchant Douse, B.A. Lond., The Institution.

**Builders' Benevolent Institution** (£2308), Major Brutton, 35, Southampton Row, W.C.

**Butchers' Charitable Institution** (£5633), H. J. V. Philpott, Butchers' Hall, 87, Bartholomew Close.

**Cabdrivers' Benevolent Association** (£1763), S. S. Safford, 15, Soho Sq.

**Cabmen's Shelter Fund** (£1304), W. H. Macnamara, 47, Buckingham Palace Rd., S.W.

**Cass's School** (£6286 of Sir John Cass's Foundation, last year's income £2450), P. M. Evans, M.A., Clerk, 26, Jewry St., Aldgate.

**Charity Organisation Society** (£17,300), C. S. Loch, 15, Buckingham St., Strand.

**Cheesemongers' Benevolent Institution** (£2000), E. Kent, Wellington Chambers, Borough, S.E.

**Children's Aid Society** (£3115), A. J. S. Madison, 32, Charing Cross, S.W.

**Children's Country Holidays Fund** (£21,137), Hon. Treasurer, Hon. A. Lyttelton, M.P., 10, Buckingham St., Strand, W.C.

Children's Home (£27,075), Rev. Dr. Stephenson, Founder; J. Pendlebury, M.A., Sec., Bonner Rd., London, N.E.

China Inland Mission (£45,213), Walter B. Sloan and F. Marcus Wood, Newington Green, N.

Christian Colportage Association for England (£22,678), H. D. Brown, 37, Farringdon St., E.C. Christian Community (£1093), J. Atkinson, Memorial Hall, London St., Bethnal Green.

Christian Evidence Society (£1090), Rev. T. T. Waterman, B.A., and Rev. C. L. Engström, M.A., 26, Charing Cross, S.W.

Christian Literature Society for India (£11,374), Earl of Northbrook, G.C.S.I., President; Rev. George Patterson, Sec., 7, Adam St., Strand.

Christ's Hospital (£51,277), R. L. Franks, Clerk, Newgate St.

Church Army (£98,000), Rev. W. Carlile, Hon. Chief Sec., 130, Edgware Rd.

Church Association (£7183), H. Miller, 14, Buckingham St., Strand.

Church Committee for Church Defence and Church Instruction (£11,307), T. Martin Tilby, Office, Church House, Great Smith St., S.W.

Church Extension, Employment, Relief, and Mission Work (£5951), Miss F. Ashdown, 27, Kilburn Park Rd.

Church Extension Foreign Missions (£800), Miss F. Ashdown, 27, Kilburn Park Rd., W.

Church Missionary Society for Africa and the East. See separate article on this Society.

Church of England Incorporated Society for Providing Homes for Waifs and Strays (£65,936), E. de M. Rudolf, Church House, Dean's Yard, Westminster.

Church of England Parochial Mission Society (£3256), Rev. H. Muir, M.A., The Church House, Dean's Yard, S.W.

Church of England Scripture Readers' Association (£11,376), Reuben G. Kestin, Sec., 56, Haymarket.

Church of England Sunday-School Institute (£12,320), J. Palmer, 13, Serjeants' Inn, Fleet St.

Church of England Temperance Benefit Society (£6568), H. A. Hazzledine, Church House, Westminster, S.W.

Church of England Temperance Society (£5702), F. Eardley-Wilmot, R.N., Deansgate, The Sanctuary, Westminster.

Church of England Zenana Missionary Society (£47,070, including £8773 special), Rev. G. Tonge, M.A., R. S. Macdonald, and Miss J. Malvaney, Secs., Lonsdale Chambers, 27, Chancery Lane, E.C.

Church of Ireland Sustentation Fund, London Committee in Aid (£1017 and legacy for £6500), The Misses Nugent, Hon. Secs., 29, Eaton Terrace, S.W.

Church Pastoral Aid Society (£52,794), Rev. J. Barton, M.A., and Col. H. S. Clarke, Secs.; R. G. Fowell, Assist. Sec., Falcon Court, 32, Fleet St.

Church Penitentiary Association (£1276), C. H. Baker, 14, York Buildings, Adelphi.

Church Schoolmasters' and Mistresses' Benevolent Institution (£5910), G. W. Perry, 280, Vauxhall Bridge Rd., S.W.

City of London Truss Society (£5636), J. Whittington, 35, Finsbury Sq.

Clergy Orphan Corporation (£13,190), Rev. W. C. Cluff, M.A., 35, Parliament St., S.W. Boys' School, St. Edmund's School, Canterbury. Girls' School, St. Margaret's School, Bushey, Herts.

Colonial and Continental Church Society (£41,097), Rev. Canon Hurst, B.D., 9, Serjeants' Inn, Fleet St.

Colonial Missionary Society (£3600), Rev. D. Burford Hooke, 22, Memorial Hall, Farringdon St.

Commercial Travellers' Benevolent Institution (£13,368), J. Kaines, 47, Finsbury Circus.

Commercial Travellers' Schools (£14,000), H. A. Evans, 37, Milk St., Cheapside.

Congregational Church Aid and Home Missionary Society (£6318), Rev. J. E. Flower, M.A., Memorial Hall, Farringdon St., E.C.

Congregational Pastors' Retiring Fund (£6224), Rev. R. T. Verrall, B.A., Memorial Hall, Farringdon St.

Congregational Pastors' Widows' Fund (£1261, '96), Rev. R. T. Verrall, B.A., Memorial Hall, Farringdon St., E.C.

Corporation of the Sons of the Clergy (£27,522), Sir Paget Bowman, Bart., Registrar, 2, Bloomsbury Place.

Country Towns Mission (£2927), G. H. Mawer, 18, New Bridge St., Ludgate Circus, E.C.

Cripples' Home and Industrial School for Girls (£2857), E. J. Physick, Hon. Sec.; Miss E. Emes, Superintendent and Resident Sec. at the Home, 17E, Marylebone Rd.

Curates' Augmentation Fund (£9000), Rev. J. R. Humble, 2, Dean's Yard, Westminster.

Domestic Servants' Benevolent Institute (£1704), W. Sly, 32, Sackville St., W.

East London Church Fund (£17,457), Rev. G. N. Walsh, 26, St. Mary Axe.

East London Industrial School (£4012), E. C. Sinkler, Hon. Sec., Parson St., Lewisham, Kent; J. Cartwright, Superintendent.

East London Nursing Society and East End Mothers' Home (£2990), A. W. Lacey, 49, Philpot St., Commercial Rd.

East London Provident Association (£2786), P. G. Kirke, 495, Commercial Rd., E.

Female Mission to the Fallen (£3685), A. J. S. Maddison, 32, Charing Cross, S.W.

Field Lane Refuges and Ragged Schools (£6803), Peregrine Platt, Vine St., Clerkenwell Rd.

Foreign Missions of the Presbyterian Church of England, including Women's Missionary Association (£24,675), J. Bell, 13, Fenchurch Avenue, E.C.

Friend of the Clergy Corporation (£8880), Rev. H. Jona, 17, King William St., Strand.

Gardner's Trust for the Blind, H. J. Wilson, 53, Victoria St., S.W. (interest on £300,000).

George Yard Ragged Schools and Mission (£2189), G. Holland, High St., Whitechapel.

German Society of Benevolence (£2237), Henry Foelix, 14, South St., Finsbury.

Girls' Friendly Society (£3903), Miss Bowlby, 39, Victoria St., S.W.

Goldsmiths' Benevolent Institution (£2043), C. C. Brace, 72, Dean St., Soho, W.

Gordon Boys' Home (£5100), Lieut.-Col. G. A. Beaty-Pownall, 20, Cockspur St., S.W.

Governesses' Benevolent Institution (£29,160), C. W. Klugh, 32, Sackville St.

Grocers' and Tea Dealers' Benevolent Protection Society (£8854), G. Powell, 76, Finsbury Pavement.

Ham Yard Soup Kitchen and Hospice (£1513), W. Stevens, Great Windmill St., W.

Consult, for further and fuller information, Low's "Handbook to the Charities of London," and "The Classified Directory to the Metropolitan Charities."

**Charities, London Parochial.** The parochial charities of the City of London are now administered by a number of trustees, nominated by various bodies, who are as follows:—  
Nominated by the Crown, the Dean of St. Paul's, Messrs. Quintin Hogg, C. J. Drummond, W. H. Fisher, M.P., and the Rev. R. H. Hadden; by the Corporation, Sir J. Savory, Bart., M.P., Messrs. C. T. Harris, C. J. Todd, and T. H. Ellis; by the London County Council, Messrs. W. J. Orsman, Evan Spicer, Sidney Webb, and Edward Bond, M.P.; by the Ecclesiastical Commissioners, Messrs. E. Freshfield, LL.D., and R. B. Litchfield; by the University of London, Sir Albert Rolit, M.P.; by University College, Professor Ramsay, F.R.S.; by King's College, Sir O. Roberts; by the City and Guilds of London Institute, Mr. L. B. Sebastian; by the Bishopsgate Foundation, Mr. G. N. Johnson; by the Cripplegate Foundation, Mr. H. J. Felton.  
During the last few years over £170,000 out of the funds of the trust have been devoted to the securing of open spaces, while about £33,000 a year is given in support of the various polytechnics that have recently been started. The foundation is the largest for charitable purposes in the kingdom. The annual income now is between £80,000 and £90,000. Offices, 3, Temple Gardens, E.C. Clerk, Mr. H. Howard Batten.

**Charity Commissioners for England and Wales, The.** The Charity Commission was created by the Charitable Trusts Act 1853 (16 & 17 Vict. c. 137). Four commissioners were appointed, three of them being paid; and two at least of these three (one of the two being the Chief Commissioner) must be barristers-at-law of not less than twelve years' standing at appointment. No paid commissioner can sit in the House of Commons during tenure of office. The Board are empowered, "from time to time, as they may see fit, to examine and inquire into all or any charities in England and Wales, and the nature and objects, administration, management, and results thereof, and the value, condition, management, and application of the estates, funds, property, and income belonging thereto." Certain large exceptions, however, are specified: the Universities of Oxford, Cambridge, London, Durham, and all colleges or halls of any of them; all cathedral or collegiate churches, all buildings registered as places of worship, with the Registrar-General of Births, etc., and *bonâ fide* used as places of meeting for religious worship; Queen Anne's Bounty; the British Museum; friendly or benefit societies, savings banks, institutions or societies for religious or other charitable purposes, funds or property of missionary or similar societies, and generally all undertakings (independent or dependent) wholly maintained

or carried on by voluntary contributions. But this exemption "shall not extend to any cathedral, collegiate, chapter, or other schools"; the colleges of Eton and Winchester, however, were exempted by the amending Act of '55. The secretary to the Commission for the time being is a corporation sole, by the name of "The Official Trustee of Charity Lands," for taking and holding charity lands; and the Commissioners from time to time appoint, with the approval of the Treasury, "The Official Trustees of Charitable Funds," who must lay their accounts before Parliament yearly. The original jurisdiction of the Commissioners was subsequently extended by another Charitable Trusts Act, passed in '60, and other Acts. In '74 the Endowed Schools Act transferred to them all the powers and duties of the Endowed Schools Commissioners. In '82 the Prison Charities Act empowered them to make schemes respecting prison charities. In '83 the Municipal Corporations Act empowered them to make schemes for the administration of the property of certain dissolved corporations. In '83, also, the City of London Parochial Charities Act empowered them to inquire into and to frame schemes for the future application and management of the Parochial Charities of the City of London. In '89 the Welsh Intermediate Education Act empowered them to make schemes for educational endowments and certain rates and Treasury grants in Wales and Monmouthshire. An account of their proceedings under the above-mentioned Acts will be found in their annual reports (Eyre & Spottiswoode). The last report gives an analysis of the purport of 4119 orders made by the Commissioners during the year '97, and states that the total sum of stocks and investments held by the official trustees of charitable funds at the end of that year was £18,774,270 18s. 6d., divided into 19,722 separate accounts. The sum produced by sales of the real property of charities during '97 was £597,769 17s. 2d. The present Chief Commissioner is Sir Henry Longley, K.C.B.; the second, C. H. Alderson, Esq.; the third, Edward Stanley Hope, Esq., C.B.; the fourth (unpaid), J. Grant Lawson, Esq., M.P. The Commissioner under the Endowed Schools Acts is Sir George Young, Bart. Secretary, Daniel K. Fearon, Esq., C.B., Gwydyr House, Whitehall, S.W.

**Charity Organisation Society, The,** was established with the object of improving the condition of the poor—(1) by promoting co-operation among existing charities and between charities and the poor law; (2) by securing due investigation and fitting action in all cases; and (3) by repressing mendicancy. The Archbishop of Canterbury is President of the Society, which consists of a federation of district committees, one or more existing in each of the poor-law divisions of the Metropolis, and of a central council at which every committee is represented. The primary objects of the local committees are to afford to all charitable institutions and individuals an easy means of exchanging information and of working together, to prevent overlapping in relief, and to secure the investigation of cases with a view to referring them to the proper quarter for assistance. In suitable cases assistance is given in the form of loans. It also investigates cases of begging-letter writing. Special committees appointed by it have reported on such subjects as "Charity and Food," "Exceptional Distress," "Medical

Reform," "The Condition of the Feeble-minded and Epileptic," "Feeding of School Children," "Homeless Cases," "Old Age Pensions," "The Better Administration of the Poor Law," etc. **Organ, Charity Organisation Review** (monthly); other papers are issued. Secretary, C. S. Loch. Central Office, 15, Buckingham Street, Adelphi, W.C.

**Charles I., King of Roumania,** was b. 1839. He ascended the throne after Prince Alex. John had been expelled ('66). In '81 the Roumanian representatives unanimously proclaimed him King instead of Prince of Roumania. His Majesty wears the Russian cross of St. George, which he received from the Emperor Alexander II. In '69 he married the Princess Pauline Attilie Louise de Wied, who is known in literary circles under the *nom de plume* of "Carmen Sylva." In Jan. '93 the Crown Prince Ferdinand, nephew of the King, was married amidst great rejoicings to the Princess Marie of Edinburgh, and a son and daughter, Carol and Elizabeth, have been born to them.

**Charlotte Town.** Capital of Prince Edward Island (*q.v.*), pop. 11,500.

**Chartered Accountants, Institute of.** See INSTITUTE OF CHARTERED ACCOUNTANTS.

**Charterhouse School, Godalming.** Founded 1611, and until 1872 situated near Smithfield, London, on ground that once belonged to the Carthusian Monastery. One of the nine great public schools of the Public Schools Commission. Sixty scholarships are tenable in the school, and there are ten or more vacancies annually. Twenty-one exhibitions to the Universities, each of the annual value of £80, tenable for four years. Chairman, Archbishop of Canterbury. Pupils, 550. Head Master, G. H. Rendall, M.A., Litt.D. Motto, *Deo dante dedi.* Alumni (some): R. Crashaw, Thackeray, Grote, Blackstone, Wesley, Addison, John Leech, Havelock, Thirlwall, Lord Liverpool, Steele, Milner Gibson, Sir G. Paget, G. Manners-Sutton; Archbishop of Canterbury, Lord Ellenborough, T. Manners-Sutton, Lord Chancellor of Ireland, Lord Dalhousie, Sir George Bowen, G.C.M.G., Prof. Palmer, formerly Professor of Latin at Oxford, Dean Liddell, Sir Richard Webster, Q.C., M.P., Attorney General; Prof. Jebb, M.P., Professor of Greek at Cambridge; Prof. Nettleship, late Professor of Latin at Oxford; F. T. Palgrave, late Professor of Poetry at Oxford; Rt. Hon. J. G. Talbot, M.P. for Oxford University; Sir H. Seymour King, K.C.I.E., M.P.; Sir Evan McGregor, K.C.B.; Dean of Salisbury; Sir Courtenay Boyle, K.C.B.

**Cheltenham College, Gloucester.** Founded 1841, mainly through the efforts of George Simon Harcourt, Esq., and Captain James Shrubbs Iredell. Incorporated by Act of Parliament in '94; is governed by a President and twenty members of Council. There are three departments—the classical, the military and civil, and the junior. Numerous scholarships are attached to the College. The pupils number 620. Principal, the Rev. R. S. de C. Laffan, M.A. Head Master of the Modern, W. M. Baker, M.A. Bursar, A. A. Hunter, Esq. Among the alumni of Cheltenham College are the Rt. Hon. Lord James of Hereford, Chancellor of the Duchy of Lancaster; the Rt. Hon. W. E. H. Lecky, M.P.; the Rt. Hon. John Morley, M.P.; Sir C. S. Scott, K.C.M.G.,

British Ambassador at St. Petersburg; the late Rt. Hon. and Most Rev. Lord Plunket, D.D., Archbishop of Dublin; the Rt. Rev. R. E. Trefusis, D.D., Bishop of Crediton; the Rt. Rev. C. O. Mules, Bishop of Nelson; Very Rev. F. Pigou, D.D., Dean of Bristol; Rev. W. W. Merry, D.D., Rector of Lincoln College, Oxford; the late Rev. R. J. Wilson, D.D., Warden of Keble College, Oxford; the late Prof. A. Palmer, D.C.L., Professor of Latin and Public Orator in the University of Dublin; Briton Riviere, Royal Academician; Sir R. T. Reid, Q.C., M.P., ex-Attorney-General; Lord Low, Scottish Judge; General Sir J. Davis, K.C.B.; the late Lieut.-General Sir T. D. Baker, K.C.B.; Lieut.-General Sir C. Warren, G.C.M.G., K.C.B.; Major-General Sir C. W. Wilson, K.C.B., K.C.M.G.; Major-General Sir A. P. Palmer, K.C.B.; Major-General Sir F. Carrington, K.C.B., K.C.M.G.; the late Major-General Sir J. Browne, K.C.S.I., K.C.B.

### CHEMISTRY, '98.

The cycle of change brought Sir William Crookes as President of the British Association in '98, and his inaugural address at Bristol proved to have exceptional interest. It dealt largely with the economics of chemistry, particularly in relation to the question of short-ages in food supplies. The President offered the assurance that starvation may be averted through the laboratory, so there is no room for alarmist views; and, further, it is foreshadowed that before we are in the grip of actual dearth the chemist will step in and postpone the day of famine to so distant a period that we, and our sons and grandsons, may legitimately live without undue solicitude for the future. But, to meet the difficulty, the fixation of atmospheric nitrogen is the great problem awaiting chemists, and one which is vital to the progress of the race. The whole secret lies in the artificial production of nitrate of soda, for by its aid the land devoted to wheat can be brought up to the thirty-bushels-per-acre standard. The following interesting statement appeared in this connection: A first-class battleship would carry about 63 tons of cordite, and it may be supposed that in a general action 40 tons of this would be expended. At Trafalgar Nelson had 27 line-of-battle ships, and the allied forces 33. If a similar number of modern battleships and first-class cruisers were now engaged, and each to expend 40 tons of cordite, the total volume of nitrogen set free would be 302,400 cubic metres, or about 385 tons, equivalent to 2300 tons of nitrate of soda. In the chemical section of the Association, the opening address was given by Professor Japp, on "Stereochemistry and Vitalism." Dr. Russell, F.R.S., lecturer on chemistry at St. Bartholomew's Hospital, read a paper on the sensitiveness of a photographic plate to chemical action, having previously delivered the annual Bakerian Lecture of the Royal Society on the same subject. Zinc, lead, aluminium, and other bodies, such for example as oiled silk, tracing paper, and vegetable parchment, impress a picture; and it appears that the printers' ink used for newspapers is in many cases a very active substance, some samples acting quite readily on a photographic plate, even if certain screens, such as gold-beater's skin, sheets of gelatine, and celluloid, be used. Mr. Bothamley and Professor Percy Frankland supplied complementary papers on this very interesting subject, one which in fact

represents practically new work. The chemistry of the sun received attention in a joint discussion with another section on the recent eclipse of the sun. A great deal of sound work is being carried on in this and other departments of physical chemistry, and the many problems presented by electrical studies continue to fascinate the chemical student, notably in connection with "Röntgen rays" and electric conductivity (see also *ELECTRICITY*). Professor S. Young's account of his prolonged researches on the "Thermal Properties of Gases and Liquids" must here be noted. The report of the committee on the continuation of the bibliography of spectroscopy was read, as well as that of the committee on the action of light upon dyed colours. The results referred to a large number of silk and wool patterns dyed with various natural and artificial brown and black colouring-matters.—Passing from the Association's proceedings, some important additions to the science must be chronicled. On May 10th Professor Dewar, F.R.S., stated that he had succeeded in liquefying hydrogen in quantity, and that by means of the liquid hydrogen he had also liquefied helium; and a paper on the subject was subsequently read at the Royal Society (*Proc. Roy. Soc.*, No. 396). The boiling point of liquid hydrogen may be placed at 240° below zero centigrade—a truly marvellous degree of cold. Our space forbids more than to chronicle these two unique additions to knowledge. On June 6th Professor Ramsay, F.R.S., announced the discovery of Krypton, a new constituent of atmospheric air, to the French Academy of Sciences. The particular medium chosen for its mention occasioned, it should be said, a good deal of hostile criticism, which the Professor met by a frank avowal of regret; and it was at once remedied by a communication to our Royal Society. About 750 cubic centimetres of liquid air was used in the experiment; and, on allowing all but 10 cubic centimetres to evaporate slowly away, and collecting the gas from that small residue in a gas-holder, the authors obtained, after removal of oxygen with metallic copper, and nitrogen with a mixture of pure lime and magnesium dust, followed by exposure to electric sparks in the presence of oxygen and caustic soda, 26.2 cubic centimetres of a gas showing the argon spectrum feebly, and, in addition, a new spectrum, characterised by two very brilliant lines. Krypton forms a fifth constituent of the atmosphere, but is present in very minute quantities. It belongs to the helium series. Some remarkable work, too, was accomplished with the gas argon. Professor Ramsay (with Mr. Travers) has shown that it has two "companions"—viz., neon and metargon. The density of the former is 14.67; that of the latter, 19.87. Unlike helium, argon, and krypton, neon is rapidly absorbed by the red-hot aluminium electrodes of a vacuum tube, and the appearance of the tube changes, as pressure falls, from fiery red to a most brilliant orange, which is seen in no other gas. Metargon appears to hold the position towards argon that nickel does to cobalt, having approximately the same atomic weight yet different properties. Mr. E. Baly is working out the spectra of these gases. The Davy medal of the Royal Society was awarded to Prof. Wislicenus. A lecture, in the series of Memorial Lectures given by the Chemical Society, was delivered by Professor Japp, when the facts

of Kékule's scientific career were set forth. A good deal of valuable work is in progress at the laboratory of the Pharmaceutical Society, under the direction of Dr. Norman Collie, F.R.S. Attention is drawn here for the first time to the yearly grant by the Treasury to the Royal Society of £4000 for scientific investigations. Part of this sum is allocated to chemical research under recommendations made by a board of experts. A full list of appropriations will be found in the Society's "Year-Book." Among valuable published papers were:—"On the Occlusion of Hydrogen and Oxygen by Palladium," by Dr. Mond, Professor Ramsay, and Dr. Shields; "The Electric Conductivity of Nitric Acid," by V. H. Veley and J. J. Manley; "On the Densities of Carbonic Oxide, Carbonic Anhydride, and Nitrous Oxide," and "On the Character of the Impurity found in Nitrogen Gas derived from Urea," by Lord Rayleigh; "The Action of Hydrogen Peroxide on Carbohydrates in the Presence of Iron," by C. F. Cross, E. J. Bevan, and C. Smith; "The Heat dissipated by a Platinum Surface at High Temperatures," by J. E. Petavel; "On the Luminosity produced by Striking Sugar," by J. Burke; "Absorption of a Röntgen Ray by Chemical Compounds," by Dr. Gladstone and Mr. Hibbert; "Recent Experiments on certain of the Chemical Elements in relation to Heat," by Professor Tilden. The death of that veteran of English chemical science, Lord Playfair, was deplored. Consult *Journal of the Chemical Society*, *Journal of the Society of Chemical Industry*, *The Pharmaceutical Journal*.

**Chester, Bishop of.** See under PEERAGE.

**Cheyne, Rev. Thomas Kelly, M.A., D.D.,** was b. in London 1841. Ed. at Merchant Taylor's School and Worcester Coll., Oxford. Elected '69 Fellow of Balliol Coll., and in '31 was appointed rector of Tendring, Essex. In '83 he received an honorary D.D. degree, in company with Bishop Westcott and Dr. Martineau, at the tercentenary of the University of Edinburgh. In '85 he became Oriel Professor of the Interpretation of Holy Scripture at Oxford, and a Canon of Rochester. Professor Cheyne is one of the most eminent authorities on Biblical exegesis. By his articles in the *Encyclopædia Britannica* (75-81) he co-operated with the late Professor Robertson Smith in naturalising the Continental methods of criticising the Old Testament. His Bampton Lecture, '89, on the Psalter, excited much controversy in consequence of his seeking to show that all or almost all the Psalms were of a Post-Exilic origin. He was a member of the Old Testament Revision Company, and is the author of numerous works on the Old Testament, including "The Prophecies of Isaiah," "Job and Solomon," "The Book of Psalms, a New Version"; "Aids to the Devout Study of Criticism" ('92), "Founders of Old Testament Criticism" ('93), an "Introduction to the Book of Isaiah" ('95), a new Translation of the book of Isaiah and a new edition of the Hebrew text of Isaiah ('97-8). In the winter of '97-8 he delivered lectures in some of the chief eastern cities of the United States on "Jewish Religious Life after the Exile." Address: South Elms, Oxford, and The Precincts, Rochester.

**Chichester, Bishop of.** See under PEERAGE.

**Children's Country Holidays Fund.** This and similar funds have recently arisen in London to organise holidays, never less than

two weeks, for poor sickly city children by boarding them with country cottagers, who are paid 5s. a week per child; and much good has resulted from the movement. The C.C.H.F. sends about 30,000 children annually. Patroness, H.R.H. the Princess of Wales; Secretary, E. A. C. McCurdy; Treasurer, Hon. A. Lyttelton, M.P. Office, 10, Buckingham St., Strand. Similar efforts in Liverpool, New York, Berlin, etc., have been equally successful. The Secretary of the Liverpool branch is Miss Sampson, 5, Bold Street, Liverpool.

**Children's Fresh-Air Mission, The,** was established in '82 to provide change of air for poor children in London, specially in the Holborn, Clerkenwell, and St. Luke's districts. In '97 2933 children were thus sent out into the country for two or three weeks, making a total since '82 of 35,761 children. The Treasurer is Mr. Walter Hazell, M.P., the Secretary Miss Rowley, and the Office is at St. Peter's Schools, Onslow St., Clerkenwell Road, E.C.

**Chili.** A republic governed by a President elected for five years, to whom the executive power is confided, and a Senate and Chamber of Deputies, who form the legislature. The Senate, of 32 members, is elected by the provinces for six years; the Chamber, of 94 members, by the departments for three years, by electors possessing a small property qualification. The republic is divided into 23 provinces, and these are subdivided into 74 departments and one territory. The Roman Catholic is the State religion, but all others are tolerated; universal and gratuitous education is given at the national charge. Wheat, wine, and minerals are the chief products of the country. The yield of nitrate, in which industry a large amount of British capital is employed, is very large. By a law passed in '96, the army is not to exceed 9000. There is also a national guard, composed of citizens between the ages of 20 and 40. The Conversion Law of Nov. 26th, '92, changed the currency from paper to gold, at the rate of 24d. for each paper dollar, but a subsequent Act of Feb. 11th, '95, made the rate 18d. per peso or dollar. The new gold coins are 20, 10 and 5 peso pieces, while the peso and fractional coinage are of silver. Area, 293,970 sq. m.; pop. in '96, 3,317,264; capital, Santiago, pop 250,000. Revenue, '97, £6,555,555; expenditure, £6,273,527; debt, '98, external £17,734,970, internal about £6,600,000 sterling; imports, '96, £11,729,777; exports, £11,773,574. For Ministry, etc., see DIPLOMATIC; see also FOREIGN NAVIES.—History, '98. The Ministry resigned (Dec. 15th, '97), and a new Cabinet was formed with Señor Antonio Valdes as Minister of the Interior. This Ministry in turn was dismissed, and Señor Eulojo Artimaran was entrusted with the formation of a new one (March 22nd). In April another new Ministry was constituted, with Señor Carlos Walker Martínez as Premier (15th). In opening Congress (June 1st) the President announced that an agreement had been entered into with the Argentine Republic for the appointment of two arbitrators to delimitate the frontier during August. The estimated revenue and expenditure for the ensuing year were \$83,000,000 and \$76,000,000 respectively. The Bank of Chili was found to be in difficulties, and the Government having exhausted its conversion fund, could not aid it. A run on the Bank followed, and to prevent its failure the Government

ordered all banks to close their doors for four days, and then decreed a moratorium for thirty days (July 10th). It was then decided, mainly through the action of the paper party, who had all along opposed the conversion scheme, to issue \$50,000,000 of paper, and to lend the banks under guarantee \$20,000,000 at 4 per cent. The \$50,000,000 was partly guaranteed by a charge on the custom houses, and was made redeemable in 3½ years. This law quickly had its effect in putting a heavy premium on gold, and much indignation was excited amongst the merchants. The frontier question was considered by the arbitrators during August and September, but they could only agree to differ, and finally it was arranged to submit the points of difference to the arbitration of Great Britain. The Cabinet resigned (Oct. 19th), but all withdrew their resignations (20th) except the Minister of Industries.

**"Chiltern Hundreds."** See PARLIAMENT AND PARLIAMENTARY PROCEDURE.

## CHINA.

The most populous, and, excluding Siberia, the largest empire in Asia. China Proper is remarkable as the most compact nationality in the world, having an area of 1,336,841 sq. m., with a pop. of 386,000,000. The rest of the empire includes the dependencies of Manchuria, Mongolia, Thibet, Jungaria, and East Turkestan, which cover an area of about 2,881,560 sq. m., and contain about 16,680,000 souls. The government of the country is in theory most carefully organised, although in practice it is far otherwise. At its head is the Emperor, supreme priest and king, whose name is Kwang Hsu. The Nei-ko or Cabinet, which includes two Manchu members, two Chinese, and two assistants from the Han-lin or Great College, administers the empire under the supreme direction of the Privy Council. Seven boards or councils, each presided over by a Manchu and a Chinese, are entrusted, in subordination to the Nei-ko, with all civil appointments, with all financial matters, with the direction of rites and ceremonies, with military affairs, with public works, with criminal jurisdiction, and with the conduct of naval affairs. The Tsung-li-yamen is entrusted with the control of foreign affairs, the maritime customs, etc. The board of Censors is theoretically superior to the central administration, and in practice possesses considerable power, through the right of access to the sovereign which its members enjoy. The eighteen provinces are divided among a certain number of governor-generals, who are assisted by governors of districts and by the "taotais" of the cities. As to the army and navy, see separate articles on FOREIGN ARMIES and FOREIGN NAVIES. Agricultural pursuits occupy the majority of the people, the chief products being tea, silk, cereals, and sugar. There is also much coal in all the provinces, and in the Lui-Yang district, in the province of Hu-nan, there is a vast coalfield, the area of which is about 21,000 sq. miles. The coal here is worked to some slight extent at present, and finds an outlet through Han-kow, on the Yang-tse-Kiang. There are also large quantities of coal in the northern provinces of Shansi and Honan. The greater part of the country is only very partially developed, and much benefit would accrue to native and foreign trade if a proper system of railways could be established. Very

little has been done in this direction at present, though, as will be seen below, and from the accompanying map, many concessions were granted in '98. Various ports, called the treaty ports, which number twenty-seven in all, have been thrown open to European trade, and about 10,000 Europeans reside in these ports, of whom about 4000 are British subjects. Shanghai is the great foreign centre, more than half of the Europeans residing here. The effect upon the freedom of trade produced by the opening of these ports has, however, been in a great degree neutralised by the imposition of local transit dues, which are termed *likin*, and are collected at innumerable barriers set up for that purpose. By the Chino-Japanese treaty a number of ports were thrown open to the Japanese for trade and residence. The three chief religions established in the country are Confucianism, Buddhism, and Taoism, the Buddhists largely preponderating. The revenue and expenditure are estimated at from £12,000,000 to £15,000,000; imports, '96, about £30,500,000; exports, about £21,000,000. The liabilities before the war with Japan were very small. Then, however, an indemnity of £38,000,000 had to be paid, and foreign loans of £32,000,000 were raised. £21,500,000 were paid to Japan, and the Treaty of Shimonoseki gave her the option of paying a further £12,000,000 in full settlement in May '98, or of paying £16,500,000 in May 1902. The former alternative was chosen. For Ministry see DIPLOMATIC; see also GREAT BRITAIN AND HER FOREIGN TRADE; and SESSION, sect. 7.

**History, '98.** — The force of German marines landed at Kiao-Chau (Nov. 16th, '97), in order to exact reparation for the murder of two German missionaries in Shantung at the beginning of the month, made their position secure, and evicted the Chinese troops on the station. A demand, which was afterwards conceded, was presented (30th) for a money indemnity, for the degradation of the Governor of Shantung, and for the grant of Kiao-Chau to Germany as a coaling station. Prince Henry left Kiel (Dec. 18th) with a naval squadron and a strong force to hold Kiao-Chau, Germany having evidently made up her mind to retain the station. The example was soon followed. A Russian fleet occupied Port Arthur with the consent of China (19th), the pretext being that the ships would simply winter there. In January it was announced (5th) that Germany had obtained Kiao-Chau and the territory around it on a lease of 99 years from China, the Chinese Government at the same time transferring all its sovereign rights in the territory for the duration of the lease. The construction of a dock and a fortified coaling station was at once commenced, and later in the year the port was declared free. Germany also secured the right to build railways connecting Kiao-Chau, Tsi-nan-fu, and Ichow. The *Times* correspondent at Peking reported (16th) that Sir Claude MacDonald had informed the Tsung-li-yamen of Great Britain's willingness to provide a 4 per cent. loan of £12,000,000 at par, on condition that three new treaty ports, including Ta-lien-wan, should be opened, and that a pledge should be given that the Yang-tse-Kiang valley would not be alienated to any other Power. Russia at once protested against the opening of Ta-lien-wan as a treaty port, and it was said to be owing to her representations that the British ships which were at Port

Arthur left, and that the condition as to the opening of Ta-lien-wan was withdrawn (Feb. 1st). Various concessions were secured by Great Britain, however (20th), the Government agreeing to open all inland waters to navigation, whether by foreign or native steamers, and to open a treaty port in Hu-nan within two years, and, further, giving an assurance that no portion of the provinces adjoining the Yang-tse-Kiang valley should be alienated to any other Power. The Government also undertook that, so long as British trade continued to exceed that of any other Power, the Inspector-General of Maritime Customs should be a British subject. A contract for a loan of £16,000,000 sterling, at  $4\frac{1}{2}$  per cent., redeemable by a sinking fund in 45 years, was signed by the Government and the Hong Kong and Shanghai and German Asiatic Banks (March 1st). The loan was secured on the unpledged balance of the Customs and specified *likin*. Russia followed up her occupation of Port Arthur by demanding that that port and Ta-lien-wan and the territories adjacent thereto should be leased to her for the same term of years and under the same conditions as in the case of Kiao-Chau, and that she should have the right to build a railway to connect those ports with the trans-Siberian main line (6th). France in her turn presented demands, the chief of which were for the cession, on the same terms as were given to Germany, of a port at Kwang-Chau-wan, on the Lei-Chau peninsula near Hai-nan (17th), and for an assurance that no part of the provinces of Kwang-tung, Kwang-si, and Yun-nan should be alienated to another Power. The Russian demands were granted (24th), only the "lease" of Port Arthur and Ta-lien-wan was made for 25 years, with power to extend the period. Russia agreed that part of the harbour of Ta-lien-wan should be open to merchant ships of all nations with a customs tariff like that of a Chinese treaty port, although administered and collected by Russian officials. This port and Port Arthur were then formally handed over to Russia (28th). The Tsung-li-Yamèn announced the opening of Fu-ning, Yo-chow, and Chin-wang, and afterwards of Wu-sung, as treaty ports (April 2nd). At the same time Great Britain put forward a demand, which was granted, for the cession of the islands and waters of Wei-hai-wei on the termination of the Japanese occupation, for the same number of years and on the same terms as Port Arthur had been ceded to Russia. The French demands already set out above were conceded (5th), and the Government agreed that a Frenchman should be appointed as Director of the Imperial Post. Concessions were also granted during the year for railways from Nanning to Pak-hoi on the coast, and from Meng-tse up the valley of the Red River to Yunnan-fu and Sze-Chuan. The final payment to Japan in connection with the war indemnity, amounting to over £11,000,000, was made to the Japanese Minister at the Bank of England (May 8th). Japan shortly afterwards evacuated Wei-hai-wei, which was then occupied by British marines. Prince Henry of Prussia, having arrived in Peking, was received by the Emperor in state (16th) and by the Empress, the ex-Regent of China. A convention with Great Britain, leasing to her the territory on the mainland opposite Hong Kong behind Kow-lung up to a line joining Mirs Bay and Deep Bay, and the neighbouring

island of Lan-tao, was signed (June 9th), but Kow-lung city itself was left under Chinese jurisdiction. The area leased was about 200 sq. miles, and the term was for 99 years. By Imperial decree a new office was created—that of Minister of Trade—and the Tsung-li-Yamèn were instructed to promote international intercourse in the future (15th). A contract with an Anglo-Italian syndicate was signed (22nd) authorising the syndicate to work for 60 years the coal and iron mines in the province of Ho-nan, to the north of the Yellow River, and to build railways connecting the mines with the nearest main lines and navigable waterways. The terms were that a royalty and a share in the profits should be paid to the Central Government. The line from Tai-yuen to Singan-fu and the branch to Siang-yang come under this contract. The Wei-hai-wei Convention was signed (July 1st). A revolt broke out in the province of Kwang-su, in the West River district, and the rebels were reported (12th) to have captured nine towns and defeated the Imperial troops west of Wu-chow. Their number was estimated at 40,000, but they were eventually dispersed. In this month and the months that followed endless disputes and negotiations went on as to railway concessions, and the international struggle which commenced by demands for the cession of territory was continued in this fashion. Russia protested energetically against the concession made to the Hong Kong and Shanghai Bank, as representing an English syndicate, for the northern extension to New-chwang of the line from Tientsin to Shan-hai-kwan; but eventually withdrew her protest on condition that the line should not be mortgaged nor alienated to any foreign Power. These conditions were accepted by the Tsung-li-Yamèn in face of British opposition. Meanwhile Russian and French money was advanced to aid the construction of a great trunk line from Peking to Hankow, on the middle Yang-tse-kiang, though the contract was nominally given to a Belgian syndicate, and the railway having been made security for the loan, Russian control of the line seemed to be assured (31st). A new central administration for railways and mining affairs was constituted in Peking, and Wang Wen Shao and Chang Yin Huan were appointed joint directors (Aug. 5th). Despite the protests of the British Minister, on the ground that the line passed into the British sphere, the Peking-Hankow railway contract was ratified by Imperial decree (12th). Li Hung Chang was credited with having exercised all his great influence in favour of Russia in this and other matters, but he was dismissed from the Tsung-li-Yamèn (Sept. 8th). Concessions to British syndicates for the construction of railways from Shanghai to Nanking, and from British Kow-lung to Canton, were granted (14th). Germany having objected to the construction across Shan-tung of a proposed line from Tien-tsin to Chin-kiang, an Anglo-German syndicate agreed to undertake the line, the Germans working from Tien-tsin to the southern frontier of Shan-tung, and the British from that point to Chin-kiang. An American syndicate secured the right to construct a railway from Hankow to Canton. The Emperor in September issued a series of edicts establishing various reforms, all in the direction of the adoption of European financial and administrative methods and

measures. These were ascribed chiefly to the influence of Kang-Yu-Wei, a Cantonese reformer; but this promising activity was rudely checked by the Empress Dowager, who assumed charge of the Government and restored the Regency she had twice exercised before (22nd). The arrest of Kang-Yu-Wei was ordered, but he escaped on board a British steamer. He declared that the *coup d'état* was the work of the Manchu party, who restored the Regency of the Dowager in order to frustrate the Cantonese Reform party, to whom the Emperor had lent too attentive an ear. The Manchu party were bound to support Russian interests. Six members of the Reform party were executed (29th) for alleged conspiracy against the Empress, and many others were stripped of their offices and banished. The situation was rendered more serious by attacks made by Chinese mobs on members of the British and American Legations in Peking (Oct. 1st). The British, Russian, and German Legations took advantage of this to order escorts of their troops to Peking from Wei-hai-wei, Port Arthur, and Kiao-chau. The appointment of M. Pavloff, the Russian Chargé d'Affaires at Peking, as representative of Russia in Korea, was officially announced (7th). The final contract for a 5-per-cent. sterling loan of £2,250,000 for the continuation of the northern railway to New-chwang and Hsi-ming-ting was signed by the manager of the Hong Kong and Shanghai Bank and Hu Yu Fen, Director of Railways (10th). It was agreed that the line should be 260 miles long, and be completed within three years. The security was a Government guarantee and a charge on the railway from Peking to Shan-hai-kwan, already open. An agreement for a coal-mining concession near the railway north of the Great Wall was signed at the same time. The Chinese Secretary to the British Legation and a British officer, with others, were assaulted at a station near Peking (23rd), and, on the demand of Sir Claude MacDonald an edict directing exemplary punishment of the offenders was issued (26th).

**Chitral** is a small state on the Indian frontier, lying N.-W. of Kashmir, N.-E. of Afghanistan, and directly S. of the province of Wakhan, which came into prominence during the Pamir's dispute. On the west of it lies Kafiristan. It is a country of great strategical importance. See '96 ed. for a full account of the circumstances which resulted in the occupation of the country by British troops in '95. The annual cost of the retention of the country is estimated at twenty-five lakhs of rupees. Snuja-ul-Mulk is the Mehtar, and receives a subsidy from the Indian Government.

**Christian IX., King of Denmark**, was b. 1818. He is the son of the late Duke William of Schleswig-Holstein-Sonderburg-Glücksburg, and father of the Princess of Wales, the dowager Empress of Russia, and the King of Greece. By the Treaty of London, signed May 8th, '52, he was appointed the successor to the throne of Denmark, and, by the law of succession of that country passed July '52, on the death of King Frederick VII., he ascended the throne Nov. 15th, '63. In the beginning of his reign arose the famous dispute about the duchies of Schleswig and Holstein, which by the Treaty of Peace of Vienna ('64) he had to surrender. He married in '42 the Princess Louise, the daughter of

the Landgrave William of Hesse-Cassel. Her mother was a sister of Christian VIII., the predecessor of Frederick VII. Queen Louise died in '98. The heir to the throne is the Crown Prince Frederick, whose second son, Prince Karl, was married to H.R.H. Princess Maud of Wales in '96.

**Christian Evidence Society.** Founded in 1870 by the late Bishop of London, the late Earl of Harrowby, and others, Churchmen and Non-conformists, with the conviction that it was necessary to do something to counteract the progress of unbelief amongst various classes. In '97 686 indoor and 448 open-air lectures were given, and 118 students were examined. **President**, Archbp. of Canterbury; **Vice-President**, Sir G. G. Stokes, Bart., F.R.S.; **Chairman**, Earl Halsbury; **Secretaries**, Rev. T. T. Waterman, B.A., Rev. C. L. Engström, M.A. **Offices**, 26, Charing Cross, S.W.

**Christie, William Henry Mahoney, C.B., F.R.S.,** Astronomer Royal, was b. at Woolwich 1845, is a son of the late Professor S. H. Christie, F.R.S., and was ed. at King's Coll. School, London, and Trinity Coll., Camb., and became a Fellow of his college. Graduated B.A. ('68) as fourth wrangler. Appointed ('70) chief assistant at the Royal Observatory, Greenwich, London. On Sir G. B. Airy's retirement ('81) appointed **Astronomer Royal**. He contrived and introduced several valuable improvements in the scientific apparatus there in use, including new forms of spectroscope, of altazimuth, and of domes. He is the author of the "Manual of Elementary Astronomy." Address: The Observatory, Greenwich.

**Christ's Hospital** (Blue Coat School), London. Founded 1547. The new scheme of the Charity Commissioners received Her Majesty's assent on Aug. 15th, '90, and came into force in Jan. '91. (Copies of the scheme may be obtained at the Counting House of Christ's Hospital, 1s. each.) It provided that the boys' boarding school should contain 700 pupils, the preparatory school 120 juniors, and the girls' school 350 scholars, these three establishments being known as Hospital schools. Two day-schools, accommodating 600 boys and 400 girls, should subsequently be started. In this way education was ultimately to be given under the new scheme to 2170 children, instead of nearly 1200, and many more female scholars were to be educated. With relation to two-thirds of the scholars at the Hospital schools, fees ranging from £10 to £20 may be charged if the Council of Almoners consider that "the parents or next friends are in a position to contribute substantially towards the child's education and maintenance." The system by which entrance to the Hospital schools is gained under the new scheme is by nomination or by competition. Presentation to 325 places lies in the hands of the President, certain City companies, and various officials. One hundred scholars are to be nominated by the Council of Almoners (which numbers forty-three members), and 150 scholars, whose names have been submitted by donation governors, may compete for places. The more notable change in the construction of the school is the distribution of the remainder of places. From metropolitan schools of a public elementary nature come 179 successful competitors; various parishes which have hitherto possessed nominative powers supply 12 scholars; and 400 places are at the disposal

of boys and girls nominated by the governors of endowed schools at which they have attended for the period of two years. Numerous exhibitions and prizes which have existed in the past still remain as inducements. Hospital exhibition funds provide exhibitions to universities; there are also the *Times* scholarship, the "Moses," "Thomson," "Rowed," and "Pitt Club" exhibitions. The new scheme also made provision for the removal of the boarding school to a new site as soon as was found conveniently practicable. An unfavourable report upon the drainage system of the school in Nov. '93 brought this question prominently forward. A site at Wimbledon was considered, but finally the governors purchased an estate of 1200 acres near Horsham, and the foundation stone of the new buildings was laid by the Prince of Wales Oct. 23rd, '97. The land cost £53,000, and the estimated cost of the buildings is about £300,000. The work is expected to be finished by the summer of 1901. In July '96 the scheme of '90 was modified in certain particulars, so as to admit to the Royal Mathematical School the sons of naval officers as formerly, and also to allow of the admission of children by direct presentation on the part of donation governors rather than as the result of competition. Further modifications, principally as to the ages of admission, have also been made by recent amending schemes. **Head Master**, Rev. Richard Lee, M.A. **Alumni**: among a numerous list may be noted Bishop Stillingfleet, Coleridge, the poet; Leigh Hunt, Charles Lamb, Thomas Barnes, a late editor of the *Times*; James Scholefield, Regius Professor of Greek for Cambridge; and Sir Henry Sumner Maine, K.C.S.I.

**Church, Anglican.** See ANGLICAN CHURCH and CHURCH OF ENGLAND.

**Church Army.** A working-man's Church mission to working-men, founded in 1882, directed by a committee acting under the Council, amongst whom are three archbishops and most of the English bishops. There are 356 parochial evangelists; 186 van evangelists and colporteurs; 69 social officers; 194 mission nurses, partly for rescue work; 107 members of central staff. As many as 76,000 copies of the *Church Army Gazette* (3d.) are sold weekly, the profits of which cover salaries of all the paid central staff. Officers and branches in India, Australia, United States, Canada, and West Indies. A sum of over £140,000 is required annually. Nearly the whole of the headquarters staff are honorary workers. **Headquarters**, 130, Edgware Road, London, W.; **Hon. Chief Secretary**, Rev. W. Carlike; **Hon. Treasurer**, Sir Hugh Low, G.C.M.G. The **Spiritual or Evangelistic Department** (**Hon. Secretary**, Edward Clifford, Esq.) selects and trains working-men and working-women for spiritual work among the masses. There are upwards of 540 evangelists and colporteurs locally employed, and 194 mission nurses in parochial and rescue work. Other institutions connected with the Army are eight-days missions to Prisons and Workhouses; a magic lantern mission; 62 mission and colportage vans working all the year round in different dioceses; tent work amongst harvest men—hay, fruit, hop, corn; and coffee tavern for training evangelists. A Fresh Air Fund for giving poor children a week in the country; a Bible

and Prayer Union; a Juvenile Brigade, etc., etc. Various Church Societies and parishes are furnished with trained evangelists and mission nurses. Suitable candidates are trained free. **Evangelists' Training Home**, 130, Edgware Road; **Publication Department**, 130, Edgware Road; **Mission Nurses' Training Home**, 21, Nutford Place, W.; **Printing Works**, Salisbury Mews, Gloucester Place, W.; **Training Home Mission Hall**, 72, Crawford Street, W.; **Church Army West-end Church**, Upper Berkeley Street, W. The **Social Scheme** (**Hon. Sec.**, Colin F. Campbell, Esq.) of the Church Army tries to raise the hopeless outcasts of society—tramps, criminals, drunkards, discharged prisoners, and fallen women, and also to assist the deserving poor. This is done chiefly through labour, rescue, and lodging homes, of which there are upwards of 70 in London and the provinces. The labour homes, holding a maximum of 25 inmates, receive from the workhouses, gaols, casual wards, and streets. On the Emigration Test Farm and Market Garden, at Ilford, able-bodied men and youths, after being tested, receive practical instruction in farm work, and are then emigrated to the colonies. Many have been sent to Canada, where the Army has an Emigration Agency, and, in almost every case, they have done well. Over 13,000 cases of men, women, and boys were dealt with in '97: 58 per cent. of all received turn out well. **Home Office**, **Local Government Board**, **Prison Commissioners**, **Charity Organisation Society**, **Corporation of London**, **Boards of Guardians**, the **Archbishop of Canterbury**, etc., approve and support the social work of the Society.

**Church Association, The.** Instituted in 1865, to maintain the principles and doctrines established at the Reformation, and to preserve the purity of Protestant worship in the Church of England; to resist all innovations in the order of the service as prescribed by the joint authority of the Church and State, whether these innovations consist in vestments, ornaments, gestures, or practices borrowed from the Church of Rome; and especially to prevent "the idolatrous adoration of the Sacrament of the Lord's Supper"; to resist all attempts to restore the use of the confessional, and every exercise of that priestly authority which was put down at the Reformation. The Association also seeks to vindicate for the laity their rightful share in all departments of Church life, and aims at the restoration to the parishioners of the election of churchwardens, giving to them a veto upon the appointment of incumbents by patrons, and the absorption of the ecclesiastical courts into the general judicature of the country. A number of valuable works, such as "The Protestantism of the Prayer Book," by Dyson Hague; "The Prayer Book Articles and Homilies," by Tomlinson; "The Secret History of the Oxford Movement," by W. Walsh; "An Indictment of the Bishops: The Historical Grounds of the Lambeth Judgment examined and found to be false," by linson, and nearly 300 tracts, bound in five volumes, have been published. Colporteurs for the dissemination of Protestant literature have been appointed in a number of counties. Several Protestant vans have also been started. **Organ of the Association**, *The Church Intelligencer*. **Chairman**, Capt. Cobham; **Secretary**, Henry Miller. **Offices**, 14, Buckingham Street, Strand.

**Church Committee for Church Defence and Church Instruction, The.** This body was formed in 1895 out of the Church Defence Institution and the Central Church Committee, which were merged into one. Its object is to give instruction to the people in town and country in all matters connected with the history of the Church; to encourage learning in the truth and soundness of the position of the Church of England; and also to combine men and women of every shade of political and religious opinion in the maintenance and support of the Established Church; and generally to encourage the co-operation of the clergy and laity for the promotion of measures conducive to the welfare and efficiency of the Church. **Secretary, Mr. T. Martin Tilby,** Church House, Westminster.

### CHURCH CONGRESS, THE, '98.

The thirty-eighth annual Church Congress met at Bradford on Tuesday, Sept. 27th. The proceedings commenced with a welcome by the Mayor in the Town Hall, after which Congress attended services at the Parish Church, where the Archbishop of York preached, at St. Jude's, where the Bishop of Glasgow preached, and at All Saints', where the sermon was by the Bishop of Derry. The Presidential Address was given by the Bishop of Ripon (Dr. Boyd-Carpenter), who spoke of the age as being one full of opportunity for the Church, but an age of needs, of unrest—an age in which self-reliance is enfeebled—and all this called the Church to a self-denying discharge of her mission. He referred to the divisions in the Church, but thought there was little chance of Popery being brought back to England, and hoped that his hearers would refrain from making use of terms which could not fail to irritate and provoke suspicion. The Congress then began by discussing "The Share of Yorkshire and the Columban Mission in the Christianisation of England," the Bishop of Bristol reading a learned paper, being followed by Professor Collins and Canon Savage. In the evening the subject was "The Mutual Relations of Clergy and Laity," which was introduced by Dr. Jessop by a paper on "The Layman's Position in the first Four Centuries," which was the subject of much criticism by the Archbishop of Canterbury later on in the evening. Chancellor Dibdin suggested Church Vestries as the next work of Church Reform. The Archbishop of Canterbury, in discussing Dr. Jessop's paper, said that the power of the clergy had arisen from the wish of the laity to escape having any trouble in the matter. Lord Halifax spoke, and suggested a Conference between High Church and Low Church representatives. He was followed by Mr. Kensit, whose speech, developing into an attack on the Bishops, was cut short by interruptions which consumed his allotted time. In his paper on "Sunday Observance," Archdeacon Sinclair said that with the fashionable classes Sunday gave no break to the gaieties of the week. Archdeacon Diggle advocated the opening of museums for the poor. On Wednesday morning the Bishop of Hereford dealt with the subject of "The Message of the Church on Imperial Policy," in which he urged that the mission of the clergy was to teach the spirit of the Gospel of Christ to the nation at large. After the Bishop had sat down, Father Black rose to object to Bishop Barry addressing

the Congress; his objection was not allowed, but he handed in his written protest to the President and to the press—the charge he made against the Bishop being that he had permitted the so-called marriage of a divorced person to be celebrated at his church. Bishop Barry's paper on "The Subject Races" was read in his absence by Archdeacon Kilner. Professor Jebb, M.P., spoke on "Imperial Policy," and was followed by Dr. Welldon, of Harrow, Bishop-Designate of Calcutta, who said that the non-Roman Catholic nations were the ones to which the future belonged, and it appeared to him that the Church of England was a divinely appointed instrument for carrying the Christian faith to the far places of the earth. Prebendary Webb Peploe, the Archdeacon of London, and the Rev. Handley Moule also spoke. In the afternoon the subject was "The Church and the Nation as affecting Internal Affairs, Social and Trade Relations." The Dean of Ely read a paper on the "Responsibilities of Capital and Labour," in which he insisted on the health right of the worker in dangerous trades. The Dean of Durham read a paper on "The Risks and Prospects of Co-operative Production," and Mr. Geo. Hawkins, a working men's representative, threw much blame on the landlords and capitalists for many of the ills which exist amongst the working classes. Earl Grey spoke on the "Relation of the Church to Co-operation," and said that the claim co-operation had on the Church was that it was doing the work of the Church in its endeavours to establish its relations of man to man on the highest Christian principles. Mr. George Harwood, M.P., and Father Adderley, amongst others, addressed the Congress. The Working Men's meeting was, as usual, a great success. The Archbishop of Canterbury was received with a perfect ovation, and urged the necessity of the conversion of mankind to the law of charity, as being the remedy for the wretched state of the employed. The Bishop of Hereford said that the time had come when it should not be allowable for any one to inflict upon this country the miseries of the strike or lock-out. Papers on "Church Music" were read by Sir Walter Parrott and Canon Joy, and Dr. Buck, the organist of Wells Cathedral, advocated most strongly the advantages of Plain-song.

On Thursday the subject was "The Church and the Age," the morning sitting dealing with "The Unrest of the Age, Intellectual, Moral and Social." Professor Gwatkin said the unrest of the present age was essentially religious. The Bishop of Manchester spoke against Materialism and Agnosticism; Canon Bonney said that unrest was natural, and he feared the clergy had been infected by it, and many of them had tried to do too much. Amongst other speakers was the Rev. T. P. Ring, who said, in the course of his remarks, that confession was a matter of obligation. This caused the Bishop of Ripon, who was presiding, to say that he regretted such an opinion had been stated. In the afternoon papers were read on "Biblical Criticism and Study" by the Rev. J. Armitage Robinson, Norrisian Professor of Divinity, Cambridge, who spoke of the comparative ages of the Four Gospels. Dr. Robertson discussed the effect of recent criticism of the Acts; Dr. Loch, the Warden of Keble College, Oxford, read a paper dealing with the Epistles; and Mr. Montague James followed

with a paper on "The New Testament Apocrypha." A meeting was also held in the evening, presided over by the Bishop of Wakefield, the subject being "The Church Congress: Can it be made more useful?" The Bishop of Southwell read a paper eulogising the work and usefulness of Congress, and referred to its founder, Archdeacon Emery. Archdeacon Emery said the Congress was to educate and leaven public opinion on questions of Church interest, and its practical value had been proved. Dr. T. C. Fry thought the Church Congress was too "cliquey," and the Committee too narrow. Archdeacon Kilner, Canon Lowther Clarke, Mr. F. G. Frith and others also joined in the discussion. The morning session on the last day was given up to the consideration of a purely devotional subject, "The Message to the Heart of Man (devotional and practical use of Holy Scripture)," papers on which were read by, amongst others, the Bishop of Salisbury, Dr. Moule, Canon Newbolt and Canon Body. The last meeting of the Congress was held on Friday afternoon, under the presidency of the Bishop of Dover, at which the Bishop of Bath and Wells read a paper on "The Message of the Church to the World: Foreign and Colonial Missions"; the Bishop of Newcastle one on "The Evangelisation of the World in this Generation"; the Bishop of Melanesia one on "The Melanesian Mission"; while the Dean of Windsor and many others spoke on the "Revival of the Missionary Spirit." A meeting for Boys was held for the first time at this Congress, and was a great success. The Bishop of Bath and Wells spoke to the lads, and the Rev. T. C. Voules, the Bishop of Glasgow, Colonel Everett, and others also addressed them. The Congress in '99 is to be held in London.

**Church House.** Originated early in '86 by a few clergy meeting at Westminster, who had observed the urgent need of such a building. Subsequently the Bishop of Carlisle suggested that the erection of such a House should be the Church's method of celebrating the Queen's Jubilee. An executive committee was appointed, and funds have been collected to the amount of over £100,000. On Feb. 23rd, '88, a charter of incorporation was granted. The committee acquired in July '88, at a cost of £52,000, the freehold of a block of buildings, about an acre in extent, which is bounded by the south side of Dean's Yard, Westminster, by Tufton Street, Little Smith Street, and to a large extent by Great Smith Street. Plans for the Church House have been prepared by Sir Arthur Blomfield, A.R.A. The principal elevation faces Dean's Yard, and the ground plan shows a group of buildings enclosing a quadrangle slightly irregular in form. The style of the building is Late Tudor, with suggestions from Hampton Court Palace. In the first part of the permanent buildings, the Great Hall block, there are spacious halls for the meetings of both Houses of Convocation, twelve rooms used as offices for Church Societies, and a great hall, capable of accommodating 1350 persons, which was opened Feb. 11th, '96, by the Duke and Duchess of York. At present the work of the Corporation is being conducted in the temporary premises, 9, 10, and 11, Dean's Yard. Here there are reading-rooms, library, writing-room, committee-rooms, offices, etc., for the use of members. The Church House proved its great usefulness during the Lam-

beth Conference, as it was the house of call of all the Bishops attending the Conference. All the meetings, over eighty in number, of the various committees of the Conference were held in its rooms. On an average 500 meetings of Church Societies are held each year in the committee-rooms and halls. **Membership** of the Corporation (open to all members of the Church of England) may be obtained by the annual subscription of one guinea. Life membership, £10 10s. Associates of the Corporation must be recommended by a member of the Corporation, and pay an annual subscription of at least 5s. **Secretary**, Mr. Sydney W. Flamank, Dean's Yard, Westminster, S.W.

**Church in Ireland (Presbyterian).** **History.** Presbyterianism arose in Ireland through the plantation of Ulster by Scottish settlers in the reign of James I. The colonists at first conformed to the Episcopal Church, which was Calvinistic in doctrine and recognised the validity of Presbyterian orders. After 1634, however, the Irish prelates endeavoured to depose all Presbyterian ministers who would not submit to episcopal ordination and follow the Anglican ritual. In self-defence the Presbyterians left the Established Church, and in 1642 they organised their first presbytery at Carrickfergus. During the protectorate of Cromwell the Presbyterians were kindly treated, but after the Restoration the severest pains and penalties were enforced against them for their nonconformity. At the Revolution of 1688 the gallant conduct of the Presbyterians in defending Londonderry and supporting William III. gained for them the *regium donum*, an annual bounty of £1200. During the reign of Queen Anne this bounty was withdrawn and Presbyterianism was proscribed, but with the accession of George I. toleration was granted and the *regium donum* restored. During the eighteenth century many of the ministers of the Irish Presbyterian Church adopted Arian views, but in 1827, chiefly through the influence of Dr. Cooke, the Church again declared its adherence to Trinitarian doctrine, and the Arians withdrew from its communion. Side by side with the Irish Presbyterian Church there sprang up congregations representing the various dissenting churches of Scotland, the majority being connected with the Secession Church; and in 1840 the seceders joined the older Church. By the disestablishment scheme of 1871 the Church lost the *regium donum*, but the commutation granted by Government, supplemented by the gifts of the people, has more than compensated for the loss.—**Statistics.** Synods, 5; presbyteries, 36; churches, 590; ministers, 656; communicants, 106,602; average income, £250,000. There are two theological halls, viz., Magee College, Londonderry, and the Assembly's College, Belfast. Vigorous home mission work is carried on in Ireland, and foreign missions are conducted in India and China. Moderator for '98, Rev. W. Beatty, B.A., India.

**Church Lads' Brigade, The.** Founded permanently in 1891, in order to promote a spirit of discipline and respect among the elder boys of a parish. It was felt that the Church tends to lose its hold upon boys who are too old to go to Sunday school, and this organisation retains boys from 12 to 18, and combines strict discipline with systematic religious education. There were, in '95, 900 companies formed with a roll of 35,000, which has since much increased.

**Church of England Sunday-School Institute** (founded 1843). The objects are to extend, improve, and develop the Sunday-school system in the Church of England, and to secure efficient teaching in Church Sunday schools. There is a central office, through which information in regard to the needs of Sunday schools is ascertained, and all over the country branch or local Sunday-school Associations, numbering 402, are established. Free grants of Sunday-school requisites are made to Sunday schools both at home and abroad where necessary. The Institute provides lesson notes, manuals, and other publications useful to Sunday-school teachers and scholars, and sends experienced representatives to attend meetings of Sunday-school teachers for the purpose of giving lectures and training lessons, and affording information on all matters connected with the management and working of Sunday schools. It arranges normal classes and practical lectures on the art of teaching at convenient centres throughout the country, and conducts a yearly examination of Sunday-school teachers in England and Wales, Scotland, Ireland, and the Colonies, and awards certificates of various grades and prizes to the successful candidates. Offices, 13, Serjeant's Inn, Fleet Street, E.C.

### CHURCH OF ENGLAND, THE ESTABLISHED.

The Church of England, properly so called, owes her foundation to St. Augustine, who was sent to England by Pope Gregory the Great in 596. Queen Bertha, the wife of Ethelred the King, was a Christian, and on St. Augustine landing in what is now Kent, the King gave him every facility for doing all he desired towards spreading that religion in the country—and in a very short time the King himself was converted. St. Augustine was made the first Archbishop of Canterbury in 597—the 1300th anniversary of which event and of the foundation of the Anglican Church was celebrated during '97.

The government of the Church is carried on by Bishops (of whom there are thirty-four, two of them Archbishops), who superintend the work in each diocese, and who are aided in the episcopal work of confirmations, consecration and opening of burial grounds by suffragans, of whom there are twenty-three. The Bishops are appointed by the Queen, in virtue of her supremacy, their appointment being ratified by the Church, by their election by the Dean and Chapter of the Cathedral of the diocese, in pursuance of a *congé d'élire* sent to them by the Crown. The suffragans are appointed by the Bishops themselves. The whole of England is divided into parishes of various sizes; for the inhabitants of each parish there is appointed a parish priest whose duty it is to minister to them. A certain number of parishes grouped together form a Rural Deanery; they in their turn added together form an Archdeaconry; a Diocese, over which the Bishop presides, is made up of two or more Archdeaconries. The Archdeacon—the *oculus episcopi*—assisted by the Rural Deans, reports as to the state of the livings. There are also in the diocese laymen who hold ecclesiastical appointments to control the temporal and legal business. There are the Vicars General (for the Province of Canterbury

Sir J. Parker Deane, Q.C., D.C.L., and for York Lord Grimthorpe), Chancellors (usually barristers), registrars, surveyors, architects, etc. Each parish has two Churchwardens to look after the temporal affairs connected with the Church. There are in each Rural Deanery Rural-decanal Conferences, composed of the clergy and leading laymen—and in each Diocese a Diocesan Conference in which Church questions are discussed. The spiritual government of the Church is in the hands of the Houses of Convocation (*q.v.*), but for any change in Church government which affects the temporal or legal position of the Church or its members the sanction of Parliament must be obtained. There is also a House of Laymen (*q.v.*) in each Province, which meets to confer on Church questions. The Cathedral in each diocese is the seat—the "*Cathedra*"—of the bishop, but he has no voice in the government of the Cathedral, which is vested in the Chapter, of which the Dean is the head. The Deans and Canons are appointed by the Crown; the Minor Canons, who sing the daily Offices, and the various officers of the Cathedral, are appointed by the Chapter. There are two Deaneries which are called Peculiars—Westminster and Windsor—the Abbey and St. George's Chapel being outside the jurisdiction of the bishops of the diocese in which they are severally situate. There are a few Deans in name only, such as the Dean of Battle—a survival of the title of the Abbot of Battle Abbey; there is also the Dean of the Chapels Royal (the Bishop of London), and the Dean of the Closet—but their offices are connected with the Royal Household. The dioceses, roughly speaking, are coterminous with the counties of which the chief town is the See, though there are important exceptions. All the dioceses of England and Wales (except those of York, Durham, Liverpool, Newcastle, Ripon, Manchester, Carlisle, Wakefield, Chester, and Sodor and Man, which form the Province of York) are in the Province of Canterbury. London is in four dioceses: London (Middlesex), St. Albans (Herts), Rochester (Surrey), and Canterbury (Kent).

The doctrines are those of the Early Church, based upon Holy Scripture, appealing to the Catholic Fathers for interpretation, teaching the Creeds put forth at the first four General Councils, and referring to the Ancient Church practices and customs as the rule for the guidance and government to-day of what is the lineal descendant, through the bishops, of the Church founded by the Apostles. The Book of Common Prayer contains all the Services of the Church—they are almost entirely translations of those used in very ancient times. Besides assenting to all contained in the Prayer Book the Clergy at their ordination are required to subscribe the XXXIX Articles—though the latter are not binding on the laity. The tenets of the Anglican Church differ from those of the Roman in not acknowledging the supremacy of the Pope—in not accepting the Roman doctrine of the Mass, nor the veneration of relics and Saints, nor the worship of the Virgin Mary—all which doctrines date from the middle ages; but they agree with the Roman in acknowledging the first four Councils, and in accepting the episcopal form of government, and the necessity of valid Orders in the Church. The Church differs from the leading Nonconformist bodies in insisting on the importance

of Apostolical succession, in order that its ministers may properly administer the Sacraments, and disaigrees also with the Nonconformist view of the meaning of the "Catholic" Church, which by them is held to be the whole body of Christians rather than those who hold the doctrines "always, everywhere, and by all believed," which is the ancient definition of the word "Catholic."

The number of clergy in England and Wales is about 23,000, rather more than 14,000 of whom are beneficed. The Archbishops and twenty-four Bishops have seats in the House of Lords as spiritual peers. Since '36 nine new bishoprics have been created: Manchester, Ripon, Liverpool, Newcastle, St. Albans, Southwell, Truro, Wakefield, and Bristol. The new See of Birmingham is proposed. The amount raised in '96 by voluntary means for Church buildings, restorations, endowments, etc., was £1,231,781; for Foreign Missions, £544,232; the amount spent on Elementary Education, for general maintenance and buildings, additional school accommodation and enlargements £1,048,659, besides Home Missions and other Church Agencies. There were also raised during '94 voluntary contributions, exclusive of all offerings made direct to Societies, for the Assistant Clergy nearly £600,000, Church Collections and Easter Offerings £118,000, Salaries of Lay Helpers and Church Expenses £1,120,000, and for the support of the Poor £549,000. The Church population is estimated at about 14,000,000, with Church accommodation for about half that number. There is an average attendance of 1,871,000 children in Church schools—the subscriptions amounted in '96 to £643,386, and since '70 £24,000,000 has been spent on buildings and maintenance of Schools. The cost of Diocesan Inspection of Schools is about £15,000. There are thirty Training Colleges for Teachers, the cost of maintenance in '96 being £14,000. The Church Schools Company was established in '83 for the purpose of providing schools for the boys and girls above the class attending Elementary Schools; there are now twenty-eight schools belonging to the Company, with an attendance of over 2000. Consult *The Official Year-Book of the Church of England and The Clergy Directory*. See also ANGLICAN CHURCH, BISHOPS, and CHURCH CONGRESS, '98.

The year '98 was notable for the stir made in the Church on two points: the remarriage of divorced persons, and the question of ritual and doctrine as practised and taught by the clergy of the High Church school of thought. The clergy have of recent years been raising their voices against the bishops who permit their chancellors to grant licenses for the remarriage of divorced persons, and against priests who either perform the ceremony or permit their churches to be used for that purpose. Some bishops have lately given their decision that in future no such licenses will be granted; others permit them to issue still. The bishops in Convocation in July put forth a statement of their opinion, a very important document, in which they said that it should be clearly and strongly impressed upon the faithful that the Christian ideal is that of indissoluble marriage, and that the most dutiful and loyal course, even in the case of the innocent party, is to put aside any thought of remarriage after divorce; but if any person determines to remarry, then the provision

made for civil marriages should be made use of. The Bishop of Lincoln, however, said that he could not regard the marriage tie as being absolutely indissoluble.

Public attention was first forcibly called to the matter of innovations in ritual and doctrine by the action of Mr. Kensit, of Paternoster Row. Having taken up his abode in the parish of St. Ethelburga, he attended his parish church in Bishopsgate Street Within, and he wrote to the Bishop of London objecting to the manner in which the services were conducted, and stating that only the priest communicated at the High Celebration, and that he was not permitted to do so. The Bishop replied that he had no reason to suppose Mr. Kensit would find any hindrance to receiving the Communion at the church, but advised him to attend a church where the services suited him rather than one where they did not. Mr. Kensit followed up his protest by appearing at other churches in London and the provinces where the services are of an elaborate character, and disturbances arose on more than one occasion. The most noteworthy took place at St. Cuthbert's, Earl's Court, when Mr. Kensit attended a service known as "The Veneration of the Cross," at which he and his followers seized the crucifix, protesting against the service as idolatry. This led to police court proceedings, which eventually ended in Mr. Kensit's conviction by the magistrate being quashed on appeal at the Sessions. Mr. Kensit in May forwarded to the Bishop of London a petition to be pre-ented to Convocation upon the subject of Ritual in the Church, and this led to a discussion in the Upper House. At the end of May a conference of clergy was convened under the presidency of Canon Carter, at which resolutions were passed recognising the full authority of the bishop to prohibit any service not contained in the Book of Common Prayer, and to prohibit also any omissions from or additions to the services contained in the Book of Common Prayer. This conference was attended by most of the leading High Church clergy, but four well-known and prominent clergymen refused to agree to these resolutions, although accepting them in the abstract, until the proceedings by the agitators had been abandoned. Prebendary Montague Villiers also presided over a very influential committee of clergy, whose work had been taken in hand before the Kensit demonstrations, and their published Memorandum recognised the authority of the bishops, and pledged the signatories to the use of the rites and ceremonies of the Prayer Book, and also made a declaration as to certain ornaments and ceremonies. The bishops afterwards took advantage of opportunities to address the faithful of their dioceses on the subjects of ceremonies or teaching. The Bishop of Hereford at the end of May addressed his clergy and churchwardens, and spoke strongly against ritual. The Bishop of Rochester at his Diocesan Conference pleaded for consideration from the "advanced" men on either side for those who differed from them. The Bishop of Liverpool, in the York Convocation, brought forward a resolution calling upon the clergy to remember their ordination vows, and their legal and moral obligations with regard to the Prayer Book; but this was modified, at the Bishop of Wakefield's suggestion, into a declaration that the practices of some of the

clergy needed restraint, and after some discussion it was carried in that form, although not agreed to by the Bishop of Liverpool himself. At the York Diocesan Synod, at the end of June, the Archbishop in his charge spoke of unauthorised services, and said that at the cost of self-denial there should be a cessation of strife, and certain practices should be given up. The Bishop of London forwarded to all the incumbents in his diocese a letter calling their attention to some points relating to the performance of Divine Service, with directions more especially as to Morning and Evening Prayer and Holy Communion, no one of which services should be disregarded in favour of another. The Communion Office should be said without additions or omissions, and all additional services should have the Bishop's sanction. A large number of the clergy addressed a letter to the Bishop in reply, assuring him of their loyal compliance with his directions. The Benefices Bill gave members of Parliament of both Houses an opportunity for discussing the ritual question, which has been filling men's minds so much. Sir William Harcourt championed the cause against the High Church party, and amongst other things he stated that under the Act of Uniformity Amendment Act of 1872 additional services must not have anything introduced into them, except anthems or hymns, but what forms part of the Holy Scriptures or Book of Common Prayer, and that the bishops could authorise nothing more. This statement, which Sir William Harcourt afterwards reiterated and amplified in a series of letters to the *Times*, gave rise to much discussion, the Archbishop of Canterbury, at his Diocesan Conference, taking exception to it, as being contrary to the spirit of the Act. The Church Association issued at the end of June a Manifesto against Ritualism couched in very strong terms; and subsequently a correspondence between the Bishop of Chichester and some officers of the Church Association took place with regard to the services in some of the advanced churches in Brighton. The Bishop referred to this at his visitation, and said that he would not be coerced. At the end of July further disturbances arose, notably at St. Michael's, Shoreditch, Mr. Clarke, of Beckenham, being the chief protestant, surrounded by some of Mr. Kensit's band of "Gideonites." Liverpool was also the scene of a good many disturbances during divine service by the same band of men. The Bishop of Salisbury published at the end of July a letter to the clergy of his diocese, entitled "Considerations on Public Worship and on the Ministry of Penitence," a very important and interesting document, in which he laid it down that every service held must have his sanction. He went very fully into the Worship of our Lord in the Blessed Sacrament, Reservation, Worship of Saints, conduct of Public Worship, and particularly the Ministry of Penitence and the question of Private Confession. A great correspondence was carried on in the *Times* on the subject of Confession, all schools of thought being represented in the discussion. The Bishop of Winchester, in addressing his Diocesan Conference, said that out of 348 forms of additional services which had been sent to him from his clergy for his approval, to not more than 7 could any exception be taken on doctrinal grounds, and it would be fatuous

to forbid the use of them. He thought the present eager life, with all its risks, was preferable to the flat, monotonous orthodoxy to which our grandfathers were accustomed. The Bishop of Hereford, at his Diocesan Conference in September, suggested a plan of local option, by which a majority of parishioners might agree to certain additional services being held, subject to the bishop's approval.

The Archbishop of Canterbury began his Visitation at Canterbury on Oct. 1<sup>st</sup>. The subject of his address was "The Doctrine or the Holy Eucharist," and he said the Church has ever held that there is a mysterious gift conveyed to the receiver in the Sacrament, as it was universally held by the Early Church and by the branches of the Catholic Church now. The reception of the gift by the congregation, as a congregation and not as communicants—otherwise known as the Real Presence—is another question, to which the Church of England has given no answer, but she does not forbid a man to hold or teach the doctrine. This doctrine is similar to the Lutheran doctrine of Consubstantiation, which may be held by members of the Church. On the 11<sup>th</sup> the Archbishop spoke on "The Objects of Worship," and declared that the worship of saints and the semi-worship of relics, pictures, places and the rest is unlawful. As to "prayer for the departed," His Grace said that nowhere is it forbidden, though prayers should only be introduced into public worship in the most cautious and guarded manner. On Wednesday, the 12<sup>th</sup>, the Charge was resumed at Ashford, when the subject was "Confession." The Archbishop said that no compulsion to confess, direct or indirect, is ever allowed, and no priest has a right to make it a condition of being presented for Confirmation, or being admitted to Communion. On Thursday, the 13<sup>th</sup>, the Visitation was continued at Maidstone, the subject being "Ceremonial," which, said the Archbishop, is prescribed by the Book of Common Prayer, and no departure is allowed, except by the intervention of lawful authority. It is the unity of ceremonial which makes the toleration of diversity of opinion possible; the ceremonial is the order of the Church, the teaching the voice of the individual. With regard to additional services, if the prayers or form of service agree in substance with parts of the Bible or Prayer Book, they are such as are sanctioned by the Act of Uniformity Amendment Act of 1872, although not actually found in either book. The Visitation was concluded at Croydon on the 14<sup>th</sup>, the last subject being "The Power of the Bishops." His Grace said the bishop had two kinds of power, one coercive, the other not; the former exercised through his court, the latter in accordance with his own judgment. The Church had enacted the rubrics of the Prayer Book, and the canons have imposed upon the clergy the obligation to promise the observance of the rubrics and canonical obedience to the bishops. In case of doubt about the meaning of a rubric, the bishop is to interpret it. Disobedience to the rubric by the clergy, after the interpretation by a bishop, is a case where a bishop cannot use coercion; if the clergyman determines to break his promise of canonical obedience, the bishop can use no compulsion.

The further hearing of the summonses for alleged brawling in St. Michael's, Shoreditch, in May, was disposed of on Oct. 16<sup>th</sup>, when

Mr. Hone was fined £5 and costs, at the Worship Street Police Court, for riotous behaviour in a place of worship. The charge of assault against the Rev. A. W. Vowler by sprinkling holy water on Mr. Hone was dismissed. The summons against Mr. Kensit was withdrawn. Mr. Hone gave notice of appeal.

Lord Salisbury said (Oct. 29th) that he sympathised deeply with the protest against Ritualistic proceedings in the Church, and agreed that "no one ought to have any office in the Church who is not prepared to stand by the Church of England Prayer-Book as it is."

**Church of England Young Men's Society, The, Leopold Rooms, Ludgate Circus, E.C.,** has for its object the promotion of the spiritual, social and intellectual welfare of young men, with especial view to their consistent life as members of the Church of England, and their active personal labours for the good of others. The Society was established in 1843, with a central body in London and branches in various parts of the country. At present there are about 100 branches, and the aggregate membership is about 15,000. Among the most flourishing ones are those of Belfast, Cork, Norwich, and Hackney. The Leopold Rooms are the central buildings of the Society, and are regarded as a home for young men. There every member of the Society is welcomed, and those who are on a visit to the Metropolis can make the headquarters their home. There are also to be found at the Leopold Rooms a splendid gymnasium, excellent rooms for reading and smoking, a large room, accommodating about 200, where lectures and concerts are constantly given, good class-rooms, a refreshment-room, and a library containing about 4000 volumes. There are besides classes for the study of French, German, etc., a class for Bible study, rowing, swimming, football, cricket, and other clubs for athletic purposes, and that indispensable adjunct to every society of the kind—a parliamentary debating society. **President, Lord Halsbury; Chairman of the Council, Mr. Robert Holmes White.** It is the aim of the Society to have a branch in every town and village, and if possible in every parish. Clergymen desiring to form branches, and young men wishing to become members of the Central Rooms, in Ludgate Circus, should apply to Mr. Percival Etheridge, **Secretary.** The Society publishes at certain intervals a magazine—*Forward*—for young men.

### CHURCH OF IRELAND, THE.

St. Patrick is universally recognised as the Apostle of Christianity in Ireland, and he probably went to that country as a missionary bishop A.D. 432. He planted there a native church and raised up a native priesthood, and during the sixth and seventh centuries missionaries from Ireland poured out to Britain and other European countries. Up till the twelfth century the Irish Church was independent, but it then became subject to Rome, and so remained till the Reformation. In 1800, by the Act of Union, the Church was united to the Church of England. In '69 the Irish Church Disestablishment Act was passed, taking effect on Jan. 1st, '71. Since then the Church has flourished in spite of the loss of the revenues and property formerly belonging to her. The government is in the hands of a General Synod

composed of three distinct orders—the bishops, the clergy, and the laity. The bishops form one House, and 208 of the clergy and 416 of the laity form a Second House—the House of Representatives. Both sit together to constitute the Synod. This latter House is elected triennially by the 23 diocesan synods throughout the country. The General Synod meets annually at Dublin on the second Tuesday after Easter. The affairs of each diocese are managed by a diocesan synod acting through a diocesan council. The financial affairs of the Church are in the hands of the Representative Church Body, composed of archbishops and bishops, 13 clergymen, and 26 laymen chosen by the diocesan representatives in the General Synod, with 13 co-opted members, making a total of 65 members. This body holds the property of the Church in trust. The sum handed over by the Church Temporalities Commission to this body was £8,081,075, which comprised £7,581,075, the life annuities of the bishops and clergy paid as commutation money, and £500,000 compensation for private endowments. The funds in hand on Dec. 31st, '97, amounted to £7,973,976, and are appropriated to the following purposes: Commutation, £1,308,603 16s. 5d.; Parochial sustentation, £4,563,570 2s. 8d.; Episcopal sustentation, £565,403 11s. 9d.; Glebes purchase, £337,268 os. 8d.; Miscellaneous purposes, £1,145,378 18s. 6d. And there are besides, balances due to parishes, etc., £53,751 18s. 7d. Total, £7,973,976 8s. 7d. The annuants now only amount to about 250, and the interest on commutation capital more than pays these, so that in many dioceses 10 to 12 per cent. is paid to the clergy as bonus on their stipends. The number of clergy in the church is 13 bishops, 1200 incumbents, and 360 curates. The Church population is estimated at 600,703. The incumbents are elected by Boards of Nomination, consisting of 1 bishop, 3 diocesan and 3 parochial members. The incumbents nominate their curates. Bishops are chosen by the members of the diocesan synods, and the Primate by the bishops from amongst themselves. The average stipend of an incumbent is £200 with house, and of a curate £120. Bishops receive from £1500 to £2000, and the Archbishops £2500 with houses free of rent. The Church Sustentation Committee in London, conducted by the Misses Nugent, raise an annual sum for poor parishes in the west and south of Ireland, which needs to be largely augmented, and contributions will be received by these ladies. The Secretary of the Representative Church Body is Mr. Thos. Greene, 52, St. Stephen's Green, Dublin.

### CHURCHES OF SCOTLAND.

Under this head the Established, the Free, the United Presbyterian, and the "Auld Licht" Churches are dealt with, beginning with

**1. Church of Scotland.—History.** Christianity was introduced into Scotland in the fourth century, and the Church that resulted differed in several respects from the rest of Western Christendom. The chief distinction lay in its government. Three orders of clergy were recognised—bishops, priests, and deacons; but the bishops had no dioceses, and were in subordination to the abbots who presided over the great missionary college at Iona. St. Columba, the first of these abbots like some of his

successors, was a simple presbyter. Gradually the early Scottish Church assimilated to the Roman use, although it was not till the fifteenth century that metropolitans were appointed, with jurisdiction over the other sees. At the Reformation prelacy was abolished, and the Church of Scotland was constituted on its present basis. A long conflict ensued between the adherents of prelacy and presbytery, but in the end the latter prevailed, and the Reformation constitution was ratified by William and Mary, and in 1707 was confirmed by the British Parliament.—**Doctrine.** The standards of the Church of Scotland are the Confession of Faith and the Larger and Shorter Catechisms compiled by the Westminster Assembly of 1643. The doctrine they contain is Protestant and Evangelical, following the theological teaching of Augustine and Calvin.—**Polity.** The Church of Scotland is Presbyterian in government—*i.e.*, it recognises the equal episcopacy of all presbyters. Its congregations are ruled by a board of elders or presbyters elected for life from the Church members. This is known as the Session, and the minister of the parish is *ex-officio* president. Its duties are chiefly spiritual, the temporal affairs of the Church being committed to a deacon's court, or to a board of managers, elected for a term of years. Over the Session is the Presbytery, consisting of the ministers and one elder from each congregation within a certain district. Over this again is the Synod, composed of representatives from the presbyteries of a province; and over all is the General Assembly, the supreme court of the Church, which meets yearly in Edinburgh in May. The Assembly is summoned by royal warrant, and the Queen's Commissioner is present at its sittings.—**Worship.** The Church of Scotland uses no liturgy in the conduct of public worship, but the order of service is prescribed by the Westminster Directory of Worship (1643). As this Directory has become obsolete, every minister is practically left to his own discretion in conducting the service. At present the tendency in the Church is towards greater uniformity and order, and many clergymen use the Euchologion, a service-book issued by the Church Service Society.—**Statistics.** Ministers, 1700; elders, 9400; communicants, 641,000; congregations, 1600; presbyteries, 84; synods, 16; income, £485,000, exclusive of seat-rents, bequests, tithes or tithes, and Government grants. There are 17 churches in England connected with the Church of Scotland, and 4 at popular places of resort on the Continent, and vigorous missions are carried on in India and Africa. Commissioned chaplains for Presbyterian troops are chosen chiefly from the Church of Scotland, but clergymen of the Free Church of Scotland and of the Presbyterian Church in Ireland are also eligible for appointments. In '96 Her Majesty decreed that during his year of office the Moderator of the Church of Scotland should take rank with bishops of the Church of England. Moderator for '98, Rev. T. Leishman, D.D., Linton. Lord High Commissioner for '98, the Earl of Leven and Melville.

**2. Free Church of Scotland.**—This Church has the same government, doctrines, and worship as the Established Church, and only differs from it in receiving no State support and admitting no State control in its affairs.—**Origin.** The Free Church originated through the evils brought about by the working

of the Patronage Act of 1712. This Act deprived the people of the right to choose their minister, and invested it in the heritors or patrons of each parish. A shadow of the popular right still remained in the "call" of the parishioners inviting the presentee to be their minister; but this call was sustained by presbyteries, although signed by a mere fraction of the people. The Moderates or Broad Churchmen, who were the dominant party in the Church of Scotland during the whole of the eighteenth century, were favourable to the rights of the patrons; but when, in the beginning of the present century, the Evangelicals became the majority, they attempted to enforce the popular rights. Accordingly the General Assembly of 1834 passed the **Veto Act**, declaring that no minister should be intruded on any parish contrary to the will of the people. A conflict at once ensued between the civil and the ecclesiastical courts, but in Aug. '42 it was brought to an end by the decision of the House of Lords, which practically affirmed the right of the civil courts to review and control all such proceedings in the courts of the Church. At the next meeting of the General Assembly (May 18th, '43) 474 ministers, headed by Dr. Chalmers, left the Church of Scotland and formed the Free Church. This event is known as **The Disruption**. The Free Church was speedily organised, and steps taken to build churches, manses, and schools. The liberality, self-denial, and enthusiasm of its people carried the Free Church safely through the trying years that followed the Disruption. Since then its progress has been gradual and peaceful.—**Statistics.** Congregations, 1050; communicants, 350,000; ministers, 1100; synods, 16; presbyteries, 75; income, £666,000. There are 3 theological colleges and 3 normal schools for teachers. At the Disruption all the foreign missionaries of the Church of Scotland threw in their lot with the Free Church, which at once assumed full responsibility for their support. Its missions are in India, South and Central Africa, Syria, and Arabia. It also supports 18 Continental charges.—**Sustentation Fund.** This famous fund was established by Dr. Chalmers to insure a fixed stipend for every minister of the Church. All the members of the Free Church are expected to contribute according to their will and ability to this fund. Out of the total thus contributed each minister receives £150, and the surplus is divided equally among the ministers whose congregations contribute not less than 10s. per member.—**Efforts at Union.** All attempts to unite the Free Church and the United Presbyterian Church have hitherto failed through the opposition of the Highland ministers of the Free Church, who hold strongly to the principle of a state religion, and refuse to unite with a Church that rejects it. In '76 the **Reformed Presbyterian Church** united with the Free Church. This Church (popularly known as the Cameronian) traced its descent to the Covenanters who refused to conform to the State Church because at the Revolution of 1688 the Covenant was not enforced. Patronage in the Church of Scotland was abolished by Act of Parliament in 1874, and thus the chief cause of the Disruption, and the principal obstacle that prevented the Free Church from uniting with the Established, was removed. But as by that time the majority of the Free Church Assembly had adopted "voluntary" principles, and were therefore opposed

to State connection of any kind, the Assembly has repeatedly declared that no union is possible so long as the mother Church is established by the State. In '92 a **Declaratory Act** was passed by the General Assembly of the Free Church, giving a liberal interpretation to the doctrines of the Westminster Confession of Faith. In '93 four ministers and about a thousand members of the Free Church in Skye and Inverness seceded from the Church, because of the adoption of the **Declaratory Act**, and constituted the "**Free Presbytery of Scotland**." They now claim to have 5000 adherents. In '96 the General Assembly unanimously agreed to reopen union negotiations with the United Presbyterian Church on the invitation of the latter. In '97 both Churches agreed to appoint committees to draw up a basis of union. Moderator of the Free Church for '98, Rev. Alexander Whyte, M.A., D.D., Edinburgh.

**3. United Presbyterian Church.**—This Church was constituted in 1847 by the union of the Secession and the Relief Churches. The **Secession Church** owes its origin to the obnoxious Patronage Act of 1712, which deprived the parishioners of their right to elect their minister, and vested the right in the heritors or patrons of the parish. A number of violent settlements followed, and it became common for ministers to be inducted with the aid of dragoons. Many appeals and petitions against such action were sent to the General Assembly, but the Moderates or Broad Churchmen, who then formed the majority of the court, decided in 1730 to receive no further complaints. Two years later the Rev. Ebenezer Erskine, of Stirling, publicly protested against this act of the Assembly. For this he was immediately censured, and soon after was deposed from the ministry. Along with seven other ministers, who supported his action, he made a secession from the establishment, and constituted a new Church, which from its origin was strongly evangelical. The growth of the Church was long retarded by many unhappy divisions among its members, but these were finally healed, and at the union with the Relief Church in '47 the original 7 congregations had increased to 384.—**Relief Church.** After 1747 the Moderates in the Church of Scotland showed a disposition to deprive the people of all right to interfere in the election of their ministers. In 1749 a crisis was reached in the presbytery of Dunfermline, for this court refused to proceed with the settlement of a minister contrary to the wishes of the parishioners. The General Assembly commanded the presbytery to induct the presentee, but six ministerial members refused to obey. One of these, the Rev. Thomas Gillespie, of Carnock, was singled out for punishment, and in 1752 he was deposed from the ministry. In 1758 the Rev. Thomas Boston, of Jedburgh, joined Gillespie, and in 1761 the people of Colinsburgh, in Fife, formed the third congregation. As they all sought relief from patronage, they adopted the name of the Relief Church. This Church kept in close touch with English Nonconformity, and became more liberal in doctrine and spirit than its sister Churches in Scotland. At its union with the Secession Church it numbered 113 congregations.—**Constitution of the United Presbyterian Church.** In doctrine and worship it agrees with the Established and Free Churches, as it also does in government, with this exception, that it has no intermediate

courts between its presbyteries and its supreme court, and the latter is not called an Assembly, but a Synod.—**Statistics.** Presbyteries, 29; congregations, 583; communicants, 195,631; ministers, 614; income, £361,174. There is a well-equipped theological college in Edinburgh, and extensive missions are supported in India, China, West and South Africa, and in the West Indies. In '97 the United Presbyterian Church celebrated its Jubilee. Moderator for '98, Rev. Wm. Blair, D.D., Dunblane.

**4. United Original Secession Church,** popularly known as "**Auld Lights**."—This Church was constituted in 1842 by the union of two small bodies that had separated at different times from the Secession Church. The "**Auld Lights**" are severely orthodox in theology and simple in worship. They believe in the principle of a union between Church and State.—**Statistics for '98.** Churches, 29; ministers, 25; elders, 155; communicants, 837; income, £6900. Moderator, Rev. A. Stirling, Arbroath.

**Church Rates.** Originally, like tithes, a charge upon the land of a parish for the maintenance of the church fabric. In later years levied as a rate, and paid by occupiers. Nonconformists having objected to them, they were abolished in 1868. The churches and services are now provided and maintained solely by Churchmen and Church endowments, whereby all apparent injustice to Nonconformists is entirely removed, and the rights of Nonconformist parishioners in the church fabric are not impaired. The Act of '68, however, did not abolish church rates in cases where, at the time of the passing of the Act, money had been borrowed and remained due on the security of the church rate, or where the rate was applicable to purposes other than "ecclesiastical purposes" as defined by the Act, or had been originally authorised to be levied by special legislation in consideration of the abolition of tithes or for other valuable consideration. In several parishes voluntary church rates are levied, principally for the purpose of paying the interest and principal in respect of loans raised on the security of that rate prior to the passing of the Act of '68, but occasionally for the purpose of defraying vestry expenses.

**Church Reform League, The,** was inaugurated at the Church House, Westminster, on Nov. 27th, 1895, and includes amongst its supporters several of the bishops and a considerable number of leading clergy and laity. It is concerned solely with Church reform; it is in no sense a party organisation; it is entirely non-political, and it does not deal with questions of doctrine. The League advocates various reforms concerning the position of the laity, discipline, patronage, and finance; but its foundation principle is that Church reform should be carried out by the Church herself through her own assemblies. It maintains that, saving the supremacy of the Crown according to law, and, in respect to legislation, subject to the veto of Parliament, the Church should have freedom for self-government, by means of reformed Houses of Convocation (which should be thoroughly representative, with power for the Canterbury and York Convocations to sit together if desired), together with a representative body or bodies of the laity. **General Secretary,** Alfred Holdsworth, Esq. **Office,** Church House, Dean's Yard, Westminster.

**Cinque Ports, The.** A group of seven ports (originally five, whence the name) situated on the south coast of England (in Sussex and Kent). **Hastings, Romney, Hythe, Dover and Sandwich** were the original ports, **Winchelsea and Rye** being added afterwards. The original Cinque Ports were created by William the Conqueror, and were endowed with various important privileges in consideration of their furnishing a certain quota of ships of war, for the king's use, when demanded. The **Lord Wardenship** is now only an honorary dignity. Its holders have no special jurisdiction. The **Marquis of Salisbury** is the present Lord Warden, and was installed in his office Aug. 15th, '96.

**City and Guilds of London Institute** for the advancement of technical education. This Institute was established to promote the applications of science and art to productive industry. The Institute consists of a Board of Governors, a Council, and an Executive Committee. The total income amounts to about £35,000 a year. The operations of the Institute are divided under the following heads:—(1) **The City and Guilds' Central Technical College** at South Kensington, the object of which is to give London a college for higher technical education in which advanced instruction is provided in those kinds of knowledge which bear upon the different branches of industry; the main purpose of the instruction given is to qualify students to become mechanical, civil, electrical and chemical engineers, technical teachers, principals, superintendents, and managers of chemical and other manufacturing works. It was built and equipped at a cost of over £100,000, and was opened in '84. (2) **The City and Guilds' Technical College, Finsbury**, is an intermediate college, with which has been incorporated the provisional classes started in the Cowper Street Schools in '79, the Artisans' Institute, and the City School of Art. The college includes day classes for those who are able to devote two or three years to systematic technical education, and evening classes for those who are engaged in industrial or commercial occupations in the daytime, and who desire to receive supplementary technical instruction in the evening. It fulfils therefore the functions of a finishing technical school for those entering industrial life at a comparatively early age; of a supplementary school for those who are already engaged in workshops; and of a preparatory school for the City and Guilds' Central Technical College. It was opened in '83, the building and equipment having cost about £40,000. (3) **The South London School of Technical Art, Kennington Park Road**, provides instruction in the following subjects: modelling, drawing and painting from the life, and house decoration, (4) **The Leather Trades' School**, in Bethnal Green Road, is entirely an evening school for apprentices and others engaged in boot and shoe manufacture. The school is conducted by a joint committee of the Institute, the Leathersellers' and Cordwainers' Companies, and the Boot and Shoe Manufacturers' Association. (5) **Technological Examinations**, the objects of which are to encourage the formation of technical classes throughout the country, and, by the publication of carefully prepared syllabuses for the guidance of the committees and teachers of these classes, to place the teaching on a sound educational basis. The examina-

tions are held during the month of May in over sixty different subjects. (6) **Grants** in aid of other institutions. The Institute co-operates with the London School Board on the joint committee on Manual Training, which was formed for the purpose of introducing manual training, both for boys and girls, into elementary schools in the Metropolis. **President**, H.R.H. the Prince of Wales; **Chairman of Council**, The Right Hon. the Earl of Halsbury, Lord Chancellor; **Chairman of the Executive Committee**, Sir F. Abel, Bart., K.C.B., F.R.S.; **Treasurer**, E. L. Beckwith, Esq.; **Hon. Sec.**, Mr. John Watney; **Assist. Sec.**, Mr. A. L. Soper. **Head Office**, Gresham College.

**City Churches Preservation Society, The**, founded in 1894, has been instrumental in saving St. Mildred's, Bread Street, E.C., and St. Mary Woolnoth, from demolition. The Society considers that to destroy any of the beautiful City churches would be unnecessary, and an act of vandalism. **Chairman**, Mr. H. C. Richards, Q.C., M.P.; **Hon. Sec.**, Mr. Alfred Moore, 7, Leadenhall Street, E.C.

**City Companies.** See LONDON, LIVERY COMPANIES OF.

**City of London College.** This institution (known as the Metropolitan Evening Classes at Crosby Hall) was founded in 1848 by the Rev. Charles Mackenzie, M.A., and was constituted the City of London College in '60. The building in White Street, Moorfields, was erected at a cost of £16,000 (in '83). It is now a constituent Institute of the "City Polytechnic." Evening classes are held in the various branches of science, literature, art, and commerce. There are large and commodious chemical and biological laboratories, also Art studios, to meet the requirements of the students. There are also a good library and a spacious reading-room. **Principal**, Rev. Prebendary Whittington, M.A.; **Secretary**, Mr. D. Savage.

**City of London Police.** See POLICE.

**City of London School, Thames Embankment.** Established by the Corporation of London in 1834. Tenable at the Universities or other places of higher education are 26 **scholarships** varying from £80 to £200; and about 20 others tenable at the school. Pupils admitted between the ages of 7 and 15. **Head Master**, Mr. A. T. Pollard, M.A. Its distinguished alumni include: the late Sir J. R. Seeley, K.C.M.G., the Rt. Hon. H. H. Asquith, M.P., Sir Andrew Scoble, Sir George Newnes, the Rt. Hon. C. T. Ritchie, M.P., Dr. Huggins, Rev. E. A. Abbott, D.D., W. S. Aldis, J. S. Reid, D.Lit., D.Sc. **Secretary**, Mr. A. J. Austin.

**Civil List, The**, is the annual grant of Parliament to the monarch, the yearly sum now being £385,000, the whole of which is devoted to Her Majesty's household and personal expenses, with the exception of £1200, which may be granted in pensions. The grant originated in the reign of William and Mary, and covered the payment of civil offices and pensions, when the amount was £700,000 (£400,000 being derived from the Crown revenues and £300,000 from excise duties). Since this resulted in debt on the part of the king, the Court of Exchequer decided that, if he chose, the king could alienate his whole revenue. The List, after having reached £800,000,

and in 1777 (George II.) £900,000, was, on the accession of William IV., cleared of all salaries, etc., upon it, and placed at £510,000, including a pension list of £75,000. The purposes to which the pensions were applied were, in 1834, limited to the deserving and needy; and in 1838, the year of Queen Victoria's coronation, it was provided that, in place of a grant of £75,000 for civil list pensions, "Her Majesty should be empowered to grant in every year new pensions on the civil list to the amount of £1200, all such pensions to be in strict conformity with the House of Commons' resolutions of 18th February, 1834" (1 Vict., c. 2).

**Civil Service.** One of the oldest institutions of the country, and probably dates from the earliest monarchical times. It is only within perhaps the last hundred years that the English Civil Service has assumed its present vast proportions. The Civil Service comprises all persons who serve the Queen in a civil capacity, as opposed to those employed in the military and naval services. The total number of persons so employed cannot be far short of half a million. The chief department of the Civil Service is the **Treasury**, which exercises a control over all other departments, and from whom alone authority is obtained for all expenditure. Perhaps next in importance is the **Exchequer and Audit Department**, which is charged with the audit of the accounts of all other departments, and is required to see that the expenditure of each is in accordance with the authorities received from the Treasury. The **Foreign Office** (including the diplomatic service), the **India Office** and the **Colonial Office**, together with the **Home Office**, probably rank next amongst the numerous departments of the Home Civil Service. The three revenue departments—namely, the **Post Office**, **Inland Revenue**, and **Customs**—are of course important branches of the service; there are also, amongst what are known as the spending departments, the **War Office**, **Admiralty**, **Board of Trade**, **Office of Works**, **Education Office**, **Privy Council Office**, the **Stationery Office**, and many other smaller offices.—Most of the clerkships in the Civil Service are now thrown open to public competition, and the various offices are grouped into two grades. The recommendation of the **Playfair Commission** which sat in 1874 to inquire into the Civil Service—namely, that the Service should be divided into a **Higher** and a **Lower Division**, with a specified scale of salaries irrespective of office for each division—has never been fully carried out. Most of the better-class offices are grouped under Grade I., and the remainder under what was formerly known as Grade II.; in these latter, however, most of the vacancies are being filled up by the appointment of Lower Division clerks under the Playfair scheme. Full particulars of all examinations for the Civil Services, and of the situations to be competed for, can always be obtained on application to the **Civil Service Commission**, at Cannon Row, S.W. (Annual report is published by Eyre & Spottiswoode.) For details see **FINANCE, NATIONAL**; see also **INDIAN CIVIL SERVICE**.

**Clarke, Sir Edward, M.P.** See under **COMMONS**.

**Clemens, Samuel Langhorne** (better known as "Mark Twain"), was b. at Florida, Mo., U.S., 1835; was apprenticed in his youth to a printer, and subsequently served as a pilot on the

Mississippi (he adopted his *nom de plume* from the cry of the leadsmen when his line "marked" two fathoms of water; the term varies with the depth, but for two fathoms it is "mark twain"). Afterwards obtained an appointment as reporter on a paper in California, whence, after some years' service, he removed to edit a paper at Buffalo. He is undoubtedly the most original and popular of the American humorists; his **best known works** are "The Jumping Frog," "The Innocents Abroad," "The Gilded Age," "Roughing It," "Adventures of Tom Sawyer," "Life on the Mississippi," "The Stolen White Elephant," "Adventures of Huckleberry Finn," "A Yankee at the Court of King Arthur," "The American Claimant," "Tom Sawyer Abroad" ('94), and "Joan of Arc" ('96).

**Clergy, Deceased (Dec. '97—Nov. '98).** See **OBITUARY**.

**Clerk of the Parliaments.** See **PARLIAMENTS, CLERK OF THE**.

**Clifford, Rev. John, M.A., LL.B., B.Sc., F.G.S., D.D.,** ex-President of the Baptist Union, President of the National Council of Free Evangelical Churches '98, was b. Oct. 16th, 1836, at Sawley. In Feb. '93, during the course of a lecture, he stated that when a boy of eleven he was a "threader" in a lace factory, and had often worked from 4 a.m. on the Friday till 6 p.m. on the Saturday. In '55 he entered the General Baptist College. After his third year at the College he accepted an invitation from the Praed Street church, Paddington. He graduated B.A. at London University in '61, B.Sc. with honours in Logic and Philosophy, and in Geology in '62, in '64 taking the degree of M.A. (bracketed first); and in '66 that of LL.B. with honours in the Principles of Legislation. The honorary degree of D.D. was conferred on him in '83 by Bates' University, U.S.A. His growing success at Praed Street led to the erection of **Westbourne Park Chapel**, which was opened Sept. '77, and in which he still continues to minister. He visited Australia and the States during '97. His **works** include the following: "Is Life worth Living?" "The Dawn of Manhood," "Daily Strength for Daily Living," "Christian Certainties," "The Inspiration and Authority of the Bible," and "Typical Christian Leaders." Address: 50, St. Quintin Avenue, North Kensington.

**Clifton College, Bristol.** Opened 1862, received charter '77. It is under a Council of fifteen, the Earl of Ducie being President. It has classical, modern, and military sides, and Junior and Preparatory Schools; and prepares pupils specially for Woolwich, Sandhurst, and Cooper's Hill, also for the Royal Navy. Three exhibitions, of £25, which may be increased to £50 a year, tenable at the Universities, and at least eleven scholarships, varying in value from £25 to £80 and admitting of augmentation to £100 a year, tenable at the College, offered annually. Pupils, 600. **Head Master**, Rev. Michael George Glazebrook, M.A. **Secretary**, W. D. L. Macpherson. **Motto**, *Spiritus intus alit*.

**Closure.** See **PARLIAMENTARY PROCEDURE**.

**Clubs for Ladies.** See the Alexandra, the Denison, the Somerville, the University, the Pioneer and other Clubs in the list of **CLUBS**.

**Coal.** For a commercial review of the industry during the year see **TRADE**, '98, and for a general and statistical article on the subject see **MINING**.

**Coburg.** Duke of Saxe-Coburg, late Duke of Edinburgh. See **SAXE-COBURG**.

**Cochin-China.** Lower or French Cochin-China consists of a portion of the old Annamese province of Champa, and comprises the whole of the Mekong delta, but comprehends little or none of Cochin-China proper. **Area**, 23,082 sq. m.; **pop.** 2,034,453. **Capital**, Saigon. The country is divided into 21 districts, each administered separately by a French officer, and is represented by one deputy at Paris. The French population numbers about 5000, and there is an army of occupation of 1830 French troops, besides about 3000 Annamese soldiers. Successful attempts have been made to develop the colony. The chief product is rice, but cotton, pepper, and copra are also exported. See **ANNAM**, **COLONIES**, **ETC.**, OF **EUROPEAN POWERS**, and **INDO-CHINA**.

**Cocos (or Keeling) Islands.** A dependency of the Straits Settlements (*q.v.*).

**Colombia.** A republic of Central America, formed by the union in 1861 of nine states as the "United States of New Granada," which in '63 became the "United States of Colombia." After the termination of the revolution, which prostrated the country in '84-5, a new constitution was promulgated in Aug. '86 by the National Council of Bogota. By this constitution the independence of the nine States was abolished, a central authority was set up, and the country was styled the "Republic of Colombia." The nine States are now simple departments, their presidents being reduced to governors under the direct nomination of the President of the Republic, whose term of office is six years. The Senate, as before, consists of 27 members, 3 from each department, and the House of Representatives of 66 members, elected by universal suffrage, each department forming a constituency and returning one member for 50,000 inhabitants. Industries are chiefly confined to agriculture and the rearing of cattle. The great attraction of Colombia is its mineral wealth. Rich mines of gold, silver, iron, copper, lead, etc., and precious stones exist in the country. **Area**, 513,845 sq. miles;

population about 4,500,000. Capital, *Bogota*. Estimated revenue, '97-8, £1,374,440; expenditure, £1,430,840; foreign debt, with several years' accumulated interest, about £2,700,000, chiefly due to English creditors; imports, '97, £3,335,848; exports, £3,600,000. See *DIPLOMATIC*.

**Colonial College, The**, is situated at *Hollesley Bay*, on the coast of *Suffolk*, and the instruction of the pupils is admirably adapted to its object—the training of youths for colonial life. Pupils are received from the public schools, etc., and turned into practical, handy men, able to use their eyes and hands as well as their brains. There is a large farm, covering 1800 acres, of arable, pasture, and wood land, with a dairy of fifty cows, as well as fruit, vegetable, and nursery gardens. The scientific teaching is under the charge of professors in each of the various departments, from veterinary science to surveying and other branches of instruction. Since '87 over five hundred students have passed through the College. The *College Magazine*, *Colonia*, published three times a year, contains valuable and impartial information concerning the Colonies, supplied by the old students of the College.

### COLONIAL CONFERENCE, THE, '97.

Advantage was taken of the presence of the Premiers of the self-governing colonies in London during the months of June and July '97, whither they had been invited to take part in the Jubilee celebrations, to hold a conference at which they and the Right Hon. Joseph Chamberlain, Secretary of State for the Colonies, were present. On Thursday, June 24th, '97, the Prime Ministers of Canada, New South Wales, Victoria, New Zealand, Queensland, Cape Colony, South Australia, Newfoundland, Tasmania, Western Australia, and Natal assembled at the Colonial Office, Downing Street. The commercial relations of the United Kingdom and the self-governing colonies were first considered, and the following resolutions were unanimously adopted:—

1. That the Premiers of the self-governing colonies unanimously and earnestly recommend the denunciation, at the earliest convenient time, of any treaties which now hamper the commercial relations between Great Britain and her colonies.

2. That in the hope of improving the trade relations between the mother country and the colonies, the Premiers present undertake to confer with their colleagues with a view to seeing whether such a result can be properly secured by a preference given by the colonies to the products of the United Kingdom.

H.M. Government promptly and formally notified to the governments concerned their wish to terminate on July 30th, '98, the commercial treaties with Germany and Belgium, which were a bar to the establishment of preferential tariff relations between the mother country and the colonies. Those treaties were accordingly terminated on the date named.

On the question of the political relations between the mother country and the self-governing colonies, the following resolutions were adopted:—

1. That the present political relations between the United Kingdom and the self-governing colonies are generally satisfactory under the existing condition of things.

2. That it is desirable, whenever and

wherever practicable, to group together under a federal union those colonies which are geographically united.

3. That it would be desirable to hold periodical conferences of representatives of the colonies and Great Britain for the discussion of matters of common interest.

Mr. Seddon and Sir E. N. C. Braddon dissented from the first resolution because they were of opinion that the time had already come when an effort should be made to render more formal the political ties between the United Kingdom and the colonies. The majority of the Premiers were not yet prepared to adopt this position; but there was a strong feeling amongst some of them that, with the rapid growth of population in the colonies, the present relations could not continue indefinitely, and that some means would have to be devised for giving the colonies a voice in the control and direction of those questions of Imperial interest in which they are concerned equally with the mother country. It was recognised at the same time that such a share in the direction of Imperial policy would involve a proportionate contribution in aid of Imperial expenditure, for which, at present at any rate, the colonies generally are not prepared.

As to Imperial defence, the most important matter was the offer by Cape Colony unconditionally of a first-class battleship. The suggestion made for an occasional interchange of military units between the mother country and the colonies was generally recognised as one likely to prove useful in increasing the efficiency of the colonial forces. On behalf of the War Office the Conference was informed that, with a view to securing uniformity in the arms and ammunition used by the military forces throughout the Empire, the Secretary of State for War was prepared to make an offer for the exchange (or conversion) of the Martini-Henry rifles at present in use for rifles of the smaller calibre now exclusively adopted by the Navy and Army. On the question of the legislative measures which have been passed by various colonies for the exclusion of coloured immigrants, a full exchange of views took place, and though no definite agreement was reached at the meeting it appeared to be possible that the natural desire of the colonies to protect themselves against an overwhelming influx of Asiatics can be attained without placing a stigma upon any of H.M. subjects on the sole ground of race or colour. With regard to postal communications, it appeared that in the present financial circumstances of the colonies an Imperial penny post was impracticable, although the Prime Ministers of the Cape Colony and Natal declared themselves in favour of such a step, and expressed their belief that the Legislatures of their colonies would be prepared to give effect to it. At the last meeting of the Conference the following resolutions were passed unanimously:—

Those assembled are of the opinion that the time has arrived when all restriction which prevents investment of trust funds in colonial stock should be removed.

The Premiers, before they separate, beg to put on record their appreciation of the many courtesies which they have received at the hands of Mr. Chamberlain personally, and of the kind treatment which has been extended to them by the Government and people of the United Kingdom.

**Colonial Institute.** See ROYAL COLONIAL INSTITUTE.

**Colonial Office.** The authority of the Crown throughout our colonial dependencies is exercised by the **Colonial Secretary**, now the Rt. Hon. Joseph Chamberlain, M.P., who took office in Lord Salisbury's Government in July '95. Governors of colonies are nominated to the Crown by him; the enactments of all colonial legislatures come before him, for approval or disallowance (a pure formality in most cases, although in some cases—*e.g.*, the Copyright question in Canada—the veto has been exercised); and in his office the constitution of new colonial legislatures is planned. The direct executive action of the department is mainly confined to Crown colonies, protectorates, etc. (for a full list of which see **BRITISH EMPIRE**, table). An **Emigrants' Information**

**Office** (*q.v.*) is attached to the department. Crown colonies are represented in London by Crown Agents, and colonies having responsible governments by Agents-General. The names of the Crown Agents and a list of the colonies on whose behalf they act and whom they represent, will be found under the heading "Colonies" in the **DIPLOMATIC** article. The names and offices of the various Agents-General will also be found in the same article under the alphabetical headings of the various colonies which they represent. The **British Settlements Act '87** enables Her Majesty in Council to provide for the government of her possessions acquired by settlement, and by Order in Council to establish all such laws and institutions, and constitute such courts and officers, and make such provisions and regulations for the administration of justice as may appear to be necessary.

\* Negotiations as to the ownership of these islands were proceeding between the Spanish and American Peace Commissioners at the time of going to press. The cession of the Philippines was demanded by America.

**Commercial Intelligence Office.** See GREAT BRITAIN AND HER FOREIGN TRADE.

or temporary service. **Office,** 419, Strand, W.C.

**Commissionaires, Corps of.** The members of this institution, which was founded in 1859 by Captain Sir E. Walter, K.C.B., are retired soldiers and sailors of Her Majesty's regular forces. At first the Corps was composed of wounded men who had served in the Crimea and Indian mutiny; but very shortly the demand for the services of Commissionaires led to an increase in the number, which has been steadily maintained, and now exceeds 2300. There are divisions in Belfast, Birmingham, Edinburgh, Glasgow, Leeds, Liverpool, Manchester, Newcastle-on-Tyne, Nottingham, and Cardiff, all being subject to the same discipline and regulations. The men are employed in every capacity where high qualifications are required, and thus may be engaged for permanent

**COMMONS, HOUSE OF.**

With certain exceptions any male of full age may be elected to represent a constituency in the House of Commons. English and Scotch peers are entirely disqualified, but Irish peers may be returned for any constituency in Great Britain. All English, Scotch, and Irish judges; clergymen of the Established Church of either of the two kingdoms; Roman Catholic priests; the holders of various offices specially excluded by statute—including revenue officers—persons who have been convicted of certain offences, aliens who have been naturalised (except in special cases where exceptions are made), imbeciles, Government contractors (except contractors for Government loans), and sheriffs and returning officers within the

constituencies for which they act, all these are disqualified. No candidate requires any property qualification, and no member receives any payment or allowance whatsoever from the country for his service in the House or on any committee thereof. The Speaker (*q.v.*) is the first to take the oath and subscribe the roll in a new House of Commons, and is followed by the other members, who come to the table without any ceremony, and are presented to him by the clerk. Members returned after a general election are introduced by two other members. The form of oath taken is as follows: "I, ———, do swear that I will be faithful and bear true allegiance to her Majesty Queen Victoria, her heirs and successors, according to law. So help me God." Quakers, Moravians, Separatists, and others are permitted to make an affirmation to the same effect as the oath; and by 51 & 52 Vict., ch. 46, every person upon objecting to being sworn, and stating, as the ground of such objection, either that he has no religious belief, or that the taking of an oath is contrary to his religious belief, shall be permitted to make an affirmation instead of taking an oath in all places and for all purposes where an oath is and shall be required by law. Succession to a peerage of England, or of Great Britain, or of the United Kingdom, disables the person so succeeding from being elected to, or from sitting or voting in, the Commons. A seat in the House is vacated by death, or on acceptance of any office of profit under the Crown; and there are also certain disabilities attached to bankruptcy. All the principal members of the Government, on accepting office, vacate their seats, and are eligible for re-election; but the vacating rule does not apply to such offices as Secretary to the Treasury or other similar appointments which are not held direct from the Crown. A change from one office held

direct from Crown to another does not involve going again to the constituency. In theory a member cannot resign, but he can accept the office of honour or profit under the Crown of the stewardship of the Chiltern Hundreds, or of the manors of Northstead, which is granted to him by the Chancellor of the Exchequer, and resigned immediately its purpose is served. When a seat becomes vacant during a session, a new writ is moved for at the commencement of an ordinary sitting, generally by one of the whips of the party to which the late member belonged. Provision is also made for the issue of writs during the recess without the intervention of the House, it being enacted that the Speaker may, on the production of a certificate signed by two members that a member has died, or accepted an office held direct from the Crown, or has been called to the House of Lords, or that the seat has become vacant by the bankruptcy of a member, order a writ to be issued for a fresh election to fill the vacancy thus caused. But a writ may not be issued during the recess on the acceptance of the Chiltern Hundreds or of the like offices. The Lunacy (Vacating of Seats) Act, 1886, provides a procedure by which the seat of any member who may have been received into a lunatic asylum shall be declared vacant.

The Act of Union with Ireland increased the number of members of the House of Commons to 658, and though it stood nominally at this figure until the end of the Parliament of '80-85, the disfranchisement of 4 constituencies returning 6 members, and the suspension of 12 writs in 7 cities and boroughs, had reduced the total of members to 640. The Redistribution Act did not alter the apportionment of members to Ireland or Wales, but increased the number returnable by Scotland from 60 to 72, and these 12 new seats being added to the nominal number of the House brought it up to 670.

COUNTRY.	Population 1891.	Electors 1898.	M.P.s (actual).	M.P.s (by pop.)	M.P.s (by electors).
England . . . . .	27,482,104	4,854,400	465	488	498
Wales . . . . .	1,518,924	289,822	30	27	30
Scotland . . . . .	4,033,103	664,095	72	72	68
Ireland . . . . .	4,706,162	720,312	103	83	74
United Kingdom . . . . .	37,740,283	6,528,629	670	670	670

From these figures it may be easily seen that if the 670 seats were proportionately redistributed (1) according to population in '91, England would gain 23 seats, Wales would lose 3, Scotland's representation would remain the same, while Ireland would lose 20 seats; and that (2) according to numbers of electors England would still gain, in fact she would be even better represented if the seats were allotted on this basis, as she would be entitled to 33 more; Wales would neither gain nor lose; Scotland would lose 4 seats and Ireland 29. The calculations include the University representation. A word as to the parts of the House which the different sections of members occupy may be added here. The benches are fixed in two long rows, extending on either side from the chair to the bar, and each row is divided midway by a narrow passage known as the gangway. The front bench to the right of the chair and above the gangway is the **Treasury Bench**, and upon it sit

the leader of the House and as many of his Ministerial colleagues as can find accommodation there. The other benches on the Ministerial side are occupied by supporters of the Government, Conservatives and Liberal Unionists, also. In the last Parliament but one ('86-92) the Liberal Unionists sat on the Opposition benches, which are to the left of the chair, with the Liberal members; on the change of Ministry in '92 they crossed the floor with the Liberals, two benches below the gangway being by arrangement set apart for their use. From '80 the Nationalists have always sat in opposition; they retained their places on this side when the Liberals took office in '92. Thus, during the Home Rule debates of '93, the Nationalists who supported the Government sat on the Opposition side, while the Liberal Unionists, who opposed, spoke from the Ministerial side. By ancient custom the two members for the City of London sit on the **Treasury Bench** on the first day of the meeting of a new

Parliament. The legislative duties of Ministers are familiar to most readers, but a word or two concerning some of them may be said here. If the Secretary for War and the First Lord of the Admiralty are peers, the Financial Secretary to the War Office generally, and the Secretary to the Admiralty, have charge of the Estimates. The Education Estimates for England and Wales are introduced by the Vice-President. A goodly number of the Civil Service Estimates are in charge of that hardly-worked official, the Financial Secretary to the Treasury; and he is bound to be well up in a large mass of detail, not only as regards them, but other Parliamentary matters, for he arranges the course of Government business in the House of Commons. The Patronage Secretary as principal Ministerial whip endeavours to secure a good attendance of members of his own side when Government business is being transacted, issuing on important occasions summonses, which are also called whips, and which, according to the urgency of the case, are emphasised by three, four, or five underlines. He is aided in his important party duties by the Junior Lords of the Treasury and the holders of subordinate Household appointments, or some of them; and with their assistance, too, he tells for the Government in divisions (*q.v.*). See PARLIAMENT AND PARLIAMENTARY PROCEDURE, SPEAKER, ELECTION, etc.

### 1. Alphabetical and Biographical List of Members.

(Revised to Nov. '98.)

The following is a list of members of the House corrected to Nov. '98. The names of those returned at the General Election of '95 who have since, for any reason, ceased to be members will be found alphabetically arranged at the end of this list. A prefixed \* denotes that the member was in the last Parliament.

A list of the pollings in the various constituencies will be found on pp. 159-170; and on p. 171 there is given a summary showing the state of parties at successive periods down to Nov. '98. See also POLITICAL PARTIES (UNITED KINGDOM), and SESSION, PARLIAMENTARY, '98.

\***Abraham, W. (L.)**, elected for Glamorganshire, Rhondda D., '95; sat for same constit. '85-95; s. of the late Mr. T. Abraham, collier and copper smelter; *b.* '42; *E.* Cwmavon village school; miners' agent '73; Vice-President of the Monmouth and South Wales Mining Association; J.P. for Glamorganshire; member of the Royal Commission on Labour and Mining Royalties; a Welsh Bard under title of "Mabon." 8, Suffolk Street, S.W.

\***Abraham, W. (N.)**, elected for Cork, North-East, '95; sat for same constit. '93-5, and co. Limerick, West, '85; *b.* '40; took an active part in the Land League, and in '81 was imprisoned as a suspect; Chairman of the Limerick Board of Guardians '82-6; a Protestant (Congregationalist). 7, Cheverton Road, N.

**Acland, Right Hon. A. H. Dyke (L.)**, elected for Yorkshire, West Riding (Rotherham D.) '95, represented same constituency '85-'87, '87-'92; is 2nd s. of the late Right Hon. Sir Thomas Dyke Acland, Bart.; *b.* '47; *E.* Rugby and Christ Church, Oxford, and is a Fellow of Balliol College; Vice-President of

the Committee of Council on Education '92-5; P.C. '92; Author of a Handbook on English Political History and of "Working Men Co-operators." Westholme, Scarborough; 28, Cheyne Walk, S.W. *Reform, Athenæum, Cobden.*

\***Acland-Hood, Captain Sir A. F., Bart. (C.)**, elected for Somerset, Wellington D., '95; sat for same constit. '92-5; *e. s.* of the late Sir A. B. F. Fuller-Acland-Hood; *b.* '53; *E.* Eton, Balliol College, Oxford, and Royal Military College, Sandhurst; entered the army '75; served in the 1st Dragoon Guards and Grenadier Guards; Egyptian Campaign '82; aide-de-camp to the Governor of Victoria '89-'91; J.P., D.L., and C.C. for Somerset. St. Audries, Bridgwater.

\***Aird, J. (C.)**, elected for Paddington, North, '95; sat for same constit. '87-95; s. of Mr. J. Aird, contractor, and member of the firm of Lucas & Aird, and John Aird & Sons; *b.* '33; H.M. Lieutenant for City of London; Lieutenant-Colonel Engineers and Railway Volunteer Staff Corps. 14, Hyde Park Terrace, W.

\***Akers-Douglas, Right Hon. A. (C.)**, elected for Kent, St. Augustine's D., '95; sat for Kent, East, '80-85, St. Augustine's D. '85-95; s. of the late Rev. A. Akers, of Malling Abbey, Kent; *b.* '51; *E.* Eton and University College, Oxford; Inner Temple '75; assumed name of Douglas '75; Patronage Secretary of Treasury '85, '86-92; First Commissioner of Works '95; P.C. '91; J.P. and D.L. for Kent and Dumfries, and J.P. for Edinburgh. Chilton Park, Maidstone, and 106, Mount Street, W. *Carlton and Junior Carlton.*

\***Allan, W. (L.)**, elected for Gateshead '95; sat for same constit. '93-5; *b.* '37 in Dundee; marine engine-builder; served as engineer in R.N. and merchant service; was blockade running and imprisoned in the Old Capitol Prison during the American Civil War, but liberated at the intervention of the British Minister; Manager of the North-Eastern Engineering Works on the Tyne and Wear; founder of the Scotia Engine Works, Sunderland; inventor of several engineering improvements; author of several volumes of poems, notably "A Book of Songs," "A Book of Poems," and, lately, "Gordon; or, the Rose of Methlic." J.P., D.L., co. Durham. *National Liberal, Caledonian.*

\***Allen, W. (L.)**, elected for Newcastle-under-Lyme '95; sat for same constit. '92-5; *e. s.* of Mr. W. S. Allen, M.P. Newcastle-under-Lyme '65-86; *b.* '70; *E.* at Rydal Mount School and Emmanuel College, Camb. Woodhead Hall, Cheadle, Staffordshire, and 71, Carlisle Mansions, S.W.

**Allhusen, A. Henry Eden (C.)**, elected for Salisbury Jan. '97; *b.* '67; is s. of the late H. C. Allhusen, and J.P., D.L., of Stoke Court, Bucks (formerly owner of Newcastle Chemical Works); *g. s.* of the late C. Allhusen, Lieutenant Bucks Yeomanry; J.P., D.L. for Bucks; *m.* '96 Dorothy Stanley, *d.* of Lady Jeune and her first husband the Hon. J. C. Stanley. Stoke Court, Stoke Poges, Bucks.

\***Allison, R. A. (L.)**, elected for Cumberland, North, '95; sat for same constit. '85-95; *e. s.* of the late Mr. J. Allison, of Carlisle; *b.* '38; *E.* Rugby and Trinity College, Camb.; J.P. and D.L. for Cumberland; Director of the Midland Railway. Scaleby Hall, Cumberland, and Queen Anne's Mansions, S.W. *New University.*

- \***Allsopp**, Hon. Geo. H. (C.), elected for Worcester '95; sat for same constit. '85-95; 3rd s. of the first Lord Hindlip; *b.* '46; *E.* Eton and Trinity College, Camb. (M.A. '71); J.P. and D.L. for Derbyshire and Staffordshire; twice Mayor of Burton and once Chairman of the Burton School Board; *m.* '95 Lady Mildred Georgiana Ashley, *d.* of the 8th E. of Shaftesbury, and has a daughter, Winifred Violet, *b.* May 6th, '96. 8, Hereford Gardens, Park Lane, W. *Turf, Carlton, Junior Carlton, and Arthur.*
- \***Ambrose**, Dr. R. (N.), elected for Mayo, West, '95; sat for same constit. '93-5; *b.* '56; *E.* Queen's College, Cork, and Edinburgh University (L.R.C.P. and L.R.C.S.); B.A. Queen's University, Ireland; for past ten years has been practising in London; cousin of Dr. D. Ambrose, M.P. for South Louth. 1, Mount Place, E.
- \***Ambrose**, W. (C.), elected for Middlesex, Harrow D., '95; sat for same constit. '85-95; s. of the late Mr. Richard Ambrose, of Chester; *b.* '32; called to the Bar, Lincoln's Inn, '59; Middle Temple '69; Q.C. '74; Benchers of Middle Temple '81; member of the Council of Legal Education; County Alderman for Middlesex; appointed Att.-Gen. Duchy of Lancaster '95; also Queen's Attorney and Serjeant within the County Palatine of Lancaster. Westover, West Heath, Hampstead, and 3, Plowden Buildings, E.C. *Carlton and St. Stephen's.*
- \***Anstruther**, H. T. (L.U.), elected for St. Andrews Burghs '95; sat for same constit. '86-95; 2nd s. of the late Colonel Sir R. Anstruther, Bart., M.P.; *b.* '60; *E.* Eton and Edinburgh University; called to the Scotch Bar '85; formerly Lieutenant Fife Light Horse Volunteers; principal L. U. Whip; appointed a Lord of the Treasury and second Whip in the Salisbury Administration '95. 6, Chester Street, S.W.
- \***Arch**, J. (L.), elected for Norfolk, North-West, '95; sat for same constit. '85-6 and '92-5; s. of Mr. J. Arch, agricultural labourer, Barford, Warwickshire; *b.* '26; received little education, having to work as a child in the fields; but after marriage educated himself at his wife's instigation, and joined the Primitive Methodist body as a local preacher; led agricultural agitation in Warwickshire '72; founder and President of the National Agricultural Labourers' Union.
- Archdale**, Edward M. (C.), elected for Fermanagh, North D. '98; s. of the late Mr. Nicholas Archdale, of Crocknacrieve, co. Fermanagh; *b.* '53; *E.* Naval School at Portsmouth, whence he entered the Royal Navy as a cadet in '66; midshipman '68, Sub-Lieut. '72, Lieut. '75, retired '80. He has served on the China, Mediterranean, Cape, and West Coast of Africa stations, at which last he held the position of first Lieut. of the *Dwarf*, a double-screw composite gun-vessel carrying four guns; J.P., D.L. co. Fermanagh, for which county he served the office of High Sheriff in '84. Riversdale, Ballinamallard, co. Fermanagh.
- Arnold**, Alfred (C.), elected for Halifax '95; y. s. of the late Rev. Frederick Arnold, rector of Brimington, Derbyshire; *b.* '35; *E.* Sidney Sussex College, Camb.; called to the Bar, Inner Temple, '78, joining Northern Circuit; J.P. for West Riding, Yorks. Clare Hall, Halifax. *Carlton and Junior Constitutional.*
- \***Arnold-Forster**, H. O. (L.U.), elected for Belfast, West, '95; sat for same constit. '93-5; 2nd s. of the late Mr. W. D. Arnold, Director of Public Instruction in the Punjab, and adopted son of the late Right Hon. W. E. Forster; *b.* '55; *E.* Rugby and University College, Oxford (B.A. 1st class in History); Lincoln's Inn '79; North-Eastern Circuit; Director of Cassell & Co., Ltd. 9, Evelyn Gardens, S.W.
- Arrol**, Sir W. (L.U.), elected for Ayrshire, South, '95; s. of Mr. Thomas Arrol, of Glasgow; *b.* '39; when only eight years old was a piercer in a cotton mill; afterwards apprenticed as a blacksmith; now partner in the firm of William Arrol & Co., contractors and engineers, the contractors of the new Tay Bridge and Forth Bridge; created a knight at the opening of the latter '90; J.P. for Ayrshire, and Hon. LL.D. Glasgow. Dennistoun, Glasgow, and Seafield, Ayr.
- Ascroft**, R. (C.), elected for Oldham '95; s. of Mr. William Ascroft, solicitor; admitted a Solicitor in '69; is a member of the firm of R. and J. Ascroft & Maw, a Perpetual Commissioner, and President of the Oldham Law Association. Sedgley Hall, Prestwich, and Oldham.
- \***Asher**, A. (L.), elected for Elgin Burghs '95; sat for same constit. '81-95; 2nd s. of the late Rev. W. Asher, D.D., Inveravon, Banffshire; *b.* '35; *E.* Elgin Academy and Aberdeen and Edinburgh Universities; called to the Scotch Bar '61; Advocate Depute '69-74; Q.C. '81; Solicitor-General for Scotland '81-5, '86, and Aug. '92—March '94; D.L. for Edinburgh City and County; LL.D. for Aberdeen and Edinburgh Universities; Dean of the Faculty of Advocates of Scotland '95. Heriot Row, Edinburgh. *Brooks's, Reform, and Devonshire.*
- \***Ashmead-Bartlett**, Sir E. (C.), elected for Sheffield, Ecclesall D., '95; sat for Eye '80-85, and Ecclesall '85-95; e. s. of the late Mr. Ellis Bartlett, of Plymouth, New England; *b.* '49; *E.* Torquay and Christ Church, Oxford (B.A. 1st class Final Schools '72, M.A. '76); called to the Bar, Inner Temple, '77; formerly in the Privy Council Office; Civil Lord of the Admiralty '85 and '86-92. 22A, St. James Street, S.W. *Carlton, Wellington, and St. Stephen's.*
- Ashton**, T. G. (L.), elected for Bedfordshire, South, or Luton D., '95; sat for Cheshire, Hyde D., '85-6; e. s. of the late Mr. Thomas Ashton, J.P., D.L., of Hyde, and Ford Bank, Lancs.; *b.* '55; *E.* Rugby and University College, Oxford (M.A. '82); J.P. for Lancashire and Cheshire. Ford Bank, Lancashire, and Hyde, Cheshire. *Brooks's, Reform, and New University.*
- \***Asquith**, Right Hon. H. H. (L.), elected for Fife, East, '95; sat for same constit. '86-95; *b.* '52; *E.* City of London School and Balliol College, Oxford, where he graduated B.A. '74, 1st class Classics, Craven University Scholar, and Fellow of Balliol; called to the bar, Lincoln's Inn, '76. His maiden speech in Parliament attracted much attention, and has been followed by successes on the public platform and at the Bar. He was engaged with Sir C. Russell on behalf of Mr. Parnell at the **Parnell Commission**. Q.C. '90. He appeared also in the "Baccarat" trial, '91. The honour of moving the amendment to the Queen's Speech, on

which the division that displaced Lord Salisbury's Government in Aug. '92 took place, was given to Mr. Asquith, and he was afterwards appointed to the important post of **Home Secretary** (salary £5000 per annum) in Mr. Gladstone's late Government, and sworn of the Privy Council. He scored several successes in the course of the Home Rule debates, and rose rapidly to the first rank in the House. It was his ill fate to incur a certain amount of disapproval for his conduct during the frequent labour disputes of '93, but his firm and consistent attitude commanded the approval of the House and the country generally. He was entrusted with the conduct of the Disestablishment of the Church of Wales Bill, which he introduced during the '94 session. He also intervened in the cab strike which occurred in May and June, and settled it by an award which, on the whole, satisfied both parties. His marriage with Miss Margot Tennant, daughter of Sir Charles Tennant, took place on May 10th, '94, and was a most brilliant ceremony. Mr. Gladstone and most of Mr. Asquith's Ministerial colleagues were present. Mr. Asquith of course left office with his colleagues on the defeat of the Rosebery Ministry in June '95, and he has since resumed practice at the bar. In a speech which Lord Rosebery made at Edinburgh in '96, after resigning the leadership of the party, he specially designated Mr. Asquith as destined to high office in the future. *Brooks's, Athenæum, and National Liberal.*

\***Atherley-Jones, L. (L.)**, elected for Durham, North-West, '95; sat for same constit. '85-95; 3rd s. of the late Mr. E. Jones, Chartist; *b.* '49; *E.* Manchester Grammar School and Brasenose College, Oxford (B.A. '74); called to the Bar, Inner Temple, '75; North-Eastern Circuit. Priory Gardens, Chiswick, and 4, Paper Buildings, E.C.

**Atkinson, Right Hon. J., P.C. (C.)**, elected for Londonderry, North, '95; *b.* '44; called to the Irish Bar, King's Inns, Dublin, '65, and English Bar, Inner Temple, '90; Q.C. '80; Bench of King's Inns '85; Solicitor-General for Ireland '89; Attorney-General and Privy Councillor for Ireland '92; reappointed Attorney-General for Ireland '95. 68, Fitzwilliam Square, Dublin.

**Bainbridge, E. (L.)**, elected for Lincolnshire, Gainsborough D., '95; Managing Director of the Nunnery Colliery Co., Sheffield; Chairman of the L.D. & E.C. Railway Co.; J.P. for Sheffield.

\***Baird, J. G. A. (C.)**, elected for Glasgow, Central, '95; sat for same constit. '86-95; *b.* '54; *E.* Eton and Oxford; served in the 16th Lancers; D.L. for Ayrshire; Captain Ayrshire Yeomanry; Director of the North British Railway Co. Wellwood, Muirkirk, Ayrshire, and 89, Eaton Square, S.W. *Carlton.*

\***Baker, Sir J. (L.)**, elected for Portsmouth '95; sat for same constit. '92-5; woollen merchant at Portsmouth, Southampton, Brighton, etc.; Alderman, J.P., and twice Mayor of Portsmouth, for 21 years Chairman of the Portsmouth School Board; Director of the Woking Water Co. and Borough of Portsmouth Waterworks; knighted '95. Northend House, Portsmouth. *National Liberal.*

\***Balcarres, David Lindsay, Lord (C.)**, elected for Chorley '95; sat for same constit. from June '95; *e.* s. of J. Ludovic, 26th Earl of Crawford and 9th of Balcarres; *b.* '71; *E.* Eton and Oxford; was President of the Oxford Union Society; is Lieutenant in the 1st Volunteer Battalion Manchester Regiment. Haigh Hall, Wigan; Dunecht House, Aberdeen; Balcarres; Colinsburgh, Fife; and 2, Cavendish Square, W.

\***Baldwin, A. (C.)**, elected for Worcestershire Bewdley D., '95; sat for same constit. '92-5; s. of Mr. G. Baldwin, of Stourport; *b.* '41; head of ironwork firm, Wilden; D.L. Worcester, and J.P. for Worcestershire and Staffordshire. Wilden House, Stourport, and 3, St. Ermin's Mansions, S.W. *Carlton and Athenæum.*

\***Balfour**, Right Hon. A. J. (C.), elected for Manchester, East, '95; sat for same constit. '85-95; *b.* '48; *e. s.* of Mr. James Maitland Balfour, of Whittingehame (*d.* '56), and Lady Blanche Gascoigne Cecil, 2nd dau. of 2nd Marquis of Salisbury. *E.* Eton and Trinity College, Camb. (M.A. '73); was private secretary to Lord Salisbury when Secretary of State for Foreign Affairs '78-80, and was employed on the special mission of Lords Salisbury and Beaconsfield to Berlin '78. In the early portion of his parliamentary career he acted for a time with the so-called "Fourth Party"; President of the Local Government Board in Lord Salisbury's first Administration '85-6; Secretary for Scotland, with a seat in the Cabinet, and Vice-President of the Committee of Council on Education for Scotland, '86-7; Chief Secretary for Ireland '87-91. He carried the Crimes Act through Parliament in that session; member of the Gold and Silver Commission '87-8; created the Congested Districts Board for Ireland '90; First Lord of the Treasury and Leader of the House on the death of Mr. W. H. Smith '91; Leader of the Opposition on the Conservatives going out of office in '92; First Lord of the Treasury and Leader of the House since June '95. For a short time during '98 he had charge of Foreign Affairs while Lord Salisbury was abroad through ill-health. He came of Irish parents, who emigrated to Canada shortly before his birth. His father was Chancellor of Ontario, and was a staunch opponent of the Union. E. at Upper Canada College, and graduated at Toronto. He afterwards practised at the Bar and entered*
- Parliament. He is regarded as being the first Canadian lawyer of the day, and his political record in Canada is a most distinguished one. He was first Premier of the Legislature of Ontario, after which he became Minister of Justice and Attorney-General in the Dominion Parliament under the late Mr. Mackenzie. He came to England in '92 with the reputation of being the first orator in Canada, but the speeches he has made, both in and out of the House, subsequent to his election for South Longford, which seat was offered him by the Anti-Parnellite leaders, have not been so successful as was anticipated. Mr. Blake refused the offices of Chancellor of Ontario, of Chief Justice of the Dominion, and the honour of knighthood, which were all proffered him, and finally gave up the leadership of the Opposition, owing to his disagreement with the policy of commercial union with the States—a policy which he feared was detrimental to the union with England.
- \***Blundell, Colonel Henry Blundell-Hollinshead, C.B. (C.)**, elected for Lancashire, Ince D., '95; sat for same constit. '85-92; *e. s. of the late R. B. Fellow of Trinity College; D.C.L., LL.D., F.R.S.; Corresponding Member of

the Institute of France and of the Royal Academies of Turin and Brussels; P.C.; called to the Bar, Lincoln's Inn, '67, and was appointed three years later Regius Professor of Civil Law at Oxford University. This chair, however, he resigned in June '93. Under-Secretary for Foreign Affairs for five months in '86; Chancellor of the Duchy of Lancaster, with a seat in the Cabinet, in Mr. Gladstone's Government of '92-4; and in Lord Rosebery's Cabinet, Chancellor of the Duchy, March to May '94, when he was appointed President of the Board of Trade, retaining the office until the change of ministry, June '95. He has always taken a deep interest in Irish questions, in the extension of rural local government, in the reconstruction of the second chamber, in the development of secondary education, and in the condition of the Eastern Christians and their emancipation from Turkish misrule. His works, which have gained for him a great reputation, include "The Holy Roman Empire," "Transcaucasia and Ararat," "The American Commonwealth" ('89), and "Impressions of South Africa" ('98). Chairman of the Royal Commission on Secondary Education '94-5. 54, Portland Place, W. *Athenæum*, *Savile*, and *National Liberal*.

\***Brymer**, W. E. (C.), elected for Dorset, South, '95; sat for Dorchester '74-85, Dorset, South, '91-5; eldest surviving s. of the late Mr. J. Brymer, of Ilslington, Dorchester; b. '40; E. \***Burdett-Coutts**, W. L. A. B. (C.), elected for Westminster '95; sat for same const. '85-95; s. of the late Mr. E. Bartlett, of Plymouth, Mass., U.S.; b. '51; E. Keble College, Oxford (M.A. '80); Special Commissioner in Turkey for Baroness Burdett-Coutts' Turkish Compassionate Fund '77; Order of Medjidie '78;

m. Baroness Burdett-Coutts '81, and assumed her name. 1, Stratton Street, W. *Carlton*.

\***Burns**, J. (Labour), elected for Battersea '95; sat for same const. '92-5; s. of Mr. Alexander Burns, engineer, formerly of Ayrshire. He was b. in very humble circumstances in '58 at Vauxhall, and attended Christ Church school at Battersea till he was ten years of age, when he went to work at a local candle factory. He then became a rivet boy in an engineer's workshop at Vauxhall, and later apprenticed himself to an engineer at Millbank, and served till he was twenty-one. Throughout youth he was an omnivorous reader, and during his apprenticeship got into trouble with his employers because of an open-air address which he delivered. He imbibed his Socialistic theories from a fellow-workman in an engineering shop, this man, a Frenchman, being a refugee from Paris after the Commune. He worked as foreman engineer for twelve months on the Niger (West Africa), and on his return spent his savings in a six-months' tour through Europe. He first attracted public attention by his speeches on Socialism at an Industrial Remuneration Conference in London, and since then has constantly addressed working-class audiences. He became prominent in his own trade society (the Amalgamated Engineers), and at the General Election in '85 he stood as a Socialist candidate for the western division of Nottingham, but obtained only 598 votes. He played a leading part in the unemployed agitation of '86, and was one of the heads of the crowd which on Feb. 8th, '87, broke from the control of its leaders and caused a riot in the West End. He contested the right of public meeting in Trafalgar Square, and suffered six weeks' imprisonment for resisting the police ('87). He was one of those who organised and won the great victory of the Dock Labourers in '89. In all matters relating to labour he is an authority, respected by both employers and employed, and he is constantly being appealed to by workmen and their organisations for help and advice. He has four times been elected a member of the London County Council for the Battersea Division, on which body he has been the author of direct employment, and had much to do with its labour policy; and twice chosen to represent the constituency in the House of Commons. There he very soon made his mark, and his speeches are recognised as weighty and authoritative contributions to debate. 108, Lavender Hill, S.W.

\***Burt**, T. (L.), elected for Morpeth '95; sat for same const. '74-95; s. of Mr. Peter Burt, miner; b. '37; Secretary to the Northumberland Miners' Union '65; member of the Labour and Mining Royalties Commission '91; President of the Trades Union Congress '91; Parliamentary Secretary to the Board of Trade Aug. '92-July '95. 20, Burdon Terrace, Newcastle-on-Tyne, and 26, Palace Street, Buckingham Gate, S.W. *Reform*.

\***Butcher**, J. G. (C.), elected for York '95; sat for same const. '92-5; 2nd s. of the late Rev. S. Butcher, D.D., Bishop of Meath '66-76; b. '52; E. Marlborough and Trinity College, Camb. (Bell Scholarship, 8th classic and 8th Wrangler '74, and Fellow); Lincoln's Inn '78; barrister-at-law; Q.C. '97. Riccall Hall, Yorks.; 32, Elvaston Place, S.W.

- Buxton**, Sydney (L.), elected for Tower Hamlets, Poplar D., '92 and '95; sat for Peterborough '83-5, Poplar D. '86-95; s. of the late C. Buxton, M.P.; b. '53; *E. Clifton College* and *Trinity College, Camb.*; member of the *London School Board* '76-82; author of "Handbook to Political Questions," "Finance and Politics," and other works; editor of the *Imperial Parliament Series*; Under Colonial Secretary Aug. '92—July '95. Shipbourne, Cromer, and 15, Eaton Place, S.W. *Athenæum*.
- \***Caldwell**, James (L.), elected for Lanarkshire Mid, '95; sat for Glasgow, St. Rollox, '86-94, Lanarkshire, Mid, April '94-5; s. of Mr. Findlay Caldwell, of Glasgow; b. at Kilmarnock '39; *E.* at the Universities of Glasgow and Edinburgh; admitted to the Faculty of Procurators in Glasgow '64; practised many years; was also lecturer on law at the Mechanics' Institute; afterwards became calico printer in a large way. 12, Grosvenor Terrace, Glasgow, and 107, Holland Road, W.
- \***Cameron**, Sir C., Bart. (L.), elected for Glasgow, Bridgeton D., Feb. '97; sat for the undivided constit. of Glasgow '74-85, and the College D. '85-95; b. '41; *E.* St. Andrews and Dublin, and also studied at the Medical Schools of Paris, Berlin, and Vienna (M.D. '65, LL.D. '71); edited *North British Daily Mail* '64-74. He has written various papers on medical and scientific subjects, and has brought forward in Parliament numerous Scottish Bills.

\***Chamberlain, Right Hon. J. (L.U.)**, elected for Birmingham, West, '95; sat for Birmingham '76-85, West '85-95. *b.* In London, July '36; *E. University College*. In '54 his father joined the firm of Nettlefold, the well-known screw makers of Birmingham. He also joined the firm, and for many years devoted himself almost exclusively to business, his spare time being given up to the study of politics. His first introduction to public life was in '70, as one of the leaders of the defeated unsectarian candidates for the School Board of Birmingham. But in '73 he was elected chairman. During this period he was also a member of the Town Council, of which he became Mayor ('73). On the death of his father he retired from the firm, in order to devote all his energies to public life. To him was due the transfer of the gas and water works to the borough authorities, and he was the author of the improvement scheme which has entirely transformed the face of central Birmingham. He was re-elected Mayor in '74, and again in '75. In '74 he opposed Mr. Roebuck in Sheffield, but was defeated by a large majority. In '76, on the retirement of Mr. Geo. Dixon from Parliament, Mr. Chamberlain was elected for Birmingham without opposition, and he has represented the town ever since. In '77 he laid before the House an exposition of the Gothenburg licensing system, but produced no impression upon members. He has recently again expressed his belief in the efficacy of the system. At this period he sat below the gangway, among the Home Rulers, with whose aspirations he was supposed to have some sympathy. When the Liberals returned to power Mr. Chamberlain became President of the Board of Trade, with Cabinet rank. He passed a Patents Bill and a Bankruptcy Bill, and after his exit from office ('85) he increased his reputation as a political leader considerably more than during the three previous years, his freedom from office giving him greater latitude. He attacked Conservatives and Whigs with almost equal bitterness. After the general election of '85 Mr. Chamberlain held the office of President of

the Local Government Board until his divergence of views on the Irish policy of Mr. Gladstone caused his resignation (March 27th, '86). He was appointed Chief Commissioner to the Conference at Washington for the settlement of the dispute between the United States and Canada on the Fisheries Question. Revisited United States on the occasion of his marriage with Miss Endicott (Nov. 15th, '88). On the elevation of Lord Hartington to the peerage as Duke of Devonshire through his father's death, Mr. Chamberlain was enthusiastically nominated the leader of the Liberal-Unionist party in the House of Commons. During the general election of '92 he spoke and worked with great effect, and his influence in the Midlands was very marked. His influence in the House throughout the Home Rule debates was just as great, and he made himself a tireless leader of all the assaults on the Bill. During the '94 session he strongly opposed the Government in most of their measures, but took practically no part in the Disestablishment debate. In the autumn he made several speeches in the north, and showed an inclination to outline a policy of social reform for the joint Unionist party. In the course of one of these speeches he made the significant statement that the gulf between him and the Liberal party could not now be bridged over. On the formation of the Coalition Ministry in June '95 Mr. Chamberlain took office under Lord Salisbury as Colonial Secretary. In '96 he had to deal with the Ashanti and Transvaal difficulties, and showed considerable energy in his efforts to develop commercial intercourse between Great Britain and her colonies. The Workmen's Compensation Act, '97, was greatly indebted to his advocacy during its passage through the House, and he was again prominent by his vigorous handling of Colonial matters. In '98 he made the famous "long spoon" speech in reference to foreign affairs, and declared himself strongly in favour of an alliance with the United States. He was chosen Lord Rector of Glasgow University Nov. 3rd, '97. LL.D. Camb. '92; D.C.L. Oxford '96. Highbury, Moorgreen, Birmingham, and 40, Prince's Gardens, S.W. *Athenæum and Devonshire.*

He was made Solicitor-General in Lord Salisbury's '86 Administration, and received the honour of knighthood. Sir Edward was for some time a reporter in the House of Commons, and was on the literary staff of the *Morning Herald* and *Standard*. He made his mark in the celebrated Penge case, and successfully defended Mrs. Bartlett in the notorious Pimlico poisoning case. Has published two volumes of political and forensic speeches. His principal speech in the House of Commons was on Feb. 13th, '93, when he

followed Mr. Gladstone in the debate on Home Rule. He declined to take office in '95 because of the regulations as to private practice imposed on the Solicitor-General and Attorney-General, and in '97 refused the offer of the appointment of the Master of the Rolls. Thorncote, Staines, and 37, Russell Square, W.C. *City Carlton, Garrick, St. Stephen's, Press, and Carlton.*

(C.),** contested Rochester '89; elected '92; return invalidated; elected for Chatham '95; *b.* '42; *E.* Dulwich College; Alderman of Ward of Bishopsgate since '89; member of Common Council for Ward of Cheap from '85-9; J.P. for Kent; Lieutenant for City of London; Sheriff of London and Middlesex '87-8; Lord Mayor of London '97-8; closed a distinguished year of office with a brilliant banquet to the Sirdar in Nov. '98; K.C.M.G. '98; Lieutenant-Colonel 3rd Middlesex Artillery since '89. Watlingbury Place, near Maidstone. *Carlton, Junior Carlton, and City Carlton.*

**Davies, M. Vaughan- (L.),** elected for Cardigan-shire '95; *s.* of the late Mr. Matthew Davies, J.P., D.L.; *b.* '40; *E.* Harrow; J.P. and D.L. for Cardiganshire; High Sheriff '75. Tan-y-Bwlch, Aberystwith, and 17, Hyde Park Gardens, W.

**\*Davitt, Michael (A.P.),** elected for Kerry, East, '95; elected for Meath, North, '92, but unseated on petition; elected Cork, North-East, '93, but resigned May '93; *b.* '46 in the village of Straide, Mayo. His father, who was a small farmer, was evicted when Davitt was but four years of age. For several years he lived at Haslingden, Lancashire; when a boy he lost his right arm through an accident in a mill. He became connected with the Fenian movement, and was present at the attack on Chester castle. Afterwards he was engaged in buying and transporting arms to Ireland, and being detected, was tried, convicted, and sentenced to fifteen years' penal servitude. He was released after seven years and seven months of his sentence had expired. He took a very active part in organising the Irish Land League, and in '81 was again arrested, and sent back to penal servitude. He was released after fifteen months' imprisonment; again tried, and sentenced to six months' imprisonment for an alleged seditious speech ('83), and afterwards elected for co. Meath, but, as his term of penal servitude had not expired, he was declared disqualified. He was one of the parties concerned in the charges made in the articles on "Parnellism and Crime," and conducted his own case, making a powerful and effective speech in his own defence ('89). Commenced the *Labour World* (Oct. '90), but the paper ceased after a few months. Mr. Davitt was defeated at Waterford by Mr. J. E. Redmond in '91, and afterwards visited the United States. In July '92 he was re-

turned as member for North Meath. He was unseated, however, for alleged "clerical intimidation," on the petition of Mr. Pierce Mahony, but returned unopposed for North-East Cork. This seat he resigned (May '93) in anticipation of bankruptcy proceedings connected with the costs of the North Meath petition taken against him by Mr. Mahony. He published in '98 a book giving his impressions of Australasian democracy. 67, Park Road, Battersea, S.W.

**Denny, Colonel J. McAusland (C.),** elected for Kilmarnock District '95; *s.* of Mr. Peter Denny, LL.D., of Dumbarton; *b.* '58; *E.* Burgh Academy, Dumbarton, and Lausanne; ship-builder; J.P. for co. Dumbarton; Lieutenant-Colonel commanding 1st Dumbartonshire Rifle Volunteers. Garmoyle, Dumbarton.

**\*Dickson-Poynder, Sir J., Bart. (C.),** elected for Wiltshire, Chippenham D., '95; sat for same constit. '92-5; *s.* of Rear-Admiral Dickson; *b.* '66; *E.* Harrow; assumed name of his maternal grandfather as heir to his mother's estate; inherited baronetcy from his uncle, Captain Sir Alexander Collingwood Dickson, R.N.; *m.* '96, Ann Beauchlerk Dundas, *g.d.* of Lord Napier of Magdala; J.P. for Wilts; Lieutenant Wilts Yeomanry Militia. Hart-ham Park, Corsham and Hilmarton; and 8, Chesterfield Gardens, Mayfair. *Carlton, Turf, and Marlborough.*

**\*Dilke, Right Hon. Sir C. W. (L.),** elected for Gloucester, Forest of Dean D., '95; sat for Chelsea '68-86, Gloucester, Forest of Dean D., '92-5; *e. s.* of the late Sir C. W. Dilke, M.P.; *b.* '43; *E.* Trinity Hall, Camb.; called to the Bar, Middle Temple, '66; P.C. He began his career after leaving college by a tour round the world, to which he owed it that he was able to write his book on "Greater Britain," a standard work on our empire beyond the seas, '68. After his return he lectured in '71 at Newcastle on "The Cost of the Crown" in a most uncompromisingly Radical fashion, which provoked universal attention. He married in '72, but his wife died in Sept. '74. In '74 he was returned to the House of Commons for Chelsea, and soon formed an alliance with Mr. Chamberlain. He was appointed Under-Secretary of Foreign Affairs in '85, and President of the Local Government Board '80 to '85. In '86 the case of *Crawford v. Crawford* and Dilke came on, and was twice tried. In the first trial, just before which he married Mrs. Mark Pattison, a divorce was granted; but Sir Charles Dilke was dismissed from the case and given his costs. On his application the Queen's Proctor subsequently intervened, and a second trial followed; but Sir Charles Dilke's application to be made a party in the second trial was refused by the Court and by the Court of Appeal. Sir Charles had been elected for Chelsea at the '85 election, but was defeated in '86. At the general election of '92 he was returned to the House of Commons for the Forest of Dean, after an absence of six years, and was re-elected unopposed in '95. He is proprietor of the *Athenæum* and of *Notes and Queries*. Besides "Greater Britain," Sir C. Dilke's chief works are "The Fall of Prince Florestan," "The Present Position of European Politics," '87, "The British Army," '88, "Problem of Greater Britain," '91, and, with Mr. Spenser Wilkinson, "Imperial Defence," '92. 76, Sloane Street, S.W.

\***Dillon, J. (N.)**, elected for Mayo, East, '95; sat for Tipperary '80-83, Mayo, East, '85-95; s. of the late Mr. John Dillon, M.P., of '48 celebrity; *b.* '51; *E.* Catholic University, Dublin, and became a L.R.C.S.I., afterwards making politics his vocation. Returned as Nationalist for Tipperary '80. Mr. Dillon was closely identified with the Plan of Campaign; and in Nov. '86, while carrying that plan into operation at Loughrea by receiving the rents of the tenants, was arrested by the police. He was subsequently tried for the offence, but not convicted. At the Mell petty sessions, Drogheda, on May 11th, '88, for "having on April 8th, at Tullyallen, co. Louth, taken part in the criminal conspiracy known as the Plan of Campaign," he was sentenced to six months' imprisonment. The sentence was confirmed on appeal on June 21st. He was sent to Dundalk prison, but was liberated Sept. '88. He returned in '90 from a tour of the Australian Colonies, where he collected large contributions in aid of the Irish Nationalist party. Was arrested (September) and tried on a political charge, but escaped with Mr. W. O'Brien, M.P., to Cherbourg, when out on bail. He afterwards visited the United States, and in Feb. '91 surrendered himself, and was imprisoned in Ireland. Released from Galway gaol on July 30th, and delivered a speech, repudiating Mr. Parnell's leadership, at Mallow. Mr. Dillon is one of the most earnest of the Irish party, and his speeches, both in the House and out of it, always carry weight. Elected Chairman of the Irish party, in succession to Mr. Justin M'Carthy, at the opening of the session of '96, re-elected '97 and '98. M. '95, Elizabeth, *d.* of the Hon. Sir James Mathew, *g.-n.* of Father Mathew, the apostle of Temperance. North Great George's Street, Dublin.

\***Disraeli, Coningsby R. (C.)**, elected for Cheshire, Altrincham D., '95; sat for same constit. (C.), elected for Cambridge University '95; sat for Cambridge '66-8, Chatham '75-92, Cambridge University '92-5; *b* '35; *E.* St. John's College, Camb.; Civil Commissioner of Waikato, New Zealand, '61-3; appointed O.C. '75, and ten years later became *Solicitor-General* in Lord Salisbury's first Government; was a member of the celebrated **Fourth Party**; appointed Under-Secretary for India '86, and created **Privy Councillor** '90; he was one of the English delegates at the Berlin Labour Conference held in '90; appointed **Financial Secretary to the Treasury** Nov. '91, holding that office until the retirement of Lord Salisbury's Government in '92; Lord Rector of Glasgow University '93; appointed Vice-President of the Council '95, and as such had a great deal to do with the conduct of the Education Bills of '96 and '97. Queen Anne's Mansions, S.W. *Carlton.*
- \***Goschen**, Right Hon. G. J. (C.), elected for St. George's, Hanover Square, '95; sat for City of London '63-80, Ripon '80-85, Edinburgh, East, '85-6, St. George's, Hanover Square, '87-95; *b.* in London '31; *E.* Rugby under Dr. Tait, and at Oriel College, Oxford, taking a 1st class in Classics. Soon after he entered the firm of Fröhling & Goschen, and became a Director of the Bank of England in '56. In '65 he was appointed Vice-President of the Board of Trade, and in '66 Chancellor of the Duchy of Lancaster, with a seat in the Cabinet. In '68 he joined Mr. Gladstone's Cabinet as President of the Poor Law Board, and in '71 succeeded Mr. Childers as First Lord of the Admiralty. Mr. Goschen was unable to join Mr. Gladstone's Government in '80, owing to his opposition to the extension of the franchise, so he was appointed special Ambassador to the Porte, in which capacity he was instrumental in settling the Montenegrin and Greek frontier questions in '80 and '81. When Mr. Gladstone launched his Home Rule Bill, in '85, Mr. Goschen was among the first to enrol himself in the opposition. He, however, failed to secure his seat in Edinburgh at the '86 election. On the resignation of Lord R. Churchill in Dec. '86, Mr. Goschen accepted the **Chancellorship of the Exchequer** as a Liberal Unionist with the full sanction of Lord Hartington. He was defeated in the Exchange Division of Liverpool (Jan. 26th, '87), but in the following month was successful in the St. George's, Hanover Square, Division. The **Budgets** which he introduced in '88 and '89 were vigorously attacked by Mr. Gladstone because of their proposals with reference to the death duties. His scheme, however, for the reduction of the interest on the national debt was cordially accepted by all parties, and successfully brought to a conclusion in July '89. He is the author of several financial and political pamphlets, and of the well-known work on "The Theory of Foreign Exchange." He has also published a number of addresses on educational and social subjects, including two on the "Cultivation and Use of the Imagination," delivered at Liverpool '77, and at Edinburgh University, and one on "Intellectual Interest," delivered by him as Lord Rector to the students of Aberdeen University in '88. He is a Privy Councillor. He joined Lord Salisbury's Cabinet in June '95 as First Lord of the Admiralty, and was re-elected for St. George's, Hanover Square. Seacox Heath, Hawkhurst, and 69, Portland Place, W. *Athenaeum and Carlton.*
- Goschen**, G. J., jun. (C.), elected for Sussex, North or East Grinstead D., '95; *e. s.* of the Right Hon. G. J. Goschen, First Lord of the Admiralty; *b* '66; *E.* Rugby and Balliol College, Oxford; private secretary to the Governor of New South Wales '90-92; moved address '96. 30, Draycott Place, Cadogan Gardens, S.W.

(M.A. '67, LL.D. '87); merchant; Alderman of Billingsgate Ward '80; Sheriff for London and Middlesex '81-2; Lord Mayor '86-7; J.P.; Commissioner of Lieutenancy for London; J.P. and D.L. for Tower Hamlets and Middlesex; late member of the School Board and C.C.; Knight Commander of the Orders of Couronne de Chêne of the Netherlands, and Saviour of Greece; knighted '82; created a baronet '87; Hon. Colonel City of London Militia; Past Master of Merchant Taylors' and Shipwrights' Companies. 4, Bryanston Square, W.

\***Harcourt**, Right Hon. Sir W. V. (L.), elected for Monmouthshire, West, '95; sat for Oxford

City '68-80, Derby '85-95; s. of the late Rev. W. V. Harcourt, of Nuneham Park, Oxford; *g.* s. of a former Archbishop of York; *b.* '27; *E.* Trinity College, Camb. (1st class honours in Classical Tripos, and Senior Optime '51); called to the Bar, Inner Temple, '54; Q.C. '66; appointed Whewell Professor of International Law, Camb., '69; *m.* '59, d. of Lady Theresa Lewis, by whom he has a son, Lewis (*b.* '63), and in '76 his second wife, Mrs. Ives, daughter of the late Mr. J. L. Motley, the historian, by whom he has a son, Robert (*b.* '78). Sir W. Harcourt entered Parliament as Liberal member for Oxford ('68-80). On seeking re-election after his acceptance of office in Mr. Gladstone's Administration he was defeated by Mr. Hall, who was subsequently unseated on petition. Meantime, by the voluntary retirement of Mr. Plimsol, a seat was found for Sir William Harcourt at Derby, for which constituency he sat till he was defeated at the general election in '95. He has held the following offices: Solicitor-General '73-4; Secretary of State for the Home Department '80-85; Chancellor of the Exchequer '86 and '92-5. His '94 Budget, which considerably extended the application of the principle of graduation to the Income Tax and reformed the Death Duties, is claimed by his friends as his greatest achievement. His leadership of his party in the '96 session was acknowledged by friend and foe to have been masterly. He took a prominent part in the proceedings of the British South Africa Committee during '97; and in '98, in a series of weighty letters to the *Times*, he attacked the Romanising movement in the Church of England. Under the *nom de plume* of "Historicus" he wrote to the *Times* the well-known letters on International Law. He is one of the most clever of parliamentary debaters and platform speakers. Is a P.C. and LL.D. Malwood, Lyndhurst, Hants. *Devonshire, Reform, etc.*

\***Hardy**, L. (C.), elected for Kent, Ashford D., '95; sat for same constit. '92-5; *y.* s. of the late Sir John Hardy, Bart., of Burton-on-Trent; *b.* '54; *E.* Eton and Christ Church, Oxford (M.A. 1st class History '76); J.P. for West Riding, Yorks; D.L. and J.P. Kent. Sandling Park, Hythe, Kent, and 42, Lowndes Square, S.W.

\***Hare**, T. L. (C.), elected for Norfolk, South-West, '95; sat for same constit. '92-5; s. of the late Sir Thomas Hare; *b.* '59; *E.* Eton; J.P. and D.L. for Norfolk; Lieutenant 24th Regiment '79-80, and 1st Battalion of Scots Guards '80-85. Stow Hall, near Downham, Norfolk.

\***Harrington**, T. C. (P.), elected for Dublin, Harbour D., '95; sat for Westmeath '83-5, Harbour D. '85-95; s. of Mr. D. Harrington, of Castletown; *b.* '51; *E.* Castletown, Catholic University, and Trinity College, Dublin; Secretary of the Irish National League; called to the Irish Bar '87; formerly part proprietor of the *Kerry Sentinel*; imprisoned under the Crimes Act. 6, Cavendish Row, Dublin, and Artane Lodge, co. Dublin.

\***Harwood**, G. (L.), elected for Bolton '95; s. of Mr. Richard Harwood, J.P.; *b.* '45; *E.* Chorlton High School and Owens College, Manchester (M.A. London); head of the firm of Richard Harwood & Son, Brownlow Fold Mills, Bolton; called to the Bar, Lincoln's Inn,

- '90; ordained by the Bishop of Manchester, and served as a deacon '86-9; author of "Dis-establishment," "The Coming Democracy," "From Within," and "A Candidate's Speeches." Arkwright Street, Bolton, and 9, Stanley Gardens, London, W. *Athenæum, Reform.*
- Haslett**, Sir James (C.), member for North Belfast since the decease of Sir E. Harland, in Jan. '96; s. of a Presbyterian minister; b. '32; is a chemist and druggist in Belfast; is a J.P. for, and has twice been Mayor of that city, and was member for the Western D. '85-6. Princess Gardens, Belfast.
- Hatch**, E. F. G. (C.), elected for Lancashire, (South-East), Gorton D., '95; s. of the late Mr. J. W. Hatch, by Matilda A., d. of the late Hugh Snell, of Collington, Cornwall; b. '59; *E.* privately; senior partner and founder of the firm of Hatch, Mansfield, & Co., of 1, Cockspur Street, S.W., and a Director of the Fine Arts Insurance Company; unsuccessfully contested Gorton D. of Lancashire '89 and '92. 11, Mount Street, Grosvenor Square, W. *Carlton, Junior Carlton, and Ranelagh.*
- \***Hayden**, John Patrick (P.), elected for Roscommon (South D.), July '97; s. of Mr. Luke Hayden, of Roscommon; a journalist; is brother of the late Mr. Luke P. Hayden, of Roscommon, who sat for Leitrim (South), from '85-92, and Roscommon (South) '92-7; and was elected to succeed him on his decease in '97.
- \***Hazell**, Walter (L.), elected for Leicester July '95; sat for same constit. '94-5; only s. of the late Mr. Jonathan Hazell; b. '43; Chairman of Hazell, Watson, & Viney, Ltd.; joint founder of the Children's Fresh Air Mission, and of the Self-Help Emigration Society, Treasurer of the Peace Society, and worker in various social movements. 9, Russell Square, W.C. *National Liberal and City Liberal.*
- \***Healy**, M. (N.), elected for Cork City '95; sat for same constit. 85-95; s. of Mr. Maurice Healy, of Bantry; b. '59; *E.* Christian Brothers School, Lismore; Solicitor '82. Ashton Lawn and Southmall, Cork. *National Liberal.*
- \***Healy**, Thomas J. (N.), elected for Wexford, North, '95; sat for same constit. March '92-5; e. s. of Mr. Maurice Healy, of Bantry; br. of Timothy Healy; b. '54; *E.* National School, Lismore; admitted Solicitor '88. Fortview, Wexford, and 12, Westmorland Street, Dublin. *National Liberal.*
- \***Healy**, Timothy M. (N.), elected for Louth, North, '95; sat for Wexford '80-83, Monaghan '83-5, Londonderry, South, 85-6, Longford, North, '87-92, Louth North, '92-5; b. in Bantry, '55; joined Mr. Parnell in '80, when he lectured in America. Took an active part in the Land League agitation '80, and was arrested in the autumn for a speech at Bantry, and committed for trial, but was acquitted. Elected for Wexford borough without opposition. Took a very active part in the discussions of the Land Bill of '81, and obtained the insertion of words excluding the improvements of tenants from rent. The clause has since come to be known as the "Healy clause." Was brought on motion by the Crown before the Queen's Bench for a speech in '82, and ordered to find bail for good behaviour, or be imprisoned for six months. Refusing bail, he was imprisoned, but was released after he had served four months of his sentence. Returned for Monaghan in '83, and in '85 for both North Monaghan and South Derby; elected to sit for the latter. Failed to secure his return in '86, but in Feb. '87 was returned unopposed for North Longford. Called to the Irish Bar in '84. Author of "A Word for Ireland," and text books on the Land Acts. He took a prominent part in the struggle of '91 against Mr. Parnell's leadership, and is recognised as one of the ablest members of the Irish party, though considerable differences exist between him and some of his colleagues. He was expelled from the Parliamentary Committee in Nov. '95 by a majority of six, and his disapproval of Mr. Dillon's leadership has been plainly manifested since. *National Liberal.*
- \***Heath**, J. (C.), elected for Staffordshire, North-West, '95; sat for same constit. '92-5; 2nd s. of Mr. R. Heath, of Biddulph Grange, Congleton; b. '52; *E.* Clifton College; ironmaster; J.P. for Staffordshire; Captain Staffordshire Yeomanry '76, Major '90, Lieut.-Col. '97, Col. '98. Crawley Court, Winchester, and 54, Cadogan Square, S.W.
- \***Heaton**, J. Henniker (C.), elected for Canterbury '95; sat for same constit. '85-95; s. of the late Lieutenant-Colonel Heaton of Rochester; b. '48; *E.* Kent House Grammar School and King's College, London; engaged in pastoral pursuits, and part proprietor of one of the largest newspaper properties in Australia; N.S.W. Government Commissioner to Amsterdam Exhibition '83, and to Indian and Colonial Exhibition '86; represented the Tasmanian Government at the Berlin Telegraph Conference '85; the successful advocate of Imperial Penny Postage, which is to be brought into operation between Great Britain and certain of her colonies on Christmas Day '98; author of "Australian Dictionary of Dates and Men of the Time"; appointed by Mauritius to negotiate its new constitution '84; introduced telegraph money orders in England, parcel post to France, and carried out numerous other postal reforms; inaugurated Parliamentary chess matches between Great Britain and America. 36, Eaton Square, S.W. *Carlton, Portland, and Savage.*
- Hedderwick**, Thomas Charles Hunter (L.), who, on the retirement of the late Sir J. Pender, won for the Liberals the seat for the Wick Burghs, is the 2nd s. of the late Mr. Robert Hedderwick, Queen's Printer and Publisher, of Glasgow, and founder of the old *Glasgow Weekly Citizen*; b. '50; M.A. Glasgow Univ.; called to the Bar, Middle Temple, '76, joining the North-Eastern Circuit; was a Member of the Executive Committee of the Eighty Club '87-92; J.P. for Lanarkshire. Hadsden House, Castle Cary, Bath. *Reform and Athenæum.*
- Hogan**, J. F. (A.P.), elected for Tipperary, Mid, '95; sat for same constit. '93-5; b. '55; *E. at St. Patrick's College, Melbourne, and entered Education Department, Victoria.*

Afterwards became a journalist, and has written "The Irish in Australia," "The Australian in London," etc. Since '87 has been residing in England. Published a biography of "Robert Lowe, Viscount Sherbrooke" ('92). Took an active part in the organisation of the new Colonial party, and at its inaugural meeting on Aug. 23rd, '93, was unanimously elected Secretary. This party held several meetings during '98, which were attended and addressed by a number of visiting Colonial statesmen, including five ministers of the Canadian Cabinet. Early in '96 Mr. Hogan published "The Sister Dominions: Through Canada to Australia by the New Imperial Highway." Early in '98 he published "The Gladstone Colony," a book that attracted much attention by giving for the first time a full account of the colonising experiment that Mr. Gladstone initiated at Port Curtis, Australia, in '47, when he was Colonial Secretary in the Ministry of Sir R. Peel. Montague Mansion, Great Russell Street, W.C.

**Holborn, J. G. (L.)**, elected for Lanarkshire, North-West, '95; is a tin-plate worker. Leith Walk, Edinburgh.

Secretary to the Royal College of Music; elected Chairman National Education Association '98. Shockerwick House, Bath, and 46, Bryanston Square, W. *Reform, Athenæum, Brooks's, and Travellers'.*

**\*Morley, Right Hon. John (L.),** elected for Montrose Burghs '96; b. at Blackburn '38; *E. Cheltenham and Lincoln College, Oxford;* called to the Bar, Lincoln's Inn, '73, but eventually took to literature rather than the law. For some time he edited the *Literary Gazette*, and from '67 to '83 he conducted the *Fortnightly*. He edited the *Pall Mall Gazette* '80-83, and *Macmillan's Magazine* '83-5. His literary career was then in part abandoned for politics. In '83 he was elected for Newcastle-on-Tyne, and when Mr. Gladstone propounded his Home Rule scheme he found in Mr. Morley, whom he made Chief Secretary for Ireland, one of his ablest and most enthusiastic supporters. He fought hard then and during the tenure of power by the Conservative Government, and in '92 he was re-appointed Chief Secretary. His Irish administration ('92-5) was most successful; but at the general election of '95 he was defeated at Newcastle, which seat he had held for 12 years. On the retirement of Mr. Shiress Will, he was, in Feb. '96, returned for the Montrose Burghs, and was thus enabled to resume his parliamentary career. Mr. Morley's literary works include a number of books on the French philosophers of the eighteenth century, an essay on Compromise; Lives of Cobden, of Edmund Burke, and of Walpole, and a Romanes lecture on Machiavelli '97; while he is designated as the writer of the authoritative Life of Mr. Gladstone; Hon. LL.D. of Glasgow and Cambridge Universities; Hon. D.C.L. of Oxford; is Trustee of the British Museum, a Bencher of Lincoln's Inn, and F.R.S.; P.C. 57, Elm Park Gardens, S.W.

**Morrell, G. H. (C.),** elected for Oxfordshire, Mid or Woodstock D., '95; sat for same constit. '91-2; e. s. of the late Rev. G. K. Morrell, D.C.L.; b. '45; *E. Rugby and Exeter College, Oxford, M.A., B.C.L.;* called to the Bar, Inner Temple, '71; J.P., D.L., and County Alderman for Oxfordshire; High Sheriff '85; J.P. for Berkshire; Lieutenant-Colonel and Hon. Colonel (V.D. '95) 1st Volunteer Battalion (University) Oxfordshire Light Infantry '79-98, when he retired. Headington Hill Hall, near Oxford, and Streatley House, on Thames, Berks. *Carlton, Junior Carlton, and New University.*

**\*Morris, Samuel (N.),** elected for Kilkenny, South, '95; sat for same constit. Sept. '94-5; s. of Mr. George Morris, merchant, of Fiddown, co. Kilkenny; b. '46; *E. O'Shea's Grammar School, Carrick-on-Suir. Newrath House, Waterford. National Liberal.*

**Stanley, Arthur (C.)**, elected for Lancashire, South-West (Ormskirk) D. '98, in succession to the late Sir A. B. Forwood; is son of the 16th Earl of Derby and brother of Lord Stanley, who has been M.P. for the Houghton D. of Lancashire since '92; *b.* '69; *E.* Wellington Coll.; was private secretary to Mr. Balfour, First Lord of the Treasury, for a few months in '92, and then entered the Foreign Office; afterwards entered Diplomatic Service, being appointed third secretary at Cairo in '95.

\***Stanley, E. J. (C.)**, elected for Somerset, Bridgwater D. '95; sat for West '82-5; Bridgwater D. '85-95; *e. s.* of the late Mr. E. Stanley, of Cross Hall, Lancashire; *b.* '26; *E.* Eton and Christ Church, Oxford; J.P. and C.C. for Somerset; High Sheriff '80; D.L. for Lancashire and Somerset. Quantonck Lodge, Bridgwater, and 14, Grosvenor Square, W. *Travellers' and Carlton.*

**Stanley, Henry M. (L.U.)**, elected for Lambeth, North, '95; *b.* at Denbigh '41, and passed his childhood in the workhouse at St. Asaph. Subsequently he sailed as cabin boy to New Orleans, where he was adopted by a Mr. Stanley, whose name he took, but whose death without making provision for him again compelled him to rely on his own

efforts. After a series of adventures he became a journalist during the American civil war, being attached as reporter to the staff of the *New York Herald*. In '68 he was sent to accompany the British expedition into Abyssinia, as war correspondent for that paper. Subsequently he made a tour to the Black Sea, and thence through Persia into India. In '69 Livingstone, in Africa, had not been heard of for a long time. Mr. Gordon Bennett, proprietor of the *New York Herald*, ordered Stanley to "go and find him." Early in '71 Stanley left Zanzibar and plunged into the unknown continent. Before the end of that year he had found Livingstone. In '73-4 he accompanied the British expedition into Ashanti, up to Coomassie, as a war correspondent again. In '76 the *New York Herald* and the London *Daily Telegraph* conjointly sent him to Central Africa, to take up the thread of Livingstone's discoveries. He left Zanzibar in that year, and in '77 emerged on the west coast, having circumnavigated Victoria Nyanza, and forced his way in spite of terrible obstacles down the whole course of the hitherto unknown Congo. In '79 the King of the Belgians gave him the command of an expedition formed by the International African Association, with which he may be said to have made what is now the Congo Free State (*q.v.*). In Jan. '87 he started on the expedition for the relief of Emin Pasha, after receiving the freedom of the City of London. In '90, having accomplished his task, he returned to England, and published his book entitled "In Darkest Africa." His marriage with Miss D. Tennant took place at Westminster Abbey July 12th. After a lecturing tour in America, Mr. Stanley delivered many lectures in various parts of the kingdom, visited Australia in '92, settled down in London, took out a certificate of naturalisation, and stood as Unionist candidate for North Lambeth at the general election '92. He was, however, defeated. During the Uganda controversy he declared strongly against the evacuation of that country. In Nov. '93 he published "My Dark Companions and their Strange Stories." He is an Hon. D.C.L.; LL.D. and Ph.D. of Oxford, Cambridge, Durham, and Halle Universities. Richmond Terrace, Whitehall, S.W.

\***Stanley, Lord (C.)**, elected for Lancashire, Westhoughton D. '95; sat for same constit. '92-5; *e. s.* of Earl of Derby; *b.* '65; *m.* '89, Lady A. Montagu, d. of the 7th Duke of Manchester; entered the army; Lieutenant and Battalion Grenadier Guards '85-95; aide-de-camp to his father, Governor-General of Canada, '88-90; J.P. and D.L. for Lancashire; appointed a Lord of the Treasury '95. Cowork Park, Sunningdale, and 36, Great Cumberland Place, W.

**Steadman, William Charles (L.)**, elected for Tower Hamlets, Stepney D., '98; *b.* '51; *E.* Poplar National School; at 15 Mr. Steadman was apprenticed to a barge-builder, at which trade he worked until '92; has been 18 years Secretary for the Barge-builders' Union, and it is greatly owing to him that the trade is one of the best organised in London. He has filled many municipal offices, and is a Governor of the People's Palace and member of the Thames Conservancy Board. Has represented Stepney on the London County

Council since '92. Unsuccessfully contested Medway D. of Kent '92, and Hammersmith '95.

\***Stephens, H. C. (C.)**, elected for Middlesex, Hornsey D., '95; sat for same constit. It is understood (Nov. 11th '98) that Mr. Arthur Acland is about to retire from the representation of the Rotherham division of Yorkshire (West Riding), on the ground of ill health.

## 2. Alphabetical List of Constituencies and Pollings.

(Revised to Nov. 12th, '98.)

The following is an alphabetical list of the Parliamentary constituencies of the United Kingdom, with the names of the member or members returned by each, and, where there was a contest, the figures polled by the candidates at the last general election, and at every subsequent bye-election to Nov. 12th, '98. In the case of recounts, etc., the revised figures will also be found as well as those announced at the election by the returning officer. The great majority of the old constituencies were by the last Redistribution Act split up into divisions each returning one member, and the names of these divisions are given in parentheses after the name of the county or borough; thus, the Luton or South Division of Bedfordshire appears as Beds (S. or Luton). Therefore, in seeking for the figures with regard to any special division of a county or borough, the county or borough should be turned to in its proper alphabetical place, and the local division will be readily found. The few places which, like the City of London, Leicester, etc., were not broken up into single-member divisions, and still return two members, are distinguished in the alphabetical list of constituencies by a figure thus (2). The figures in brackets, e.g. [5280], show the number of electors on the register revised according to the latest returns.

**Comoro Islands, The.** A group of volcanic islands in the Mozambique Channel, between the east coast of Africa and the north-west coast of Madagascar. Area, 625 sq. m.; pop. 53,000. The group consists of four small elevated islands—Great Comoro, Mohilla, or Little Comoro, Anjuan, erroneously called Johanna, and Mayotte. Mayotte (area 143 sq. m., pop. 9598) is a French possession, and its Administrator also controls the other islands. Commercially the most important is Mohilla, which carries on a brisk trade with Madagascar, Zanzibar, Mozambique, and the rest of the mainland. The people are Mohammedans, speak Arabic, and are akin to the mixed races of Zanzibar.

**Companies Act, '98.** See SESSION, sects. 43, 44.

**Companies, Joint Stock.** See JOINT STOCK COMPANIES.

**Company Law.** See LAW, '98.

**Comptroller and Auditor-General.** See EXCHEQUER and FINANCE.

**Cconciliation Act, The, '96.** See previous eds.

### CONGO FREE STATE.

The Congo Free State was constituted and defined by the general Act of the International Congo Conference of Berlin, '85, and entered into treaties with all the great Powers, by which its status as a sovereign power was recognised and its boundaries were settled. By a Convention made in '90, Belgium was given the right of annexing the State after a period of 10 years. Its area is estimated at 900,000 sq. m., and the population is estimated to be about 30,000,000. The estimated European population is 1678. The capital is Boma, on the Lower Congo. The central Government is at Brussels, and consists of the King of the Belgians as sovereign, and

three departmental chiefs, for Foreign Affairs, Finance, and the Interior, under a Secretary of State. At Boma there is a Governor-General, with a local government; and European Commissioners, assisted by civil and military officials, govern the fifteen administrative districts. Among the chief exports are ivory, rubber, coffee, nuts, palm oil. Gold, copper, and other metals have been discovered. Districts are suitable for growing sugar, cotton, coffee, etc. The army consists of about 6500 natives commanded by European officers. The State has 6 steamboats on the Lower Congo and 14 on the Upper Congo, besides a small flotilla of sailing boats. An agreement between Great Britain and the Congo Free State was signed at Brussels, May '94, settling the boundaries of their respective territories in the Upper Nile valley, and granting to the Free State, during the reign of King Leopold, a lease of that portion of territory lying between the Congo-Nile watershed and the Nile, bounded on the north by the 10th parallel of north latitude, and on the south extending to Mahagi on Lake Albert. It was further agreed that the lease of the territory between the 25th and 30th meridian of E. longitude, comprising the Bahr-el-Ghazal, might be continued to King Leopold's successors. France at once negotiated an agreement with the Free State, which was afterwards signed at Paris (Aug. 10th). By this the frontier between the Free State and French Congo (*q.v.*) was traced, following the *thalweg* of the Oubanghi to the confluence of the Mbomu with the Welle, thence along the *thalweg* of the Mbomu and the watershed between the Congo and the Nile up to its intersection with long. 30° E. France was also given "the right of police" along the left bank and over the course of the Mbomu. The only other important article bound the Free State to renounce all occupation and to exercise no political influence W. or N. of a line starting from the intersection of long. 30° E. with the watershed of the Congo and Nile basin, and following the meridian to its intersection with parallel 5° 30' N. lat., and thence proceeding along that parallel to the Nile. By this article the Free State renounced its right to occupy so much of the territory leased to it by Great Britain under the agreement of May '94 as lies to the west of the 30th meridian of E. long. and north of 5° 30' N. lat. This territory thus renounced included the Bahr-el-Ghazal province. In '97 the Free State troops effectively occupied Refaj, on the Nile. The first locomotive on the new railway between Matadi and Stanley Pool arrived at N'dolo, Stanley Pool, on March 16th, '98. The railway is about 25½ miles long, and the capital of the company is £2,400,000, half in shares and the other half in debentures. The festivities in connection with the inauguration took place in July. It is contemplated to make a branch to Leopoldville, 6½ miles, and among other auxiliary lines one is projected to connect the Lubefu with the Lomami and the Lualaba. We have given a history of the undertaking in our former editions. Estimated revenue, '98, £590,602; estimated expenditure, £693,079; public debt, '98, £6,000,000; imports, '97 £937,088; exports, £698,283. See DIPLOMATIC and EGYPT (map).

**Congregationalism.** It is claimed for the Congregational system of church government that it is apostolic; that each congregation of

believers gathered by the apostles was in itself a complete church; that each church was free from the control of other churches and of the State; and that every member of the church had the right to take part in its management. The first Congregational church in England, of which there is any record, was formed in London about the year 1571. Robert Fitz was the minister, and his "True Marks of Christes Church" is the first document relating to English Congregationalism known to be in existence. The most prominent name in connection with Congregationalism at this time is that of the Rev. Robert Browne, who left the Established Church, and, in conjunction with the Rev. Robert Harrison, formed a Congregational church at Norwich in 1580. One of the most famous of the early churches in England was formed at Scrooby, in Lincolnshire. It met in the house of William Brewster, under the pastoral care, for a time, of Richard Clyfton (who had relinquished a living at Worksope). The famous John Robinson, M.A., succeeded him. To escape persecution, members of this church fled to Holland, from whence, after twelve years, they crossed the Atlantic and landed at New Plymouth—the Pilgrim Fathers of the *Mayflower*. At this time the Congregationalists were sometimes called "Brownists" (after the Rev. Robert Browne), sometimes "Separatists" (because they would keep the Church separate from the world), and sometimes "Independents." This last designation Congregationalists themselves soon adopted, and have ever since retained, because it signifies that they hold "all particular churches of Christ to be of equal authority, and none to have jurisdiction over another." At the time of Cromwell's death a general council of Congregationalists was meeting in the Savoy. This council issued a "Declaration of Faith and Order." Of course the "Declaration" was not binding upon any particular church; at the same time it is almost as important in the history of Congregationalism as the Westminster Confession is in the history of Presbyterianism. The Restoration placed Congregationalism in a very different position from that which it enjoyed under the Protectorate, nevertheless the denomination was greatly and permanently strengthened by the Act of Uniformity (Aug. 24th, 1662), which drove 2,000 ministers and many thousands of laymen out of the Established Church. Under the later Stuarts Congregationalists had their full share of persecution. After the passing of the Act of Toleration (May 24th, 1689) they took an active part in the extension of civil and religious liberty, and in forwarding movements of a philanthropic character. They were chief amongst the founders of the London Missionary Society (1795), and the first tract for the Religious Tract Society was written by Dr. Bogue in 1799. In 1831 the Congregational Union of England and Wales was formed, and an International Council of Congregationalists met in London in July '91. The second International Council will be held in Boston, U.S.A., in September '99. From what has been said above it will be seen that Congregational polity is based upon three ideas: the right of each individual to take part in the government of the community; the autonomy of the local church; and its independence of all external ecclesiastical authority. While complete in itself, the local church may,

voluntarily unite with other churches for consultation and common action. But no resolution of any such Union binds the individual church without its own consent. Usually each church has one minister or pastor, who is chosen by the free suffrages of the membership; but there is nothing to prevent there being more than one, and in fact such cases are not uncommon. In addition to the pastor or pastors, home missionaries and evangelists are sometimes appointed, whose work is distinct from, though subject to the supervision of, the regular pastorate. There are two orders of church officers only: bishops, elders, or pastors, who are the presidents or administrative rulers in the spiritual department of church life; and deacons, who have charge of its secular affairs. There are in the British Isles 4919 Congregational churches and branch churches (mission stations in Scotland not included). There is a general union of the churches, known as the Congregational Union of England and Wales, which meets twice a year, in May at London, and in October at various places in the provinces. There are twelve colleges belonging to the denomination in the three kingdoms (beside four in the Colonies), in which between 400 and 500 students are being trained for the regular ministry. The British Congregational churches raise for the support of religious worship, and for philanthropic purposes, in connection with their own organisations, upwards of £1,000,000 per annum. County or district associations exist for the purpose of upholding and extending evangelical religion, of promoting the spiritual intercommunion of the churches, strengthening their fraternal relations, facilitating co-operation in everything affecting their common interest, aiding weak churches, and carrying on mission work within their respective areas. The Congregational Church Aid and Home Missionary Society supports mission work through the county unions. For foreign missions see MISSIONARY SOCIETIES (London Missionary Society). Congregationalism is also a prominent form of church life in the United States of America, throughout the British dependencies, and in other parts of the world. Offices of the Congregational Union of England and Wales, Memorial Hall, Farringdon St., E.C. Secretary, Rev. W. J. Woods, B.A.; Chairman, '99, Rev. H. Arnold Thomas, M.A.

**Connaught and Strathearn, H.R.H. Prince Arthur William Patrick Albert, 1st Duke of** (creat. 1874), Earl of Sussex, P.C., K.G., K.T., K.P., G.C.S.I., G.C.M.G., G.C.I.E., G.C.V.O., K.C.B., General, Colonel of the Scots Guards, and Col.-in-Chief of the Rifle Brigade, A.D.C., was b. 1850. The third son of the Queen. Mar. the Princess Louise Margaret, youngest dau. of Prince Fredk. Charles of Prussia ('79). Commanded 1st Brigade, 1st Division, in the Egyptian Expedition ('82). Late Commander-in-Chief at Bombay, and of the Southern District in England. In April '93 he was promoted to the rank of full General, and made Commander-in-chief at Aldershot in August. After holding the command for five years, he withdrew in '98, and in the same year he attended the French Army Manœuvres at Moulins, and by his frank geniality won all hearts.

**Constantinople.** The capital of Turkey, situated on the waterway between the Black Sea and Mediterranean. Its population exceeds

a million. To protect it, the Berlin Treaty left on the European side a portion of territory about the size of England and Scotland combined (80,000 sq. m.), and a population of 5,250,000. See TURKEY.

**Consumption and other Forms of Tuberculosis, Association for the Prevention of.** The Association consists of ordinary and of life members. The subscription of ordinary members is 5s. annually. Life members give a donation of £5 5s. The methods employed by the Association include the education of public opinion and the stimulation of individual initiative by means of a central bureau for the collection and distribution of information as to modes of diffusion of tuberculosis and measures of prevention; the circulation of pamphlets and leaflets setting forth in plain language the results of scientific investigation of the above points; public lectures by men approved by the Council; addresses at congresses and other public gatherings; co-operation with other societies having for their object the promotion of public health; the co-operation of the public press; the holding of periodical congresses, and the issue of an annual report; the promotion of the establishment on a self-supporting basis of open-air sanatoria for tuberculous patients; the influencing of Parliament, county councils, boards of guardians, and other public authorities on matters relating to the prevention of tuberculosis. All communications should be addressed to the **Hon. Secretary**, at the office, 20, Hanover Square, London, W.

### CONVOCATION.

There are two Convocations, or Provincial Synods, of the clergy of the Church of England for the two Provinces of Canterbury and York. The greater importance of the Synod of Canterbury, until recent years, has led to its being commonly spoken of as **Convocation**. It was silenced in 1717, and its meetings were, with few exceptions, merely formal until 1852, from which date it has regularly met for business, generally thrice yearly for a week at a time. It consists of two Houses. In the Upper House sit the Archbishop and Bishops of the province in their scarlet Convocation robes; in the Lower House, the Deans, Archdeacons, and Proctors elected to represent the cathedral chapters and the beneficed clergy. The members of the Lower House wear the academic dress, the doctors their scarlet gowns. With every new Parliament a new Convocation is summoned by the Archbishop in obedience to a royal writ. When the Crown desires to refer to the Convocation any question affecting the Church, **Letters of Business** are issued directing it to take that question into its consideration. If the Convocation wishes to make any alteration in the canons of the Church, it prepares draft amended canons, and submits them to the Crown, both Convocations concurring in the same proposals. If the advisers of the Crown approve, the "royal licence" is issued, and the canons are enacted and promulgated by the Convocations and bind the ecclesiastical courts. Where the law of the Church has been settled by statute—as is the case with the rubrics and services of the Prayer-Book, and many other matters—it cannot be altered without the authority of Parliament. In the absence of Letters of

Business Convocation is free to discuss all questions concerning the interests of the Church and the spiritual welfare of the nation.

**Meetings in '98.** At a meeting of the Convocation of Canterbury (May 13th), the Upper House resolved that steps should be taken to enlarge the number of representatives of the parochial clergy in the Lower House. A petition from Mr. John Kensit as to lawlessness in the Church was placed in the hands of members, but no reference was made to it during the sitting. At the meeting of the York Convocation (June 9th), however, the Bishop of Liverpool moved—"That, in the opinion of this House, the increase of lawlessness on the part of many of the clergy in the conduct of Divine worship in their churches, and especially the introduction of unauthorised services and practices in the celebration of the Holy Communion, and the growing dissatisfaction of the laity in consequence of such lawlessness, demand the special attention of the Bishops, and therefore this House considers it necessary at the present juncture that the clergy of our respective dioceses should be called upon to remember the solemn declarations, subscriptions, and oaths made and taken by them at their ordination, licensing or institution, and in particular their legal and moral obligation to use the form prescribed in the Book of Common Prayer and none other, except so far as shall be ordered by lawful authority." The Bishop of Manchester seconded the motion. The Bishop of Wakefield, however, moved, and the Bishop of Chester seconded, the following amendment:—"That, in the opinion of this House, there is a serious danger at the present time of wide divergencies in liturgical practices, owing to the introduction on the part of some of the clergy of services and ceremonies unauthorised by lawful authority and alien to the principles of the Church of England, and especially owing to the alterations by way of omission or addition of the order for the administration of Holy Communion, and that these practices need some restraint and guidance, due regard being had under the authority of the ordinary to modern needs and the reasonable liberty which has always obtained in the Church of England," which was carried as a substantive motion. A report of the Upper House of the Convocation of Canterbury on the remarriage of divorced persons was adopted (July 7th). The essence of the report was contained in the following passage:—"It ought, in our judgment, to be clearly and strongly impressed upon the faithful, and upon the clergy as their advisers in matters of discipline and conduct, that the Christian ideal is that of indissoluble marriage, and that the most dutiful and loyal course, even in the case of the innocent party, is to put aside any thought of remarriage after divorce. But if any Christian, conscientiously believing himself or herself to be permitted by our Lord's words to remarry, determine to do so, then endeavour should be made to dissuade such person from seeking marriage with the rites of the Church, legal provision having been made for marriage by civil process; the language of the Marriage Service is unsuitable for repetition, except in cases where the marriage tie has been dissolved by death or the marriage proved to have been invalid from the beginning." On the same day the Lower House refused to suspend the standing orders to give an opportunity for

the discussion of a motion on the subject of lawlessness in the Church. The *Benefices Bill* was also discussed and several changes were suggested, especially by the Upper House (see *Session*, sects. 37 and 38).

[In the Lower Houses those marked \* are Proctors for the Chapter; those marked † Proctors for the Clergy.]

### PROVINCE OF CANTERBURY.

1. **The Upper House.**—Archbishop of Canterbury, *President*; Bishops of London, Winchester, Bangor, Bath and Wells, Chichester, Ely, Exeter, Gloucester, Bristol, Hereford, Lichfield, Lincoln, Llandaff, Norwich, Oxford, Peterborough, Rochester, St. Albans, St. Asaph, St. Davids, Salisbury, Southwell, Truro, and Worcester.

2. **The Lower House.**—*Prolocutor*: Right Rev. George H. Sumner, D.D., Bishop Suffragan of Guildford. **Canterbury**—Dean F. W. Farrar. Archdeacons Right Rev. W. Walsh and B. F. Smith; \*(vacant); †Revs. H. Bartram and F. H. Murray. **London**—Deans Gregory and Bradley; Archdeacons Sinclair, Thornton, and Furse; \*Revs. Canons Duckworth and C. H. Turner (Bishop Suffragan of Islington); †Rev. A. J. Ingram and H. W. Villiers. **Winchester**—Dean Stephens; Archdeacons Sumner, Sapte, and Henry Haigh; \*Rev. Canon Warburton, †Rev. Canon Musgrave and W. Durst. **Bangor**—Dean Lewis; Archdeacons Pryce and Williams; \*Canon D. W. Thomas, †Revs. T. Edwards and E. Hughes. **Bath and Wells**—Dean Jex-Blake; Archdeacons Browne, Fitzgerald, and Ainslie; \*Rev. Canon Buckle, †Rev. Prebendaries W. Michell and F. A. Brymer. **Bristol**—Dean Pigou; Archdeacon Robeson; \*James George Tetley, †Canons F. V. Mather and Hon. M. J. G. Ponsonby. **Chichester**—Dean Randall; Archdeacons F. J. Mount and R. Sutton; \*Rev. Canon Sanderson, †Revs. A. H. S. Barwell and J. J. Hannah. **Ely**—Dean Stubbs; Archdeacons Emery, Chapman, Bathurst, and Vesey; \*Canon Lowe, †Rev. W. Cunningham and J. H. Macaulay. **Eton College**—Provost Hornby. **Exeter**—Dean Cowie; Archdeacons C. T. Wilkinson, E. G. Sandford, and Seymour; \*Rev. Canon Edmunds, †Rev. Prebendary Martin and Tudor. **Gloucester**—Dean Spence; Archdeacons Haywood and Sheringham; \*Rev. Canons M. W. F. St. John, †Rev. Canons Jones and Proctor. **Hereford**—Dean Leigh; Archdeacons Bather and Stanhope; \*Rev. Canon Poole, †Revs. E. F. Clayton and C. S. Palmer. **Lichfield**—Dean Luckock; Archdeacons T. B. Lloyd, H. M. Scott, and E. Lane; \*Sir L. Stamer, Suffragan of Shrewsbury, †Revs. C. N. Bolton and E. Philips. **Lincoln**—Dean Wickham; Archdeacons Kaye and Perry; \*(vacant), †Revs. J. H. Overton and G. W. Jeudwine. **Llandaff**—Dean Lewis; Archdeacons W. C. Bruce and Edmondson; \*Rev. Canon Thompson, †Revs. J. T. Harding and S. F. H. Nicholl. **Norwich**—Dean Lefroy; Archdeacons Perowne, Gibson, Neville; \*Rev. Canon Robinson and Bishop Lloyd (Suffragan of Thetford), †Revs. Canon C. Frere and Hoare. **Oxford**—Dean Paget; Archdeacons Pott, Bishop Randall and Bourke; \*Rev. Canon Bright, †Revs. Canon E. Savory, and C. W. F. Norris. **Peterborough**—Dean Ingram; Archdeacons Thicknesse, Lightfoot, and Mitchinson (Assistant Bishop); \*Canon Clay-

ton, †Rev. Canons Yates and H. L. Watson. **Rochester**—Dean Hole; Archdeacons Cheetham, Richardson, and Burney; \*Rev. Canon Jelf, †Rev. Canons Erskine Clarke and R. R. Bristow. **Salisbury**—Dean Boyle; Archdeacons Lear, Sowter, and Buchanan; \*Rev. Canon Kingsbury, †Rev. Canons E. S. Banks and Prebendary R. B. Hutchings. **St. Albans**—Archdeacons Johnson (Bishop Suffragan of Colchester), Lawrance, and Stevens; †Revs. J. M. Procter and J. W. Irvine. **St. Asaph**—Dean Williams; Archdeacons D. R. Thomas and D. Evans; \*Rev. Canon Fletcher, †Revs. D. Jones and W. Ll. Nicholas. **St. Davids**—Dean Howell, Archdeacons Protheroe, Bevans, James, and Hilbers; \*Rev. Canon Lewis, †Revs. Canon T. R. Walters and D. Jones. **Southwell**—(no dean); Archdeacons Frere and Richardson; \*(none); Rev. Canon Gray and Rev. C. J. Hamilton. **Truro**—(no dean); Archdeacons Cornish and Du Boulay; \*Rev. Canon Worlledge, †Rev. Canon Thynne and Rev. J. S. Tyacke. **Windsor**—Dean Rev. J. F. Eliot; \*Canon Right Rev. Bishop Barry. **Worcester**—Dean Forrest; Archdeacons Walters, Bree, and E. A. Knox (Bishop Suffragan of Coventry); \*Rev. Canon Knox Little, †Rev. C. A. Dickens and Rev. E. A. Waller. *Vicar-General*: Sir J. P. Deane, Q.C., D.C.L.; *Registrar*: Sir John Hassard, K.C.B.; *Actuary*: F. Cobb, Esq.; *Apparitor-General*: Sir J. A. Hanham, Bart. *Clerk*: Mr. Arthur Ryder, Church House, Westminster.

### PROVINCE OF YORK.

1. **The Upper House.**—Archbishop of York, *President*; Bishops of Durham, Liverpool, Ripon, Manchester, Carlisle, Chester, Sodor and Man, Newcastle, and Wakefield.

2. **The Lower House.**—*Prolocutor*: Rev. Chancellor T. E. Espin, D.D., D.C.L. **York**—Dean Purey-Cust; Archdeacons R. J. Crosthwaite (Bishop of Beverley), C. C. Mackarness, W. H. Hutchings, and J. R. Eyre; \*Rev. Chancellor Randolph and Canon Blunt (Bishop of Hull); †Rev. Canons Faber, Argles, Watson, Stanbridge, Temple, and Revs. C. N. Gray, J. Gilmore (one vacant). **Durham**—Dean Kitchin; Archdeacons Long and Watkins; \*Rev. Canon Tristram, †Rev. Canons Falconer, Bailly, Savage, and Chancellor Espin. **Carlisle**—Dean Henderson; Archdeacons Prescott, Diggle, and Phillips; \*Canon Ware (Bishop of Barrow), †Rev. Canons Stock, Bell, Sherwen, Ayre, and Bower; (one vacant). **Chester**—Dean Darby; Archdeacons Barber and Woosnam; \*Rev. Canon Feilden; †Rev. Canons Wood and Gore, and Revs. W. E. Torr and S. A. Boyd. **Liverpool**—(no dean); Archdeacons Madden and Taylor; \*(none); †Rev. Canons Jones, Blundell, Penrhyn, and Spooner. **Manchester**—Dean Maclure; Archdeacons Wilson, A. F. Clarke, and Rawstorne; \*Rev. Canon Crane, †Rev. Canons Rogers, Hon. A. T. Lyttelton and Hawkins, Right Rev. F. A. R. Cramer-Roberts (sometime Bishop of Nassau), Revs. C. H. Lomax and S. Hastings. **Newcastle**—(no dean); Archdeacons Hamilton and Martin; \*(none); †Rev. Canons Lister, Waite, Long and Rogers. **Ripon**—Dean Fremantle; Archdeacons Kilner, Danks, and Waugh; \*Canon Gibbon, †Rev. Canons Owen, Eddowes, and Wood, and Revs. R. P. Daniell-Bainbridge, V. J. Ryan, and A. J. G. Nash. **Wakefield**—(no dean); Archdeacons Brooke and Donne; \*(none); †Rev. Canons Grenside, Ivens, and

J. W. Bardsley, and Rev. W. F. Norris. **Sodor and Man**—(no dean); Archdeacon Gill; \*Rev. Canon Moore; †Canon Clarke. *Synodal Secretary*: Rev. Canon Wright, The Rectory, Stokesley, R.S.O., Yorks; *Registrar and Notary*: H. A. Hudson, Esq., Minster Yard, York; *Treasurer*: Canon J. W. Stanbridge.

**Cook, Edward T.**, M.A., was ed. at New College, Oxford, where he attracted attention, both by his scholastic ability and by the speeches which he delivered at the Oxford Union. He was also one of the prime movers in the Palmerston Club. On leaving Oxford, he was for some years *secretary* of the London branch of the *University Extension* movement, and subsequently joined the staff of the *Pall Mall Gazette*. He is an enthusiastic disciple of Mr. Ruskin, and wrote a work entitled "*Studies in Ruskin*" ('90). He has also compiled a "Handbook to the National Gallery," and a companion volume for the "Tate Gallery." He succeeded Mr. Stead as editor of the *Pall Mall Gazette* in '90, and when the paper changed hands in '92 resigned, but resumed work with all his old staff on the *Westminster Gazette*. In '96 he was appointed editor of the *Daily News*.

**Cook Islands Federation.** A group of six islands, with a few islets, situate in the eastern Pacific, between 18° 15' and 21° 47' S. lat., and 157° and 160° W. long. Excepting a few small lagoon islands, this group is the only British possession in the eastern Pacific between Fiji and the Marquesas. The other islands are French. The Cook Islands are very fertile and healthy, with a population of about 8000 Maoris and 150 to 200 Europeans. The chief island is Rarotonga, about 53 miles in circumference, with a population of 3000. The principal products are coffee, copra, and lime-juice, with a considerable export of oranges and other tropical fruits to New Zealand. These exports are capable of large increase as the islands get more settled and cultivated. Exports, '96, £20,709; imports, £25,068. There is a Federal Government, which confines itself to federal work. Each island has its own local government, and raises a local revenue in its own way.

**Coolgardie.** The principal town and headquarters of the rich gold fields in Western Australia (*q.v.*). See also GOLD FIELDS AND PRODUCTION.

### CO-OPERATION.

The co-operative societies of the United Kingdom are united under the **Co-operative Union**, which was established after 1869, the year in which the first Co-operative Congress was held. A **Central Co-operative Board** was then formed, consisting of London and provincial members. This Board now consists of seven sections—the Midland, Northern, North-Western, Scottish (including North of Ireland), Southern, South-Western and Western. The general secretary is Mr. J. C. Gray, and the offices are at Long Millgate, Manchester. These seven sectional Boards meet periodically in their respective districts, and the full Board meets twice every year—on the Saturday before the meeting of the Congress, and once during the Congress. The governing body of the Union is the **United Board**, the members of which are appointed by the above seven sectional Boards as their representatives. This organisation directs and promotes the cause of co-operation.

The number of societies already enrolled under the Union (which enrolment is conditional on the payment of  $\frac{1}{2}d.$  per quarter per member) is about 1060, and the number of registered societies, according to the latest published returns, in Great Britain 1845. The members of these societies number 1,591,455, their share capital is £18,611,658 sterling, sale of goods ('97) £62,287,058; their net profit was £6,717,876, and their investments amounted to £10,817,251. Besides its great distributive business, the **English Wholesale Co-operative Society**, whose headquarters are at Manchester, Newcastle, London and Leicester, engages in the production of boots and shoes at Leicester and Heckmondwike, soap and candles at Irlam, biscuits, sweets, etc., at Crumpsall, preserves, etc., at Middleton, lard, etc., at Hartlepool, woollen goods at Batley and Leeds (clothing factory), corn-milling at Dunston-on-Tyne, furniture at Broughton, and printing and stationery at Manchester. The **Scottish Wholesale Society** at Glasgow, in addition to its distribution, manufactures boots and shoes, shirts, tobacco, and confectionery, and carries on tailoring works, cabinet and printing works, with branches at Dundee, Leith, and Kilmarnock. Banking and shipping business is done by the Wholesale Societies, which own five steam vessels with a registered tonnage of 3313. There are also a Co-operative Newspaper Society and a Co-operative Insurance Society.

During '97, 127 new co-operative societies were registered. Out of the 127, 27 societies were distributive, 15 productive, 47 agricultural and dairying, and 38 for special objects. The application of co-operation to **Farming** has been much discussed among co-operators of late years: 37 co-operative societies (not including those holding less than 10 acres of land) in England have engaged in farming, and there are three strictly **Farming Societies**—the North Seaton Society, Northumberland, 28 acres, capital £380; the Assington Society, Suffolk, 222 acres, capital £2313; and the Coln St. Alwyn's Society, Gloucester, 242 acres, capital £1014. Altogether co-operation under this form deals with 4414 acres, with a capital of £88,912. The rent paid in '97 was £6127. The profits were £3736, as against £1012 in losses. There are also 12 **Agricultural Supply Associations** in England and 67 in Ireland, with a total of 6542 members, £70,661 capital, and sales £133,783. In Ireland co-operative dairying is represented by above a hundred societies with 4195 members, £28,399 share capital, and £274,150 trade during the year. Great attention is paid by the Union to propagandist and educational work. The examinations held under the management of the Educational Committee of the Co-operative Union on Auditing, Bookkeeping, and the Principles of Co-operation attract an increasing number of students every year. By means of local festivals, social meetings, concerts and lectures, illustrated by lantern slides, the principles of co-operation are being extensively made known among the working classes of the country. The fifteenth annual report of the **Women's Co-operative Guild** shows that 21 new branches were started during the year, bringing the total up to 237, with a membership of 12,103. The thirtieth Annual Congress of delegates from Co-operative Societies in Great Britain and Ireland was held at Peterborough in May and June '98, the total number present

being about 1000. The President was Mr. D. M'Innes, of Lincoln, and the inaugural address was delivered by Dr. Creighton, Bishop of London. Among the subjects discussed during the sitting of the Congress were the representation of co-operators in Parliament, Co-operative Credit-Banking, Co-operation in Agriculture, and Education (discussion presided over by the Bishop of Peterborough). The next meeting of the Congress will take place at Liverpool, in Whit-week, '99. A new departure was taken in Aug. '95, by the formation of an International Co-operative Alliance. The fourth International Congress was held at Neustadt, in Germany, in Aug. '98.

**Cooper's Hill College.** See ROYAL INDIAN ENGINEERING COLLEGE.

**Cooper, Thos. Sidney, R.A.,** was b. 1803, at Canterbury. After struggling against adversity in his early life, in '23 he entered the R.A. school, through the influence of Sir Thomas Lawrence, and subsequently set up as a drawing master at Canterbury. Travelled to Brussels, where, under the auspices of Verboeckhoven, the animal painter, he became a very successful artist. First exhibited at the Academy in '33, becoming A.R.A. in '45 and R.A. in '67. As an animal painter he is supreme. His "Cattle Reposing" and "King of the Meadows" are amongst the best of his numerous paintings. Mr. Cooper's works have been more frequently copied, perhaps, than those of any other living artist. After becoming famous he returned to his native city, in the affairs of which he takes a lively interest. He presented its corporation with an Art Institute in '82. He has written his reminiscences.

**Copper.** See TRADE, '98.

**Copyright, English.** The first English Copyright Act, passed in the reign of Queen Anne, gave the author an absolute right of fourteen years, with an additional fourteen years in case of the author or his representative surviving this term. By an Act of George III. the period was increased to twenty-eight years, and the remainder of the author's life, if any. The Act at present in force (5 & 6 Vict., c. 45) fixes copyright at forty-two years, or the period of the author's life, with a grace of seven years, whichever is the longer. Copyright covers literary, dramatic, artistic, and musical property. The Act provides that the owner of a copyright shall present one copy of the article protected, if published, to the Library of the British Museum, and one copy each, if demanded, to the Bodleian Library, Oxford, the University Library, Cambridge, the Advocates' Library, Edinburgh, and the Library of Trinity College, Dublin. A Select Committee of the House of Lords sat to consider the law of copyright, and two bills introduced by Lords Herschell and Monkswell for the purpose of amending it, during '98. See INTERNATIONAL COPYRIGHT, LAW, '98, and SESSION, sec. 46.

**Copyright in Government Publications.** See previous eds.

**Corrupt and Illegal Practices Prevention Act, '95.** See eds. '96 and '97.

**Corsica.** An island of the Mediterranean, separated from Sardinia by the Strait of Bonifacio. Area, 3376 sq. m.; pop. 278,501. Chief town, Ajaccio.

**Costa Rica** is the southernmost republic of Central America. Capital, San José. It is governed by a President and a Chamber of 32

Representatives, each elected for four years by the "respectable" inhabitants, half of the deputies retiring every two years. Constitution promulgated in 1870, but frequently interrupted by pronunciamientos, and practically suspended from '70 to '82. Education compulsory and free. All religions tolerated. Chief exports, coffee and bananas. Valuable metals exist in various parts of the country, and mining industry is making progress. Area, 37,000 sq. m.; estimated pop. 202,661. Revenue, '97-8, £1,634,820; expenditure, £1,663,090. Foreign debt, £2,000,000. Internal debt, £225,029. Imports, '97, £1,692,189; exports, £1,094,954. For Ministry, etc., see DIPLOMATIC; see also CENTRAL AMERICA.

**Cottage Arts Association.** See HOME ARTS ASSOCIATION.

**Cotton.** See TRADE, '98.

**Countess of Huntingdon's Connexion, The,** owes its existence to the religious revivals in the eighteenth century, with which Whitefield and the Wesleys are so prominently identified. The Countess of Huntingdon (d. 1791) had been a member of the Established Church, but finding that the parochial system interfered with her intense desire to have the gospel preached in every place in England, she cast in her lot with the Nonconformists. The liturgy formed part of the religious worship in her chapels, and it is still used in some of them. The Connexion has never been numerically strong. During life her control was absolute. Her successors were unable to exercise a similar control; and although a trust was created a few years after her death, many leasehold chapels lapsed into other hands. At one time the preaching stations numbered over a hundred; now those under the Trustees amount to over thirty, not including village stations vigorously maintained by the principal churches, and Countess's chapels which are beyond the control of the Trustees. Cheshunt College, of which the Rev. O. C. Whitehouse, M.A., is the Principal, has been rebuilt. New Spa Fields Church has been erected. The Connexion chapels generally have been adapted to the religious requirements of the age, and the Trustees have faithfully endeavoured to maintain an evangelical ministry in every chapel of the Connexion. All its ministers have to subscribe to the "Fifteen Doctrinal Articles" of the Church of England, as do the professors of Cheshunt College and the students, with a view of carrying out the Countess's idea—the continuance of an earnest evangelical ministry. Secretary, Rev. W. M. Lennox. Offices, 36, Finsbury Pavement, E.C.

## COUNTY COUNCILS.

Full particulars as to the constitution and powers of County Councils will be found in the article on LOCAL GOVERNMENT. Under this heading will be found a list corrected up to date, of the chairmen, clerks, and other principal officers of the County Councils of England and Wales. The constitution of the LONDON COUNTY COUNCIL is given under that heading, and there are added various particulars of interest, including a brief summary of the more important proceedings of the Council during the past year.

**Anglesey.**—Chairman, David Rees; Clerk, J. Lloyd Griffith, Anglesey; Chief Constable, Lewis Prothero, Menai Bridge.

**Bedford.**—Chairman, His Grace the Duke of Bedford; Clerk, W. W. Marks, Bedford; Chief Constable, Lt.-Col. F. J. Josselyn; Surveyor, W. H. Leete.

**Berks.**—Chairman, W. G. Mount, M.P.; Clerk, J. T. Morland, Reading; Deputy Clerk, F. Morland, Reading; Chief Constable, Col. A. Blandy; Surveyors (Bridges and Buildings), J. Morris, Reading; (Highways), H. J. Tollit, Oxford; Treasurer, H. Collins, Reading.

**Brecknockshire.**—Chairman, C. Evan Thomas; Clerk, H. Edgar Thomas, Brecon; Chief Constable, E. R. Gwynne; Surveyor, William Williams.

**Bucks.**—Chairman, The Rt. Hon. Lord Cottlesloe; Clerk, W. Crouch, Aylesbury; Chief Constable, Major Otway Mayne; Surveyor, R. J. Thomas.

**Cambridgeshire.**—Chairman, A. Sperling, LL.M., J.P.; Clerk, H. Wortham, Cambridge; Deputy Clerk, A. Wright, LL.M., B.A.; Chief Constable, C. Stretten; County Surveyor, W. M. Fawcett, M.A.; Treasurer, E. H. Parker, M.A.

**Cardiganshire.**—Chairman, J. C. Harford; Clerk, H. C. Fryer, Aberystwith; Chief Constable, H. Evans; Surveyors, R. Lloyd, D. Davies.

**Carmarthenshire.**—Chairman, Professor D. E. Jones; Clerk, T. Jones, Llandovery; Chief Constable, W. Philipps, Llandilo; Surveyors, W. B. Davies, D. Philipps.

**Carnarvonshire.**—Chairman, J. I. Davies, Esq.; Clerk, J. H. Bodvel-Roberts, Carnarvon; Chief Constable, Lt.-Col. A. A. Ruck; Surveyor, E. Evans.

**Cheshire.**—Chairman, Col. G. Dixon, Astle Hall, Chelford, Cheshire; Clerk, R. Potts, Chester; Chief Constable, Lt.-Col. J. H. Hamersley, Chester; County Surveyor, H. F. Bull, Chester Castle.

**Cornwall.**—Chairman, Earl of Mount-Edcumbe; Clerk, Christopher L. Cowlard, Bodmin. Chief Constable, Richard M. Hill; Surveyors, S. W. Jenkin, L. T. Hickey.

**Cumberland.**—Chairman, H. C. Howard; Clerk, C. B. Hodgson, Carlisle; Chief Constable, Sir John Dunne, D.L.; County Surveyor, G. J. Bell; Financial Secretary, William Dobinson.

**Denbighshire.**—Chairman, Thomas Gee; Clerk, Lt. Adams; Chief Constable, Major T. J. Leadbetter; County Surveyor, R. L. Williams.

**Derbyshire.**—Chairman, Sir H. Wilmot, Bart., V.C., K.C.B.; Clerk, N. J. Hughes-Hallett, Derby; Chief Constable, Captain H. C. Holland; Surveyor, J. S. Storey; County Medical Officer of Health, S. Barwise, M.D. (Lond.), D.P.H.; County Treasurer, C. H. Coulson, Derby.

**Devonshire.**—Chairman, Lord Clinton; Clerk, H. Michelmores, Exeter; Chief Constable, F. R. C. Coleridge; Surveyors, C. G. S. Acock, H. Masterton.

**Dorset.**—Chairman, Viscount Portman, Bournemouth; Clerk, E. A. Ffooks, Sherborne; Chief Constable, Capt. D. Granville, Dorchester; Surveyor, W. J. Fletcher, Wimborne.

**Durham.**—Chairman, S. Storey, D.L.; Clerk, R. Simey, Durham; Deputy Clerk, G. I. Simey; Chief Constable, Lt.-Col. J. H. Eden; Surveyor, W. Crozier.

**Ely (Isle of).**—Chairman, W. C. Little; Clerk, E. H. Jackson, Wisbech; Deputy Clerk, E. McD. C. Jackson, Wisbech; Chief Constable, Lt.-Col. W. B. Ferris, Ely; County Surveyors (Bridges and Buildings), R. R. Rowe, Cambridge;

(Northern Roads District), H. F. Simpson, Wisbech; (Southern Roads District), Herbert Leete, Ely; Treasurer, F. M. Bland, Wisbech.

**Essex.**—Chairman, A. Johnston; Clerk, H. Gibson; Deputy Clerk, H. W. Gibson; County Treasurer, R. Woodhouse; Chief Constable, Capt. E. M. Showers; County Surveyor, H. Stock; Surveyor of Main Roads, P. J. Sheldon; County Accountant, F. H. Owers; Medical Officer of Health, J. C. Thresh.

**Flintshire.**—Chairman, Rt. Hon. Lord Kenyon; Clerk, T. T. Kelly, Mold; Chief Constable, Maj. R. T. Webber; Surveyor, David Williams.

**Glamorgan.**—Chairman, J. Blandy Jenkins; Clerk, T. Mansel Franklen, Cardiff; Chief Constable, L. Lindsay, Cardiff; Surveyor, T. L. Edwards, Bridgend; Medical Officer, W. Williams, M.A.M.D., Penarth.

**Gloucestershire.**—Chairman, Sir J. E. Dorington, Bart., M.P.; Clerk, E. T. Gardom, Shire Hall, Gloucester; Chief Constable, Adm. H. Christian, Cheltenham; Surveyor, R. Phillips, Shire Hall, Gloucester.

**Hampshire (or Southampton).**—Chairman, The Earl of Northbrook, G.C.S.I.; Clerk, Henry Barber, LL.B., The Castle, Winchester; Deputy Clerk, G. A. Webb; Chief Constable, Major St. A. B. Warde, Hants Constabulary, Winchester; County Surveyor, W. J. Taylor, C.E., The Castle, Winchester; County Treasurer, G. E. Yonge, The Castle, Winchester.

**Herefordshire.**—Chairman, Col. Prescott-Decie; Clerk, J. F. Symonds, Hereford; Chief Constable, Capt. the Hon. E. S. Stanhope.

**Hertfordshire.**—Chairman, Earl Cowper, K.G.; Vice-Chairman, Sir John Evans, K.C.B.; Clerk, Charles Elton Longmore, Hertford; Chief Constable, Lt.-Col. Daniell, Hatfield; Surveyor, U. A. Smith, 41, Parliament Street, Westminster, S.W.

**Huntingdonshire.**—Chairman, Earl of Sandwich; Clerk, E. Maule; Deputy and Acting Clerk, J. Percy Maule; Chief Constable, Maj. H. G. Rooper; Surveyor, E. Borissow.

**Isle of Wight (Administrative County of).**—Chairman, Godfrey Baring; Vice-Chairman, Robey F. Eldridge; Clerk, William H. Wooldridge; Assistant Clerk, Chas. E. Nobbs; Chief Constable, T. O. H. Lees; Surveyor, F. Newman; Organising Secretary for Technical Education, Professor I. D. Custance.

**Kent.**—Chairman, Sir J. F. Lennard, Bart.; Clerk, W. B. Prosser, Maidstone; Chief Constable, Lt.-Col. H. M. A. Warde; Surveyor, F. W. Ruck.

**Lancashire.**—Chairman, Rt. Hon. Sir J. T. Hibbert, K.C.B.; Clerk, F. C. Hulton, Preston; Deputy Clerks, S. C. H. Sadler and J. P. Muspratt, Preston; Chief Constable, Lt.-Col. H. M. Moorsom, Preston; Medical Officer, E. Sergeant, Preston; County Bridgemaster, W. H. Radford; Surveyor, W. H. Schofield.

**Leicestershire.**—Chairman, Hussey Packe, Esq.; Clerk, W. J. Freer, Leicester; Chief Constable, E. Holmes; Surveyor, W. B. Smith.

**Lincolnshire (Holland Division).**—Chairman, Alderman G. S. Mossop; Clerk, F. T. White, Boston; Deputy Clerk, H. Chaderton Johnson; Chief Constable, Capt. P. B. Bicknell; Surveyors, Lewis Starkie, J. T. Peacock.

**Lincolnshire (Kesteven Division).**—Chairman, Sir W. E. Welby-Gregory, Bart., Denton Manor, Grantham; Clerk, J. Phillips, Stamford; Chief Constable, Capt. Bicknell, Lincoln; Surveyor, H. Kirk, Sleaford.

**Lincolnshire** (Lindsey Division).—Chairman, William Embleton-Fox, Northorpe Hall, Lincoln; Clerk, C. Scorer, Lincoln; Chief Constable, Capt. P. B. Bicknell; Surveyor, J. Thropp, C.E.; Treasurer, Alexander Samuel Leslie Melville, Lincoln.

**London**.—See separate article LONDON COUNTY COUNCIL.

**Merionethshire**.—Chairman, Roger Hughes; Clerk, Robert Jones, Portmadoc; County Treasurer, John Richards, Dolgelly; Chief Constable, Major T. W. Best, Barmouth; Surveyor, J. M. Jones, Trawsfynydd.

**Middlesex**.—Chairman, R. M. Littler, C.B., Q.C.; Deputy-Chairman, Montagu Sharpe, Esq.; Clerk, Sir R. Nicholson; Deputy-Clerk, W. G. Austin, Guildhall, Westminster.

**Monmouthshire**.—Chairman, E. Grove; Clerk, H. Stafford Gustard, Newport; Chief Constable, Victor Bosanquet, Abergavenny; Surveyor, W. Tanner.

**Montgomeryshire**.—Chairman, A. C. Humphreys-Owen M.P.; Clerk, G. D. Harrison, Welshpool; Chief Constable, R. W. Hughes; Surveyor, G. A. Hutchins.

**Norfolk**.—Chairman, R. T. Gurdon; Clerk, C. Foster, Norwich; Deputy Clerk, G. C. Davies; Chief Constable, P. Pigott, D.L.; Surveyor, T. H. B. Heslop; Technical Organiser, Edward Pillow.

**Northamptonshire**.—Chairman, S. G. Stopford Sackville, Esq., Drayton House, Thrapston; Clerk, H. P. Markham, Northampton; Chief Constable, J. D. Kellie MacCallum, County Hall, Northampton; Surveyor, E. Law, Northampton.

**Northumberland**.—Chairman, Rt. Hon. the Earl Percy; Vice-Chairman, Watson Askew Robertson, Esq., Ladykirk, Northam-on-Tweed; Clerk, S. Sanderson, Newcastle-on-Tyne; Deputy Clerk, C. D. Forster, Newcastle-on-Tyne; Chief Constable, Capt. H. D. Terry, Morpeth; County Surveyor, H. S. Kynnersley, Moot Hall, Newcastle; Medical Officer, Dr. J. W. Hemmings, Moot Hall, Newcastle; Accountant, W. H. Lloyd, Moot Hall, Newcastle; Secretary for Technical Education, Charles Williams, Moot Hall, Newcastle.

**Nottinghamshire**.—Chairman, Lord Belper; Clerk, J. Hind, 20, Fletcher Gate, Nottingham; Chief Constable, Capt. W. H. Tomasson; Surveyor, E. P. Hooley.

**Oxfordshire**.—Chairman, Viscount Valentia, M.P.; Clerk, T. M. Davenport, M.A., Oxford; Chief Constable, Lt.-Col. Hon. E. A. Holmes-a-Court; Surveyor, H. J. Tollit.

**Pembrokeshire**.—Chairman, Judge W. S. Owen; Clerk of the Peace, William Davies George; Chief Constable, T. Ince Webb-Bowen; Surveyor, T. George.

**Peterborough** (County Soke of), Northants.—Chairman, Col. C. I. Strong; Clerk, Leonard J. Deacon, Peterborough; Deputy Clerk, Walter J. Deacon; Chief Constable, J. D. K. McCallum, County Hall, Northampton; Surveyor, J. B. Williams, Borough Fen, Peterborough; Treasurer, Henry Pank, Peterborough.

**Radnor**.—Chairman, C. C. Rogers; Clerk, E. Wood, Rhayader; Deputy Clerk, T. W. Harding; Chief Constable, Captain Fullarton James; Surveyor, S. W. Williams.

**Rutlandshire**.—Chairman, Earl of Gainsborough; Clerk, B. A. Adam, Oakham; Chief Constable, W. Keep; Surveyor, J. Richardson.

**Shropshire**.—Chairman, J. Bowen-Jones; Clerk, F. C. Peele, Shrewsbury; Deputy Clerk,

R. S. Cleave, Shrewsbury; Chief Constable, Capt. G. Williams-Freeman; Surveyor, A. T. Davis, C.E.

**Somerset**.—Chairman, The Rt. Hon. Sir R. H. Paget, Bart.; Clerk, W. Dunn, Frome; Chief Constable, Capt. C. G. Alison, Glastonbury; Surveyor, W. J. Willcox, 1, Belmont, Bath; Treasurer, W. C. King, Weston-super-Mare.

**Staffordshire**.—Chairman, Earl of Harrowby; Vice-Chairman, Frank James; Clerk, M. F. Blakiston, Stafford; Chief Constable, Capt. Hon. G. A. Anson; Surveyor, W. H. Cheadle; County Medical Officer, Dr. George Reid; Treasurer, P. H. Harston; Surveyor (Main Roads), J. Moncur, A.M.I.C.E., Stafford.

**Suffolk** (East).—Chairman, Lord Rendlesham; Clerk, J. Cherry; Deputy and Acting Clerk, A. Townshend Cobbold; Chief Constable, Maj. C. H. J. Heigham; Surveyor, H. Miller, M.I.C.E.

**Suffolk** (West).—Chairman, Col. N. Barnardiston; Clerk, J. Cherry; Deputy and Acting Clerk, A. Townshend Cobbold; Chief Constable, Maj. C. H. J. Heigham; Surveyor, F. Whitmore.

**Surrey**.—Chairman, E. J. Halsey; Clerk, Sir R. H. Wyatt, D.L., County Hall, Kingston-on-Thames; Deputy Clerk, T. W. Weeding; Chief Constable, Capt. H. C. Hastings; Surveyor, F. G. Howell.

**Sussex** (East).—Chairman, E. Eager; Clerk, F. Merrifield, Lewes; Chief Constable, Major H. G. Lang, Lewes; Surveyor, F. J. Wood, Lewes.

**Sussex** (West).—Chairman, Duke of Richmond and Gordon, K.G.; Clerk, F. Merrifield, Lewes; Chief Constable, Capt. G. R. B. Drummond, Horsham; Surveyor, W. B. Purser, Horsham.

**Warwickshire**.—Chairman, J. S. Dugdale, Q.C.; Clerk, A. S. Field, Leamington; Chief Constable, Capt. J. T. Brinkley; Surveyor, J. Willmot; Treasurer, S. C. Smith, Lloyds Bank, Ld., Warwick.

**Westmorland**.—Chairman, J. Cropper; Clerk, J. Bolton, Kendal; Chief Constable, Sir J. Dunne; Surveyor, J. Bintley; Treasurer, G. E. Cartmel.

**Wiltshire**.—Chairman, Lord Edmond Fitzmaurice, M.P.; Clerk, R. W. Merriman; Deputy Clerk, H. H. Copnall; Chief Constable, Capt. Sterne, R.N.; Surveyor, C. S. Adye.

**Worcestershire**.—Chairman, J. W. Willis-Bund; Clerk, S. Thornely; Worcester; Chief Constable, Lt.-Col. G. L. Carmichael; Treasurer, A. C. Cherry; Medical Officer, G. H. Fosbrooke, D.P.H. (Cantab.); County Surveyor, H. Rowe.

**Yorkshire** (East Riding).—Chairman, Sir C. Legard, Bart.; Clerk, J. J. Bickersteth, Beverley; Chief Constable, Major H. J. Bower; Surveyor, Alfred Beaumont.

**Yorkshire** (North Riding).—Chairman, John Hutton, M.P.; Clerk, W. C. Trevor, Northallerton; Chief Constable, Major R. L. Bower, C.M.G.; Surveyor, W. Stead.

**Yorkshire** (West Riding).—Chairman, Alderman Charles A. Milnes Gaskell, Thornes House, Wakefield; Clerk, F. A. Darwin, Wakefield; Deputy Clerk, W. Vibart Dixon; Treasurer, Percy Tew, Heath Hall, Wakefield; Chief Constable, Capt. T. S. Russell, Wakefield; Surveyor, J. Vickers Edwards, Wakefield; Medical Officer, Dr. J. R. Kaye; Accountant, W. Clarke, Wakefield.

**County Councils Association**. Secretary, J. R. Fitz-Gerald. Office, 9, Palace Chambers, Bridge Street, Westminster, S.W.

**County Courts.** These are now regulated by the *County Courts Act 88*, 51 & 52 Vict., c. 43, which amended and consolidated all the former Acts. The whole of England and Wales is divided into districts or circuits, which are presided over by judges, who hold courts in certain towns of each district once a month or so; in London and in some large towns courts are held on several days in each week. The judge, appointed by the Lord Chancellor, must be a barrister of at least seven years' standing; the registrar of each court, appointed by the judge, must be a solicitor of at least five years' standing; the high bailiff, who is responsible for the service of the process of the Court, and for levying executions, etc., is also appointed by the judge. This post is in many cases held by the registrar. Speaking generally, the jurisdiction of the court extends to all actions where the sum claimed does not exceed £50, though actions for malicious prosecution, libel, slander, seduction, and breach of promise are excluded. The latter may, however, be sent down from the High Court and heard in the County Court. Actions of contract up to £100, and of tort up to any amount may be remitted from the High Court to the County Court. Contract cases are remitted on the application of either party, tort cases on the affidavit of the defendant that in the event of an adverse verdict the plaintiff would be unable to pay the costs of the action. There is jurisdiction in equity, such as administrations of estates, trusts, dissolution of partnerships, foreclosure of mortgages, specific performance, etc., where the amount involved does not exceed £500. Bankruptcy, the Employers' Liability Act, and Tithes, are in the exclusive jurisdiction of the County Court. There is a limited jurisdiction in Admiralty: (1) the claim for salvage, where the property saved does not exceed £1000, or where, irrespective of such value, the amount claimed does not exceed £300; (2) towage, etc., not exceeding £150; (3) damage to cargo by collision, or otherwise, not exceeding £300. Only a few courts held in towns situate on the coast, appointed by an Order in Council, have Admiralty jurisdiction. The procedure is very simple, there are no pleadings, process is usually served by the bailiffs, but may in some cases be served by the parties or their solicitors. On the day fixed for the trial the parties appear, either in person or by solicitor or counsel, and the case is heard and determined by the judge or registrar. Cases of contract where the defendant does not appear are heard by the registrar; who also settles the terms of payment where the debt is admitted; he also has power to try disputed cases by consent of the parties, where the sum claimed does not exceed £2. A jury of five persons may be summoned if the amount involved exceed £5, or if under that amount by leave of the judge. The Court fees payable are 1s. in the £ for each £ claimed on entering the plaint, and 2s. in the £ for the hearing, with a maximum of 21s. and 40s. respectively. The judge has power under the Debtors Act '69 to commit to prison for a term not exceeding six weeks any person who has the means to satisfy the debt and has failed to do so. There is an appeal to the High Court on a question of law, but not of fact, in cases where more than £20 is claimed, but where less than that sum is claimed leave to appeal must be obtained from the judge.

**Courtney, Rt. Hon. L. H., M.P.** See under COMMONS.

**Cowen, Frederic Hymen**, one of the most popular of English composers, was b. in Kingston, Jamaica, 1852. From an early age he was a pupil of Sir Julius Benedict and Sir John Goss, and further studied at Leipzig and Berlin. His most esteemed productions are his symphonies, his "Language of Flowers" orchestral suite, and his cantatas "The Rose Maiden," "The Sleeping Beauty" (specially composed for the Birmingham Festival of '85), and "The Water Lily" (first performed at the Norwich Festival, Oct. 6th, '93). Mr. Cowen's other important works include two oratorios, "The Deluge" and "Ruth," and four operas, "Pauline," "Thorgrim," "Signa," first produced at Milan in Nov. '93, and "Harold," produced at Covent Garden in June '95. A sacred cantata, "The Transfiguration," was composed for the Gloucester Festival in Sept. '95. His later works comprise a *suite de ballet*, "In Fairyland," "Four English Dances," Symphony No. 6 (The Idyllic), a *Concertstück* for piano and orchestra, on the "Ode to the Passions," for chorus and orchestra, composed for the Leeds Festival (Oct. '98). Mr. Cowen has also written over two hundred songs, duets, etc., many of which have become very popular. He was elected conductor of the Philharmonic Society in '88, but resigned in '92. He has now succeeded the late Sir Charles Hallé as conductor of the Manchester Subscription Concerts and the Liverpool Philharmonic Society, and is also conductor of the Bradford Festival Choral Society. Address: 73, Hamilton Terrace, N.W.

**Crane, Walter**, poet and painter, was b. 1845 and first exhibited at the Royal Academy '62. Has published various illustrated books, and is an authority on decorative art. Mr. Crane was a member of the old Dudley Gallery Committee '66-81, elected a member of the Institute of Painters in Water Colours in '82, resigned later, now belongs to the Old Society of Painters in Water Colours, and is an ardent advocate of the establishment of a really national institution of art, regarding the reform of the Royal Academy as hopeless. He was the first President of the Arts and Crafts Exhibition Society, and since the death of Mr. William Morris, whom he joined in his socialist propaganda, he has again been elected President. He has published "Walter Crane's Toy Books," and many poems illustrated by himself, the principal one being "The Sirens Three." An interesting exhibition of his work was held in London during '91, which has since made a tour in the United States, Germany, and Austria, and will go to Copenhagen, Norway, Sweden, and Switzerland before returning to England. Among his principal pictures are "The Renaissance of Venus," "The Bridge of Life," "Neptune's Horses," "Freedom," "The Chariots of the Hours," and "The World's Conquerors" ('98). In '92 he published "The Claims of Decorative Art," in '96 "Decorative Illustration of Books," and in '98 "The Basis of Design." He was Art Director to the city of Manchester '93-6, and was appointed Principal of the Royal College of Art in '98. He has illustrated an edition of Spenser's "Faerie Queene" and "The Shepherd's Calendar."

**Crawford, F. Marion**, the novelist, only son of Thomas Crawford, the American sculptor,

was b. in Italy in August '54. He was educated at St. Paul's School, U.S.A., and Trin. Coll., Cambridge, and spent a great portion in his early life in India. He now lives partly of New York and partly in Italy, where the plot of more than one of his novels is laid. His works include "Mr. Isaacs," "Tale of a Lonely Parish" ('86), "Saracinesca," "Paul Patoff" ('87), "Dr. Claudius," "Marzio's Crucifix" ('87), "With the Immortals" ('88), "Marzio's Crucifix," which depicts the life of an engraver on silver, and more recently "Greifenstein," "Sant Ilario," "A Cigarette-Maker's Romance" ('90), "Khaled," "The Witch of Prague," "Don Orsino," "Pietro Ghisleri," "The Children of the King" ('93), "Katharine Lauderdale" ('94), "The Ralstons" ('95), "Adam Johnstone's Son" ('95), "Taquisara" ('96), "A Rose of Yesterday" and "Corleone" ('97), all of which have quite justified the already high reputation of their author. Address: 65, Fifth Avenue, New York, and Sant' Agnello di Sorrento, Italy.

**Cremation.** The disposal of the human body after death by the process of cremation, which rapidly resolves the body into its component elements, in an absolutely innocuous manner, is now largely practised throughout the civilised world, where formerly burial in the earth only was carried out. This modern movement in its favour commenced about fifteen years ago. Crematoria have been established in this country at Woking, Manchester, and Glasgow. Cremation societies have been instituted in every European country, and many of the states of America possess them also, and cremation in these states has become a regular practice. The cremation of an adult by either of the two processes employed is completed in about an hour and a half, and the ashes, which are perfectly white, weigh about 4 lb. The cost of reduction, were it to become common, would be less than thirty shillings; but at present it is more than treble this sum, owing to the necessity of heating the crematory every time for each cremation. **Hon. Secretary of Cremation Society, J. C. Swinburne Hanham, 8, New Cavendish Street, London, W.**

## CRETE.

Crete is an island in the Mediterranean, lying to the south of the Ægean Sea and Archipelago, and appertaining to Turkey. **Area** about 3000 sq. m.; **pop.** 370,000. Chief cities, Candia (pop. 25,000); Canea (pop. 15,000); and Retimo. There are about 70,000 Moslems and 300,000 Christians. The island was conquered in 1669, but has never really submitted to the Turks, and has continually risen in insurrection against them. In 1868, after one of these insurrections, the Organic Statute was drawn up, and thus, in form at least, a fair amount of self-government was secured to the island. But, as usual, the Turks did not keep their promises, and another insurrection broke out in '77. England then intervened, and the Pact of Halepa was drawn up, inaugurating the Assembly and a parliamentary régime. War broke out again in '89, and Turkey, having mastered the island, withdrew many of the provisions of the Pact of Halepa, and limited the number of members of the Assembly, as well as their powers. From this time onwards Mussulman Valis ruled the island, and the discontent amongst

the Christians smouldered for a time, till, at the end of '95, it burst into a flame. The pressure brought by the Ambassadors at Constantinople to bear upon the Porte resulted in the restoration of the Constitution of Halepa. The National Assembly was opened, a draft scheme of reforms was drawn up by the Ambassadors and accepted by the Sultan, and Georgi Pasha Berovitch was appointed as the first Christian Governor-General. The reforms, however, were not carried out. Indeed, the Sultan, by means of his agents, stirred up the Mahomedans to make them unworkable, and in the midst of the fighting and disturbance thus caused, came the intervention by Greece early in '97, and the landing of a Greek force. The Powers, however, disapproved of this action, and ultimately the Greek troops were withdrawn, the Powers undertaking to set up autonomy under the nominal suzerainty of the Sultan, and to secure the withdrawal of the Turkish forces also.

**History, '98.**—At a conference of the Ambassadors at Constantinople (Dec. 27th, '97), the Russian Ambassador suggested that Prince George of Greece should be appointed Governor of Crete. It was understood that in **January** the Russian Ambassador at Constantinople strongly urged on the Sultan that it was the Tsar's personal wish that the Prince should be appointed. The Sultan, however, took strong objection to the plan, and as Germany and Austria-Hungary also opposed it, in spite of the approval of Great Britain, France, and Italy, it fell through. The German troops and the German battleship *Oldenburg* withdrew from Crete, Germany thus relinquishing her part in the international administration of the island (**March 16th.**). The Austrian troops also left (**April 12th.**). The Admirals addressed a Note to the Cretan Assembly (**July 15th.**) explaining that an executive committee, to be nominated by the Assembly, would administer those parts of the interior of the island under the influence and control of the Assembly, the Admirals themselves administering the coast regions occupied by European troops. This scheme, though temporary, provided for the administration of justice, for the formation of a force of *gendarmérie*, and the framing of a Budget. The Assembly unanimously accepted the scheme in principle (20th), with the reservation that the Turkish troops should be withdrawn. Attempts were made by the Porte to increase the Turkish garrison, but they were sternly repressed by the Admirals. Modifications in the scheme having been agreed to by the Admirals, with a declaration from them to their Governments suggesting the necessity of the withdrawal of the Turkish troops, the Assembly elected an Administrative Council under the presidency of Dr. Sphakianaki (28th). Nothing, however, was done for some time, owing to the lack of funds necessary for carrying on the administration, and the neglect of the Powers to provide them. This excited great dissatisfaction and led to much disorder. Eventually the Powers authorised the grant to the Assembly of a tithe of the export revenue (**Aug. 26th.**). Then the discontent amongst the Mahomedan refugees in Candia broke out in open violence (**Sept. 6th.**). The collection of the tithe led to the actual outbreak, in which nearly a hundred British soldiers were killed or wounded, and close upon a thousand Christians

massacred. The British Vice-Consul was burned in his house, the town was set on fire, and bombarded by the British ships of war. The Turkish troops not only did nothing to aid the British troops, but assisted the Mahomedans against them, and joined in pillaging the town. The Executive Committee, in an official communication to the Admirals, ascribed the outbreak to the Turkish troops, and resigned until the Turkish Administration should be withdrawn entirely. The Admirals requested reinforcements from the Powers, and presented a formal demand for the withdrawal of the Bashi-Bazouks from Candia and of the Turkish authorities and troops from the island. Admiral Noel, the British Commander, also delivered an ultimatum to Edhem Pasha, commanding the Turkish troops, demanding the delivery of the ringleaders in the outbreak within 48 hours, and the transmission of the tithes collected since Sept. 3rd, with the surrender of the forts and ramparts commanding the town. The ringleaders were given up (15th), and the other terms were ultimately complied with, owing to the uncompromising attitude of Admiral Noel. Edhem Pasha left Candia (29th), and was succeeded by Colonel Chefki Bey. A Collective Note signed by Great Britain, France, Russia, and Italy, was presented to the Sultan (Oct. 5th), demanding the withdrawal of the Turkish troops within one month. The Sultan agreed (11th) but made reservations which the Powers refused to accept, and ultimately he submitted unconditionally. Seven Mahomedan prisoners convicted of the murder of two privates of the Highland Light Infantry were hanged at Candia (18th); and this salutary act, followed by other executions, made a tremendous impression on the populace. The Admirals arranged that, pending the appointment of a Governor, the administration should be carried on by themselves in the towns and mixed municipalities to be nominated; that a *garde civile* should be established; that in the interior a European *gendarmerie* should be established, with the *garde civile* for patrols and military excursions; that justice should be exclusively military, and the hearing of civil and commercial cases be postponed; that the Health Board, the telegraphs, and the European post-offices should be retained and the Ottoman post be abolished; and that the Central Treasury should be at Canea. The Sultan, taking advantage of the tension between Great Britain and France, demanded, when the bulk of the Turkish troops had left (31st), that a small Turkish garrison should be retained, an annual tribute paid to him, and that the administration of the law should be in his name. The evacuation was completed (Nov. 6th), and the Russian Minister at Constantinople formally proposed the appointment of Prince George of Greece as High Commissioner of Crete. At both Candia and Retimo a display of force had to be made to get the Turkish troops on board the transports.

### CRICKET, '98.

The cricket season may be said to have continued during the winter of '97, for, owing to the Australian matches which were going on, the excitement was kept up just as if they had been played in England. The results of the matches were as follows:—England won the

1st by 9 wickets, Australia won the 2nd by an innings and 55 runs, the 3rd by an innings and 13 runs, the 4th by 8 wickets, and the 5th by 6 wickets. In the match against 13 of Queensland and New South Wales, England made 636 in one innings; the match, however, was drawn. Mr. Stoddart's XI. beat Victoria by 2 wickets in Nov., and by 7 wickets in March. They beat New South Wales by 8 wickets, but the latter won the return match by 231 runs. The XI. closed their tour on March 23rd with a return match with South Australia, which ended in a draw. Mr. W. G. Grace's Jubilee on July 16th was made the occasion of a great celebration in his honour, and the Gentlemen v. Players match was arranged for that day. Special honour was rendered to one who has done so much for good all-round cricket, and who, in view of the long time that he has held his position, is the most noted cricketer that has ever lived. He is by common consent looked upon as the champion, and after 35 years in the cricket field is yet one of the most formidable players whom it is possible to put into an XI. He played for the All England XI. in his 16th year. It is needless to say that Mr. Grace was received with unbounded enthusiasm before, during, and after the match, in which he scored 43 and 31 not out. The Players beat the Gentlemen by 137 runs. Mr. W. G. Grace was entertained at a banquet in the evening. The cricket world is the loser by the deaths of Mr. I. D. Walker, who was a well-known captain of the Middlesex XI., and of George Ulyett, the famous Yorkshire professional. At the commencement of the season the weather was bad, but for the very large part of the summer it could not have been better for the game, and it has been a splendid run-getting season. In 13 instances 1000 runs were obtained in a match, the highest being 1203 in that between Somerset and Surrey. There were 136 centuries obtained in county matches as against 108 in '97. The highest individual scores in one innings were Hayward 315 not out, and Brown 30, both on the same day, Aug. 19th. Abel obtained 6 centuries. The record for first wicket partnership was easily got in the shape of 534 by Brown and Tunncliffe for Yorkshire against Derbyshire on Aug. 19th, the previous best being 379 in '97. No fewer than 24 batsmen have scored 1000 runs in championship matches, Abel standing at their head with 1832, whilst he has scored 2053 in first-class matches. Hearn succeeded in taking 222 wickets during the season.

The position of the counties at the close of the season was as follows:—

County.	Pl.	W.	L.	D.	Pts.
1 Yorkshire . . .	26	16	3	7	13
2 Middlesex . . .	18	10	3	5	7
3 Gloucestershire.	20	9	3	8	6
4 Surrey . . .	24	11	4	9	7
5 Essex . . .	20	10	6	4	4
6 Lancashire . .	26	9	6	11	3
7 Kent . . .	20	5	6	9	—1
8 Notts . . .	16	1	2	13	—1
9 Warwickshire .	17	2	6	9	—4
10 Derbyshire . .	15	2	6	7	—4
11 Sussex . . .	20	3	9	8	—6
12 Hampshire . .	18	2	8	8	—6
13 Leicestershire .	16	1	10	5	—9
14 Somerset . . .	16	1	10	5	—9

Oxford beat Cambridge by 9 wickets. Harrow beat Eton by 9 wickets. Eton v. Winchester drawn. Haileybury beat Cheltenham. Rugby v. Marlborough drawn.

**Criminal Evidence Act.** For particulars of this important Act, which provides that every person charged with an offence shall be a competent witness for the defence at every stage of the proceedings, see SESSION, sects. 49 and 50.

**Criminal Law.** See LAW, '98.

**Criminal Statistics.** See PRISON STATISTICS.

**Crispi, Francesco,** is a native of Ribera, in Sicily, where he was born in 1819. He was educated for the law, and was called to the Neapolitan bar. His early aspirations for the realisation of Italian unity prompted him to take an active part in the revolutionary movement of '48, when the kingdom of the two Sicilies was overthrown. He inspired the resistance of the Sicilians during the insurrection of Palermo, and was compelled to fly to France. He subsequently landed with Garibaldi at Palermo, and distinguished himself by his courage and capacity. In '61 he was elected to the first Italian Parliament as member for Palermo, and was recognised as the leader of the Constitutional party. On the death of Signor Depretis, in '87, Signor Crispi, who had been Minister of the Interior, became President of the Council and Minister for Foreign Affairs. His Ministry was defeated (Jan. '91), and he resigned. In '92 he announced his intention to quit politics, and gave up the leadership of the Opposition. The voice of his country, however, called him to the head of affairs early in '94, when all was chaos and uncertainty. Under his powerful leading the condition of affairs gradually improved, notwithstanding the desperate efforts of his opponents to discredit and overthrow him by slanderous personal attacks upon him. He fell eventually in '96, through the disasters that overtook the Italian arms in Erythrea. For an account of the report of the Chamber on the charges of fraud brought against him, see ITALY.

**Croatia.** See AUSTRIA-HUNGARY.

**Crockett, Samuel Rutherford,** was b. at Duchrae, New Galloway, where his father was a farmer, in '59. He was ed. at the Free Church Institution, Castle Douglas, and became a pupil-teacher there, obtaining a bursary at Edinburgh University in '76. His literary instincts during this period, and while he was following the profession of tutor after leaving the university, broke out chiefly in verse, which first appeared in the periodical press, and were then collected into a volume published under the title of "Dulce Cor" in '86. His first prose work, "The Stickit Minister," appeared in '93, and has since reached its fourteenth edition. "The Raiders" followed, and also achieved a great success. It is now in its twelfth edition. Since then Mr. Crockett has written, amongst other smaller sketches, "Mad Sir Ughtred of the Hills," besides publishing a larger work, written before he became so well known, "The Lilac Sun-Bonnet," of which about 100,000 copies have been sold. In Oct. '95 "The Men of the Moss Hags," and later a book of child life, "Sweet-heart Travellers," appeared. "Cleg Kelly, Arab of the City," was published in March, and "The Grey Man" in Sept. '96. The unprecedented edition of 35,000 of this book was subscribed before publication. "Lochinvar" was published in Oct. '97, "The Standard Bearer" in '98, and "The Red Axe," a romance of the Baltic lands in the end of the sixteenth century, ran during '98 in the *Graphic* and *Harper's*. Mr. Crockett's books have been exceedingly popular in America, and have been translated into most European languages.

## CUBA.

Cuba is considerably the largest of the West India Islands, and lies between Florida and the Caribbean Sea. It is divided into six provinces. The capital is **Havana**, a splendid city (pop. 200,000), connected with other towns by 1300 miles of railway. The population is about 1,640,000, of whom about one-half are mulattoes or negroes. The chief products are sugar and tobacco, though both have shown signs of declining in late years, and the crops have frequently been ruined by the joint action of the insurgents and the Spanish troops. There are also valuable iron, manganese, and copper mines. A serious insurrection, which subsequent events showed had been long prepared for, broke out in the island early in '95. Its object was the absolute freedom of the island from Spanish rule, this demand arising from the harsh and oppressive treatment of the Spanish Government. No less than 200,000 Spanish troops were sent to quell the insurrection, but the rebels, numbering about 40,000, adopted guerilla tactics, and could not be put down. A scheme of reforms was agreed upon by the Spanish Cabinet (Feb. 3rd, '97). These were, however, ridiculed as offering a settlement of the grievances of the rebels or holding out any hope of a termination of the war, and the general situation remained much as before, the rebels holding their own in every province. General Weyler accomplished nothing but the devastation of the country, and in that he succeeded admirably. With the advent of a new Spanish Ministry under Señor Sagasta, it was announced that political rather than military means would be used to effect the pacification of the island, and that autonomy, under the suzerainty of Spain, would be granted (Oct. 6th). General Weyler was then recalled, and General Blanco appointed Governor. On arriving at Havana he issued a proclamation declaring that the Spanish Government had charged him to grant reforms and give the island self-government under the sovereignty of Spain. Estimated revenue, '96-7, £6,250,000; expenditure, £25,420,000; imports, '95-6, £14,290,874; exports, £20,387,804. The Public Debt, at the end of '97, was estimated by a *Times* correspondent at about £104,000,000, as compared with a debt of £34,000,000 when the rebellion broke out in Feb. '95. See **COLONIES**, etc., of **EUROPEAN POWERS**, and **SPAIN**.

**History, '98.**—During January the attempts at improving the condition of affairs were continued, but with no degree of success, and Cuban sympathisers in the United States manifested much impatience. Considerable comment was caused by the order given for the *Maine*, an American second-class battleship, to proceed to Havana (24th), and her presence was undoubtedly resented by the Spaniards. She stayed there for some time, until a terrible explosion destroyed her (Feb. 15th), 2 officers and 253 men being lost out of her total complement of 360. All possible assistance was rendered by the Spanish authorities, and an inquiry into the cause of the disaster was at once commenced. The

American Commission of Inquiry reported that the explosion was probably caused by a submarine mine (March 25th). The Spanish authorities, however, held that the explosion was due to some internal cause. From this point onwards events moved swiftly towards war. The United States Consuls left the country (April 9th), and although, through the intervention of the Pope and the European Powers, hostilities between the Cubans and Spain were suspended by a proclamation issued by General Blanco (11th), the forcible intervention of the United States was not avoided. A demand for the evacuation of the island was sent to the Spanish Government, but before it could be delivered that Government broke off diplomatic relations with the United States and a state of war commenced (21st). The American fleet proceeded to blockade Havana, and bombarded the forts at Matanzas (27th). The first Congress of the autonomous Government was opened with great ceremony at Havana (May 4th). The Royal Message read by General Blanco commented very severely on the action of the United States, and called on Spaniards and Cubans to unite to defend the Fatherland. A portion of the Spanish fleet left Cape Verde under Admiral Cervera, and for a time its movements were unknown, but ultimately (19th) it arrived at Santiago de Cuba, where it was at once bottled up by the American fleet. Naval-Constructor Hobson and seven men accomplished a gallant feat (June 3rd) in running the *Merrimac*, an old collier, into, and sinking her so as to block the channel of Santiago harbour. The port of Guantanamo, 37 miles east of Santiago, was taken and a force of marines was landed (11th). This was followed by the landing of an American force of about 23,000 men under Major-General Shafter at Baiquiri (22nd) and their immediate advance upon Santiago. A sharp encounter with the Spanish forces took place near Sevilla (24th), resulting in a further American advance, till the northern side of the town was almost surrounded. Some aid was afforded by the Cuban insurgents, and a general attack on the town by land and sea was made (July 1st). The outworks were carried, but in view of the strength of the defence General Shafter found himself unable to storm the town with the force at his command. While matters were in this state Admiral Cervera and his squadron left the harbour under orders from the Government and tried to get away (3rd), but all his ships were either sunk or captured. Santiago was more closely invested than before, and negotiations with the Spanish General resulted at last (14th) in the surrender of the city and most of the eastern part of the island. It was agreed that the Spanish troops should be conveyed to Spain. The formal capitulation took place (17th), and the Cubans under Garcia wished at once to sack the city, but were forbidden by General Shafter. This led to strained and almost hostile relations between them and the Americans. Another element of anxiety was the health of the American forces at Santiago, amongst whom yellow fever and malarial fever had broken out with great violence. The Washington authorities, upon receiving an urgent dispatch from General Shafter on the state of affairs, ordered the troops to be conveyed to the States. The end was, however, in sight, and a protocol embodying

the terms of peace (see SPAIN and UNITED STATES) was signed at Washington (Aug. 12th). Spain undertook to relinquish and evacuate Cuba, and a joint Commission was appointed to arrange the details. At a meeting of this Commission (Oct. 5th) the American representatives insisted that the evacuation should be completed by Nov. 30th; but the Spaniards declared that to be impossible, and asked for further time. Ultimately the question was referred to Washington, and a delay of one month was agreed to. The Peace Commissioners at Paris found it difficult to come to an agreement as to the Cuban debt and the government of the island. The United States representatives refused to accept the sovereignty of Cuba, or to assume responsibility for the Cuban debt in any form (27th).

**Curacao.** An island in the Caribbean Sea, off the coast of Venezuela. It is a Dutch possession, and chief of Holland's West Indian possessions. The colony of Curacao includes the islands of Curaçao, Bonaire, Aruba, St. Eustache, and Saba, with part of the island of St. Martin. The total area is 403 sq. m., and the pop. about 50,000. The colony is administered by a Governor with a Council of 4 members all nominated by the sovereign, and a Colonial Council of 12 nominated members. Cattle, sheep, goats, etc., are bred for exportation. See COLONIES, ETC., OF EUROPEAN POWERS.

**Curzon, Lord, of Kedleston,** appointed Viceroy of India in '98. See under PEERS.

**Customs.** See FINANCE, NATIONAL.

### CYCLING, '98.

The cycling races of the year have not been so numerous as in the last few years, and the long-distance and long-hours racing have sensibly altered—the competitions being over shorter courses. The following are among the principal events of the year:—On Nov. 4th Maurice Lombert, of Amiens, at the Crystal Palace, made a new kilometre record of 58½ sec. and a ½-mile record of 47 sec. On Nov. 16th R. P. Clark created a record for 50 and 100 miles on a tricycle, the former being 2 h. 8 min. 41½ sec., the latter 4 h. 44 min. 7½ sec. Jenkins and Weeks, on a tandem at the Crystal Palace, rode on Dec. 8th ½-mile in the then record time of 31 sec.; but this was beaten by Wells and West, on Dec. 31st, in 30½ sec. Mr. C. B. Lawes (formerly a celebrated runner and oarsman), on April 2nd beat Parlbys' amateur record for ¼-mile from a flying start, in 25½ sec., and tied the world's amateur record at the same time. On April 9th E. Ransley and J. H. Herbert rode 50 miles on a tandem in 2 h. 32 min. 4 sec. on the road; and Ransley on the 18th beat the 50 miles record on the road by riding the distance in 2 h. 27 min. 10 sec. On May 9th, at the Crystal Palace, J. Platt Betts from a flying start rode 1 mile in 1 min. 35 sec., all the times from one quarter upwards being records. On May 30th took place the first record under the new regulations of the N.C.U. that amateurs shall not be paced in road racing, when A. F. Ilsley rode the wonderful distance of 187½ miles in 12 hours. Cordang beat Huret easily in a 100-kilometre race in Paris on June 12th. On June 13th A. A. and F. W. Chase rode 50 miles on a tandem without pacemakers in 2 h. 2 min. 25 sec., beating A. A. Chase's record on a single machine of 2 h. 3 min. 10 sec. At

the N.C.U. Championship Meeting at Norwich, on June 25th, H. E. Meyers (Dutch C.U.) won the 5-Miles Professional Championship in 15 min. 36½ sec. A. S. Ingram (Polytechnic C.C.) won the Amateur 5-Miles Championship in 14 min. 11½ sec., and H. W. Payne won the 25-Miles Amateur Championship in 69 min. 52½ sec. On the same day, at Herne Hill, A. C. Akers and J. D. Clarke rode 150 miles on a tandem in the amateur record time of 6 h. 7 min. 8 sec. T. Linton, at Manhattan Reach, created a world's record of 20 miles in 35 min. 59½ sec. On June 29th a dreadful accident occurred at the Crystal Palace, when one of the handle-bars of a quintette which was pacing Platt Betts broke, causing the whole of the riders to fall, as well as Platt Betts himself, who sustained terrible injuries to his head and jaw, which at the time were considered most serious. At the **Oxford and Cambridge Match** at Sheen House, on July 2nd, Oxford won the 1-mile race by 6 points to 15, time 2 min. 39 sec.; the 4-miles by 8 points to 13 in 12 min. 10½ sec., H. B. Fitzherbert, Oxford, winning both races. The 10-miles race fell to Cambridge by 80 points to 50, P. Engleheart, Cambridge, winning in 25 min. 30½ sec. On July 9th E. P. Clarke established an unpaced record of 15 h. 44 min. 32 sec. for the double journey between London and Bath on a bicycle, the distance covered being 213½ miles. The "**Kops**" Cup for 100 miles was won by F. D. Frost, for the second time, in 3 h. 47 min. 34½ sec. Linton defeated Michael in a 20-mile paced race on July 16th, at Manhattan Reach, in the record time of 35 min. 18½ sec. At the **N.C.U. Championship Meeting** at Leeds, on July 16th, T. J. Gascoyne and H. Brown walked over for the 2-Miles Professional Tandem Race. W. V. Edwards won the Mile Amateur Race in 3 min. 8 sec. F. W. Chinn won the 1-Mile Professional Championship in 2 min. 51½ sec. The ¼-Mile Amateur Championship was won by T. Summerville in 32½ sec., and the ¼-Mile Professional Championship by S. Jenkins in 33 sec. T. J. Gascoyne and H. Brown rode ½-mile on a tandem with a flying start in 24½ sec., a record performance. On Aug. 1st A. A. Chase beat his previous 1-mile unpaced record from a flying start by doing the distance in 2 min. 2½ sec. On Aug. 6th W. Birtwistle and G. Masters rode ½-mile unpaced from a standing start in 57½ sec. On Aug. 9th A. A. Chase beat his own flying mile record by accomplishing the distance in 2 min. 2½ sec. E. Gould, at the Crystal Palace on Aug. 12th, rode 100 miles in the world's record time of 3 h. 24 min. 41 sec. The **Century Cup** was won by R. Palmer in 3 h. 29 min. 51½ sec. W. J. Offen, on Aug. 13th, beat W. J. Cherry's performance on July 9th by reducing the record for the 1-mile Amateur (unpaced), standing start to 2 min. 9½ sec. On Aug. 17th A. A. Chase established pace records from 2 to 10 miles inclusive, completing the full distance in 17 min. 20 sec. At the Crystal Palace, P. E. Marsden, the Australian cyclist, beat the 1 hour's world's amateur record by covering 29 miles 574 yards in the hour. At Catford, on Aug. 20th, standing ¼, ½, and 1-mile records for tandems were made by Burnand and Chambers, the last-mentioned distance being covered in 1 min. 53½ sec. They also accomplished a flying-start ¼-mile in the record time of 24½ sec., and E. and H. Sames reduced the record of the flying-start mile to 1 min. 58½ sec. On Aug. 22nd A. A. Chase rode 33 miles 712 yards in an hour—the

record, and also beat all records from 5 miles upwards. An unpaced mile record (flying start) was made by W. Rimington, who did it in 2 min. 17 $\frac{3}{4}$  sec. On Aug. 29th Messrs. Fraser, Lunn and Lowe returned to London, having cycled through a great portion of Europe, Asia, and America; they started on July 17th, '96, and have ridden 19,270 miles. A new 24-hours' record was made by F. R. Goodwin, who rode 428 miles in that time. The **Cuca Cup** (a 20-miles professional instead of, as formerly, a 24-hours' amateur race) was won by J. Green in 48 min. 3 $\frac{1}{2}$  sec. At Vienna the **Mile Amateur Championship of the World** was won by Albert (Germany) in 3 min. 32 $\frac{1}{2}$  sec. Cherry (England) won the **100 kilometres Championship of the World** in the world's record time of 2 h. 12 min. 23 $\frac{3}{4}$  sec. Palmer (England) won the paced 100 kilometres professional race. The meeting was not a success, owing to mismanagement. On Sept. 10th the 10-Miles Championship Cup of the Surrey Club was won by E. J. Callaghan. Miss Foster, on Sept. 12th, covered 50 miles on the road in 2h. 33 min., beating Mrs. Grace's previous record by 8 min. On Sept. 20th the 50-Miles Championship of the N.C.U. was won at Reading by H. Chinn, in record time for this event of 1 h. 51 min. 41 $\frac{3}{4}$  sec. The 2-Miles Tandem Championship was won by F. Burnard and E. J. Callaghan. E. J. Steel, on Sept. 26th, rode to Brighton and back from London in 6h. 23 min. 55 sec.—a record; and P. F. A. Gomme

did the like distance on a tricycle at the same time in 8h. 11 min. 10 sec, which is also a record. On Oct. 1st, at the Canning Town track, the following amateur records were made:  $\frac{1}{2}$ -mile standing unpaced record, 61 $\frac{1}{2}$  sec., by C. F. Sanderson—previous best 63 $\frac{1}{2}$  secs.  $\frac{1}{4}$ -mile flying start unpaced, 27 $\frac{3}{4}$  sec., by S. T. Meager—previous best 28 sec.:  $\frac{1}{4}$ -mile standing start, 30 $\frac{1}{2}$  sec., by W. H. Boyington—previous best 30 $\frac{3}{4}$  sec.;  $\frac{1}{4}$ -mile standing start tandem, 30 $\frac{3}{4}$  sec., by W. V. Solomon and S. P. Abbott—previous best 30 $\frac{3}{4}$  sec.; 1-mile flying start unpaced tandem, 1 min. 58 $\frac{3}{4}$  sec., by G. W. and J. H. Bishop—previous best 1 min. 59 $\frac{1}{2}$  sec.

**Cyprus.** An island and British colony in the Levant, 60 miles from Asia Minor, and 40 from Syria. Area, 3584 sq. m.; pop. 221,343, of which 161,360 are Greeks and 47,926 Mohammedans. Divided into six districts. Capital, Nicosia, pop. 12,575, inland. Chief produce, cotton, wine, carobs, wheat, barley, wool, silk, spirits, sponges, raisins. Minerals: lead, building and ornamental stones, salt. The island is administered, under the agreement concluded between Great Britain and Turkey in '78, by a High Commissioner, with an Executive Council of 4 and a Legislative Council of 18, of whom 12 are elected. Under the same agreement an annual tribute of £92,800 is paid to the Sultan. See **BRITISH EMPIRE** (table) and **DIPLOMATIC**.

**Czar of Russia.** See **NICHOLAS II.**

## D

**Dahomey** is a French protectorate lying between the Lagos hinterland on the east and Togoland on the west. It was taken by the French in '92, the then sovereign, Behanzin, being defeated and dethroned. It has access to the sea through its port, Whydah, and also through the French Guinea ports. The area of the country is about 14,000 sq. m., and the population about 600,000. The capital is Abomey, 70 miles north of Whydah. The chief products of the country are palm oil and palm kernels, while various manufactures are also springing up. The trade passes principally through Kotonou and Whydah. In July '97 an agreement was come to with Germany as to the delimitation of the French and German spheres in Dahomey and Togoland. By the Niger Convention, drawn up by the Anglo-French Commission and signed at Paris June 15th, '98, the boundary line between the French territories and the Lagos hinterland was drawn thus. Starting from the dividing point between Dahomey and Lagos on the 9th parallel, the line runs north to Boria, and thence curves in a north-east direction, passing to the west of Gbani, Ashigere and Dokala, till it reaches a point on the Niger ten miles north of Ilo. Nikki was thus given to France and Borgu to Great Britain. See **NIGERIA** (map).

**"Daily Chronicle."** Morning newspaper. Originally a local paper for the whole of London, it was purchased by Mr. Lloyd ('76), and converted into an Imperial Liberal organ with an independent line of action. Other

noticeable features are its attention to Labour and social questions, its illustrations, produced with great care and finish, its literary page, remarkable for the high quality of its reviews, and its special correspondence. During '95 it published an admirable "Encyclopædic Dictionary" in weekly parts. Editor, Mr. H. W. Massingham (*q.v.*). Offices, Fleet Street, E.C.

**"Daily Graphic."** An illustrated London daily newspaper; was first published on Jan. 4th, '90, and was launched under the direction of Mr. W. L. Thomas. In politics the *Daily Graphic* is neutral, but signed contributions containing free expressions of opinion are a distinctive feature. Editors, Mr. T. Heath Joyce and Mr. Hammond Hall. Office, Milford Lane, Strand, W.C.

**"Daily Mail."** A halfpenny London morning paper, which was started in '96, and has attained a reputation for brief and crisp reports of current events, brightly written special articles, and reliable foreign news. Its circulation for the first month of its existence (May '96) was 171,000, and in Sept. '98 it was over 525,000. The founder is Mr. Alfred C. Harmsworth, well known as the proprietor of *Answers* and similar publications. The *Daily Mail* is Independent Unionist in politics, but aspires to be rather an Imperialist journal than the organ of any party.

**"Daily News."** A prominent Liberal daily paper, and generally regarded as the organ of the Liberal party. Established in '46. It

made much headway in '70-71, owing to its early and impartial telegrams respecting the Franco-German war; again in '76, when Mr. MacGahan, its special correspondent, first called attention to the Bulgarian Atrocities; and later during the Egyptian campaigns. Charles Dickens was its first editor, and it is at present edited by Mr. E. T. Cook (*q.v.*), and managed by Sir John R. Robinson (*q.v.*). The Jubilee of the paper was celebrated by a special number issued on Jan. 21st, '96, giving a history of the Journal for fifty years. Office, Bouverie Street, E.C.

**"Daily Telegraph."** Morning newspaper; founded in '55. Circulation approximates to a quarter of a million daily. Its politics are Independent, and it has taken a foremost part in the discussion of great social problems. Has special wires from New York, Paris, and Vienna. It employed Mr. Smith on his successful special commission to Assyria, and sent Mr. Henry M. Stanley to Central Africa. A notable feature of the *Daily Telegraph* is the correspondence on important social topics, which at frequent intervals appears in its columns. Offices, Fleet Street, E.C.

**Damaraland.** See GERMAN SOUTH-WEST AFRICA.

**Danish Colonies.** See COLONIES, ETC., OF EUROPEAN POWERS.

**Danube Improvements.** See ENGINEERING.

**Dardanelles, The, or Hellespont,** is a narrow strait, about forty miles long, and varying in width from one to four miles, between the European and Asiatic coasts of the Turkish Empire between the Sea of Marmora and the Grecian Archipelago. Its strategical importance is great, inasmuch as it is the key to Constantinople. Both sides of the strait are strongly fortified.

**Davidson, John,** is the son of a minister of the Evangelical Union, and was b. in 1857, at Barrhead, Renfrewshire. He became a pupil teacher in '72, and was engaged in teaching till '89. In the following year he came to London and embarked on that literary career which has made him famous. At first he took part in journalism, and contributed frequently to the *Speaker*. His experiences in this direction enter largely into "Fleet-Street Eclogues," '93, and "A Random Itinerary," '94. Other books of his are two novels, "Perfidy," an early work, and "Baptist Lake," published in '94; a volume of "Plays," the "Ballads and Songs," '94, which first drew the general attention of the reading public to the new poet; a "Second Series of Fleet-Street Eclogues," "New Ballads," and "The Wonderful Mission of Earl Lavender" ('96), "Godfreda: a Play," and "The Last Ballad and Other Poems" ('98). In '96 also Mr. Davidson adapted Coppée's "Pour la Couronne" for Mr. Forbes Robertson at the Lyceum. Address, Rayleigh House, Shoreham, Sussex.

**Day, William R.,** whose name was so prominent in the United States during the Spanish-American war of '98, is a native of Canton, Ohio, and was born in April 1849. He was educated at the University of Michigan, and at once took up the practice of the law, therein following a family precedent. One of his ancestors was Chief Justice of the Supreme Court of Connecticut, and another a member

of the Supreme Court and of Congress, while his father was a lawyer and judge in Northern Ohio. Mr. Day was appointed Judge of the United States District Court for the Northern District of Ohio in '89, but he quickly resigned on account of ill-health, and so was almost new to office when he was called by President McKinley to the high office of Secretary of State in '98 in succession to Senator Sherman. He was afterwards appointed on the Commission entrusted with the settlement of the treaty of peace between Spain and the States.

**Dean and Chapter.** See CHURCH OF ENGLAND; and for a list of Deans see the table of BISHOPS.

**Death Certification.** See former eds.

## DEATH DUTIES.

Previous to the passing of the Finance Act, 94, six different death duties were payable—viz., probate duty, account duty, legacy duty, succession duty, additional succession duty, and estate duty. The probate, account, additional succession, and estate duties were abolished by the statute referred to, which came into operation on Aug. 2nd, '94. Under this Act a new estate duty is payable on all property, real or personal, settled or not settled, which passes on the death of any person dying after the Act came into force. The following property is exempted from the estate duty: (1) settled property of every kind in respect of which estate duty has been paid since the date of the settlement, unless the deceased was at the time of his death, or had been at any time during the continuance of the settlement, competent to dispose of the property; (2) property passing under and by virtue of transactions for full money consideration; (3) the property of common seamen, marines, or soldiers who are slain or die in the service of her Majesty; (4) sums of less than £100 which may under the Friendly Societies Act, '75, the Savings Bank Act, '77, and other statutes, be paid to the representatives of the deceased without requiring representation; (5) reversionary interests, the estate duty on which has been commuted; (6) survivorship annuities of less than £25; (7) pictures, prints, books, manuscripts, works of art, and scientific collections given or bequeathed for national scientific purposes, or to any university, or to any county council or any municipal corporation, the duty in respect of which has been remitted by the Treasury; (8) pensions and annuities payable by the Indian Government to the widows or children of deceased Indian officers; (9) advowsons or church patronages which would have been free from succession duty under the Succession Duty Act, '53; (10) reversionary interests *bonâ fide* sold or mortgaged before Aug. 1st, '94; (11) property settled by a husband on a wife, or *vice versa*, before that date, and reverting to the settler. All the property of the deceased is firstly liable to estate duty, and then to legacy and succession duties. Foreign property is to be included only when such property would formerly have been subject to succession or legacy duty; and in the case of property in the colonies any duty payable in the colony for the property is to be allowed as a deduction from the estate duty; and if the Commissioners are satisfied that duty is chargeable in a foreign country in respect of property there, they are to make an allowance of the

amount of that duty from the value of the property. The following table notifies the amounts

payable under the estate duty of the Finance Act, '94, viz. :—

## ESTATE DUTY.

Where the Principal Value of the Estate				Estate Duty shall be payable at the Rate per Cent. of	
Exceeds	£100 and does not exceed		£500		
"	£500	"	"	"	One Pound.
"	£1,000	"	"	"	Two Pounds.
"	£10,000	"	"	"	Three Pounds.
"	£25,000	"	"	"	Four Pounds.
"	£50,000	"	"	"	Four Pounds Ten Shillings.
"	£75,000	"	"	"	Five Pounds.
"	£100,000	"	"	"	Five Pounds Ten Shillings.
"	£150,000	"	"	"	Six Pounds.
"	£250,000	"	"	"	Six Pounds Ten Shillings.
"	£500,000	"	"	"	Seven Pounds.
"	£1,000,000	"	"	"	Seven Pounds Ten Shillings.
"		"	"	"	Eight Pounds.

To ascertain the percentage of duty payable, all the property passing on the death of its owner is to be aggregated so as to form an estate. Legacy duty is payable on legacies and shares of residue under a will or intestacy, and is applicable to personal property, except leaseholds either within the United Kingdom or abroad of a person who died domiciled in the United Kingdom. The rate of this duty is as under: viz., for legacies to children, or father, mother, or lineal ancestors, £1 per cent.; to brothers or sisters or their descendants, £3 per cent.; to brothers and sisters of the father and mother of deceased, or any descendant of such brothers or sisters £5 per cent.; to brothers and sisters of grandfather or grandmother, or any descendants of such brothers or sisters, £6 per cent.; to persons of other degrees of consanguinity, or strangers in blood, £10 per cent. Succession duty is payable on the interest that an individual takes as successor to a deceased person on real or leasehold property in the United Kingdom, or on legacies charged upon the proceeds of sale of real estate of a person who died domiciled in this country, irrespective of the situation of the property; and also on personal property included in a settlement, whether that property was at home or abroad. The duty varies in a similar manner to the legacy duty, and is as follows: £1 per cent. on the value of succession to lineal descendants; £3 per cent. to brothers and sisters and their descendants; £5 per cent. to brothers and sisters of the father or mother of the predecessor, or the descendants of such brothers or sisters; £6 per cent. to brothers and sisters of the grandfathers or grandmothers of the predecessor, or descendants of such brothers or sisters; and £10 per cent. to persons of other degrees of consanguinity or strangers in blood. The value of a succession to real estate is ascertained by tables in the Succession Duty Act of '53. The beneficial interest is considered as an annuity equal to the net yearly value of the property during the lifetime of the successor, or other shorter term to which his interest may extend. By the Finance Act, '94, the principal value of any property liable to the new estate duty is to be estimated on the price which, in the opinion of the Commissioners, the property would realise if sold in the open market at the time of the death of the deceased; but, as regards agricultural property, the value is not to exceed twenty-five years' purchase of the property, as assessed under Schedule A of the

Income Tax Acts, after deducting £5 per cent. for expenses of management. Disputes as to valuation of the property may be referred to the High Court, or to the County Court where the amount is less than £10,000. Duty on real property may be paid by eight yearly or sixteen half-yearly instalments. It is provided by the Finance Act, '96, that estate duty on annuities may be paid by four equal annual instalments. A few other minor amendments of the Finance Act of '94 have been made by the one of '96. A power of appeal is granted to the Court of Appeal in respect of disputed valuations of property for the estate duty. See FINANCE, NATIONAL, and LAW, '98 (Death Duties).

**Deceased Wife's Sister, Marriage with.** See MARRIAGE WITH DECEASED WIFE'S SISTER.

**Delagoa Bay.** Situated on the east coast of South Africa, on the twenty-sixth parallel of S. latitude. It forms the southern extremity of the Portuguese province of Lorenzo Marques. See EAST AFRICA (PORTUGUESE). Delagoa Bay is available for vessels of large tonnage. The Transvaal border begins 52 miles inland. In the course of the negotiations between Great Britain and Portugal as to the action of the latter power in East Africa, the claims of the Delagoa Bay Railway Co. for compensation for the seizure of the line by Portugal on June 29th, '89, were brought forward. The names of the arbitrators and some account of the lengthy proceedings are given in our last and previous eds. The extension of the line from the Portuguese frontier at Komati (which is 60 miles from the port of Lorenzo Marques) to Pretoria (Transvaal) was formally opened on July 8th, '95. The extension is the property of the Netherlands South African Railway Company, and places Pretoria by rail 350 miles from the coast, and Johannesburg 400 miles. The distance from the latter city to Cape Town by rail is 1013 miles. In Jan. '96 it was stated that the total cost of the line, including rolling stock (£318,600), was £4,252,477; it is 382 miles long. The interminable arbitration proceedings reached another stage in the summer, a telegram dated Berne, July 3rd, announcing that the Tribunal recognising the necessity of expert evidence had appointed M. Stoccalper, engineer at Sion, and M. Dietler, chief engineer of the St. Gothard railway at Lucerne, both these gentlemen accepting on condition that they were not called upon to make a local investigation; on July 21st they submitted the

name of a third expert, M. Nicole, the Swiss railway engineer, to proceed to Delagoa Bay. M. Nicole presented his report in '97. In the House of Commons on March 28th, '98, Mr. Curzon, Under-Secretary for Foreign Affairs, stated that the latest information to hand was that the experts had presented their report, which would be printed and distributed to the parties concerned. On July 18th the *Times* contradicted a report which was circulated to the effect that an award of £2,500,000 had been made in favour of the claimants, adding, "The contentious procedure is not yet closed, and the case will not be finally submitted to the Court, much less decided, for at least three months." The *Globe* stated (Nov. 1st) that the decision of the arbitrators would be given early in Feb. '99. There was a rumour during the year, which received strong confirmation from a statement of the German Chancellor (see GERMANY), that Great Britain and Germany had come to an understanding as to their interests in Delagoa Bay and South Africa generally. See TRANSVAAL (map).

**Delcassé, Théophile**, French Minister for Foreign Affairs, was born at Pamiers, March 1st, 1852, and began his career as a journalist. He was elected to the Chamber in '89, and in '93 he became Under-Secretary for the Colonies under MM. Ribot and Dupuy. It was mainly through his efforts that colonial affairs were entrusted to a distinct department. He became Colonial Minister in the Dupuy Cabinet of May '94, and has always been a consistent advocate of colonial expansion. When M. Brisson formed his ministry, after the fall of the Méline cabinet, in '98, he entrusted Foreign Affairs to M. Delcassé, and it fell to his lot to deal with the difficult position at Fashoda. He accomplished the task with great ability, and retained his portfolio in M. Dupuy's ministry, after the defeat of the Brisson administration. See FRANCE.

## DENMARK.

A kingdom under Christian IX., of Glucksburg, who succeeded to the throne in 1863. By charter of '49 (modified in '55, '63, '65, and '66) the executive power is vested in King and ministers, the legislative in the Rigsdag or Diet acting jointly with the sovereign. The Rigsdag is composed of the Landsting (or Upper House of 66 members; 12 Crown nominees appointed for life, and 54 indirectly elected by electoral bodies for eight years), and the Folkething (or House of Commons of 114 members directly elected by universal suffrage for three years). Members of both houses are paid 6s. 8d. a day while the Rigsdag is sitting, and their travelling expenses. The Rigsdag must meet every October, and all money Bills be submitted to the Folkething. Colonies comprise Iceland, the Faeroe Islands, Greenland, and three small West Indian islands. The agricultural returns for the past three or four years show that the foreign demand for Danish agricultural produce continues to increase. Cattle breeding is at the same time taking more and more the place of arable farming. Above all, dairy farming is being pursued with unparalleled skill and success. The export of butter and other dairy produce is now the main source of the wealth of Denmark, and this was recognised by the formation of an Agricultural Department under

a responsible minister in May '96. The State religion is Lutheran, but all others are tolerated, and there are no disabilities to dissenters. Education compulsory and free, the public schools being maintained by communal rates. **Area**, 14,775 sq. m.; estimated pop. 2,299,564. The total revenue for '97 was £3,741,270; expenditure, £4,137,257; public debt, '98, £11,579,335; imports, '97, £22,466,879; exports, £17,944,387. For army and navy see FOREIGN ARMIES AND NAVIES; and for Ministry see DIPLOMATIC.

**Political Parties.** In Denmark parties are broadly divided into supporters and opponents of a parliamentary system like our own. The Conservatives, or **Right**, contend that by the constitutional law of Denmark (promulgated in 1849 and revised in '66) the Folkething has not—like the English House of Commons—the supremacy in matters of taxation and finance, and the power of practically deciding who shall be the ministers. They maintain that the King and Landsting together may overrule the Folkething. The **Left** are parliamentary men attached to the English system. Hence there has arisen an apparently interminable dispute, with the Landsting and the Ministry on one side and the majority of the Folkething on the other. This majority, however, gradually divided into two parties, Radicals and Moderates. After the general election of '92, when the Right obtained 30 seats and the Moderate Left 43, the Radical Left only succeeding in obtaining 28 seats as against 39 at the previous election, an agreement was arrived at that Parliament should confirm the provisional laws that, in spite of the opposition of the Left, the Estrup Cabinet, though in a minority, had enacted, the Cabinet in return promising to make way for a new administration of a Moderate type. This agreement was carried out (Aug. 7th, '94), when M. Estrup's ministry resigned, after nineteen years' tenure of office, Baron de Reedtz-Thott becoming Premier, and selecting Moderate men of the Right for his colleagues. The general election of April '95 scarcely approved this compromise in the way that had been anticipated, for 52 Radicals, 9 Socialists, 28 Moderates, and only 24 Conservatives were returned. The Radicals again won a decisive victory at the elections in April '98, when 15 Conservatives, 23 Moderates, 12 Socialists, and 63 Radicals were returned.

**History, '98.**—The elections to the Folkething resulted in a striking victory for the Radicals, who obtained an absolute majority over all other parties (April 5th). Since the Cabinet, however, never had a majority in the Folkething, they did not resign, still relying on their supporters in the Landsting. The September elections to the Landsting left parties in this condition—43 Conservatives and 23 Opposition members. Queen Louise died (Sept. 29th). The Finance Minister in his Budget statement estimated the revenue for 1899-1900 at 68,200,000 kr., and the expenditure at 68,000,000 kr. (Oct. 7th). The Queen was buried in Roskilde Cathedral (15th), and the funeral service was attended by the Czar of Russia, the King of Greece, the King of Sweden, the Duke of York, and other royal personages.

**Denmark, King of.** See CHRISTIAN IX.

**Denominations, The Three,** is the abbreviated designation of an association of Presbyterian, Independent, and Baptist ministers

resident in or near London. The full title is "The General Body of Protestant Dissenting Ministers of the Three Denominations Resident in and about the Cities of London and Westminster." This association enjoys the privilege of direct access to the throne and the kissing of hands—a privilege of which it availed itself at the Jubilee of Her Majesty's reign, and again at the Diamond Jubilee. On the last-named occasion the Rev. Alexander Jeffrey (Presbyterian), the Rev. Joseph Parker, D.D. (Congregationalist), and the Rev. J. Monro Gibson, D.D. (Presbyterian), kissed hands. As far back as the Revolution each denomination had its own ministerial board in London, and each board by itself approached the Throne as occasion arose. On the accession of Queen Anne the three boards united in an address. In July 1727 the present association was organised. It is not a body which represents the Churches. It is composed solely of ministers, and admission must be through one or another of the three ministerial boards, which are not themselves representative either. The secretary is chosen triennially from each of the three bodies in succession. The present secretary is a Presbyterian (the Rev. Alexander Jeffrey); Mr. J. Minshull, of the Memorial Hall, is permanent clerk, and the annual meeting is held at the Memorial Hall in March. Every meeting appoints its own chairman. The "Three Denominations" is often confounded with another body known as the "Dissenting Deputies." The two are quite distinct from each other. The "Dissenting Deputies" are laymen, and represent Churches—Presbyterian, Independent, or Baptist, in or near London—by whom they are elected. This body came into existence in November 1732, in connection with the Test and Corporation Acts, and still exists to protect the rights of Dissenters. It has not the privilege of access to the Throne. The present chairman is Mr. William Woodall, M.P., and the secretary Mr. A. J. Shepherd.

**Devonshire, Duke of.** See under PEERAGE.  
**Dilke, Sir Charles, M.P.** See under COMMONS.

**Dillon, John, M.P.** See under COMMONS; also POLITICAL PARTIES.

**Diocese.** See CHURCH OF ENGLAND, CHURCH OF SCOTLAND, and ROMAN CATHOLIC CHURCH.

### DIPLOMATIC.

The following list gives the names of the Cabinet, or Executive Council, or principal members of the Government, of each of the leading Foreign States, and of the more important British colonies.

**Abyssinia.** *British Agent*, Lieutenant Harrington.

**Aden.** *Political Resident*, Brigadier-General C. A. Cunningham, I.S.C.

**Afghanistan.** *Agent to the Governor-General of India*, Maulvi Ghafur Khan.

**Africa, British Central, Protectorate.** *British Commissioner and Consul-General*, Alfred Sharpe, C.B.—*Deputy-Commissioner, Consul, and Commandant of Armed Forces*, Lieutenant-Colonel W. H. Manning.—*Assistant Deputy-Commissioner and Vice-Consul*, Captain F. B. Pearce.—*Secretary to the Administration*, J. F. Cunningham.—*Senior Naval Officer on Lake Nyasa*, Commander Percy Cullen, R.N.R.

—*Surveyor*, W. Anderson.—*Director of Customs*, H. A. Hillier.

**Africa—East Africa Protectorate.** *Commissioner and Consul-General*, Sir A. H. Hardinge, K.C.M.G., C.B. (resides at Zanzibar).

**Africa, South.** *High Commissioner*, Sir Alfred Milner, G.C.M.G., K.C.B.—*Secretary to the High Commission*, G. V. Fiddes.—*Resident Commissioner for the Bechuanaland Protectorate*, Major H. Goold-Adams, C.B., C.M.G.—*Assistant Commissioners*, W. H. Surmon and J. Ashburnham.—*British Agent at Pretoria*, W. Conyngham Greene, C.B. See also **British South Africa Company**.

**Ajmere.** *Chief Commissioner*, A. H. T. Martindale.

**Algiers.** *Governor-General of Algeria*, M. Laferrière.—*British Consul-General*, F. Hay Newton.—*British Vice-Consul*, F. E. Drummond-Hay.

**Argentine Republic.** *President*, General Julio A. Roca. **Ministry:** *Minister of the Interior*, Dr. Felipe Jofre.—*Minister of Foreign Affairs*, Dr. Amancio Alcorta.—*Minister of Finance*, Dr. José Maria Rosa.—*Minister of Justice*, Dr. Osvaldo Magnasco.—*Minister of War*, General Luis Maria Campos.—*Minister of Marine*, Commodore Martin Rivadavia.—*Minister of Agriculture*, Dr. Emilio Frers.—*Minister of Public Works*, Dr. Emilio Civit.—*Ministry in London*, 16, Kensington Palace Gardens, W.—*Secretary of Legation and Chargé d'Affaires*, Florencio Don L. Dominguez.—*Consul-General*, Dr. S. Garcia Uriburu.—*Consul*, Alfredo O. Lumb, 3, Budge Row, Cannon Street, E.C.—*Vice-Consul*, Francisco J. Torromé.—*British Minister at Buenos Ayres*, Hon. W. E. Barrington.

**Assam.** *Chief Commissioner*, H. J. S. Cotton, C.S.I.—*Secretary to Chief Commissioner*, P. G. Melitus, C.I.E.

**Austria-Hungary.** *Minister of the Imperial and Royal House and for Foreign Affairs*, Count Agenor Goluchowski.—*Imperial and Royal Minister of Finance*, Benjamin de Kállay.—*Imperial and Royal Minister of War*, General Edmund von Krieghammer. **Ministerial Council for Austria:** *Premier and Minister of the Interior*, Count Thun.—*National Defence*, Count Welsner von Welsersheimb.—*Railways*, Dr. Ritter von Wittek.—*Justice*, Dr. Edler von Ruber.—*Public Worship and Instruction*, Count Bylandt-Rheidt.—*Agriculture*, Baron von Kast.—*Finance*, Dr. Kaizl.—*Commerce*, Baron Dipauli.—*Minister without Portfolio*, Herr Jandrejevics.—**Ministerial Council for Hungary:** *President of the Council*, Baron Bánffy.—*Public Worship and Instruction*, Julius de Wlassics.—*Croatia, Slavonia, and Dalmatia*, M. de Josipovich.—*Justice*, G. de Erdélyi.—*Minister for Home Affairs*, Desiderius Perczel.—*Minister at H. M. Court*, Baron Jozsika.—*Minister of National Defence*, Baron de Fejérváry.—*Commerce*, E. de Daniel.—*Agriculture*, J. Darányi.—*Ambassador in London*, Count Deym, 18, Belgrave Square, S.W.—*Consul-General*, Baron Alfred de Rothschild.—*Assistant Consul-General*, Baron Erwin von Ferstel.—*Vice-Consul*, Walter Princig de Herwalt.—*Secretary*, Julius Kohn, Mansion House Chambers, 11, Queen Victoria Street, E.C.—*British Consular Agent at Lissa*, Seraphin Topich.—*British Consul at Trieste*, John George Haggard, Esq.—*Pro-Consul*, N. Salvani.—*British Ambassador at Vienna*,

The Rt. Hon. Sir Horace Rumbold, Bart., G.C.B., G.C.M.G.—*British Consul-General in Vienna*, Chevalier Paul von Schoeller.—*Consul*, Moriz Feldscharek.—*British Consul-General at Budapest*, Gerard Lowther, Esq.—*Consul*, Dr. Ignatz Bruell.—*British Consul at Fiume*, George Louis Faber, Esq.—*Vice-Consul*, Arthur Steinacker.

**Baden.** *President of Ministry*, Dr. W. Nokk.—*British Chargé d'Affaires*, G. W. Buchanan (resides at Darmstadt).—*Consul at Mannheim*, F. Ladenburg.

**Bahamas.** *Governor and Commander-in-Chief*, Sir Gilbert Carter, K.C.M.G.; *Private Secretary and Clerk to Executive Council*, J. L. Bonhote. *Executive Council: Colonial Secretary*, J. S. Churchill.—*Attorney-General*, W. Rees Davies.—*Receiver-General*, H. H. J. Bell. R. H. Sawyer; G. T. R. Kemp, M.D.; W. E. Armbrister; Joseph Brown; and J. H. Young.

**Baluchistan.** *Agent to the Governor-General for India*, H. S. Barnes, C.S.I.

**Barbados.** *Governor*, Sir J. S. Hay, K.C.M.G. *Executive Council: Officer commanding the Troops.*—*Colonial Secretary*, R. C. Williams.—*Attorney-General*, W. H. Greaves, Q.C.—Sir G. C. Pile, M.L.C.

**Baroda.** *Resident and Agent to Governor-General*, Lt.-Col. N. C. Martelli, I.S.C.

**Basutoland.** *Resident Commissioner*, Sir Godfrey Y. Lagden, K.C.M.G.

**Bayaria.** *Ministers: Minister of State and Foreign*, Baron Von Crailsheim.—*Instruction and Worship*, Herr Von Landmann.—*Justice*, Baron Von Leonrod.—*Finance*, Dr. Baron Von Riedel.—*Interior*, Baron Von Feilitzsch.—*Minister of War*, General Baron Von Asch zu Asch.—*British Minister Resident at Munich*, Victor A. W. Drummond.

**Bechuanaland Protectorate.** See Africa, South.

**Belgium.** *Premier and Minister of Finance*, M. de Smet de Naeyer.—*Foreign Affairs*, P. L. M. C. de Favereau.—*Interior and Public Instruction*, M. Schollaert.—*Agriculture, Industry, and Public Works*, M. Léon de Bruyn.—*War*, —.—*Railways, Posts and Telegraphs*, M. J. Vanden-Pereboom.—*Justice*, M. Begerem.—*Industry and Labour*, M. Nysens.—*Envoy Extraordinary and Minister Plenipotentiary in London*, Baron Whettall.—*Consul-General*, M. F. H. Lenders, 118, Bishopsgate - Street - Within, E.C.—*British Minister at Brussels*, Hon. Sir Francis Richard Plunkett, G.C.M.G.—*Secretary of Legation*, G. E. Welby.—*British Consul-General at Antwerp*, G. R. de Courcy-Perry, C.M.G.

**Bengal.** *Lieutenant-Governor and President of Council*, Sir John Woodburn, K.C.S.I.—*Council of the Lieutenant-Governor*, Sir G. C. Paul, K.C.I.E., H. H. Risley, C.I.E., Rai Durga Gati Banerjee Bahadur, C.I.E., Nawah Syud Ameer Hossein, C.I.E., M. Finucane, C.S.I., W. B. Oldham, C.I.E., R. B. Buckley, W. H. Grimley, C. W. Bolton, C.S.I., Sahibzada Mahomed Bakhtyar Shah, M. C. Turner, Norendra Nath Sen, Saligram Singh, Kali Charom Banerjee, The Maharajah of Darbhanga, G.C.I.E., Surendranath Banerjee, Jatra Mohan Sen, T. W. Spink, Raja Shashi Shakhawar Roy of Tahipur. *Secretaries to Government: Chief Secretary*, C. W. Bolton, C.S.I.—*General Statistical and Revenue*, M.

Finucane, C.S.I.—*Financial and Municipal*, H. H. Risley, C.I.E.—*Public Works*, Col. A. D. McArthur, R.E., and R. B. Buckley.

**Berbera.** See SOMALI COAST.

**Bermuda.** *Governor*, Lieut.-Gen. G. D. Barker, C.B.—*Executive Council: The Governor*, Lieut.-Col. E. J. Bor.—*Colonial Secretary*, A. Alison.—*Attorney-General*, S. B. Gray, C.M.G.—*Receiver-General*, James Tucker, C.M.G.—*Solicitor-General*, R. D. Darrell.—*Assistant Justice*, J. H. Trimmingham.

**Bolivia.** *President*, Señor Fernandez Alonzo.—*Foreign Affairs*, Señor Gomez.—*Finance*, Señor Gutierrez.—*Interior*, Señor Pinilla.—*Colonies and Public Worship*, Señor Ochoa.—*War*, Señor Sanjines.—*Envoy Extraordinary and Minister Plenipotentiary in France*, Francisco de Argandoña, 66, Rue Pierre-Charron, Paris.—*Acting Consul in London*, Arthur Moutrie, 12, Fenchurch St.

**Bombay.** *Governor*, Lord Sandhurst, G.C.I.E.—*Council of the Governor*, J. Nugent, C.S.I.; Sir E. C. K. Ollivant, K.C.I.E.—*Additional Members for making Laws and Regulations*, Basil Lang (Advocate-General); Ranchodlal Chotalal; W. H. Crowe; Daji Abaji Khare; Mir Allāhbakshkhān walad Mir Alibakshkhān Shahvani Talpur; Narayan Ganesh Chandavakar; W. C. Hughes; A. S. Moriarty; Bhalchandra Krishna Bhatawadekar; T. R. McLellan; Gokuldas Kahandas Parekh; Meherban Narayanras Govind; Fazulbhai Visram, C.I.E.; Dhondo Shamrao Garud; Pherozeshah M. Mehta, C.I.E.; Vrijbhukands Atmaram; R. H. Macaulay; E. Giles; J. K. Spence.—*Secretary*, C. G. H. Fawcett. *Secretaries to the Government: Chief Secretary Revenue, Financial and Separate Departments*, J. Monteath, C.S.I.—*Secretary Political, Special, Judicial, and Separate Departments*, S. W. Edgerley, C.I.E.—*Educational, etc., Departments*, J. de C. Atkins.—*Public Works*, H. M. Thompson, M.Inst.C.E.

**Zanzibar.** *British Political Agent and Consul-General*, Sir A. H. Hardinge, K.C.M.G., C.B.

**Zululand.** Now a province of Natal. See NATAL.

**Disestablishment.** While the State does not concern itself about the affairs of other religious bodies, the Churches of England, of Wales, and of Scotland are national church establishments; and disestablishment means the placing of them on exactly the same footing as those other religious bodies. The Protestant Episcopal Church in Ireland was established at one period, but was disestablished by an Act of Parliament passed in 1869. With regard to disendowment, it should be stated that the advocates of disestablishment propose to respect all existing life interests, and also to leave the disestablished churches in possession of the buildings and endowments which have been the result of the liberality of their own adherents during recent years. The disestab-

lishment and disendowment of the Church of England in Wales, and the disestablishment of the Presbyterian Church in Scotland, are included in the programme of the Liberal Party. A Bill for disestablishing the Church of England in Wales was brought in by Lord Rosebery's Government in '94 (see article on WALES, DISESTABLISHMENT in, in '96 ed.), and reintroduced in '95. It was read a second time (May 21st, '95) by a majority of 44, 304 members voting for and 260 against it. It was being discussed in Committee, when the defeat of the Government (on another issue) led to their resignation. The Bill, as altered in Committee, provided that the bishops and clergy should retain their incomes, palaces, and parsonages for life, also that the Church should retain the cathedrals and churches and all private benefactions received since 1662. The surplus funds were to be applied partly to Welsh national, and partly to parochial purposes; the latter including hospitals, convalescent homes, institutes and libraries, labourers' dwellings, etc. The Bill was strenuously opposed, not only by Welsh supporters of the Establishment, but by Established Churchmen in England, on the ground that it would dislocate the Church, and would lead to disestablishment in England also. The Bill of Sir C. Cameron for disestablishing the Church of Scotland was again brought in in '95, but not discussed. The organisation with which is most closely identified with the disestablishment movement is popularly known as "The Liberation Society," its full title being *The Society for the Liberation of Religion from State Patronage and Control*. It was largely through the labours of this Society that the Irish Church was disestablished, that compulsory Church rates were abolished, that the National Universities were thrown open to Nonconformists, that the Burial Act of '80 was carried, and that many minor religious equality measures have been passed. In '96, and since, the Society has been very active in insisting upon religious equality in relation to national education, and in '98 it entered on a fresh campaign with a view to making Disestablishment all round a question at the next general election. Its attitude was expressed by the following resolution, proposed at the autumnal meeting of the Council (Oct. 24th, '98)—"This Council, in common with the rest of the community, regards with concern and apprehension the lawlessness, antagonism, and confusion now existing in the Established Church as the result of the growth of sacerdotalism among its clergy, as well as of other causes, and believes that the interests of religion are thereby seriously imperilled. It is confident that no effective remedy for the evils complained of would be found in either (1) the action of the Bishops of the Church; (2) the renewal of ecclesiastical prosecutions; or (3) new Parliamentary enactments. The State, having proved itself unable to exercise adequate control over the Established clergy, or to successfully regulate the Established Church's affairs, should now withdraw from the Church national authority and endowments, and, concurrently therewith, permit its members to possess the same rights of self-government as are enjoyed by non-established religious communities. Such a change would, in the opinion of the Council, inevitably give to the laity of the Anglican Church a due share of authority and

influence, and render possible greatly needed ecclesiastical reforms, as has been conspicuously shown in the case of the disestablished Irish Church. Holding these views, the Council is of opinion that the time has arrived when the question of disestablishment should be urgently pressed upon the leaders of the Liberal party, and also upon the constituencies, in view of the next general election." The Society's chief office and dépôt for publications is 2, Serjeants' Inn, Fleet Street; Secretaries, Mr. John Fisher and Mr. Sydney Robjohns. The Church Committee for Church Defence and Church Instruction (*q.v.*) is the organisation on the other side.

**Dispensaries.** See HOSPITALS.

**Dissenting Deputies, The.** See DENOMINATIONS, THE THREE.

**Distinguished Service Order.** Her Majesty having taken into consideration that the means of adequately rewarding the distinguished services of officers in the naval and military services who had been honourably mentioned in despatches were limited, instituted and created for the purpose of rewarding individual instances of meritorious and distinguished service in war a new naval and military Order of distinction. The statutes of the Order, which are dated Balmoral, Sept. 6th, '86, but which were not issued from the War Office until Nov. 6th in that year, provide that no person shall be eligible for the distinction who does not hold, at the time of his nomination, a commission in the navy, in the land forces, or marines, or the Indian or Colonial naval or military forces, or a commission in one of the departments of the army or navy the holder of which is entitled to honorary or relative navy or army rank; nor shall any person be nominated unless his services shall have been marked by the especial mention of his name by the admiral or senior naval officer commanding a squadron or detached naval force, or by the commander-in-chief of the forces in the field, in despatches for meritorious or distinguished service in the field or before the enemy. Foreign officers who have been associated in naval and military operations with our forces are eligible to be honorary members; and the Order ranks next to the Order of the Indian Empire. The badge, which consists of a gold cross, enamelled white, edged gold, having on one side thereof in the centre, within a wreath of laurel enamelled green, the Imperial Crown in gold upon a red enamelled ground, and on the reverse, within a similar wreath and on a similar red ground, the Imperial and Royal cypher V.R.I., is to be suspended from the left breast by a red riband edged blue of one inch in width.

**District Councils** See LOCAL GOVERNMENT ACT.

**Divorce**, in English law, is of two kinds: a *vinculo matrimonii*, or dissolution of marriage; and a *mensa et thoro*, now usually known as judicial separation (*q.v.*). Dissolution of marriage is usually in common language, and in the Divorce Court always, meant when divorce is spoken of; the use of the word divorce as meaning the modern judicial separation belongs to the old ecclesiastical courts only. Till 1858 complete dissolution, or divorce, could only be obtained by Act of Parliament (as in Ireland now); separation by suit in the ecclesiastical courts. The Matrimonial Causes Act, 1857 (which

came into operation Jan. 1st, '58), established the Divorce Court, now incorporated in the High Court of Justice (Probate, Divorce, and Admiralty Division), and this court has power to grant a divorce *a vinculo matrimonii* at the suit of the husband on proof of the wife's adultery, and at the suit of the wife on proof of the husband's adultery, coupled with cruelty or desertion for upwards of two years, or after an order for restitution of conjugal rights (*q.v.*), or for certain aggravated forms of adultery, including bigamy and incestuous adultery. Cruelty does not necessarily imply actual physical violence, the House of Lords, in *Russell v. Russell* ('97) having held "cruelty" to include injury or the reasonable apprehension of injury to life, limb, or health, bodily or mental. A charge of cruelty must be supported by evidence other than the petitioner's. Adultery is inferred from circumstantial evidence. A divorce cannot be obtained if the petitioner has connived at or condoned the offence, or the petition is presented in collusion with the other side. The court has a discretion where the petitioner is guilty of cruelty, acts conducing to the misconduct alleged, desertion, adultery, or unreasonable delay. The decree pronounced in the suit is called a decree nisi, and has no legal effect till it is made absolute, six months later; and during this period the Queen's proctor can, and often does, intervene to show cause why the divorce should not be made absolute, on the ground of collusion between the parties, or some fact having been kept back from the knowledge of the Court that pronounced the decree nisi. See also JUDICIAL SEPARATION, RESTITUTION OF CONJUGAL RIGHTS, and LAW, '98.

**Dog Laws and Licences.** Every person in Great Britain keeping a dog over six months old, with two exceptions, must have a licence, the cost of which is 7s. 6d. The licence can be obtained either of an excise officer or at a post-office, and it is in force from Jan. 1st to Dec. 31st. The exceptions are: a blind person keeping a dog for guidance, and a man who keeps his dog solely for tending sheep and cattle; but certificates of exemption must be obtained from the Commissioners of Inland Revenue. The maximum penalty for breach of the law is £5. In Ireland the licence only costs 2s. 6d. A Departmental Committee, appointed by the Board of Agriculture in '96 to inquire into and report upon the working of the laws relating to dogs, reported during '97, that, while muzzling is the only practicable means for the extermination of rabies, the powers of muzzling as exercised since '92 by local authorities are inadequate to eradicate rabies, and only result in temporary and local checks to its spread. The Board of Agriculture should have regard to the country as a whole and should impose muzzling over considerable areas, irrespective of the boundaries of boroughs or counties. More efficient means should be devised for the due licensing of dogs and for their subsequent regulation. A general Collar and Registration of Dogs Order should be imposed in Great Britain and Ireland, in order to procure the more efficient control over dogs, and to lessen the evils which are caused by stray and ownerless dogs. Existing statutory powers, with a view to regulating and controlling the importation of dogs from abroad, should be exercised. In Great Britain it should be made the statutory duty of the police to aid

in the enforcement of the law relating to dog-licence duties. The whole, and not as at present a moiety, of any penalties recovered by the police, or on information supplied by them, should be paid over to the Police Superannuation Fund, or otherwise applied for their benefit. Lists of licences taken out, subdivided in a form convenient for reference, should be supplied by the Board of Inland Revenue to the various police forces. The determination of questions of exemption of farmers' and shepherds' dogs from dog-licence duty should be transferred, as far as England and Wales are concerned, from the Board of Inland Revenue to justices in petty sessions specially summoned for the purpose, and in Scotland to the authority exercising similar functions. In Ireland licence duty should be made payable for each dog that has attained the age of six months, and in this respect the law should be assimilated to that of Great Britain. In order to secure greater uniformity and simplicity in the laws relating to dogs in the United Kingdom, a consolidating and amending Act should be passed.

**Dominica.** An island in the West Indies forming a presidency of the British colony of the Leeward Islands (*q.v.*). Area, 291 sq. m.; pop. 27,339. Capital, Roseau, pop. about 4500; second town St. Joseph. Sugar, cacao, lime-juice, coffee, fruits, and spices are the chief productions. But in spite of all its great possibilities, the trade of the island is declining. As the result of an inquiry made in '93 into the causes of the lack of prosperity and of the discontent prevalent in the island, it was placed for local affairs under an administrator with far greater powers and freedom than those previously possessed by the Commissioner of Dominica. The constitution of the Assembly was altered so as to include three official, seven elective and four members nominated by the Lieut.-Governor in Council, and a loan of £30,000 to pay off the floating debt was sanctioned. Two-thirds of the people speak French. A few aborigines (Caribs) still exist. The terms on which the Colonial Secretary offered Imperial aid to the colony were made known and considered by the Legislative Assembly (June 16th, '98). The sole condition was that the constitution should be altered so as to give the Crown control of the finances. The offer was refused by 8 votes to 6; but the Assembly was then dissolved, and the newly elected Assembly reversed the decision and carried a Bill accepting the offer (July 14th).

**Dover Harbour.** See **ENGINEERING.**

**Doyle, Dr. Conan,** the grandson of John Doyle, the famous political caricaturist "H. B.," was born at Edinburgh in 1859. His education began at Stonyhurst in Lancashire, and was continued in Germany. At both schools the irrepressible literary leanings of the future novelist broke forth in the shape of school magazines which he edited. In '76 he commenced to study medicine at the Edinburgh University, and remained there for five years. His first essay in literature was "The Mystery of the Sassassa Valley," written at the age of nineteen, and published in *Chambers' Journal*. From '82 till '90 he practised his profession at Southsea, writing all the while various short stories, some of which have been since published under the title of "The Captain of the Polestar." After "A Study in Scarlet," "Micah

Clarke," and "The Sign of Four," came "The White Company," which led to the final abandonment of medicine for literature. "The Adventures of Sherlock Holmes," and "The Memoir by Sherlock Holmes," a series of powerful and remarkably vivid detective stories, attracted universal admiration. In '93 "The Refugees" was published, and in '94 he wrote a short play, "A Story of Waterloo," successfully produced by Sir Henry Irving, and a volume of stories called "The Red Lamp." "The Exploits of Brigadier Gerard," and "Rodney Stone," one of his best stories, followed in '96, "Uncle Bernac" in '97, and "The Tragedy of the Korosko" and a volume of poems ("Songs of Action") in '98. Address: Undershaw, Hindhead, Surrey.

### DRAMA, THE, '98.

It was not a brilliant dramatic year, either with respect to the advent of gifted playwrights or to the increase of the reputation of those whose former successes assured an attentive hearing for whatever they might submit. The progress of "advanced" drama was stayed whilst the conventional recovered some of the ground lost during a few preceding seasons; and, except at about half a dozen theatres, the managerial scheme was simply to amuse. The Shakespearian revivals were less remarkable for quantity than for the artistic quality of production; and, apart from these, little desire was evinced to offer intellectual plays appealing both to mind and heart. Undisguised farces and musical pieces—the latter frequently of the "variety" order—still remained in the ascendant, and next in popular favour came romantic, picturesque drama abounding with striking incident. There was quite an invasion from the other side of the Atlantic. At one period of the summer four American companies, brought over in entirety, had full possession of as many leading West End theatres, and plays of American origin were to be found in every direction. For nearly two decades we have sent our most celebrated actors as well as our best plays on tour in the States, and in '98 the States returned the compliment. The suburban establishments became more numerous, and in some instances the policy of following the central houses in the selection of entertainment was abandoned for that of enterprise, with the result that several plays originally produced in the outlying districts were deemed good enough for transference to mid-theatrical London. This change was significant of a vigorous action calculated to have an important bearing on the future. The opportunities of aspiring dramatic authors being augmented, it is quite possible that in time Suburbia will become altogether independent of the Strand.

For the Shakespearian account three theatres were virtually responsible—the Lyceum, Her Majesty's, and the St. James's. Sir Henry Irving once more found a faithful friend in *The Merchant of Venice*. Repeating with undiminished effect his masterly impersonation of Shylock, and with Miss Ellen Terry as the most winning and persuasive Portia the present generation has witnessed, the famous actor-manager obtained convincing proof that the comedy was as great a favourite with his audiences as ever. Other Shakespearian revivals would have taken place but for the destruction by fire of the scenery of about thirty plays forming the Lyceum repertoire.

Had not "The Merchant of Venice" been removed from the place of storage a few days before, it would have shared the same fate as "Henry VIII.," "Cymbeline," "Much Ado about Nothing," "King Lear," "Richard III.," "Macbeth," and other elaborate productions marking the present régime. Owing to arrangements for tours in the suburbs and in the provinces, Sir Henry Irving brought his season to a close on July 1st, when he announced that his next Shakespearian revival would be the long neglected **King Richard II.** Mr. Forbes Robertson again took the Lyceum in the autumn, opening on Sept. 17th with **Macbeth.** A few months before, he had played the murderous Thane at Dublin, on returning from a successful visit to Germany with his own company. On each occasion Mrs. Patrick Campbell appeared as Lady Macbeth. Mr. Robertson's reading of the part evoked some discussion, but the intellectuality and artistic sympathy characterising it were universally acknowledged. For divers reasons Mr. Beerbohm Tree's revival of **Julius Cæsar** at Her Majesty's (Jan. 22nd) was one of the most notable events of the year. It was a series of magnificent stage pictures, in which every character was played with such fidelity and judgment as apparently to belong to the time and action depicted. Mr. Tree's Marc Antony, Mr. Lewis Waller's Brutus, Mr. Franklin McLeay's Cassius, Mr. Fulton's Julius, Mr. Calvert's Casca, Miss Hanbury's Calphurnia, and Miss Millard's Portia equally stood out as forcible embodiments thoroughly in harmony with each other and with the spirit of the tragedy. By a neat rearrangement of the acts the momentous incidents were brought closer together, and in the Forum scene the Roman mob had been so well drilled as to constitute a singularly exciting and realistic spectacle. "Julius Cæsar" had an unprecedented run of several months, and before he left town Mr. Tree intimated his intention of staging **King John.** At the St. James's, on Feb. 16th, Mr. George Alexander revived **Much Ado about Nothing** in sumptuous and eminently tasteful style, with a carefully selected cast, including himself as Benedick, Miss Julia Neilson as Beatrice, and Mr. Fred Terry as Don Pedro. In the early autumn Miss Ellen Terry played Desdemona at the Grand at Fulham for a few nights, with Mr. Frank Cooper as Othello.

Poetic and imaginative drama was not very well represented. Miss Olga Nethersole opened Her Majesty's for an autumn season on Sept. 1st with **The Termagant**, an original play by Messrs. Louis N. Parker and Murray Carson. It was an ambitious essay, that received all possible aid from Miss Nethersole and her companions, and from beautiful stage decoration. At the Lyceum on July 4th M. Coquelin commenced a series of performances of the much-talked-of **Cyrano de Bergerac**, crowded audiences completely endorsing the enthusiastic approval bestowed upon his finished assumption in Paris. Madame Sarah Bernhardt visited London in June, and at the Lyric, besides going through a round of her celebrated characters, appeared in Romain Coolus' **Lysiane** and Octave Feuillet's **Julie.** An interesting production was a translation by Mr. J. W. Mackail of Maeterlinck's tragic romance, **Pelléas et Mélisande**, taken in hand by Mr. Forbes Robertson at the Prince of Wales's (June 21st) for matinées. The youthful

heroine was prettily played by Mrs. Patrick Campbell, Mr. Robertson was the middle-aged husband, and Mr. Martin Harvey the boy lover.

Of sterner stuff was the first novelty of the year, **Peter the Great**, presented at the Lyceum on Jan. 1st. Written by Mr. Laurence Irving, and with his distinguished father playing the title-part, its introduction evoked more than ordinary curiosity. Naturally Sir Henry in every way did his best for the piece, and his rugged Peter was voted a splendid performance; but the many advantages the piece obtained could not counterbalance the gloom of the theme of an exacting and suspicious father sentencing his son to death for the supposed good of the country. That the play was powerful and clever was widely admitted, but it did not prove very attractive. Sir Henry was a little more fortunate (May 4th) with the thoroughly modern **The Medicine Man**, by Messrs. H. D. Traill and R. S. Hichens, who turned to account the weirder elements of will-power. **Ragged Robin**, adapted by Mr. Louis N. Parker from Jean Richepin's "Le Chemineau," was very favourably received at Her Majesty's (June 23rd) with Mr. and Mrs. Tree as the wanderer and his victim respectively. Mr. G. R. Sims' **The Gipsy Earl** at the Adelphi (Aug. 31st), and Messrs. Cecil Raleigh and Henry Hamilton's **The Great Ruby** at Drury Lane (Sept. 15th), were thoroughly suited to their respective quarters through their scope for both spirited acting and spectacular accessories. **Teresa**, a drama by Mr. George P. Bancroft, was played for some time at the Garrick after successful trial at the Métropole; and in the summer **The Heart of Maryland** with an American company did well at the Adelphi. Evidence of the renewed popularity of thorough-going romantic drama was furnished by the "boom" in Dumas' **The Three Musketeers.** Versions of the story cropped up in various places after it became known that plays on the subject had been respectively prepared by Mr. Henry Hamilton for Mr. Lewis Waller and by Mr. Sydney Grundy for Mr. Beerbohm Tree. Of the two latter the first to see the light was Mr. Hamilton's (Métropole, Sept. 12th), with Mr. Waller as the brave Gascon, Miss Florence West as Miladi, and Miss Kate Rorke as the Queen, and the success both in London and the provinces was so pronounced that the piece was eventually brought to the Globe. Mr. Grundy's adaptation was produced at Her Majesty's immediately on the return of Mr. Tree (who played D'Artagnan) from his country tour (Nov. 4th). In differing degree Mr. Paul M. Potter's **The Conquerors** (St. James's, April 14th), Mr. Joseph Hatton's new edition of **Jack Sheppard** (Pavilion, April 9th), Mr. Frank Harvey's **A Musician's Romance** (Métropole, June 13th), Messrs. Landeck and Shirley's **Going the Pace** (Pavilion, Oct. 24th), a translation of the late Sergius Stepniak's **The Convert** (Avenue, an afternoon in June), Messrs. Sutton Vane and Arthur Shirley's **The Bell Ringer** (Grand, Islington, July 25th), and Alicia Ramsey and R. de Cordova's **As a Man Sows** (Grand, Islington, Aug. 22nd), also obtained notice.

In the domain of genuine comedy Mr. J. M. Barrie's **The Little Minister** (at the Haymarket) and Mr. Henry A. Jones' witty **The Liars** (Criterion), were such established successes that both pieces resumed their accustomed places after the autumn holidays. The first-

named was not displaced until Oct. 20th, when a new comedy called *The Manceuvres* of *Jane*, by Mr. H. A. Jones, was produced by Messrs. Harrison and Maude. Mr. and Mrs. Kendal, who were very cordially greeted, returned to London in April to play Mr. Walter Frith's *Not Wisely but Too Well* at the Grand, Fulham, and on Sept. 22nd to commence a season at the St. James's with *The Elder Miss Blossom*, a charming piece by Messrs. Ernest Hendrie and Metcalfe Wood, upon which a hearty verdict of approval was passed. "John Oliver Hobbes" (Mrs. Craigie) scored with *The Ambassador* at the St. James's (June 2nd), as also did Mr. R. C. Carton with his smart *Lord and Lady Algy* at the Comedy (April 21st). Shafts of amusing satire against the foibles of actors in the sixties were directed by Mr. A. W. Pinero in *Trelawney of the "Wells"* at the Court (Jan. 20th), and Mr. Stuart Ogilvie came to the front with *The White Knight* at Terry's (Feb. 26th) and *The Master* (with a good part for Mr. John Hare, who brought back to the stage the far too long absent Miss Kate Terry) at the Globe (April 23rd). *Dangerfield*, '95, a one-act piece by Mildred J. Dowling, at the Garrick (May 26th), brought to London Miss Annie Russell, a delightful young actress, who a little later specially distinguished herself on the same boards in the more substantial *Sue*, adapted from Bret Harte's story "The Judgment of Bolinas Plains." A pleasing sentimental piece was Miss Martha Morton's *A Bachelor's Romance* at the Globe (Jan. 8th). In such old comedies as *She Stoops to Conquer*, *The School for Scandal*, and *The Country Girl*, Miss Kate Vaughan played at Terry's, where in the autumn Mr. Tom Thorne revived *Our Boys*. A decided hit was made at the Duke of York's with *The Adventure of Lady Ursula* (Oct. 11th), by Mr. Anthony Hope, who during the following week joined Mr. Edward Rose in submitting, at the Court, *When a Man's in Love*. Another acceptable modern comedy was *Brother Officers*, by Leo Trevor, at the Garrick (Oct. 20th). Among the farcical pieces that kept the bill for some time were the American *Too Much Johnson*, with Mr. William Gillette, at the Garrick, in April; Robert Ganthony's *A Brace of Partridges*, Fenton Mackay's *The J.P.*, and George Broadhurst's *What Happened to Jones* at the Strand; R. Marshall's *His Excellency the Governor*, at the Court; *The Dove Cot*, an adaptation of "Jalousie," at the Duke of York's; *The Club Baby* at the Avenue; G. R. Sims and Leonard Merrick's *My Innocent Boy* at the Royalty; and Osmond Shillingford's *Tommy Dodd* at the Globe (Aug. 30th).

Musical pieces—the majority by three or four authors and composers—were so numerous that they went beyond count. Several were produced merely with the view of obtaining a certain amount of prestige for provincial purposes, and to these it is not necessary to refer. At Daly's "The Geisha" at length resigned in favour of *A Greek Slave* (June 8th); at the Gaiety on May 21st *A Runaway Girl* took the place of "The Circus Girl"; at the Vaudeville on Sept. 3rd *Her Royal Highness* superseded "The French Maid"; and on Sept. 16th *The Royal Star* ousted "La Poupée" at the Prince of Wales's. The American *The Belle of New York*, in which much novelty was detected, was a great draw at the Shaftesbury (April 12th). Of English facility in this class

of production *The Dandy Fifth* (Duke of York's, Aug. 16th) and *Bilberry of Tilbury* (Brixton and Criterion) were favourable specimens. Later additions were *Little Miss Nobody* (Lyric, Sept. 14th), the merry *The Topsy-Turvy Hotel* (Comedy, Sept. 21st), and *The Land of Nod* (Royalty, Sept. 24th).

The benefit for Miss Nellie Farren at Drury Lane, on March 17th, was a remarkable demonstration of sympathy, alike by the profession and the public, and proved an unexampled success. The Greek play at Bradford in June was *Antigone*. Among miscellaneous events of special interest must be mentioned the revivals of Rowley and Middleton's *The Spanish Gypsy* (St. George's Hall, April 5th), Ford's *The Broken Heart* (St. George's Hall, June 11th), and Ben Jonson's *The Sad Shepherd* (Fulham Palace Grounds, July 23rd), by the Elizabethan Stage Society.

**Dreyfus Affair.** See under FRANCE.

**Dublin.** The Most Rev. J. F. Peacocke, Archbishop of, is the son of Mr. George Peacocke, M.D., and was born in 1835. He was educated at Trinity College, Dublin, where he graduated B.A. (Senior Moderator in History and English Literature) in '57. He won the Regius Professor of Divinity's first premium, and obtained a first class in the Divinity testimonium examination in '58. He proceeded M.A. in '62, B.D. '77, and D.D. '83, and was ordained deacon '58 and priest '59. After holding several curacies he was appointed canon of St. Patrick's Cathedral, Dublin, in '75. He was incumbent of St. George, Dublin, '73-'88, and rector of Monkstown from '78 to '94. In '94 he was appointed Professor of Pastoral Theology in Trinity College, Dublin, and in the same year he was consecrated Bishop of Meath. He married in '65 the daughter of Major John Irvine, of Killadeas, co. Fermanagh. On the death of Lord Plunket, in '97 he was elected by the Bench of Bishops to succeed him as Archbishop.

**Dublin University.** The University of Dublin, commonly known as *Trinity College, Dublin*, was founded in 1591 by Queen Elizabeth, who also established in the same year a college under the style of the Holy and Undivided Trinity, near Dublin. Its constitution has been altered by numerous Royal charters. In the Treaty of Union between Great Britain and Ireland (1800) it is spoken of as the University of Trinity College. The tercentenary festival of the College was celebrated in July '92 with great solemnity and splendour. At the service in St. Patrick's Cathedral, the Dean traced the history of the University back to a period three hundred years before the founding of the present University by Elizabeth. In 1321, he stated, the then Archbishop of Dublin established a University at St. Patrick's with the sanction of the Pope, but it came to an end after an existence of nearly two centuries. The Chancellor of the University is the Earl of Rosse, and the Vice-Chancellor the Right Hon. D. H. Madden, LL.D. The undergraduates exceed 800. Certificates of proficiency are granted to women. Degrees: D.D., B.D., M.A., B.A., M.D., M.B., M.Ch., B.Ch., LL.D., LL.B., Mus.D., Mus.B., M.Engin., B.Engin., D.Sc., D.Litt. The two last-named are new degrees, conferred only for original research and discoveries. The Regius Professors are: Rev. Dr. Gwynn

(Divinity), Robert Tyrrell (Greek), Sir John Banks (Physic), Henry Brougham Leech (Law), C. B. Ball, M.Ch. (Surgery); Professor of Latin, Louis C. Purser, D.Litt.; Ancient History, Rev. J. P. Mahaffy, D.D.; Modern History, John B. Bury, M.A.; Mathematics, W. Snow Burnside, D.Sc.; Chemistry, Emerson Reynolds, D.Sc.; Natural Philosophy, Alexander Tarleton, D.Sc.; Experimental Physics, George F. Fitzgerald, D.Sc.; Civil Engineering, Thomas Alexander, M.A., etc. **Parliamentary representatives:** Rt. Hon. Edward Carson, Q.C., and W. E. H. Lecky, LL.D. **Provost,** Rev. George Salmon, D.D.; **Vice-Provost,** John K. Ingram, LL.D.; **Bursar,** Rev. James W. Barlow, M.A.; **Senior Proctor,** Rev. Thomas K. Abbott, D.D.; **Senior Lecturer,** B. Williamson, D.Sc.; **Registrar,** Rev. R. M. Connor, D.D.; **Librarian,** Rev. T. K. Abbott, D.D. Consult *Dublin University Calendar*.

**Dufferin, Marquis of.** See under **PEERAGE**.

**Dulwich College** (Alleyn's "College of God's Gift" at Dulwich) was founded A.D. 1619, by Edward Alleyn, the Actor, under Letters Patent of King James I., by which a licence was granted to Alleyn to establish a College "to endure and remain for ever," and to be called "The College of God's Gift in Dulwich, in the County of Surrey." Reconstituted '58, and removed to new site and new building '70. **Present numbers** in the school, 680. No boy may enter the school before the age of 10, or remain after the age of 19. Endowment about £4000 per annum. £1000 may be annually allotted among "boys proceeding to a place of higher education," and £1000 also may be paid annually in scholarships to boys either already in the school or about to enter it. Such scholarships are awarded as the result of open examination. **Head Master,** A. H. Gilkes, M.A.; **School Secretary,** Gilbert B. Stretton, M.A.; **Motto,** *Detur Gloria Soli Deo*.

**"Dundee Advertiser."** The morning newspaper which is generally regarded as the most prominent organ of the Liberal party in Scotland. Issued from the same office are the *Evening Telegraph*, the *People's Journal*, and the *People's Friend*. The *People's Journal* is the great Radical working-man's weekly newspaper in Scotland, having a circulation approximating to a quarter of a million, and being read all over the country. **Editor,** Sir John Leng, M.P., for Dundee. **Chief Office,** 7 to 25, Bank Street, Dundee. **London Office,** 186, Fleet Street, E.C.

**Dupuy, M. Charles,** was b. at Puy, Nov. 5th, 1851, and is the son of a process-server at the Prefecture. Obtaining a scholarship at a *lycée*, he passed through the Ecole Normale, and became a Professor of Philosophy in various colleges in the provinces, and afterwards an inspector of schools ('83). He left his educational career when he was elected to the Chamber in '85, and actively took up politics,

joining himself to the advanced Republican party. M. Ribot gave him the portfolio of Public Instruction in the Cabinet of '92, and in '93 he became Premier. He was succeeded by M. Casimir-Perier in Nov. '93, and was then elected President of the Chamber, only to become Premier again in May '94, when M. Casimir-Perier fell. He was in office when Captain Dreyfus was condemned and degraded; but in Jan. '95 he had to resign, and was succeeded by M. Ribot. When M. Brisson's Cabinet was defeated and had to retire, in Oct. '98, M. Dupuy was commissioned by the President to form a Ministry, and succeeded.

**Durham, Bishop of.** See under **PEERAGE**.

**Durham University,** founded 1832, comprises University College (37), Bishop Hatfield's Hall (46), and the Colleges of Medicine and Science located at Newcastle-upon-Tyne. The students number about 200 at Durham, and about 2000 (reckoning matriculated and non-matriculate students) at Newcastle. Unattached students first admitted '71. Affiliated are Codrington College, Barbadoes, and Fourah Bay College, Sierra Leone. **Warden,** the Dean of Durham, G. W. Kitchin, D.D., F.S.A., who is also President of the College of Science; President of the College of Medicine, G. H. Philipson, M.D., M.A. **Degrees:** D.D., B.D., M.A., B.A., D.C.L., B.C.L., M.D., M.E., M.S., B.S., Mus.D., Mus.B., D.Litt., B.Litt., D.Sc., M.Sc., B.Sc. **Licences** in theology, **Diplomas** in public health, and **Certificates** of proficiency in general education, also granted. **Local University Lectures** are also given in connection with this University, and local examinations have been established. Consult *Durham University Calendar*.

**Dutch Colonies.** See **COLONIES, ETC., OF EUROPEAN POWERS**.

**Dutch Political Parties.** See **NETHERLANDS, POLITICAL PARTIES**.

**Dykes, Rev. J. Oswald,** D.D., b. at Port Glasgow 1835, graduated M.A. at Edinburgh '54, studied theology at New College (Edin.), Heidelberg, and Erlangen. Ordained minister of the Free Church, East Kilbride, Lanark, '59; elected colleague of Dr. Candlish in Free St. George's, Edinburgh, '61. Compelled to resign this important charge through feeble health in '64, he visited Australia, where he remained for three years. In '69 he became minister of Regent Square Presbyterian Church, London. He left this charge in '88, when he was appointed Principal of the Theological College, Queen Square. **Works:** "Beatitudes of the Kingdom" ('72), "Laws of the Kingdom" ('73), "Relations of the Kingdom" ('74), "From Jerusalem to Antioch" ('74), "Abraham" ('77), "Daily Prayers" ('81), "Sermons" ('82 and '92), "The Law of the Ten Words" ('84), "The Gospel according to St. Paul" ('88), "Plain Words on Great Themes" ('92). Address: 38, Coolhurst Road, Crouch End, N.

## E

**Earl Marshal, The,** is one of the great officers of State, and takes precedence next after the Lord High Constable. The latter office ceased to be hereditary in 1521, since which it has been only temporarily revived for successive coronations, and once for a trial by combat, which, however, did not take place. One of the functions of this exalted personage is, in company with the Earl Marshal, to usher the **King's Champion** into Westminster Hall just before the second course of the coronation banquet. It is usual to appoint to the office some person of high rank and great distinction, and the first **Duke of Wellington** was selected to fill it at the coronations of George IV., William IV., and Her Majesty. The Lord High Constable and the Earl Marshal were formerly judges of the ancient Court of Chivalry; but when the former office ceased to be hereditary, the sole jurisdiction in questions of honour and arms was vested in the Earl Marshal, who is head of the College of Arms (see **GARTER KING OF ARMS**). The office of Earl Marshal is hereditary in the family of the Duke of Norfolk. **Office,** Queen Victoria Street, E.C.

**Early Closing Association and Traders' Parliamentary Alliance.** Founded for promoting: (1) An abridgment of the hours of labour in all departments of industrial life, wherever unduly prolonged—especially on Saturday nights; (2) the adoption of a Saturday or other weekly half-holiday; (3) the abolition of unnecessary Sunday labour; (4) the early payment of wages; (5) the promotion of a profitable employment of leisure hours; (6) the promotion of the interests of traders and their assistants in matters requiring municipal or legislative control. By subscribing 2s. 6d. half-yearly, assistants are entitled to receive gratuitous medical advice from any of the Society's honorary medical staff. **President,** Sir John Lubbock, Bart., M.P. **Secretary,** James A. Stacey. **Offices,** 21, New Bridge Street, E.C.

**East Africa, German.** The German possessions in East Africa lie immediately to the south of British East Africa, and have an estimated area of about 400,000 sq. m., with a population of 4,000,000. They are bounded on the north by a line running north-west from the Umbe river to the east shore of the Victoria Nyanza, and continuing west from this lake to the Congo State. Lake Tanganyika forms the western boundary, and thence a line to Lake Nyasa, and the river Rovuma form the south-west and southern boundaries. In September '94 it was agreed that the German-Portuguese frontier should follow the parallel  $10^{\circ} 40' S.$  lat. from the coast to its intersection with the river Rovuma, leaving Kionga and the mouth of the Rovuma to Germany, and Cape Delgado to Portugal. Several stations have been established by the German East Africa Company, and the chief ports are Dar-es-Salaam, Bagamoyo, Kiloa, and Tanga. A narrow-gauge railway from the coast to Lakes Victoria Nyanza and Tanganyika is projected. The entire length will be 1775 kilometres. It is to start from both Bagamoyo and Dar-es-Salaam, with a main junction some

30 kilometres inland, and to extend to Lakes Tanganyika and Nyanza, *via* Tabora. The style of construction is to be as light as possible, and the gauge 75 centimètres. The entire cost is estimated at from 30,000,000 to 40,000,000 marks, but it is only intended at first to build a stretch of some 296 kilometres. Colonel Liebert is the Governor of the colony. The products of the country are coffee, tobacco, cotton, ivory, caoutchouc, and gum. Gold has been found at Usambara. **Imports,** '95-6, £373,500; **exports,** £190,600.—**History,** '98. Major Liebert, the Governor, placed a tax on houses and huts in the colony as from April 1st, but the option was given to pay the tax in kind or even in labour, instead of in money. The Reichstag granted a sum of 72,000 marks for the purpose of keeping the Usambara railway in working order until it was able to pay its way (Feb. 13th).

**East Africa, Portuguese,** comprises the two districts of Lorenzo Marques and Mozambique, which are separated from one another by the Zambesi, and the other smaller districts of Zambesia, Inhambane, and Gaza. Its coastline extends southwards from Cape Delgado, the southern extremity of the coast-line of German East Africa, to Kosi Bay, just below Delagoa Bay, at a point separating British from Portuguese territory, as fixed by the Anglo-Portuguese Agreement of '91; the northern boundary is the river Rovuma, running west from Cape Delgado to Lake Nyasa. The frontier between German and Portuguese East Africa runs along parallel  $10^{\circ} 40' S.$  lat. from the coast to its intersection with the river Rovuma, leaving the mouth of the Rovuma and Kionga to Germany, and Cape Delgado to Portugal. The eastern boundary is the lake and British Central Africa, or the Nyasa Protectorate down to the junction of the Shire with the Zambesi; while from that point the British South Africa Company's territory, including Mashonaland and Matabeleland, and the South African Republic, form the boundary. The colony is administered by a Royal Commissioner appointed for three years. The Manica and Sofala region, where gold exists, is placed under the Mozambique Company, which has a royal charter. Other companies are working other parts of the country. The two principal railways of this region are the Delagoa Bay (*q.v.*) which has a length of 57 miles in the colony, and the Beira, the latter now being in course of construction. The alignment runs from the river Pungué on the east coast, a point 12 miles from the mouth of the river, and it is hoped will eventually reach Fort Salisbury, the capital of Rhodesia, and join a line from Bulawayo. It had made such a rapid advance that in Nov. '98 it was already 60 miles beyond Umtali. The distance of Salisbury from the sea is 382 miles. Beira is connected by telegraph with Salisbury. In Feb. '96 it was stated that a new company had been formed to construct a railway, 36 miles long, from Port Beira to Fontesvilla, the commencement of the railway, and at intervals since then some progress has been made. The principal exports are oilnuts and seeds,

caoutchouc and ivory. **Area**, about 3,000,000 sq. m.; **pop.** about 300,000. See TRANSVAAL (map).

**East Africa Protectorate.** The British possessions in East Africa extend about 400 miles along the coast northwards from Umba, at the mouth of the Umbar river. The southern boundary runs from Umba in a north-west direction to the intersection of the Victoria Nyanza with the first parallel of N. lat., skirts the northern shore of the lake, and thence westwards to the boundary of the Congo Free State. The river Jub begins the northern boundary, which from the intersection of the river with the 6th parallel N. lat. runs to the 35th meridian E. long., and follows that to its intersection with the Blue Nile; the Congo Free State and the western watershed of the basin of the Upper Nile forming the western boundary. The total area is about 1,000,000 sq. miles, embracing a great part of Somaliland, the Equatorial Province, Uganda, Usoga, Unyoro, etc., and the population is estimated at between 2,000,000 and 3,000,000. The Imperial British East Africa Company opened up the country, having in '88 obtained a concession of territory from the Sultan of Zanzibar and a charter from the British Government. An arrangement for buying them out was, however, come to in '95. It was arranged that the Sultan of Zanzibar should pay £150,000 for the surrender of the Company's concession of a ten-mile strip along the coast, and £50,000 for their assets, while the British Government should pay a grant of £50,000 for the surrender of the Company's charter. The majority of the Company's *employees* were re-engaged by the Government. Uganda was made a protectorate, administered by Mr. E. L. Berkeley; the country between Uganda and the ten-mile strip along the coast was made a protectorate under the authority of the British Consul-General at Zanzibar; Witu and the river Tana region were similarly treated, and finally the ten-mile strip along the coast bought back from the Company by the Sultan was rented by the Government for £11,000 a year, and the territory placed under the administration of the Consul-General at Zanzibar. The Protectorate is divided into four districts: the Coast Province, capital Mombasa; Ukamba, capital Muchakos; Tanaland with Witu, capital Lamu; and Jubuland, capital Kismaya. The chief ports are Mombasa (which is also the capital of the whole Protectorate), Lamu, Vanga, and Kismayu. The construction of a railway of 670 miles' length from Mombasa to Lake Victoria Nyanza has been commenced. Mr. Whitehouse and his staff began operations on Dec. 11th, '95. A Parliamentary paper issued in July '97 reported that at the end of '96 and the beginning of '97 the health of the staff and labourers had been very bad, and there had been unseasonable rains. The total expenditure to March 31st, '97, was £390,838, of which £211,850 represented cost of material and freight from England, and the remainder expenditure in India and Africa. The first 100 miles of line were completed on Sept. 30th. The *Times* published an article descriptive of the whole undertaking on Aug. 16th. A Foreign Office paper on the Uganda Railway, issued in July '98 ('E. Africa,' No. 8), stated that during the year ending March 1881 miles were surveyed, making in all 263 miles, and earthworks had been made and rails laid up to 139 miles. The

first 100 miles, to the Voi river, had been opened for traffic in December, and the earnings for the first three months amounted to 126,400 rupees, or, excluding the carriage of railway stores, 676 rupees per mile per week. The telegraph line had been pushed on to Kikuyu, 325 miles. From another source it appears that a time and fare book had been prepared, the fares being first class, 38 rupees; second class, 19 rupees; and third class, 3 rupees 3 annas, for the whole distance of 100 miles. A telegram from Mombasa (Sept. 9th) reported that Kibwezi was reached at the end of August, and that the rails were laid past the 200-mile peg on Sept. 8th. The principal products of the country are cloves, ivory, indiarubber, copra, hides, etc. See AFRICA and SOUDAN (map).

**East Indies, Dutch.** The Dutch possessions in the Asiatic Archipelago include Java (*q.v.*), with Madura, and what are called the Outposts, viz., Sumatra, part of Borneo (*q.v.*), Celebes, the Moluccas, part of New Guinea (*q.v.*), and the Sunda and other islands. For the area and population of these islands, etc., see COLONIES, etc., OF EUROPEAN POWERS. Java is dealt with in a separate article. The Outposts, which have an estimated area of about 650,000 sq. m., and an estimated population of about 9,000,000, are administered by Governors, Residents, etc., according to their status. The administrative and executive authority for the whole of Dutch East India is in the hands of a Governor-General, assisted by a Council of five members. The army, which is purely colonial, numbers about 16,500 Europeans and 22,000 natives. The cost of the navy is borne partly by the colony and partly by the Government of the Netherlands. There are over 1200 miles of railroad opened for traffic. The chief exports are sugar, coffee, tea, indigo, and tobacco. Estimated revenue, '97, £10,537,000; expenditure, £11,736,000; average imports, £13,000,000; average exports, £16,000,000. See DIPLOMATIC.

**Ecclesiastical Commissioners.** The, owe their origin to the Act 6 and 7 Will. IV., c. 77. Incorporated for the purpose of making schemes to carry out the recommendations of certain earlier commissions appointed to inquire into the endowment of bishoprics, the state of cathedral and collegiate churches, the best way of providing for the cure of souls, etc. The Act provided that the two Archbishops, the Bishop of London, the Lord Chancellor, Lord President, and First Lord of the Treasury for the time being, as well as a Secretary of State named by the sovereign, with three others therein named, should be of the commission. A subsequent Act added all the remaining bishops in England and Wales, the Chief Justice, and others. Membership of the Church of England has always been an indispensable condition of holding the office. By an Act of 1856 the Church Building Commissioners had their powers transferred to the Ecclesiastical Commissioners. Generally it may be said that the function of the Ecclesiastical Commissioners is to provide for the adjustment of the endowments to the wants of the Church. The proceedings of the Commissioners are controlled by numerous Acts of Parliament, and various duties have from time to time been imposed upon them—e.g., the formation of new parishes and alteration of boundaries where required, the augmentation and endowment of poor benefices in populous places, the sale

and leasing of glebe lands, etc., etc. Since '40, when the common fund was first created, the Commissioners have augmented or endowed upwards of 5800 benefices. The total increase in the incomes of benefices resulting from the operations of the Commissioners exceeds £1,024,230 per annum, and may be taken to represent a capital sum of £30,787,500. The Commissioners determined to appropriate in grants towards the augmentation and endowment of benefices, during '98, the sum of £150,000 of capital. Office, 10, Whitehall Place, S.W. Secretary, A. De Bock Porter, C.B.

**Ecclesiastical Courts.** These are of three degrees of jurisdiction. First there are the purely spiritual courts, including the Archdeacon's Court, the Bishop's Consistory, and the Archbishop's Court; second, courts of mixed spiritual and secular jurisdiction—e.g., the Court of Arches and the Court of the Official Principal of York; and, third, courts of purely secular constitution—e.g., the Judicial Committee of Privy Council, which is the Court of Final Appeal in ecclesiastical causes. Practically none of these courts now pretends to undisputed authority. The report of the Royal Commission on Ecclesiastical Courts ('83), while vindicating the historical position of them all, bewailed the confusion into which the administration of ecclesiastical law had fallen, and urged the adoption of various reforms. Absolute power, however, meanwhile rests with Lord Penzance, "Judge of the Provincial Courts of Canterbury and York," under the Public Worship Regulation Act, '74, and, as such, Dean of the Arches and Master of the Faculties. By the issue of writs de *contumace capiendo* clergymen have been, and may be, imprisoned for defying sentences of monition, by inhibition, suspension, or deprivation decreed by this court. The judgments of the Judicial Committee may be upheld and enforced by any of the High Courts of Justice. The Archdeacon's Court is a survival, and nothing more. It is a court of first instance, and appeals lie to the bishop, but its aid is seldom invoked.—**Consistory.** Every bishop has his Consistory Court held before his Chancellor or Commissary, in his cathedral church, or other convenient place in his diocese. In this court are granted faculties for the alteration, repair, and renovation of churches. Nothing can be added to or taken from the ornaments of the Church except a faculty is obtained for the purpose. The Archbishop's Court, distinguished from the Provincial Court, is the canonical tribunal for the hearing of spiritual causes. Lord Penzance's Court, or the old Court of Arches modified as stated, unites the powers of the *jus canonicum* with new powers conceded by the Church Discipline Act, '41, and the similar statute of '74, exercising authority in both Provinces. Lastly, the Judicial Committee of Privy Council, as representing the Royal Supremacy, is the absolute though not the canonical court of final appeal.

**"Echo, The."** An evening paper, established Dec. 1868. Its principles are Independent Liberal. The *Echo* gives daily, in a condensed form, the chief and latest news of the day, foreign, home, and commercial, of which it treats in an independent manner. Several new features have recently been introduced in the *Echo*, special prominence being given to topics of social interest. Manager, Mr. W. F. Cornish. Office, 22, Catherine St., Strand, W.C.

**Economics and Political Science, The London School of.** The School commenced work in Oct. '95, and is already the largest centre of systematic training in economic and political studies in the United Kingdom. During the third year, '97-8, 378 students joined the School. Work is carried on, by lectures and classes, both in the morning, and in the evening after 5 p.m. A three years' course of training in economics has been established. With the view of encouraging the elementary study of economics and political science, a limited number of scholarships, tenable at the School, are awarded to selected students from University Extension and other classes in economics. Three research studentships, of from £100 to £25 each, were awarded after an examination held in July '98, for the promotion of special investigations into problems of economic and political science. A sum of more than £1500 has been obtained for the purposes of The British Library of Political Science. The Library is intended for the free use of students of the School, persons engaged in public administration, professors, etc., of a recognised University, and others are admitted by the Directors on recommendation by some person of position. Hours: opens daily at 10 a.m. Closes (a) in Term, on Saturdays at 6, other days at 9 p.m.; (b) in Vacation on Mondays, Wednesdays, and Fridays at 9, other days at 6 p.m. Closed entirely on Sundays, January 1st, Good Friday and next five days, Saturday before Whit Monday and next four days, first fourteen days of August, Christmas Day and next six days. Contains a valuable collection of English and foreign municipal reports, minutes, etc., publications of other local government bodies, Government publications, etc. The School is located at 10, Adelphi Terrace, London, W.C. All communications should be sent to the Director.

**Ecuador.** A republic of equatorial South America, governed by a President elected for four years, with the assistance of a Congress composed of a Senate of 32 members, elected for four years (one-half retiring every two years), representing the provinces, and a Chamber of 42 Deputies, representing the people, which is elected every two years. The electors to both Chambers must be adults able to read and write, and holding the Roman Catholic faith. Area, 120,000 sq. m.; pop. 1,270,000. Capital, Quito, pop. 50,000. The foreign commerce is largely with the United Kingdom, and centres in Guayaquil. The chief products are cocoa, indiarubber, hides, coffee, sugar. Gold exists in the Napo country, three or four days' march from Quito, but the country badly needs opening up. Army about 3341 officers and men. Between Ecuador, Peru, and Colombia there have been for some time boundary disputes, at present unsettled. Revenue, '96, £885,936; expenditure, £877,952; public debt, about £2,500,000; imports, £1,675,360; exports, £2,342,000. For Ministry, etc., see DIPLOMATIC.

**Edinburgh University,** founded 1582, has since become one of the chief medical centres in the world. During '97 the total number of matriculated students was 2813. Of these 777 were enrolled in the Arts Faculty, 1423 in the Faculty of Medicine, 390 in Law, 60 in Divinity, 153 in Science, and 10 in Music. The aggregate value of the University fellowships, bursaries, and prizes now amounts to over £16,000 per annum, most of the bursaries being open to

competition. Chancellor, Rt. Hon. A. J. Balfour; Principal and Vice-Chancellor, Sir Wm. Muir, K.C.S.I., D.C.L., LL.D., etc.; Lord Rector, Lord Balfour of Burleigh (elected Nov. 7th, '96). Conjointly with St. Andrews it sends a representative to Parliament; present member Sir William Overend Priestly, K.B., M.D., LL.D. Its Degrees are: M.A., B.D., D.D., LL.B., B.L., LL.D., M.B., Ch.B., M.D., Ch.M., B.Sc., D.Sc., D. Litt., D. Phil., Mus. Doc., Mus. Bac. Women have been since '92 admitted to the Arts and Science classes and to Graduation in Arts and Science on the same terms as men. Of the above number of matriculated students, 188 were women, and 54 were also among the non-matriculated students in attendance on the Music Classes. Women who have obtained their medical education in universities, or recognised extra-academical schools, are now admitted to degrees in medicine and surgery in the university. Alumni include Sir William Hamilton, Carlyle, Hume; Nasmyth, the engineer; Sir Walter Scott, Mungo Park, James Mill, Owen, the anatomist; Sir C. Wyville Thomson, scientific chief of the *Challenger* expedition; Dugald Stewart, Lord Brougham, R. Louis Stevenson, and J. M. Barrie. Sec. of Senatus, Prof. Sir L. J. Grant, Bart. Consult *Edinburgh University Calendar*.

## EDUCATION.

- I. INTRODUCTION.
- II. PRIMARY EDUCATION.
- III. THE RELIGIOUS DIFFICULTY.
- IV. SECONDARY EDUCATION.
- V. TECHNICAL EDUCATION, ETC.

### I. INTRODUCTION.

The educational system of Great Britain, as it stands to-day, is a remarkably varied and complex system. First as to primary education. The Elementary Education Acts of '70, '76 and '80, required that every school district, whether municipal borough or civil parish, should provide sufficient elementary school accommodation for all the children resident in such district and requiring such accommodation. The Education Act of '91 further provided that every parent could claim gratuitous elementary education for his children between the ages of 3 and 15. Education is compulsory for all classes; and elementary education in the primary State-aided schools is free to all classes of children applying for it. Elementary education is imparted under the operation of two great systems, the Voluntary system and the School Board system. The former sprang up early in the century, and was carried on by private effort; but State aid was granted to the schools thus established by a Committee of the Privy Council. The chief educational societies engaged in this work were the National Society of the Church of England, the British and Foreign School Society, the Wesleyan School Society, and the Roman Catholic Poor School Committee. School Attendance Committees were established by Lord Sandon's Education Act of '76, which prescribed that every district in England and Wales which had not a school board should have such a committee, chosen in boroughs and urban sanitary districts by town councils and urban sanitary authorities, and in all other places by boards of guardians. The chief difference of function between these committees and School boards is that the attendance committee

cannot build or carry on schools; it can only compel attendance in the voluntary schools, and there must be enough voluntary school accommodation for all the children in the district. A large proportion of the rural area is under attendance committees, and there are a few important towns in the same position. During the year ended March 31st, '97, 9 orders were issued creating new school boards in parishes and 3 in municipal boroughs. At that date there were 120 school attendance committees for boroughs, 83 for urban sanitary districts, and 580 for poor-law unions.

The School Board system was created by the Elementary Education Acts of '70-80. There are 2502 school boards in England and Wales, 187 of which have jurisdiction over municipal boroughs, including London. The total population within the school board areas is 19,978,110, leaving a balance of 9,844,115 under school attendance committee jurisdiction. Wherever there is not enough efficient public elementary school accommodation in a district for all the children a school board must be formed, whose first duty it is to make good the deficiency of accommodation by opening board schools. Districts where there is no deficiency of accommodation may have a school board by passing a vote to that effect by a majority of the town council in boroughs, or of ratepayers in districts which are not boroughs. The boards are elected outside the Metropolis by the burgesses of the borough or the ratepayers of the parish; within the Metropolis by those entitled to vote for common councilmen or vestrymen. School age is from 5 to 14, with exemption from compulsory attendance for children over 11 years of age who have passed certain standards of proficiency. There must be accommodation also for as many children as present themselves under the age of 5 and over the age of 14, except for such scholars as have passed an examination in the seventh standard. In boroughs with a population of 100,000 and upwards the school board consists of 15 members; from 70,000 to 100,000, 13 members; from 40,000 to 70,000 11 members; from 15,000 to 40,000 9 members; from 5000 to 15,000, 7 members; under 5000, 5 members. Any man or woman twenty-one years of age, without any restriction as to qualification or residence, may be elected a member of a school board. The board may not interfere with the management of voluntary schools, but may demand from those schools returns of the attendance of children. The board may acquire, with the sanction of the Education Department and of Parliament, compulsory possession of a site for a board school. It borrows money for building board schools, paying back the whole amount, interest and principal, in fifty or less years. All other expenses must be met year by year, the deficiency being made up by a school rate. School boards which fail in their duty are declared "in default," and may be superseded by a school board appointed by the Committee of the Privy Council on Education, at the cost of the ratepayers. School boards in Scotland and the Isle of Man are under separate Acts of Parliament, under which the whole area of those countries are under school boards, and such a thing as a school attendance committee is unknown. See LONDON SCHOOL BOARD.

The Education Department for England and Wales, the central authority for primary education, is a committee of the Privy Council,

in which are included the President of the Council (the Duke of Devonshire), and the Vice-President for Education (Sir J. E. Gorst, M.P.), assisted by a large permanent staff. The greater share of ministerial work falls upon the vice-president, who is responsible to the House of Commons. The Department distributes the parliamentary grant, frames the Code, and appoints a staff of inspectors; it sanctions the borrowing of loans by school boards on the security of the rates, and may grant provisional orders for the compulsory acquisition of land for school sites. **Council office, Whitehall, S.W. Secretary, Sir G. W. Kekewich, K.C.B.** There is a separate Department for Scotland; **Office, Dover House, Whitehall; Secretary, Sir H. Craik, C.B.** The Department in Ireland is under the Commissioners of National Education, Dublin. The cost of the administration of the English Department was in '96 £398,910 in England and £28,075 in Wales; of the Scotch Education Department, £49,749. The Science and Art Department of the Committee of Council, under the same Lord and Vice-President, is at South Kensington, and has charge of all those subjects which are encouraged by State aid and which do not fall within the curriculum of the ordinary elementary school. See SCIENCE AND ART DEPARTMENT.

For Secondary Education (except in Scotland, where the "higher class schools, and "secondary" departments in public schools are under the School Boards) there exists no such State organisation as is provided for elementary education, and private adventure still rules supreme, uninspected and uncontrolled, in the supply of education for the middle classes. Some excellent and useful organisations for the provision of secondary education have sprung voluntarily into existence, such as the Boys' Public Day-schools Company and the Girls' Public Day-schools Company; and the Charity Commissioners have done a great work in re-organising the old grammar and foundation schools scattered throughout the country. Furthermore, there are the recent advances made as to Technical Education, which was so remarkably stimulated by the grants of money allocated to it under the Customs and Excise Act, '90. But there is no statutory power existing to enable any department to insist on a sufficient and efficient supply of second-grade schools being established in every district in need of it. By the Local Taxation Act of '90 the county councils were empowered to supply certain funds for the promotion of technical and commercial education in their districts. In respect of schools of the highest grade, while there is no such thing as State control, the great schools of Eton, Harrow, Rugby, Winchester (see separate articles under their various headings), and their like, offer a liberal education in the humanities. It should be added that nearly all the great public schools have now established laboratories, libraries and museums.

For a summary of the Education measures introduced into the House of Commons during '98, see SESSION.

## II. PRIMARY EDUCATION.

**1. England and Wales.**—The keystone of the whole system of primary education is the requirement by the Education Department

that any head master or head mistress of a school receiving grants shall have passed an examination for a certificate of merit, and proved his or her practical ability as a teacher, by obtaining favourable reports from the inspector. All children are grouped in standards of graduated difficulty, and are required to be present at the annual inspection. The curriculum of the schools, which is determined by the Code annually submitted to Parliament by the Education Department, includes sound instruction in the usual essential elementary subjects. Drawing (for boys) and needlework (for girls) are compulsory. Two "class subjects" are generally taught in addition, selected from English, geography, elementary science, and history. The scholars in the three highest standards (V.—VII.) are allowed also to take two subjects, called "specific subjects," of a more advanced character. Much encouragement is being given now to subjects of a technical character, such as drawing, needlework, cookery, laundry, dairy-work, domestic economy and hygiene, carpentry, agriculture, etc. The grants of the Department are made on precisely the same conditions, whether the school is a voluntary school (*i.e.*, maintained by some denominational body, partly by voluntary subscription), or is under a school board with the assistance of the rates.—**Statistics.** On Aug. 31st, '97, the date to which the last return (published in Aug. '88) is made up, there were in England and Wales 19,958 elementary schools inspected, having accommodation for 6,215,199 scholars. The average daily attendance was 4,488,543. The Government grant for day schools amounted to £4,339,739, or about 16s. 1½d. per infant scholar and £1 os. 2½d. per older scholar in average attendance. This does not include the amount contributed in lieu of school fees, which in '97 amounted to £2,226,522. An idea of the progress that has been made in the provision of elementary education since '70 may be formed from the fact that in that year accommodation was only provided for 8·75 per cent. of the population, whereas in '97 the percentage was 20·01. The cost of education per head has steadily increased since the passing of the first Education Act. In '72 the cost per head was £1 7s. 5d.; in '79, £1 16s. 10½d.; in '85, £1 19s. 1½d.; and in '97, £2 os. 6d. in voluntary schools, and £2 13s. 2½d. in board schools. The amount raised during '97 (latest returns) for purposes of public elementary education in England and Wales will be seen from the annexed table.

**2. Ireland.**—The 64th Report of the Commissioners of National Education in Ireland, for '97-8, states that on Dec. 31st, '97, there were 9057 schools on the roll, of which 8631 were in operation. There were on the rolls 816,000 pupils, with an average attendance of 521,141, being a percentage of 63·9 as against 65·6 in the preceding year. Of the pupils on the rolls 75·9 per cent. were Roman Catholics, 11·5 per cent. of the late Established Church, 10·9 per cent. Presbyterians, 1·0 per cent. Methodists, and 0·7 of other denominations. There were 13,007 teachers, exclusive of the teachers of 273 convent and 3 monastery schools paid by capitation. The teaching programme has been modified by the introduction of English literature, and in certain cases drawing and needlework for females as

compulsory subjects, and by the extension of optional subjects, of which one must be taken. £42,120 was paid to 1266 teachers in pensions. The aggregate annual expenditure from all sources, including grant, rates, fees, and subscriptions, amounted to £1,193,148, giving an average of £2 6s. 6½d. per child in average daily attendance.

**3. Scotland.**—In Scotland an excellent system of elementary education was adopted long before the passing of the *Scottish Elementary Education Act* in '72. In 1696 a law was passed establishing a school in every parish of Scotland. The great secession from the Church of Scotland in '43 effected the break-down of the parochial school system. The Free Church schools were set up side by side with the schools of the Establishment, and the division of interests and the means of support were not conducive to educational efficiency. Hence two years after the adoption of Mr. Forster's Act in England and Wales the *Scotch Education Act* was passed, establishing a school board in every Scottish parish, and giving it the control of all parochial schools, not only elementary schools, but also the academies and high schools, and empowering it to erect and maintain new schools, according to the needs of the population. Grants in aid are given from the Imperial Exchequer to all schools under school boards, except those defined as "high-class public schools." The *Scotch Education Act* is administered by a committee of the Privy Council, called the *Scotch Education Department*. The *Scotch Code* differs from that of England and Wales in that it provides for the teaching of more advanced subjects, and differently defines the term "training college." Free elementary education has now been generally adopted in Scotland, under the powers of Acts passed in '89 and '90. There were in '97 3086 separate institutions inspected, furnishing accommodation for 843,769 scholars. There were 716,893 names on the registers, of whom 605,389 were in average daily attendance. The parliamentary grant to day inspected schools amounted to £655,647. The total income per scholar in average attendance was £2 7s. 11½d. Of evening continuation schools, 1019 were inspected, and 59,954 scholars were present.

### III. THE RELIGIOUS DIFFICULTY.

The religious controversy in connection with elementary education dates from the early part of the present century. For detailed history of this controversy down to '70, see eds. '95-6. Mr. Forster's Act of '70 provided, as a compromise, that religious instruction, when given, should be imparted at the beginning or end of the school meeting, leaving an unbroken two hours for secular instruction; there should be displayed in each schoolroom a time-table of religious and secular teaching, and parents should have the right to withdraw their children from the religious instruction; in board schools no distinctive catechism or religious formulæ should be taught; and the Education Department should not inspect or take any cognisance of the religious instruction.

The compromise, thus arrived at in '70, worked satisfactorily on the whole, until the supporters of the denominational grant-aided schools began to feel the competition of the board schools, and became unceasingly active to secure both additional aid from Government

and a complete control over their own schools. In the early part of '96 Sir John Gorst introduced his Education Bill, for a summary of which, and of its fate in the House, see Session, sect. 44, ed. '97. This proved unsatisfactory to all parties, and the clauses which affected religious instruction were vigorously opposed in the House, and strongly condemned throughout the country by the friends of religious liberty. On Nov. 5th and 6th, '96, a conference of both Houses of Convocation, including the Houses of Laymen, was held in the Church House, the Archbishop of York presiding. The Primate (Dr. Temple) proposed a number of resolutions, which were carried with slight modifications. The principal points agreed upon were: To ask for statutory aid from the Exchequer of not less than 6s. a child for all public elementary schools alike; and to ask for rate aid in school board districts only, payable to federations of schools only, such payments not to exceed the voluntary contributions, donations, and endowments. In response to these demands the Government, early in '97, brought in a Bill giving to voluntary schools an aid grant equal to 5s. per scholar in average attendance, available for distribution among necessitous schools; providing for the constitution of associations of voluntary schools, for the distribution of the grant among the associated schools; removing the 17s. 6d. limit, and exempting voluntary schools from rates. As this Act left untouched board schools in necessitous districts where the rates pressed heavily upon the poor, another Bill was brought in providing an additional grant for board schools. This Bill provided that where a 3d. rate would produce less than £20, or less than 7s. 6d. per child in average attendance, there should be an additional grant equal to 4d. per child for every 1d. by which the school rate exceeded 3d. For summaries of these Acts see Session, ed. '98, sects. 58, 121, 122, and 123. Under the Voluntary Schools Act, 75 Associations of Voluntary Schools have been formed, 46 of them being Church of England, 11 British, 11 Roman Catholic, 6 Wesleyan, and 1 Jewish.

#### IV. SECONDARY EDUCATION.

In England and Wales, though the State has at present exercised no direct control over secondary education, it has instituted several inquiries into its condition, from '61 onwards. In Jan. '93 Mr. A. H. Dyke Acland appointed a Departmental Committee, to consider as to the best means of organising secondary education in England and Wales. But the work of this committee was suspended in March '94 owing to the appointment of a Royal Commission to inquire into the subject. The terms of the reference were that the Commission should consider what are the best methods of establishing a well-organised system of secondary education in England, taking into account existing deficiencies, and having regard to such local sources of revenue from endowment or otherwise as are available, or may be made available, for this purpose, and make recommendations accordingly. The Commissioners were Rt. Hon. J. Bryce, M.P. (Chairman), Rt. Hon. Sir J. T. Hibbert, K.C.B., M.P., Hon. and Rev. E. Lyttelton, Sir Henry E. Roscoe, M.P., Very Rev. Dean Maclure, D.D., Rev. A. M. Fairbairn, D.D., R. C. Jebb, Esq., D.C.L., M.P., Dr. R. Wormell, H. Hobhouse, Esq.,

M.P., M. E. Sadler, Esq., H. Llewellyn Smith, Esq., G. J. Cockburn, Esq., C. Fenwick, Esq., M.P., J. H. Yoxall, Esq., Lady Frederick Cavendish, Mrs. Bryant, and Mrs. Henry Sidgwick. The Secretary of the Commission was the Hon. W. N. Bruce, of the Endowed Schools Department of the Charity Commission.

The Report of the Commission was issued at the end of October, in nine volumes, including minutes of the evidence taken, memoranda and answers to the Commissioners' questions, the reports of Assistant Commissioners on selected typical districts, etc. The Report itself was divided into four parts: (1) an historical statement as to previous legislation; (2) a description of the existing state of things; (3) an analysis and exposition of the evidence, with a discussion of the views and suggestions of certain leading witnesses; and (4) the recommendations of the Commissioners. These recommendations fell into five classes, as follows:—

**1. The Central Authority.**—This ought to consist of a Department of the Executive Government, presided over by a Minister responsible to Parliament. There should be under the Minister a permanent Secretary. An Educational Council should be created, with not more than 12 members, 4 appointed by the Crown, 4 by the Universities of Oxford, Cambridge, London, and Victoria, and 4 selected by these 8 from among experienced members of the teaching profession. The work of the Charity Commission, so far as it touched educational endowments, and of the Science and Art Department, so far as it touched secondary education, should be transferred to the new Department. The functions entrusted to the Central Authority should include a general oversight of the action of such local authorities as may deal with Secondary Education, with some measure of jurisdiction over those important educational foundations which, being used by the country generally, cannot properly be subjected to local jurisdiction, and the management of a Register of Teachers.

**2. Local Authorities.**—The Commissioners recommended that a local authority should be created in every county and county borough with a population exceeding 50,000, but that adjoining counties and county boroughs should have power to unite. As to London, the area dealt with was made the administrative county of London. The local authority should have power to establish new schools where necessary, to initiate schemes for the better management of educational endowments, to supervise and inquire into the working of all endowed schools, and to a certain extent of all proprietary and private schools, within its area, to make schemes for unendowed public schools, to establish scholarships and exhibitions, to aid schools and institutions not under its direct management, to appoint representatives on governing bodies of public schools within its area, to determine the amount of and issue a precept to the county or borough council for the rate found to be necessary for its work, and to receive, instead of the county and borough council, the money available under the Customs and Excise Act of '90.

**3. Arrangements for the Better Organisation of Schools.**—The Commissioners stated under this head that the duty of providing in each area schools of the type locally required had better be left to the local

authority. As to existing secondary schools, **Endowed Schools** were first dealt with, and the Commissioners recommended that the great public schools should not be excluded from the supervision of the Central Authority. As to **Unendowed but Public Schools**, Higher Grade Elementary Schools, Organised Science Schools and Evening Continuation and Technical Schools should all be classed and treated as Secondary Schools, but the transition should be gradual. As to **Proprietary and Private Schools**, the Commissioners desired not to weaken but to stimulate and improve them. In rural districts the Commissioners recommended that the endowed schools in the smaller towns and villages should be remodelled, and an upper department should be established in a certain number of elementary schools.

**4. Financial Arrangements.**—The Commissioners pointed out that income can be drawn from (1) endowments, amounting to about £735,000 per annum, at present very unequally distributed; (2) the grant under the Customs and Excise Act, '90, amounting in '93-4 to £748,000, which should all be handed over to the Secondary Education Authorities, although it would still go partly in aid of Technical Education; (3) local rates to the limit of 2d. in the £, which would produce £1,280,000 per annum; (4) fees paid by pupils to be fixed by the governors or managers of all secondary schools with an eye to the kind of education provided by the school, and the class of pupils served by it; (5) Parliamentary grants made by the Science and Art Department and by the Education Department to evening and continuation schools. These grants should be consolidated into a grant to the new local authorities, and made applicable to Secondary Education.

**5. Questions Specially affecting Teachers.**—The Commissioners recommended that some limit should be placed to the power of the head teacher as to the tenure of office of assistant teachers, the power of dismissal being always subject to the approval of the governing body. The fixing of the salaries should be in the hands of the governing body also. A register of qualified teachers should be established, and provision made for their professional training both in the theory and the practice of education.

Sir J. Gorst's Education Bill (March '95) proposed to create local education authorities which—by clause 12 of the Bill—would be competent to deal with secondary education. The power proposed to be given to these authorities would be only optional. The clause very inadequately represented the recommendations of the Commissioners, and received comparatively little attention. See *SESSION*, sect. 44, ed. '97. Early in '97 the Duke of Devonshire promised a measure on secondary education, mainly on the lines of the report of the Royal Commission on Education; but the Government did not find time to bring in the measure. In Aug. '98 the Duke of Devonshire brought in a Bill relating to Secondary Education and a Bill relating to the Registration of Teachers. The Bills were read a first time, but were not proceeded with.

The Committee of Council in '98 issued a *Return of Pupils in English Secondary and other Schools* (not being Public Elementary or Technical Schools), the statistics being obtained in reply to circulars sent to as many of such schools as

could be discovered. This was the first attempt to obtain such statistics, which are necessarily imperfect owing to the difficulty of defining the term "secondary school." Some of the schools from which the return was received are practically private elementary schools. The schools are arranged under five categories—Private Enterprise, Subscribers' (including schools supported by religious communities and City companies, which are not carried on for profit and have no fixed endowment), Companies' (carried on for profit), Endowed, and under Local Authority. The statistics are based on returns from 1958 boys' schools, 3173 girls', 1078 mixed. Mixed schools are those in which the boys and girls are within the same upper and lower age limits; they are not always places of co-education, the boys and girls in many of them being taught separately. In 16 schools entered as Boys' Schools there are a very few girls (the proprietors' daughters, etc.). In some entered as Girls' Schools, there are boys receiving a preparatory education and leaving at a much earlier age than the girls. There were 122,313 boys in Boys' Schools, 21,252 in Mixed Schools, and 14,937 in Girls' Schools: total, 158,502 boys. There were 114,230 girls in Girls' Schools, 18,740 in Mixed Schools, and 63 in Boys' Schools. Of the boys there were 64,339, or 40·6 per cent., under 12; 79,359, or 50 per cent., between 12 and 16; and 14,804, or 9·3 per cent., over 16. Of the girls, there were 6,866, or 45·7 per cent., under 12; 57,040, or 42·9 per cent., between 12 and 16; and 15,136, or 11·3 per cent., over 16. The pupils were thus distributed among the five classes of schools:—**Private Enterprise:** Boys' Schools 1311, or 66·9 per cent. of Private Enterprise Schools, with 46,617 or 38·1 per cent. boys; Girls' Schools 2886, or 91 per cent., with 80,286 or 70·3 per cent. girls; Mixed Schools 970, or 90·1 per cent., with 26,027 or 65·3 per cent. pupils. **Subscribers':** Boys' Schools 70, or 3·6 per cent. of Subscribers' Schools, with 8719 or 7·1 per cent. boys; Girls' Schools 99, or 3·1 per cent., with 6321 girls; Mixed Schools 28, or 2·6 per cent., with 3626 or 9 per cent. pupils. **Companies':** Boys' Schools 48, or 2·5 per cent. of Companies' Schools, with 5188 or 4·2 per cent. boys; Girls' Schools 99, or 3·1 per cent., with 13,238 or 11·6 per cent. girls; Mixed Schools 3, or ·3 per cent., with 308 or ·7 per cent. pupils. **Endowed, etc.:** Boys' Schools 502, or 25·6 per cent. of Endowed Schools, with 59,517 or 48·6 per cent. boys; Girls' Schools 86, or 2·7 per cent., with 14,119 or 12·3 per cent. girls; Mixed Schools 31, or 2·7 per cent., with 3035 or 7·5 per cent. pupils. **Local Authority:** Boys' Schools 27, or 1·4 per cent. of Local Authority Schools, with 2272 or 1·8 per cent. boys; Girls' Schools 3, or ·1 per cent., with 275 or ·2 per cent. girls; Mixed Schools 46, or 4·1 per cent., with 6996 or 17·4 per cent. pupils. It is interesting to note the difference between the five classes as to the leaving age. Of **Private Enterprise Schools** only 13·4 per cent. have pupils over 18 in their boys' schools, 20·3 per cent. in their girls' schools, and merely 3·2 per cent. in their mixed schools. The corresponding figures for the other classes are: **Subscribers':** Boys' Schools 42·8 per cent, Girls' Schools 48·5 per cent., Mixed Schools 3·7 per cent. **Companies':** Boys' Schools 56·2 per cent., Girls' Schools 76·7 per cent., Mixed Schools 33·3 per cent. **Endowed, etc.:** Boys' Schools 39 per cent., Girls' Schools 51·2 per cent., Mixed

Schools 16·1 per cent. **Local Authority:** Boys' Schools 25·9 per cent., Girls' Schools 66·7 per cent., Mixed Schools 21·7 per cent. More than half of the total number of schools have less than 31 scholars, and about one-quarter have between 31 and 50 scholars; 151 have between 200 and 500, and 22 have over 500. Most of the Private Enterprise Schools have less than 50, only 7 have over 200, and none of them have over 500. Of the 22 schools with more than 500 pupils, 15 belong to the Endowed category. The percentage of boarders in all the schools is: Boys' Schools 35·7, Girls' Schools 18, Mixed Schools 13 of boys and 9 of girls, most of the boarders being in the Private Enterprise and Endowed Schools. There are no day pupils in 224 Boys' Schools, 101 Girls' Schools, and 18 Mixed Schools. Important items in the Return are those referring to the teaching staff. Omitting the visiting staff, and reckoning only the exclusively attached staff, in Boys' Schools 55·9 per cent. of the men and 11·3 per cent. of the women are graduates; in Girls' Schools 29·2 per cent. of the men and 12·7 per cent. of the women; and in Mixed Schools 25·8 per cent. of the men and 7·8 per cent. of the women. There are 626 (or 32 per cent.) Boys' Schools, 2324 (73·8 per cent.) Girls' Schools, and 876 (81·3 per cent.) Mixed Schools without any graduates at all on the exclusively attached staff. The total number of graduates on the attached staff of the schools included in the Return is 4405 men, 1801 women; of non-graduates 3957 men and 13,179 women. The percentage of graduates on the visiting staff is very much less. The Blue Book contains tables giving details for every administrative county and county borough, but not mentioning the names of the schools. Monmouthshire, being under the Welsh Intermediate Education Act, 1889, is not included in the Return.

## V. TECHNICAL EDUCATION, ETC.

**1. Technical Education.**—The Technical Instruction Act of '89 defines technical education to mean instruction in—(1) the principles of science and art applicable to industries; (2) the application of special branches of science and art to specific industries or employment; (3) any other form of instruction (including modern languages and commercial subjects) which may be approved by the Science and Art Department, and are stated by the local authority to be required by the "circumstances of the district." The question passed into the practical stage in the year '90, when Mr. Goschen, the then Chancellor of the Exchequer, set apart the proceeds, with a small reduction, of a new tax on spirits, the Local Taxation (Customs and Excise Duties) Act, '90, for the benefit of county councils, giving them express permission to use the whole or any part of the sum for the purposes of technical education. Various local authorities also supplement the money thus obtained by grants out of the rates under the provisions of the Technical Instruction Act, '89. The National Association for the Promotion of Technical and Secondary Education, which has now been in existence nearly eleven years, under the presidency of the Duke of Devonshire, has been energetically at work. The Society (Office, 14, Dean's Yard, Westminster) has published numerous valuable pamphlets, and is prepared to advise any local authorities who may apply to it as to the best means of utilising the funds at their disposal.

In the country generally the working of the Technical Instruction Act and of the Local Taxation Act is entrusted to the county councils, town councils, or urban sanitary authorities. A rate may be levied by either of these authorities under the former Act, but it must not exceed a penny in the pound. Every county council in the country has devoted the proceeds of the Local Taxation Act, either wholly or in part, to the purposes of technical instruction; and nearly all the county boroughs have done the same. Exclusive of London, there has been throughout the country, since '89, a capital expenditure of £2,340,651 upon Technical Schools; while many schools and classes are conducted in rented premises, and a number of secondary schools have been utilised as technical institutes during the evening. The progress made in London owes its impulse to the establishment of the Artisans' Institute in '74, under the influence of the late Mr. Samuel Morley, M.P., Lord Lyttelton, Rev. H. Solly, and others. In '78 many of its teachers were taken over by the City and Guilds of London Institute. To the patronage of the Livery Companies of London much of the subsequent progress of the movement may fairly be attributed. There are now eleven Polytechnics in London, all of them doing efficient work as technical institutes. The London County Council has delegated its powers in this respect to a Technical Education Board, consisting of 20 representatives of the Council, 5 of the London School Board, 3 of the City and Guilds Institute, 2 of the City Parochial Charities, and 1 each of the Head Masters' Association, the National Union of Teachers, and the London Trades Council. Dr. Garnett became the secretary of the Board. Very much has been done by means of scholarships to enable the children of poor parents to fit themselves for appropriate technical training.

In Scotland a large proportion of the available residue under the Local Taxation Act accruing to Scotland has been devoted to technical education purposes. In applying the fund the local authorities are fortunate in not being limited to the machinery of the Technical Schools (Scotland) Act, '87. The passing of the Technical Instruction Amendment (Scotland) Act, '92, has simplified the procedure greatly in this country.

In Ireland, as the residue under the Local Taxation Act is not available for technical education, the Science and Art Department continued and augmented in that country the grants in aid of such instruction which they had suspended in England and Wales.

**2. Commercial Education.**—The Oxford and Cambridge Schools Examination Board, after conferring with representatives of the Chambers of Commerce, have adopted a scheme under which certificates are granted for proficiency in commercial knowledge preparatory to entering upon a mercantile career. A scheme for junior and higher commercial education has been drafted by the committee of the London Chamber. All information in connection with future examinations, past papers, etc., can now be obtained at the offices of the London Chamber of Commerce, Botolph House, Eastcheap, E.C. At King's College, the City of London School, the Central Foundation Schools (under the control of the Charity Commissioners), the Y.M.C.A. (Aldersgate Street branch), and the Polytechnic Y.M.C.I., among

other institutions in London, special provision has been made for a course of education in accordance with the scheme of the London Chamber. In July '98 a Conference on Commercial Education was convened by the London Chamber of Commerce in the Guildhall. Sir Albert Rollit, M.P., presided; and among the speakers were Sir John Gorst, Sir Philip Magnus, and a number of leading educationists. The subjects discussed were: Commercial Education in Secondary Schools, Continuation Schools, Foreign Higher Commercial Education, and the Organisation of Tertiary or Higher Commercial Institutions.

**3. Higher Grade Schools.**—These schools, springing from a demand for secondary education from the lower social strata, began to be established by school boards in '80, and in '97 there were 60 in existence, 55 of them being under the control of school boards. In most of them the lower classes are taught as an elementary school, and their higher classes as organised science classes under the Science and Art Department. The scholars get an education extending for at least three years beyond Standard VI., under trained and picked teachers, and without a break in the continuity of study or of social surroundings.

**4. Evening Continuation Schools.**—The great municipalities of Birmingham, Leeds, Liverpool, Manchester, and Sheffield, through the instrumentality of their school boards, have set themselves resolutely to work to foster the desire and to provide the means for the continuation and perfection of the instruction in the day-schools. Regulations were submitted to Parliament in '93 establishing a Code of Regulations for Evening Continuation Schools. It provides liberally for the establishment of such schools, and abolishes many of the restrictions of former codes, which militated so largely against the spread of evening schools. See the "Evening School Code of the Education Department"; the "Report of Science and Art Department," and the "Syllabus of the Birkbeck Institute" (Chancery Lane). See also a valuable return to Parliament during '94, by the Science and Art Department, and the "Report, '96, of the National Society for the Promotion of Technical Education" (Offices, Westminster). In '97 there were 4980 evening continuation schools under inspection, with 358,628 scholars, earning grants to the amount of £162,158. The instruction given in these schools is, like that given in the higher grade schools, largely secondary in its character. See SESSION, sects. 8, 51, and 52.

## EGYPT.

A state, nominally dependent on Turkey, under the rule of Abbas Pasha, the seventh of the dynasty founded by Mehemet Ali, his great-grandfather. Abbas is the eldest son of the late Tewfik Pasha. The first four rulers bore the title of Vali or Viceroy, but in '66 Ismail, then ruler, received from the Sultan the title of Khedive or king, and the succession was made direct from father to son, instead of descending, in accordance with the original treaty, to the eldest male of the family of Mehemet Ali. From '79 to '83 the country was under the dual control of France and England, but in the latter year England intervened after Arabi Pasha's rebellion, and since then has practically governed the country. Lord Cromer is H.M. Agent at

Cairo. There are, however, provincial boards for local affairs, and a General Assembly and Legislative Council for national affairs, but with limited powers. The General Assembly consists of the Ministry, the Legislative Council, and 46 other elected members, and must be summoned every two years. The Legislative Council consists of 30 members, of whom 14 are nominated and its powers are chiefly consultative. The judicial system is somewhat complex. The Consular Courts try cases of crime brought against foreigners; the Native Courts, instituted '84-9, are occupied with civil actions between natives, and crimes by natives; and there are also courts of religious law for Mahomedans. The Mixed Tribunals were instituted in '75 as a substitute for the Capitulations, under which each country transacted its legal business in its own Consulate. They deal with civil actions between persons of different nationalities, or between natives and foreigners, and to some extent with criminal offences of foreigners. They were set up for a period of five years, and ever since have been renewed periodically for periods of five years. The present period expires on Feb. 1st, '99. In Nov. '97 the Egyptian Government notified the Powers that certain reforms were in its opinion necessary, and an International Commission has been created to investigate the matter. One of the Government's main points is that the powers of the Mixed Tribunals should be limited so far as the Government's acts are concerned. The chief religion is that of Islam, but there are also many Christians, including the Copts with the Patriarch of Alexandria at their head. There are many Government Coptic and Mahomedan schools. The army contains about 18,000 men. There is also a British force of about 4000 men at Cairo. By the '96, '97 and '98 campaigns the Government has re-established its authority over some of the provinces in the Soudan, temporarily abandoned in '83. See maps on pp. 217 and 218. In the summer of '98 the Soudan military railway had reached the Atbara at its junction with the Nile, 380 miles from Wady Halfa, and proved of immense service to the force advancing on Omdurman. In a letter published in the first week of September the correspondent of the *Daily Chronicle* wrote that it had been decided to continue the line across the Atbara to Khartoum. The Ministry of War asked (Oct. 27th) for a first credit of £350,000 for the reorganisation of the Soudan, including the extension of the railway from the Atbara to Khartoum. On Nov. 8th it was announced that the extension of the Soudan Railway from the Atbara to Khartoum was to be undertaken at once, the distance being about 180 miles. Contracts had been placed with British firms for the wrought-iron bridges, about sixty in number, the largest being over 1200 feet in length, and spanning the Atbara river near its confluence with the Nile. As to the Suakin-Berber Railway proposal, Mr. Lamb, British Consul at the former place, in his report for '97, shows that after the opening of the Soudan line the project could only be justified as a commercial undertaking, and his calculations in this respect do not hold out much promise.—The first section of the *Delta Light Railway*, from Damanhour to Delingat, in the Behereh province, was opened on April 5th. It is 16 miles long, of 29½ in. gauge, and follows

(See also accompanying Map as to the situation in the Upper Nile Valley.)

the agricultural roads. Other sections were then reported to be near completion. **Principal products**, cotton, sugar, and cereals. **Area of Egypt** (excluding the provinces reconquered in the Soudan), 394,240 square miles, of which about 12,976 sq. m. are settled. **Pop.** about 9,750,000. **Revenue**, '97, £11,092,554; **expenditure**, £10,659,257; **exports**, '97, £12,321,220; **imports**, £10,603,672; **public debt**, '98, £96,271,730. See **DIPLOMATIC, SOUDAN, and SESSION**, sect. 9.

**History, '98.**—The Egyptian force, under Colonel Parsons, sent to occupy Kassala, arrived there (Dec. 22nd, '97), and the transfer of the fort from Italy to Egypt formally took place (25th). El Fasher and Osobri, two Dervish stations on the Atbara, were at once attacked by Colonel Parsons' orders and taken, the Dervishes being put to flight. Reinforcements were sent to Wady Halfa at the Sirdar's request, in view of a threatened attack on Berber by the Dervishes (Jan. 2nd, '98). The Dervish leader, Mahmud, crossed the Nile, and was reported to be advancing from Shendy northwards with a large force (March 1st). British troops were at once hurried to the front to support the native force, and encamped on the Atbara. The post at Adarama was attacked, but the Dervishes were driven off with heavy loss. They continued to advance, however, and entrenched themselves strongly in the bush at Hilgi. Their reserve depôt at Shendy was soon attacked and destroyed by Egyptian gunboats (29th), and the Sirdar's whole force finally attacked and utterly defeated them, capturing all their guns, baggage, and standards, and Mahmud himself (April 8th). The Sirdar then retired to Wady Halfa, and all operations were for a time suspended. The Daira-Sanieh estates were sold to a group of English, French, and Egyptian capitalists by the Government (June 21st), and it was arranged that the proceeds, £6,431,500, should be applied to wiping off the Daira loan. It was arranged that the payments should be made thus: £500,000 on Aug. 1st, '98; £2,150,000 in July, '99; and annual payments of £310,000 till 1905; and that, as each payment was made, an equivalent amount of property should be transferred to the buyers. The buyers were bound to sell in turn within seven years, and to give half the net profit to the Government. It was hoped thus to distribute these valuable lands amongst a large number of individual cultivators. All preparations having been made with admirable foresight and thoroughness, the advance on Omdurman from the Atbara was commenced (Aug. 19th). The whole force was concentrated at Wady Hamed (22nd), at Jebel Royan (27th), and so pressed on regularly and methodically till Omdurman was reached. The Khalifa came out with his army, and received a terrific beating, half the force being either killed or wounded (Sept. 2nd). The 21st Lancers made a magnificent charge during the fight, against enormous odds. The Sirdar then entered Omdurman and released a number of European prisoners whom he found there. The Khalifa fled in the direction of Kordofan, pursued by the cavalry and the gunboats, and the remnant of his force surrendered. An impressive service in memory of Gordon was held at Khartoum (4th). The withdrawal of the British troops to Cairo was at once commenced, but important news arrived, when one of the Khalifa's steamers, which had been to Fashoda, returned to Omdurman and surrendered to

the Sirdar. The captain of the steamer said that he found Fashoda occupied by a white force, and was fired upon by white men there (7th). It was suggested that the force was Major Marchand's expedition, which had for some time been pushing towards the Nile from French Congo. The Sirdar at once went with his flotilla of gunboats southwards to investigate, and sent all the press correspondents back to Cairo. Meanwhile Col. Parsons defeated and finally dispersed the sole remaining Dervish force at Gedaref (23rd). The Sirdar returned to Omdurman (25th), having established posts at Fashoda and Sobat. At Fashoda he found the French flag flying, and Major Marchand, with 130 men, in possession. The Major refused to withdraw or to haul down his flag without orders from his Government; so the British forces were placed in such a way as to bar him from access to the mainland, he being posted on what was virtually an island in the river. The Sirdar's report was published in a Parliamentary paper issued by the Foreign Office (Oct. 9th). Captain Marchand, it appeared, stated that he had been instructed by the French Government to occupy the Bahr-el-Ghazal up to the confluence of the Bahr-el-Jebel, and also the Shilluk country on the left bank of the Nile as far as Fashoda; that he had concluded a treaty with the Shilluk chiefs by which they placed the country under the protection of France; and that he had sent this treaty for ratification to his Government. He had fought with the Dervishes on Aug. 25th, and only the arrival of the Sirdar's forces had prevented a more serious attack. The Sirdar handed him a written protest against the occupation by France of any part of the Nile valley, and further said that the Shilluks denied the treaty, and that since Major Marchand was in want of ammunition and supplies, and had no following in the country, nothing could have saved his expedition from being annihilated by the Dervishes had the British victory been delayed by a fortnight. The French Government sent, *via* Omdurman, and by permission of the British Government, a message to Major Marchand to dispatch an officer with a copy of his report (already dispatched *via* Abyssinia and French Congo) to Cairo, and Captain Baratier arrived there (20th). Major Marchand arrived at Khartoum from Fashoda, having decided to himself carry his report on to Cairo and Paris. He reached Cairo Nov. 3rd. Captain Germain was left in charge at Fashoda. Lord Salisbury announced at the banquet to Lord Kitchener given by the Lord Mayor (5th) that France had decided to evacuate Fashoda, and Major Marchand returned thither to arrange the details.

**Egypt Exploration Fund, The.** Founded 1883, for the purpose of historical investigation in Egypt. The work is conducted on the principle of careful examination of all details, and preservation of the objects found in the course of the excavations. The minor antiquities afford valuable evidence as to the history of civilisation by illustrating the influences of Egypt, Assyria, Asia Minor, Syria, Greece, and the peoples of the Mediterranean coasts and islands on one another. After the claims of the National Museum of Egypt have been satisfied, the portable antiquities found are divided between the British Museum and various public collections in Great Britain, America, and the Colonies. The distribution depends

mainly on the amount of support contributed by the several districts represented by the museums. Annual illustrated volumes are published, giving the results of each season's work. During the season of '97-8 two parties were at work in Egypt. Prof. W. M. Flinders Petrie excavated the cemetery of Denderah, where he discovered fine sculptures and inscriptions of the early dynasties, and brick arches of great antiquity. Mr. Carter continued the task of protecting the already excavated temple of Deir el Bahari, and of copying the sculptures there. In '97 the Society also started a *Græco-Roman Branch*, for the discovery and publication of the remains of classical antiquity and early Christianity in Egypt. During the previous winter, Mr. B. P. Grenfell and Mr. A. S. Hunt, working on account of the Society, had discovered the largest collection of Greek papyri ever yet found. Among these was the leaf containing the *Logia*, or Sayings of Christ, which was published as a pamphlet. There has now appeared the first volume of the *Oxyrhynchus Papyri*, including a third-century fragment of St. Matthew's Gospel, a poem by Sappho, considerable portions of known and unknown Greek literature, and a long series of official and private documents. Prof. Petrie, Mr. Grenfell, and Mr. Carter will probably all proceed again to Egypt this winter. In addition to its work of exploration, the Society commenced in '90 its *Archæological Survey of Egypt*. The object of this survey is to map, plan, photograph, and copy all the most important sites, sculptures, paintings, and inscriptions in the valley of the Nile between Cairo and Aswân. Up to the present time its work has chiefly been devoted to the celebrated XIIth Dynasty tombs of Beni Hasan and El Bersheh, and the still earlier tombs of Deir-el-Gebrawi and Sheikh Said. The XVth Memoir of the Egypt Exploration Fund, being Prof. Petrie's account of his excavation of the cemetery of Deshasheh, is now published. Five memoirs of the Archæological Survey of the Egypt Exploration Fund—viz., *Beni Hasan I., II., and III., and El Bersheh I. and II.*—have been issued to annual subscribers to the Survey from 1890-95, and the next volume will contain a further instalment of detailed facsimiles in colour of hieroglyphs and scenes. For the last five years the Fund has published, under the editorship of Mr. F. Ll. Griffith, an annual *Archæological Report on Egypt and Egyptology*, containing not only an account of the progress of Egyptology and reports by the Society's explorers, but also papers by experts on Coptic and Egypto-Greek and Roman research, and full bibliographies. The Report is illustrated, and contains maps and plans. An *Atlas of Ancient Egypt*, with letterpress, and a sixpenny Guide to the Temple of Deir el Bahari, have also been issued. The Offices of the Fund are at 37, Great Russell St., W.C. (opposite the British Museum), and at 59, Temple St., Boston, Mass., U.S.A. President, Sir John Fowler, Bart., K.C.M.G.; Hon. Secretary, Mr. Jas. S. Cotton.

**Egyptian Soudan.** See EGYPT and SOUDAN.

**Egypt, Khedive of.** See ABBAS PASHA.

**Eisteddfod.** The name of an annual bardic congress in Wales, having for its objects the preservation of the music and the general literature of the Principality, the maintenance of the

Welsh language and ancient national customs, and the cultivation of a spirit of patriotism among the people. Its origin is lost in antiquity, but it is certain that three such congresses were held in the reign of Edward III., one of them being under the patronage of Earl Mortimer. For history see ed. '88. A *Gorsedd* (this word means *throne*, but in an Eisteddfodic sense it signifies the four-and-twenty stones of the Druidic circle, whence a year and a day beforehand the Eisteddfod is proclaimed "in the face of the sun, the eye of light," and where bardic and musical degrees are conferred), is held at the conclusion of each Eisteddfod, and the place of the next festival is announced to be held in '99 at Cardiff.

**Election of a Member of Parliament.** Under the provisions of the Ballot Act, the returning officer is required, in the case of a county election within two days after the day on which he receives the writ, and in the case of a borough election on the day on which he receives the writ or the following day, to give notice of election. The day of nomination is to be fixed as follows: in the case of an election for a county or district borough, not later than the ninth day after the day on which he receives the writ, with an interval of not less than three clear days between the day on which he gives the notice and the day of nomination; and in the case of an election for any borough other than a district borough, not later than the fourth day after the day on which he receives the writ, with an interval of not less than two clear days between the day on which he gives the notice and the day of nomination. The candidate is nominated in writing, subscribed by two registered electors as proposer and seconder, and by eight other electors, who must also be registered in the same constituency. If at the expiration of one hour after the time appointed for the election not more candidates stand nominated than there are vacancies to be filled up, the returning officer is to forthwith declare the candidate nominated to be elected; but if at the end of one hour more candidates stand nominated than there are seats to be filled up, the returning officer is to adjourn the election and take a poll. The poll is to take place on such day as the returning officer may appoint, not being, in the case of an election for a county or district borough, less than two or more than six clear days, and not being, in the case of an election for a borough other than a district borough, more than three clear days after the day fixed for the nomination. Sundays, Christmas Day, Good Friday, and any day set apart for a public fast or thanksgiving, are not counted. The following calendar, which will probably make the matter quite clear, shows the time for nomination and poll in boroughs and counties, assuming that the writ has been received by the returning officer on the 1st of any given month:—

Day of Month.	County.
1	Receipt of writ.
2	
3	Last possible day for notice of election.
4	
5	First possible day for nomination.
6	
7	
8	First possible day for poll.
9	

10 Last possible day for nomination.

11

### *Borough.*

1 Receipt of writ.

2 Last possible day for notice of election.

3

4 First possible day for nomination.

5 { Last possible day for nomination.

6 { First possible day for poll.

7

8

9 Last possible day for poll.

In using either table, regard must be had to the intimation given above, that **Sundays, Christmas Day, etc., do not count.** Thus, if an election in a county be fixed for the latest possible day, the poll would, on account of the Sundays, be at least two days later, or on the nineteenth, and in some cases three days later, or on the twentieth day. There is a special allowance of time in the case of the constituency of Orkney and Shetland. Where an equality of votes is found to exist between any candidates at an election for a county or borough, and the addition of a vote would entitle any of such candidates to be declared elected, the returning officer, if a registered elector of such county or borough, may give such additional vote, but shall not in any other case be entitled to vote at an election for which he is returning officer. But the returning officer may, if qualified, decline to give the casting vote; and if he be not qualified, or if he decline to act, the names of the two candidates are endorsed on the writ and a double return made. Neither candidate returned may vote until the right to the seat has been determined. A petition may be presented by a person qualified to vote, a person claiming to have the right to be returned, and by a person alleging himself to have been the candidate; the petition may be presented on various grounds, and it may allege bribery and corruption. Thus, where there has been an equality of votes, and the casting vote has been given by the returning officer, or where a double return has been made, the seat may be claimed on petition. The voting papers would then be scrutinised by the Court, and some deductions would probably be made on the ground of spoiled papers, disqualification of the voter, etc., which would reduce one party's number more than it would the figure of the other. All election petitions are tried by two judges, who determine and report to the Speaker whether the member petitioned against, or what other person, if any, was duly elected, or whether the election was void; and when corrupt practices have been alleged, the judges report also whether any such practices have been committed, and, if so, whether it was with the knowledge or consent of any candidate, and the nature thereof; the names of the persons proved to have been guilty of such corrupt practices; and whether during the election there was an extensive prevalence of corrupt practices. When such a report as the latter is made to the House, it is usual to appoint a Royal Com-

mission, on whose report, if it disclose a serious state of things, the writs for a fresh election may be suspended, so that the constituency remains temporarily unrepresented. Any member returned for two or more places in any part of the United Kingdom is to make his selection for which of the places he will serve within one week after it shall appear that there is no question upon the return for that place. See also COMMONS, HOUSE OF, PARLIAMENT.

### **ELECTRICITY, '98.**

It has been well said that the researches of Crookes, Lenard, and Röntgen have given to man a new eye. Certainly they have furnished science with many problems. The Crookes tube still remains the only source for the Röntgen rays, though ray-emitting properties, at present obscure in character, appear to be possessed by many substances (see CHEMISTRY), and to have the power, besides, of affecting photographic plates, notably uranium and thorium compounds (discovered by Curie and Schmidt). Investigations into the phenomena attending Röntgen rays are the subject of earnest study by many well-known physicists, but are perhaps less popularly explained now than when the first effects were described in the departments of medicine and surgery. That they cannot be polarised is confirmed by Dr. L. Graetz, as well as their essential wave-nature. Sir W. Crookes claims that some early views of his respecting a fourth state of matter are finding acceptance, and that proofs are being produced in favour of the doctrine that the essential fact in the phenomenon is **electrified radiant matter.** In this connection the writings of Professor J. J. Thomson and Dr. Larmor should be studied (*Philosophical Magazine*). It cannot, however, be said that a complete and conclusive theory of these rays has yet been propounded, but it is becoming generally believed that Crookes' original theory, enunciated some twenty years ago, as to the nature of cathode radiations (*i.e.* the kind of ray in a vacuum tube that proceeds from the aluminium plate forming the negative electrode or "cathode" exciting the green luminescence in the glass upon which it falls) is at any rate to a large extent correct. According to this theory these cathode rays consist of material particles of the residual gas, which, being similarly electrified by contact with the cathode, are violently repelled by the latter. This has been the view (says Swinton) held for a long time by most English physicists, and the chief point of difference now appears to be whether these material particles are single atoms, single molecules, or larger aggregations of matter. Sir Gabriel Stokes likens cathode rays to negatively charged missiles, shot in showers like hedge-firing from the negative electrode against a target which suddenly receives and arrests them. According to this view the radiation from the target reaches an object which is being skiagraphed as an undulation consisting of irregular pulses. Among developments of apparatus Mr. Swinton has supplied a Röntgen ray camera, intended to show the position, dimensions, and form of the source of the X-rays in a Crookes tube. By means of a pin-hole the image of the anti-cathode area is thrown upon a fluorescent screen, or a sensitive plate may be substituted for the screen and the image photographed. Mr. J. Wimshurst,

F.R.S., has introduced improved apparatus for holding tubes and for their excitement, whereby leakage in the flow of current is lessened. In medicine and surgery a very considerable application of the "new eye" is still going on for localisation purposes. In a letter to the *Times* the Treasurer of St. Thomas's Hospital stated that during one year 416 patients passed through the X-ray department. See *Archives of the Röntgen Rays*, also the following important papers: "Röntgen Rays in Military Surgery," by Surg.-Major Beevor; "Cathode Rays and some Analogous Rays," by S. P. Thompson; "On the Source of the Röntgen Rays in Focus Tubes," by A. A. C. Swinton; "On the Condensation Nuclei produced in Gases by the action of Röntgen Rays, Uranium Rays, Ultra-violet Light, and other Agents," by C. T. R. Wilson; "Evidence that Röntgen Rays are Ordinary Light," by G. J. Stoney; "Electrostatic Properties of Cathode Rays," by P. Lenard; "Röntgen Rays," by W. C. Röntgen (*Annal. Phys. Chem.* '98).

Under the general heading of **Electrical Industries** may be considered the commercial application of electricity, traction, and power distribution. In the American periodical *Electricity* there have appeared some very valuable articles on the electro-chemical industries of Europe, by J. Kershaw, which should be consulted. The recovery of tin from tin-scrap and the refining of commercial tin are included. It is considered that the electrolytic recovery of the former would prove a profitable industry. German firms are shown to be only too well to the front in these concerns. In *CHEMISTRY* (*q.v.*), the necessity for the production of nitrate of soda in the world's economy is mentioned. The industrial problem is the artificial production of electric nitrate; and Sir W. Crookes has lately asked the pertinent question whether we can by the aid of electricity generate enough energy to produce 12,000,000 tons annually. But as the use of steam and coal engines is far too expensive to justify outlay with any such object, the manufacturer must seek some great natural source of electric energy. At Niagara, where water power is used, electricity can be sold at a profit for  $\frac{1}{17}$ th of a penny per Board of Trade unit. Waterfalls are scarce, we know; but Mr. Preece has lately said that electrical energy can be generated on a coalfield, where coal of good calorific value is raised at a cost of 3s. per ton, cheaper than by a waterfall even at Niagara. The commercial supply of current by companies, vestries, and municipal bodies continues to progress on the most favourable lines, and especially so in London, where the annual derived revenue is given at £800,000. The average charge per unit stands at  $5\frac{1}{2}d$ . At present some difficulty is experienced in acquiring land at places sufficiently convenient for plant. The combined dust-destroyer and electric supply works at Shoreditch appear to have fulfilled expectations, and a substantial reduction in the charge for electricity has been made; but the pattern and ensample that the vestry claim to be should be carefully interpreted nevertheless by its balance sheet. See, further, "The Hargreaves-Bird Electrolytic Alkali Process" (*Electrician*, Feb. 18th): "The Hulin Electrolytic Alkali Process" (*ibid.*, March 4th); "The Commercial and Business Aspects of Municipal Electricity Supply" (Gibbings, *ibid.*, April 8th).

**Electric Traction** is advancing surely and steadily, and on sound business lines. The prejudice of the public in favour of horse or steam power is now lessened in view of the facilities and convenience afforded by electric tramways and light railways, and such traction is no longer an uncertain factor in town and urban life. The scheme for light (electric) railways in Hastings, Bexhill, and outlying parts has fallen through in consequence of strong local opposition, but the town council were in favour of it. On the other hand, the commissioners have passed a scheme for tramways on the overhead trolley system, to run between Rochester, Chatham, and New Brompton, as well as between Ramsgate and Margate. The proposed construction of an electric railway from Hanwell, through Southall to Uxbridge raised the important point of probable magnetic disturbances to Kew Observatory, an institution where the rating of chronometers used in the Navy, and other work is carried on. Such strong pressure was manifested in high quarters that the bill which passed authorising the construction of the line contained a special clause for the protection of the observatory. This we give here, as it will undoubtedly be quoted in regard to schemes in other parts of the country involving possible electrical disturbances: "The whole circuit used for the carrying of the current to and from the carriages in use on the railway shall consist of conductors which are insulated along the whole of their length to the satisfaction in all respects of the Commissioners of Her Majesty's Works and Public Buildings, and the said insulated conductors which convey the current to or from any of such carriages shall not at any place be separated from each other by a distance exceeding one-hundredth part of the distance of either of the conductors at that place from Kew Observatory." That is to say, the proximity of the nearest point of the railway will be a distance of one kilometre from the observatory. Upwards of fifty tramway schemes, it is stated, on the authority of Sir C. Rivers Wilson, are under consideration, while agreements and contracts have been entered into, or applied for, covering a total mileage of electrical tramways and light railways in the United Kingdom of upwards of two hundred miles. The literature on the engineering features of electric traction is indeed voluminous, and cannot be suitably treated upon here; nor have we space to indicate rival systems. On the whole what is known as the overhead or trolley system finds prime favour, and it is economical; where a combination is necessary and conditions favourable, the overhead and underground conduit system are placed next; but storage batteries are by many considered both commercially and theoretically unsatisfactory. At Blackpool, where the conduit system is in vogue, a report was obtained by the Corporation upon the estimated cost of substituting accumulators, and this was done after inspecting Continental methods. The figures supplied for maintenance were: overhead, £600; conduit (1897), £2238; accumulator, £2799. The question of municipalising electrical tramways may be expected before long to occupy public attention. The decision of the London County Council to seek powers for the purchase of the London tramways is of far-reaching importance, one which will undoubtedly revolutionise the whole system of street locomotion. See *London Electric*

### Lines and Paris Metropolitan Railways under ENGINEERING.

The Electric Lighting Acts of '82 and '88 have been reconsidered by a select committee of both Houses of Parliament. Two references of high import to the industry were answered by the committee as follows:—

(1) "The committee is of opinion that, while it may be advisable to maintain the veto of local authorities as to the erection of overhead wires given by the Act of '82 in respect of other electric wires, it is not advisable that in the case of overhead wires for traction purposes the local authority, other than the London County Council and county boroughs, should have an absolute veto. While due weight should be given by the Board of Trade to the representatives of such local authorities, the committee think that in the case of wires for purposes of traction it would be sufficient to give a *locus standi* to such local authorities." (2) "The proved public advantages of electrical energy in the generation of light and power warrant, in our opinion, the granting to undertakers of compulsory powers for acquiring sites for generating stations and lands or easements for pipes and mains th refrom and other works."—See SESSION, sect. 103.

The establishment of a Corps of Electrical Engineers, Royal Engineers (Volunteers), was completed with the approval of the War Office. Experiments on the practicability of the so-called wireless telegraph are still being conducted by the Post Office. They do not call for further mention at present. The report of the committee appointed by the Treasury to consider the desirability of establishing a National Physical Laboratory for the testing and verification of instruments for physical investigation and for the systematic determination of physical constants and numerical data useful for scientific and industrial purposes was issued, and is in favour of such an institution. As a result the Government have determined to obtain parliamentary sanction for a lump sum for building and preliminary equipment, and, in addition, to guarantee a fixed sum per annum for some years. The actual amounts are not yet stated, but we believe they will be found to be on a generous scale, involving some thousands of pounds. Further, the site of the laboratory will be near the Kew Observatory at Richmond, to which Government institution it also will be affiliated. In concrete progress this is the great event of the year in British science. The new institution will be on the lines of the great Physikalisches-technische Reichsanstalt at Berlin.

Ely, Bishop of. See under PEERAGE.

**Emigrants' Information Office.** This office was established by Her Majesty's Government in 1886, for the purpose of supplying intending emigrants with information respecting emigration, chiefly to the British colonies, and is under the direction of the Colonial Office. Branches have been opened at several public libraries in the country. The classes chiefly required in the colonies are generally farm labourers and others connected with the land, miners, female domestic servants, farmers with £200 capital, and, to a limited extent, competent mechanics with a little money; but during '98 the demand for labour was small, except in Western Australia. Hardly any assisted pas-

sages are now granted, Western Australia and Queensland giving the most encouragement. The importance of the subject is shown by the fact that the exodus from Great Britain has averaged during the last few years nearly 300,000 persons annually (including foreigners), of whom the majority have gone to the United States. There was a decrease in the number of emigrants from British ports in '97, as compared with '96. Printed particulars, which are revised quarterly, are exhibited at every post-office, and at more than 250 public libraries; and free circulars and penny and other handbooks of all the principal colonies, and some foreign countries, with maps and full details, can be obtained on application by post or personally to the Chief Clerk, at 31, Broadway, Westminster, S.W.; a monthly report is also compiled for the *Labour Gazette*, published by the Labour Department of the Board of Trade. A professional handbook, price 3d., is issued for barristers, solicitors, medical men, police, etc. See also SELF-HELP EMIGRATION SOCIETY.

**Emigration.** The following statistics were issued during '98 relating to emigration from the United Kingdom during the six preceding years.

Emigration '91, '92, '93, '94, '95, '96, and '97.

	Total, including Foreigners.	Emigrants of British and Irish Origin only.
No. of emigrants in '97	213,280	146,460
" " '96	241,952	161,925
" " '95	271,772	185,181
" " '94	226,827	150,030
" " '93	307,633	208,814
" " '92	321,397	210,042
" " '91	334,543	218,507

The decrease in the total emigration, foreigners as well as British and Irish included, for the year ended Dec. 31st, '97, amounts to 28,672. The decrease in British and Irish emigrants, for the same year, amounts to 15,465.

**Employers' Liability.** A comprehensive article on this subject appeared in the '96 and '97 eds., giving full details of the law on the subject, of the Act of '80, and of Mr. Asquith's Bill of '93 and the proceedings upon it. In the Session of '97 the *Workmen's Compensation Act* was passed, introducing a new principle and altogether altering the state of affairs. For a summary of this Act, see separate article, *WORKMEN'S COMPENSATION ACT*.

### ENGINEERING.

#### *African Transcontinental Telegraph.*

—We have given accounts of the progress of this line in previous editions. On April 21st, '98, a cablegram was received in London stating that through communication had been made between Cape Town and Blantyre (British Central Africa)—an approximate distance of 2000 miles—and on May 9th was published a letter of congratulation from Lord Salisbury to the British South Africa Co. and the Transcontinental Telegraph Co. Mr. C. J. Rhodes, in addressing the third ordinary meeting of the latter company on May 19th in London, said the wire had got to Kotakota, and in 15 months

they hoped to have reached Abercorn, at the south end of Lake Tanganyika. When the line was carried to Uganda the question would be whether the British or Egyptian Government would complete the distance from Khartoum. Within five years he hoped to see the complete success of the whole undertaking. It was agreed to increase the capital of the concern to £300,000. On July 28th and 29th the *Daily Chronicle* gave some details of a Belgian scheme for a telegraph line from Mtwara, on Lake Tanganyika, to Kasongo, on the Congo, 200 miles, and from Kasongo to Stanley Falls, 400 miles more. In the future, probably a connection will be made with the Cape Town and Cairo line. It was stated on Nov. 1st that Mr. Mohun's party had left Zanzibar for the Tanganyika undertaking.

**Alexandre III. Bridge, Paris.**—This bridge is being constructed across the Seine, specially with a view of its completion in time for the Exhibition of 1900. The length of the main span between the abutments will be 357 ft. 10 in., the rise of the arch in the centre being 20 ft. 7 in. It will be of exceptional width, the distance between the parapet walls being 131 ft. 3 in., divided into a roadway of 65 ft. 7 in. and sidewalks of 32 ft. 10 in. each.

**Barnstaple and Lynton.**—The first sod of this light railway was cut at Shamblehay, near Lynbridge, by Lady Newnes on Sept. 17th, '95. The line, which is of 1 ft. 1½ in. gauge, starts from a joint station with the L. & S.W. at North Walk, Barnstaple. The new line is about 19½ miles long; and although it crosses a hilly country, no gradient is steeper than 1 in 50, but such gradients prevail for 60 per cent. of the total length. The cost, including land, works out at £3000 a mile. There are six stations. On March 1st, '97, the first train crossed the Cheltenham viaduct, 4½ miles from Barnstaple. This was the most serious piece of work on the railway. The main height is 70 ft., built of Marland brick springing from stone piers, and the viaduct consists of eight arches. There are also a score of bridges over roads. The formal opening took place on May 11th, '98, when Sir George Newnes was presented with an address. The receipts for June were about £600; July, £700; August, £1000; and September, £930.

**Behr Monorail Railway.**—One of the curiosities of the Brussels Exhibition of '97 was the single line railway, built at Tervuren Park, and run by the inventor, Mr. F. B. Behr, to demonstrate the possibility of attaining a speed of 100 or 150 miles an hour. The carriage was provided with pointed ends to diminish the air resistance, the compartments enclosed in these ends being occupied by the driver and conductor respectively. The vehicle had a sitting capacity for 100 passengers, arranged in four rows, two on each side of the carrying rail. There were two electric motors to each track, making four in all; these were placed in the lower part of the carriage body, below the seats. The bottom of the car extended to within a few inches of the sleepers, and was encased throughout, within this space being a quantity of mechanism including the sets of lateral wheels bearing against the side guiding rails. The two trucks, of four wheels each, running on the main rail were within the recess formed by the framing of the seats. In running order the carriage weighed about 55 tons. By an arrangement of adjustable louvre plates the

inclined faces of the pointed ends could be opened to act as air brakes. It was announced early in '98, on the authority of Mr. Behr, that the Belgian Government had named a *Commission of Inquiry*, composed of the following engineers in the service of the State: M. E. Gerard, engineer-in-chief and chef du cabinet of the Minister of Railways; M. A. Degraux and M. Flammasche, engineers-in-chief of the State railways; and M. Robert, engineer of the State railways, as secretary.

**Berne ("Kornhaus") Bridge.**—Commenced in Sept. '95, this bridge, which spans the Aar valley with one large and five smaller arches—a distance of 1300 ft.—was opened in '98. The length in iron construction is 1180 ft., and 1800 tons of the metal were used, the height of the carriage road above the ordinary water level being 160 ft.; the gradient is only 2·7 per cent., and the width 43 ft. The great arch has a span of 380 ft., and each of the smaller arches 115 ft.; the cost of the bridge proper, which is the latest addition to several interesting structures of the kind in the neighbourhood, was about £80,000.

**Birmingham Water Supply.**—Although, owing to the tropical heat of the summer of '98, the Birmingham Corporation (who own the local water supply) were obliged to issue a warning to the citizens that it had become impossible to maintain a constant service in the higher districts, their great scheme for providing a supply from Wales made excellent progress. The Water Committee, in their report for the year ending March, stated that the amount expended on the Elan valley part of the works during the twelve months was £141,858, bringing up the total to that date of £475,511. Various contracts had been let on both sides of the Severn, including the chief work at the Frankley distributing reservoir, which will have a containing capacity of 200,000,000 gallons. In June, it was stated, another tender had been accepted from a Glasgow firm, amounting to half a million sterling. On Sept. 9th the *Engineer* published a long descriptive article, from which it appeared that the 74 miles of aqueduct were being constructed by contract, about one-half being in cut-and-cover and tunnel, and the other half in syphon, the longest (17 miles) being across the valley of the Severn and Stour, near Bewdley. The scheme has been described at some length in our previous editions. It is to bring the waters of the Elan and Claerwen and their tributaries in the counties of Cardigan, Radnor, Brecknock, and Montgomery to Birmingham, a distance of about 80 miles. The cost has been calculated at £6,600,000, and the interest and sinking fund are to be raised by an advance in the water rates of from 15 to 20 per cent., the saving in pumping (the new supply coming by gravitation), and the increased revenue from increased consumption. The lower end of the water-works is at Caban Coch, on the river Elan, some three miles from Rhayader. In this glen a dam, 120 ft. high, will turn some four or five miles of valley into a deep, winding, and timber-fringed lake, of 497 acres surface and 7,540,000,000 gallons capacity; in flood times the flow over the top of the dam will be about 3 ft. deep. About half a mile from Caban Coch is the confluence of the Elan and Claerwen, and the reservoir will extend about a mile up the one and two miles up the other. Higher up

the Elan valley is the site of the Pen-y-gareg dam, forming the lower end of a lake of 424 acres, with storage capacity of 1,320,000,000 gallons, and also that of the Craig-y-Allt-Goch, with an area of 217 acres and a capacity of 2,000,000,000 gallons. The three reservoirs (the lower one including the submerged dam) are estimated to provide in the driest season for 27,000,000 gallons a day for Birmingham, and the necessary compensation water. If more is wanted, it is proposed to erect three reservoirs on the Claerwen, having an aggregate area of 661 acres and a capacity of 6,500,000,000 gallons.

**Black Sea and Baltic Ship Canal.**—Rumours and reports concerning this enterprise were again in circulation in '97. On Feb. 11th, '98, *Engineering* learnt, "on the highest authority," that it was not contemplated to construct such a canal. The publication of the paragraph brought a reply from Messrs. Target & Co., of Winchester House, E.C., on Feb. 25th, who, stating that no one in London was in a better position to know the facts than they were, reaffirmed that the making of the canal was "very seriously contemplated." The following contains the leading features of the latest detailed description of the scheme published in this country:—The route proposed is from the Gulf of Riga, along the rivers Duna, Beresina, and Dnieper to Kherson on the Black Sea, the length being 994 miles. The channels of the rivers would be deepened, and new cuttings made where necessary, so as to give a depth of 28 ft. of water, the estimated cost being 20 millions sterling, and the time of construction five years. While the primary object of the canal is to connect the naval dockyards at Libau in the north with those at Nikolaieff in the south, it is thought that the great waterway would be commercially successful, as it would develop a very rich tract of country. There is already communication between the two seas, practicable for rafts and small vessels, by this route, and also to the Black Sea, near Memel, by means of the Dnieper, the Oginsky Canal, and the Niemen. The Duna, which empties in the Gulf of Riga, is generally closed by ice from November to April, and the Dnieper, which discharges through nine months into the Black Sea, is closed from January to March. The upper portion of the latter river passes through marshy forests, and it is here that some of the greatest difficulties in the way of the scheme are expected to arise, while 200 miles from the debouchure are a series of nine rapids, extending over 40 miles, with a total fall of 107 ft.

**Blackwall Tunnel.** See ed. '98.

**Bristol Port Improvement.**—In our last edition the resolution of the Bristol Town Council of Sept. 21st, '97, to promote a Parliamentary Bill for a deep-water dock at Avonmouth, at an estimated cost of £1,500,000, was duly recorded. But difficulties arose with the Great Western Railway Company, who, in view of the division of opinion on the scheme, and in view also of the work the company had undertaken in Bristol, were unable to support the undertaking. In the meantime the accounts of the dock estates for the year ending April 30th, '98, were published, and proved to be of an encouraging character. The dock dues reached over £180,000, and the expenditure was about £112,000, leaving a profit of about

£68,000. The city dues came to £26,000, and the expenditure £5500. The total net revenue was £92,853, sufficient to pay 4·07 per cent. on the outstanding capital of the estate. After various discussions, the Council decided on July 20th to promote a Bill for dock extension works at Portishead—instead of the Avonmouth scheme—at an estimated cost of £350,000. It was stated that for this sum the lock could be widened to 80 ft., deepened by 9 ft., and lengthened to 750 ft.; two new warehouses of adequate length and 120 ft. wide could be built, and cattle lairs, cold storage and other accessories provided. An amendment in favour of dockising the Avon at a cost of 2½ millions was rejected, the new scheme being accepted as an instalment. Another postponement, however, was occasioned as the result of the meeting of the Council on Sept. 20th, when only 38 members voted for the Bill, or five below the necessary statutory majority. Later still the Council directed the Docks committee to report within three months on the dockising of the Avon.

**Bruges Ship Canal.**—In Aug. '95 the Chamber of Representatives at Brussels voted credits for this enterprise. The canal entrance will be at Heyst, about 14 miles to the north-east of Ostend, and proceed direct to Bruges, about 6 miles, where docks, wharfage, and warehouses will be provided. The canal is to be capable of accommodating large ocean vessels, but a feature of the general plan is the construction of an *avant port* at Heyst, where there is deep water. Here a curved mole or breakwater, with a radius of 4000 to 6000 ft., has been begun, and the harbour will cover an area of 270 acres. The lock for the ship canal, which is approached from the harbour by a channel 26½ ft. deep, is to be 925 ft. long and 65½ ft. wide, while the canal itself will be 6 miles long, 72½ ft. wide at bottom, and 229 ft. at water line, the depth being 26½ ft. Only one swing bridge will cross the canal, and there will be a floating ferry for cart traffic. The contractors are MM. Coiseau & Cousin, the amount being fixed at £1,558,761, and the time for completion seven years, which will expire in 1902. It was stated in Aug. '98 that considerable progress had been made both at the harbour, mole, the lock, and in excavating the canal.

**Brussels Ship Canal** (see previous eds.)—On Oct. 19th, '95, the ceremony of signing the decree altering the name of the Belgian capital to "Bruxelles port de mer" took place at the official residence of the Governor of Brabant. Apparently it was part of the scheme to utilise and improve the existing canal between Brussels and Willebroek, which runs a distance of 28 kilometres, and is connected at the latter place with the Scheldt. The total estimated cost is 35,000,000 fr., of which the city is responsible for 14,000,000 fr., the State for 10,000,000 fr., and the provinces for 4,000,000 fr., while the rest is borne by the communes of the immediate locality. In Aug. '96 the formation of a company to construct the canal was announced under the title of Société Anonyme du Canal et des Institutions Maritimes de Bruxelles; the capital, £1,343,000, was subscribed in the manner above stated. A meeting of the Committee of Maritime Installations was held at the Ministry of Finance, Brussels, on Jan. 4th, '97, when M. de Smet de Naeyer declared his acceptance of certain modifications

and concessions demanded by the city. The canal will pass through the plain of Tour and Taxis, thus bringing the new docks nearly into the heart of the city. According to a correspondent of *Engineering*, who attended the International Congress on Navigation held at Brussels in the summer of '98, the general idea is to enlarge the present canal *via* the Rupel, giving 18 ft. of water at once and a possible 2½ ft. later. "It appears certain to end in Brussels having two ports, the inner for 18 ft. and the outer for 21 ft. draught, with not improbably differential freights."

**Calais Port.**—The completion of the new port was officially celebrated on Sept. 17th, '98. The harbour entrance is 430 ft. wide, with a depth of 29 ft. at high-water neap tides and 34 ft. at spring tides. The completion of the harbour, with docks and equipment, has cost the French Government about £3,000,000.

**California (Southern) Transmission Scheme.**—In July '97 it was announced that a contract for the transmission of power from the Santa Ana Canyon to Los Angeles and Pasadena had been entered into between the Southern California Power Company and the General Electric Company. The station is in the canyon, about 80 miles from the towns named, and the water is to be taken from the river, through canal, flume, and tunnel, along the side of the canyon. It will be let into a pipe line 2200 ft. long, giving what will be equivalent to a vertical fall in the water of 750 ft. This transmission will be the longest commercial electrical power transmission as yet undertaken, as well as that using the highest voltage. The distance covered is about three times longer than that between Niagara (*q.v.*) and Buffalo, the town supplied from the Falls.

**Channel Tunnel and Kentish Coal Working.**—At the meeting of the Channel Tunnel Company (Jan. 20th, '98), Baron Emile d'Erlanger, who presided, in moving the adoption of the report, made a speech to the effect that the company had paid all their debts and had £23,000 in cash at their bankers; he attributed this result to their Kent Colliery shares, many of which they still held unsold. He spoke hopefully of the future. At this meeting, and the confirmatory meeting on Feb. 17th, it was agreed to convert the capital into 456,757 shares of 4s. each, some of which were fully paid, others 3s. and 2s. paid, the last named being called upon to pay the 1s. due since '90 with interest. The report of the consulting engineer of the Kent Collieries Corporation, published in October, showed that good progress had been made with the three shafts. No. 1 was 520 ft. deep.

**Channel Bridge (New Scheme).**—The annual meeting of the Channel Bridge Company was held in Paris, and reported in this country on April 12th, '98. The minutes contained the following statement:—"M. Thévenet le Boul, chief engineer of the Ponts et Chaussées, member of the Technical Committee of the company, explained that the new method proposed for crossing the Channel consists in rolling on a bridge, submerged to the depth of 15 mètres below low-water mark, an immense platform emerging above the water. It is to be propelled by electricity, and capable of carrying four railway trains. The rails on the platform join the rails on land at the departure and arrival, so that the trains will simply steam on to the platform, and steam off it when the plat-

form reaches the opposite coast. It is the amplification, on a vast scale, of the little platform which is used to convey foot passengers between St. Malo and St. Servan." It was added that the work could be completed in five years, at an estimated cost not exceeding 250,000,000 fr., and that it had been considered by the Compagnie de Fives-Lille and the Thames Ironworks Co. The platform in question would be 450 mètres long and 15 mètres wide, supported by five iron pillars on each side, which would rest on a submerged platform, 30 mètres wide, provided with wheels which would run along the rails fixed on the submerged bridge. Three rolling platforms might be at work during the daytime. The meeting approved the idea.

**Chicago Drainage Canal.**—Early in '98 it was stated, on the authority of the President of the Chicago Drainage Board, that this canal would be ready, and the water turned on, in the autumn of '99. Up to that time it was calculated that about 87 per cent. of the great work had been completed, including 97 per cent. of the canal itself. The following interesting comparisons, showing the work and cost of the canal up to the end of '97, were prepared:—

Canals.	Miles.	Years.	Cost.
Chicago ..	40'6 ..	6 ..	£5,057,740
Suez ..	66'0 ..	9 ..	20,000,000
Corinth ..	3'7 ..	12 ..	3,000,000
N. Holland ..	16'0 ..	11 ..	3,200,000
North Sea ..	61'5 ..	8 ..	7,488,000
Manchester ..	35'5 ..	6 ..	15,400,000

**Colombo Harbour Works.**—This great undertaking, up to the end of '97, had cost 17,875,855 rupees, of which the sum of 5,529,916 rupees had been laid out on the two breakwaters commenced in '94. The completion of the whole scheme is expected by 1902; it comprises a graving dock and slip, a coaling dépôt, and three breakwaters inclosing a harbour of one square mile in area. The sterling debt of the colony on account of the harbour improvements will, it is anticipated, amount to £1,300,000.

**Danube Improvements.**—The formal opening of the new passage through the **Iron Gates**—the most formidable of a series of rocky rapids between Turn Severin and Orsova, took place on Sept. 27th, '96, with imposing ceremonial. The work was commenced by the Hungarian Government (under the Treaty of Berlin) in '90, and we have noted its progress in several editions. A waterway has been opened up in the shape of two canals, one being 1700 mètres long and 150 broad and protected by directing walls; higher up the river is a buoyed channel, under 4 miles in length, leading into the straits of Kusan. The depth throughout is 12 ft. In June '97 it was reported that a German engineer had secured a right to utilise Danube cataracts for power production. In September further particulars of the Servian concession to the German firm were published, showing that the monopoly extended to all the Danube waterfalls in Servia from Brujice to Kloslovo, and including the right to work all mines and quarries on the borders of the river. On May 9th, '98, the European Commission of the Danube decided upon a scheme which is of great importance to maritime nations. It was agreed to commence a cutting five miles long, 400 ft. wide, and 20 ft. deep, which, together with former cuttings, will convert the

Sulina branch of the river into almost a straight waterway 35 miles in length, extending from the port of Sulina to the Tultcha branch of the main river. Owing to the labours of the Commission, since they undertook their task in the lower Danube in 1856, the worst of the windings in the branch have been overcome, and the depth has been increased, so that vessels of 3000 tons can navigate the river from the great corn ports of Braila and Galatz. The new improvement, it is estimated, will be completed in five years. On May 8th King Charles conferred the Grand Cordon of the Crown of Roumania on Sir Charles Hartley, who has been engineer-in-chief and consulting engineer of the Commission from its creation. In the spring of the year it was stated that the opening up of the Iron Gates, and the general improvement of the Danube, had drawn attention to the development of the river and canal systems of Bavaria. From Buda-Pesth, Sept. 30th, it was announced that the *Official Gazette* had published an order from the Minister of Commerce by which the canal at the Iron Gates would be opened for navigation from October 1st, toll free till further notice. Passage up stream may be made from 5 a.m. till noon, and down stream from 2 p.m. till nightfall. In the same month it was reported that Hungary had objected to Servia's contract with the German firm, and the latter had suspended operations pending an inquiry.

**Dover Harbour.**—Work on the Great National Harbour at Dover was actually commenced at the end of '97 or the beginning of '98 by Messrs. Pearson, the contractors, the cost being about £3,500,000, the whole harbour to be completed by 1908. The *Times* of Nov. 13th, '97, gave an excellent plan of the scheme, accompanied by a full description. The plan consists of (1) an extension of the existing Admiralty Pier in an east-south-east direction for a distance of 2000 ft.; (2) the erection of an east arm extending seaward in a south-westerly direction for a length of 3320 ft. from the foot of the headland, at a point situated 200 yards to the eastward of the south-east angle of the convict prison enclosure; (3) the construction of a breakwater 4200 ft. long, which, at a distance of about three-quarters of a mile from the shore, will form on the south the outer sheltering arm of the harbour; and (4) the building of a sea-wall, 3850 ft. in length, extending from the Castle Jetty at the eastern end of East Cliff Terrace to the root of the proposed east arm. The area enclosed will be 610 acres at low water, of which 315 acres will be beyond the five-fathom line, affording anchorage for twenty battle-ships besides numerous smaller craft. There will be two entrances: one at the extremity of the eastern arm, 600 ft. wide and 42 ft. deep at low water; the other at the end of the Admiralty Pier extension, 800 ft. wide and also 42 ft. deep. In the western corner of the National Harbour is enclosed the *Commercial Harbour*, the memorial stone of which, as stated in our last edition, was laid in July '93. It was originally intended that this harbour should enclose 56 acres, but the area will now be increased to at least 75 acres by carrying the Admiralty Pier extension another 640 ft., and by lengthening the eastern arm. Thus the area of the two harbours taken as a whole will be at least 685 acres; it is not anticipated that the enlarged Commercial Harbour, which is in the hands of Sir John Jackson's firm, will be

finished before the end of 1901. The National Harbour works are under the direction of Major Henry Pilkington, C.B., R.E., and of Messrs. Coode, by whom the design was prepared. It was reported in Jan. '98 that the Dover Harbour Board, who have control of the Commercial Harbour with its accompanying poll-tax of 1s. on passengers crossing from Calais, had decided to ask for powers to make additions to the piers now being constructed for the cross-Channel traffic, in order to provide additional shelter. In July it was stated that the National Harbour works were going on rapidly.

**Dortmund and North Sea Canal.**—The opening of this waterway was expected by the end of '98. It starts at Dortmund, Westphalia, and passing Munster, Nieppen, and Leer, ends at Emden. The total length is 270 kilometres, the depth 2.50 metres, the width at the surface 30 metres, and at the bottom 18 metres, and there are 20 locks; the total cost is given at £3,465,000. It appears that the main purpose of the canal is to afford an outlet for the heavy coal and iron traffic from Westphalia for the North Sea ports.

**Egyptian Irrigation.**—From Cairo, Feb. 20th, '98, it was announced that the Khedive in Council had approved a contract with Messrs. John Aird & Co. which settles the much debated question of the new Nile Reservoir. The work to be done consists of a dam at Assouan and another at Assiout, to be completed in five years from July 1st, '98, and the contractors agree to accept payment by annual instalments of £160,000, beginning on the completion of the dams and extending over 30 years—about £4,800,000 in deferred payments. The Assouan dam will be built on the granite reefs of the cataract, and consist of granite ashlar; it will be 76 ft. above the river bed, and the head of water being about 46 ft. the Philæ Temple will be safe; the approximate length will be about 6000 ft., and the amount of water to be stored 1,065,000,000 cubic metres. The Assiout dam is intended for raising the level of the river during the summer for the benefit of Middle Egypt and the Fayûm. Both dams will be provided with navigation locks, and the regulation of the supply will be by means of sluices. Sir Benjamin Baker is the chief engineer of the scheme. Operations were begun immediately after the signing of the contract, and it is calculated that employment will be given to at least 10,000 natives.

**Florida Ship Canal.**—Some particulars of this proposed canal appear in a memorandum from Mr. C. F. Adam, British Chargé d'Affaires at Washington, published in Nov. '97, and based upon a report drawn up by Mr. R. M. Caffall. The length is given at 112 miles, 85 of which will be canal, and the remainder inland waters; the course followed being a straight line across the narrowest part of Florida. The width at bottom is to be 200 ft., and the depth not less than 30 ft. The route selected was surveyed and laid out by the late Gen. Stone.

**Gibraltar Naval Works.**—In the House of Commons, on June 13th, '98, Mr. Goschen, First Lord of the Admiralty, in reply to questions, said that the harbour works, as far as the enclosure and defence is concerned, will be practically completed within the period originally contemplated—namely, 1899—1900; but the final completion of portions of the upper structures may require some additional time. In the Naval Works Act, '95, a provision of

£361,000 was made for one dock (or docks), and that dock was to be completed in 1899–1900. but in the Act of '96 it was decided to extend the dockyard and to construct three docks at an estimated cost of £2,674,000, in place of one dock. If the date in the schedule was not changed it was by inadvertence. Under the new scheme the three docks will occupy the site of the New Mole Parade and the whole of the site of the present dockyard, which will remain until the new dockyard, now in progress, is sufficiently advanced to allow the existing establishment to be transferred. The date for the completion of the docks could not be given until the works were more advanced. It was not contemplated to place a floating dock at Gibraltar during the completion of the works.—A tunnel under the Rock was completed earlier in the year by the contractors, Messrs. Topham, Jones & Railton, for the purpose of bringing stone from the east side, though it will probably be used for strategic purposes. It is 1100 yards long, 10 ft. wide, and from 8 ft. to 14 ft. in height. The western end is a few hundred yards south of the Ragged Staff, and the eastern end at Sandy Bay; it rises on an easy gradient towards the east, and the greater part runs through solid limestone. The *Globe* of Oct. 29th announced that the contract for the dock and harbour works had been let to Messrs. Topham & Co., of Westminster.

**Greenwich and Millwall Tunnel.**—During the session of '97 both Houses of Parliament passed the County Council Bill. The tunnel will begin near Brewhouse Lane, Greenwich, terminating at Millwall, near the western boundary of the Island Gardens, Poplar. The estimated cost, as stated before the Parliamentary Committee, was £70,500, inclusive of lands and property. It was also stated that the roadway of the tunnel would be 8 ft. wide and 9 ft. 4 in. high; the two ends would be approached by circular shafts, the level of the tunnel being 40 ft. deep on one side and 50 ft. on the other. In Feb. '98 tenders were invited from six selected firms, but two only were received—for £119,732 and £155,000 respectively. Sir A. Binnie, the Council's engineer, in a report upon the excess of the tenders over his estimate, brought forward various reasons, including the labour clause and the fact that the Parliamentary Committee inserted clauses for compensation for ferry rights, etc. His amended estimate was £83,175 for the tunnel; but with other additions, including land and compensation, it would be £155,150. At the meeting of the Council on July 19th, a recommendation of the Bridges Committee that the work should be carried out by the engineer without the intervention of a contractor was referred back.

**Hastings Harbour.**—On June 16th, '97, the Marquis of Dufferin and Ava laid the inaugural stone of the new harbour, a work promoted by the Hastings Harbour Commissioners. The area of the harbour in the deep is to be 27 acres, and the two arms will have a total length of 3000 ft. From the first the Commissioners were faced with the difficulty of raising the £200,000 estimated as the cost of the undertaking; but a contract was entered into, although less than £120,000 had been realised. In '98 Sir Douglas Fox reported on the work done, and in regard to the breakwater in particular he recommended the

provision of a concrete toe on the sea side and other protective measures. The cost of completing the work, with the additions he advised, he estimated at £270,000. The Commissioners appealed to the Corporation to give a guarantee of 3 per cent. on £100,000, and a poll of the ratepayers, it was reported in August, was in favour of the proposition.

**Herne Bay New Pier.**—On June 11th, '98, the new structure was inspected on its approaching completion. The old pier was 400 ft. long, and an addition of 3320 ft. has now been made, the head being in deep water. In the new structure there are eight alcoves where the width is 30 ft., and at two points the pier is widened to 66 ft. The pier head is 76 ft. wide, and carries an octagonal pavilion 40 ft. wide. Beyond this there is an independent timber landing-stage for the steamers. The pier is solidly built on screw piles entering about 10 ft. into the sea bed, the superstructure being of steel, with a wooden deck which is 14 ft. above the highest water. Mr. E. Matheson was the engineer. An electric tramway runs the whole length of the pier.

**Irish Channel Tunnel Scheme.**—In the summer of '97 this long-talked-of scheme was advanced another stage. On June 29th a deputation representing Ulster and the south-west of Scotland was introduced to Mr. Ritchie, President of the Board of Trade, by Mr. Arnold Forster, M.P. They came to ask the Government for a grant of £15,000 to carry out borings. Mr. Barton, C.E., said four routes had been examined, and any of them would cost between eight and ten millions sterling. In the course of a critical reply, Mr. Ritchie said he had seen estimates as high as sixteen millions. It was a new departure to grant public money for such a purpose, but the Government were prepared to enter into a conference, and to give the assistance of the engineering department of the Board of Trade.

**Japanese Sea-to-Sea Canal Scheme.**—In April '97 it transpired that a project had been formulated to construct a waterway, 26 ft. 8 in. wide, and deep enough to allow the passage of torpedo boats, between the Sea of Japan and the Pacific. It will commence at Isugura, on the Sea of Japan, entering the Bay of Kurawan, on the Biwako Lake, whence a second canal will proceed to the River Usikawa, at the mouth of which Osaka is situated. The cost of the first canal, 22 kilometres, was estimated at £309,700, and the second, 14 kilometres, at £255,500. On June 24th, '98, *Engineering* said that, apart from the other advantages of the scheme, a very large area of land at present under water would be recovered, which, being rich in alluvial deposits, would yield a very large return. The water level of the lake, which is 80 metres deep in some places, being 85 metres above sea-level, can be lowered by 41 metres, producing, it is calculated, 159,750,000 tsubo (1 tsubo = 6 sq. ft.) of dry land on its shores. As to the cost of the whole, it is roughly estimated that the total expenditure will be about 200,000,000 yen, of which, however, it is expected that 160,000,000 yen may be defrayed by the money obtained by selling the reclaimed land. The work is expected to extend over ten or fifteen years, the Government in the meantime disbursing 15,000,000 to 20,000,000 yen a year. The commencement of the undertaking does not yet appear to have been decided upon.

**Jersey Harbour Improvement.**—In the spring of '98 it was reported that the dredging operations had been completed. A channel has been made from the outside roads to inside the harbour mouth, having an average depth of 11 ft. at low water; also a depth of 9 ft. at the L. & S.W. and G.W. Companies' berths. The latter place, which was 12 ft. above low water, has been thus deepened 21 ft. The work was done by Messrs. Volkes & Bos, of Holland, and over 350,000 cubic yards of sand, clay, and stone have been removed.

**Jungfrau Railway.**—On Sept. 19th, '98, the first section, to the Eiger glacier, including a tunnel of 88 yards, was opened, and it was announced that the summit of the Jungfrau would be reached by 1904, when it is intended to erect an observatory. The motive power is electricity. The *Electrician* gives the sections of the line as follows:—Starting from the Little Scheidegg station, 6770 ft. above sea level, the distance to the Eiger Glacier is 840 ft., 7610 ft. above the sea level. This portion is now completed. The next section, to the Eiger Wand, will be 1610 ft., from the Eiger Wand to Eissmeer 1140 ft., from Eissmeer to Jungfraujoch 850 ft.; from the last-named station to the lift, situated 240 ft. from the summit, the distance is 2240 ft. The steepest gradient encountered will be 25 per cent. Electric energy is used, not only for motive power, but for lighting and heating and for working the rock drills.

**Keyham (Devonport) Extension.**—Sir John Jackson secured the contract for this dockyard scheme, commenced in '96, which includes a dam a mile and a half in length, and a great development of the dock accommodation. The total cost was estimated at about £2,000,000; but as the work advanced the Lords of the Admiralty found it necessary to increase the sum to £3,175,000, including £175,000 for fixed machinery. It is expected that the extension will be completed in 1903. The first section of the great cofferdam was successfully closed on June 16th, '98, and was found to be practically watertight. No less than 1,500,000 cubic feet of timber have been used, the whole being imported by the contractor from Vancouver and the Gulf of Mexico. In August it was stated that plans and estimates for new buildings, slips, and workshops at Keyham were being prepared; the outlay was put at £50,000. Besides these extensive works, the estimated expenditure for new buildings and repairs during the naval year at Devonport was fixed at £102,683.

**Kushk-Merv Railway.**—From St. Petersburg, April 27th, '96, it was reported that the Russian Government had somewhat suddenly decided to construct a broad-gauge line as soon as possible from Merv to the Kushk; also that all necessary material was to be collected at the Kushk terminus for rapidly laying down a Decauville railway farther on to Herat. This statement, which appeared in the *Times*, was promptly contradicted, and almost as promptly confirmed by the *Svietsk* in May (N.S.). General Kuropatkin inaugurated the construction of the Kushk-Merv Railway on May 9th, '97. A St. Petersburg telegram of Dec. 24th (N.S.) was to the effect that levelling operations had been begun. The line will be known as the Murghab branch of the Trans-Caspian Railway (q.v.); it was described as being about 107 miles long, with seven stations—Sary-Yazy, Rapter-

kan, Sultan-Bend, Imam Baba, Tash-Kuppi, Kalo-i-Mor, and Kushk. The cost was estimated at 8,718,981 roubles, and the time of construction three years. From Askabad, Nov. 6th, it was reported that passenger traffic from Merv to Sary-Yazy was to be opened immediately.

**Lancashire, Derbyshire, and East Coast Railway.**—This was originally a great scheme for a line straight across England from west to east, from Warrington, where the main line of the North-Western system crosses the Manchester Ship Canal (q.v.), to Sutton, on the Lincolnshire coast. Circumstances, however, arose which caused a considerable modification of the enterprise. A line between Lincoln and Chesterfield is now virtually the whole undertaking, as the Warrington section has been abandoned, and the eastern section to Sutton is transferred to another company. The first section, Lincoln to Edwinstowe, was opened in Dec. '96, and the remainder to Chesterfield on March 8th, '97, including branch connections. There was some heavy engineering work, including a tunnel at Bolsover  $1\frac{1}{2}$  miles long, and several viaducts. At the twelfth half-yearly meeting of the Company in London, on July 19th, '98, Mr. E. Bainbridge, M.P., who presided, said this was the first time they could compare the six months' working with a corresponding period. The net revenue was £13,463 against £7,136, the ratio of expenditure to gross receipts being 56·82 against 57·57, notwithstanding that a large portion of the line had been maintained by the Company which in the corresponding half-year had been maintained by the contractors. A small sum was carried forward after paying all fixed charges and an accumulated adverse balance of £2,528. The Company expected to get access to Sheffield *via* the Midland during the year, and a direct run by means of the Sheffield District line in the course of '99.

**Leicester Water Supply.**—In Sept. '98 it was reported that the Corporation were moving for a scheme by which a supply of 14,000,000 gallons per day will be secured from the watershed of the Upper Derwent, 66 miles off.

**Liverpool Docks Improvement** (see Mersey River).—On Oct. 14th, '97, the Works Committee of the Mersey Docks Board submitted a scheme for improvements of the dock accommodation on a very large scale, and during the session of '98 the Board obtained borrowing powers amounting to about five millions. Briefly stated, the scheme includes the construction of five branch docks and three new graving docks, and the enlargement of six of the existing docks, besides the erection of a huge tobacco warehouse at Stanley Dock. The new Canada Graving Dock, now being proceeded with very rapidly, will be the largest yet known, being 920 ft. long, with a width at bottom and entrance of 94 ft., and a water depth on the sill of 32 ft. at ordinary spring tides. (Compare Glasgow Docks, q.v.)

**Llanelli New Dock.**—The first sod of this undertaking was cut on March 15th, '98. The dock will be 9 acres in area, 1000 ft. long and 400 ft. wide, with a quayage of 1200 ft. There will be a depth of 17 ft. on the sill, and a width of 50 ft. at the gates. The cost is estimated at about £200,000.

**London Electric Lines.**—The following are summarised accounts of various electric railways, in working order, in course of con-

struction, or otherwise dealt with, in '98.—*Brompton and Piccadilly Circus*. A new scheme, the Bill for which was passed in '97. The line will be carried from South Kensington to Piccadilly Circus, with stations at Brompton Road, Knightsbridge, Hyde Park Corner, Down Street, and Dover Street for Bond Street. According to the prospectus issued in July '98, the line is to be 2 miles in length, in two tunnels, each of  $11\frac{1}{2}$  ft. diameter, and a connection is to be made, by means of the existing subway, with the District line at South Kensington. The capital was fixed at £600,000, in £10 shares, with borrowing powers for £200,000. A provisional contract had been entered into with Mr. George Talbot (contractor for the City portion of the Central London Railway) to complete the line in  $2\frac{1}{2}$  years for £385,174; while the estimated cost of electrical equipment, rolling stock, etc. (apart from land), was £144,000. Sir James and Mr. W. H. Szlumper and Mr. A. B. W. Kennedy, F.R.S., are the engineers.—*Central London*. In '95 this company was floated, with a capital of £2,850,000 in £10 shares, and with £950,000 borrowing powers, interest at 3 per cent. during construction. It will be about 6 miles long, starting at Shepherd's Bush, and proceeding under Uxbridge Road, Oxford Street, Holborn, and Cheapside, to the Bank. A public subway is being constructed at the Bank Station, which will be a point of junction with other electric lines. There will be 13 stations on the route. The Company has powers to extend the line to Liverpool Street. The railway will consist of two parallel tunnels, and the engineers were Sir B. Baker, Sir J. Fowler, and Mr. J. H. Greathead (since deceased), the last-named having been succeeded by Mr. Basil Mott. The construction work proceeded so rapidly in '98 that the two tunnels were expected to be completed before the end of the year, and the progress of the great subterranean work near the Bank, it is hoped, will enable the Company to open the line for traffic in the summer of '99.—*City and Brixton*. This is a scheme for an electric railway from Brixton to the City, with stations at Brixton Hill, Lorne Road, Kennington Oval, Kennington Cross, Lambeth, St. George's Circus, and King William Street, which the City and South London Company (*q.v.*), who will have connections at the Oval and King William Street, agreed to work in perpetuity; capital £1,200,000. The Bill was passed by the Commons' Committee in March '98.—*City and South London*. At the half-yearly meeting on July 26th, '98, a dividend at the rate of  $2\frac{1}{2}$  per cent. per annum was declared on the ordinary stock, the highest yet announced by this Company. Mr. C. G. Mott, the chairman, stated that the Moorgate Street extension was making satisfactory progress; one tunnel from Moorgate Street to Lombard Street was complete, and the other would be finished in a month or two; the tunnelling between Lombard Street and Denman Street, in connection with the S.E. and Brighton railway termini, was expected to be completed in three months. With regard to the church of St. Mary Woolnoth, that edifice was now standing entirely supported by girders, and not a single crack had occurred in the structure. The contract for the Clapham extension had been let, and some time next year it was hoped the entire railway from Finsbury Pavement to Clapham Common would be open

for traffic.—*District Deep Level*. A scheme to construct a deep-level express line between the Mansion House and Earl's Court, under the existing lines—two tunnels for up and down services, to be worked probably by electricity, with an intermediate station at Charing Cross. A Bill was lodged for the session of '97, and passed both Houses. The line will be about 4 miles 6 furlongs 10 chains in length, and the total cost, according to the estimates of Sir B. Baker, was put down at £906,470, of which £25,000 will be expended upon station accommodation and £80,100 is allowed for contingencies.—*Great Northern and City*. In June '98 the prospectus of this undertaking was published; the scheme has been referred to in previous eds. It was now proposed to construct a line, 3 miles in length, from Finsbury Park to Moorgate Street, with intermediate stations at Drayton Park, Essex Road, and Old Street. The tunnels differ from the usual electric railway tunnel in that they are to be 16 ft. in diameter, large enough to take the heaviest G.N. suburban trains, consisting of 11 vehicles, with seating capacity for 500 persons. The capital consists of £780,000 Four-per-cent. Preferred Ordinary, and a like amount in Five-per-cent. Deferred Ordinary shares; there are also powers for a debenture issue, and dividends during construction and covering the period that the contractors work the line.—*Waterloo and City*. This scheme consists of a railway, beginning at the Waterloo terminus of the London and South-Western Railway, passing under the Thames, coming out close to the northern approach to Blackfriars Bridge, and continuing to the Mansion House, where it will be connected with the Central and South London Railways (*q.v.*). There are no intervening stations, the sole object of the undertaking being to connect Waterloo Station with the City. The length of the line was given as 1 mile 4 furlongs 6·80 chains, and the cost of construction £499,769. In March '94 a prospectus was issued, the capital of the company being fixed at £540,000, with borrowing powers for £180,000, the South-Western Company guaranteeing a dividend of 3 per cent. out of gross receipts, two-thirds of the net profit also to go to the new company. Messrs. Mowlem & Co., contractors, commenced operations in '94 by building a staging in the river near Blackfriars Bridge, and sinking a shaft in the river bed, the "spoil" being carried away in barges. The tunnels are of cast iron, 12 ft. in diameter each where the line is straight and on easy curves, and 9 in. wider on sharp curves. At the half-yearly meeting of the Company, on Aug. 4th, '98, Mr. Wyndham S. Portal, who presided, said the total capital receipts were £540,000, and the expenditure £511,317, leaving a balance on June 30th of £28,683; the entire cost of the railway works and connected electric equipment would be fully covered by the authorised capital. The Duke of Cambridge formally opened the line on July 11th, but public traffic was not commenced till Aug. 8th, when about 100 trains ran each way, carrying between them 15,000 and 20,000 passengers, the journey occupying about 5 minutes. There is only one class, the fare being *2d.*, or *3d.* return, and season tickets are issued. At the Waterloo end there are several approaches from the L. & S.W. platform; in the City there are temporary staircases in Walbrook and at the corner of the Poultry, but

eventually there will be entrances in front of the Royal Exchange, the Bank of England, the Union Bank, and the Mansion House, connecting with the new public subway in the centre of this crowded crossing.—*Waterloo and Baker Street*. This scheme, referred to in previous editions, was allowed to hang fire till the London and Globe Finance Corporation took it up in '98. It is to run an electric underground line from a point adjoining Baker Street Station on the Metropolitan, with subways connecting both with it and the Marylebone terminus of the Great Central (see *London's New Trunk Line*), to Waterloo. There will be intermediate stations at Oxford Circus, Piccadilly Circus, and the Embankment end of Northumberland Avenue. Work has commenced from a staging in the river near Charing Cross, to which the "spoil" will be brought, and it is expected the line will be completed in five years.

**London's New Trunk Line.**—The first passenger train on the Great Central ran from Manchester to London, with a party of officials, on Nov. 7th, '98. See article on RAILWAYS.

**Manchester Sewage Disposal.**—After the rejection of the culvert proposal by vote of the ratepayers, as recorded in our last ed., the Rivers Committee of the Manchester Corporation was reconstituted and a small subcommittee appointed. The latter, consisting of eight members, visited a large number of places where the sewage problem had been seriously dealt with, and reported in March '98. Briefly stated, they recommended "the immediate construction of four acres of bacteria beds, and that the best available expert assistance be obtained in regard to the construction and working of the same. After completion of this area, and proof of cost, capacity, and efficiency, the progressive extension of the same to be made on an area large enough to meet the requirements of the daily normal flow of sewage." In the meantime the case brought by the Mersey and Irwell Joint Committee against the Corporation for breaches of the Rivers Pollution Act was adjourned. At the meeting of the Joint Committee in July it was stated that the Rivers Committee had decided to put down four small test filters in addition to those already in use. According to experts the effluent could be treated on the 151 acres of land already in their possession; but if the effluent did not prove satisfactory, or if the Local Government Board were not satisfied, the Corporation were prepared to buy more land. The Joint Committee agreed that the consideration of the question be postponed for six months. The City Surveyor's annual report, to Dec. 31st, '97, was presented at a meeting of the Corporation in August. It contained an account of various experiments, and the statement that in all the tests applied the effluent contained more impurity than the water of the Manchester Ship Canal (*q.v.*). The net cost of the work for the year was £19,089 against £15,780 in '96; the volume of sewage was 7,373,917,000 galls., an increase of 26·7 per cent., and the contributing population had increased in the year to 512,500, or 28 per cent.

**Manchester Ship Canal** (see previous eds.).—This great undertaking, the first of its kind completed in this country, is 35½ miles long, average width 172 ft., and at bottom 120 ft. (but much wider between Barton

and Manchester), depth 26 ft. There are four locks between the entrance at Eastham (opposite Garston, on the Mersey estuary) and the city, the total rise of the four steps being about 60 ft. The canal is tidal up to the first (Latchford) locks, a distance of 21 miles; but the entrance itself is through locks, so that the necessary depth of water is always retained in the whole canal. A channel has been dredged in the Mersey estuary to secure the approach to Eastham. The fixed bridges have a minimum height of 75 ft., and there are a number of swing bridges; a fine feature of these works is the Barton swing aqueduct, carrying the waters of the profitable Bridgewater Canal. After passing the last locks, at Mode Wheel, a vast water area comes to view—the Manchester and Salford Docks, including over 104 acres water space and miles of quay frontages. The governing body consists of a board of directors, some of whom are representatives of the Manchester Corporation, who obtained Parliamentary Bills to lend the company £5,000,000 sterling. The works were commenced at Eastham in Nov. '87, and the waterway was opened to public traffic from Eastham to Manchester on Jan. 1st, '94. The Queen declared it open on May 21st. At the meeting on Feb. 17th, '98, Mr. Bythell, the chairman, said that the net revenue for the last half of '97 was £41,606, the earnings having only fallen short by £3,135 of paying interest on the whole of the first and second debentures. On Feb. 24th, at a meeting of the Manchester Corporation Ship Canal Consultative Committee, Mr. Hill, C.E., the engineer, presented his report, and referred to the rate of progress in the Canal finances, which, on the whole, were favourable. The issue was announced in April of the Manchester and Liverpool Transport Co., to undertake the transport of merchandise by steamers. In the same month the railway companies carrying goods between Manchester and London intimated that the rates for cotton and linen goods would be reduced from 40s. to 30s. per ton, as an experiment, from May 2nd to Dec. 31st. The steamship companies, it appears, carry these goods *via* the canal for 22s. 6d. Later on the Lancashire and Yorkshire Railway branch line through Salford to the docks was opened. The half-yearly report to June 30th, issued in August, showed that the net revenue was £42,279. The total expenditure on capital account was £15,179,224. The amount standing to the debit of the net revenue account was £707,035. Interest for the half-year on the first and second mortgage debentures, amounting to £44,742 had been paid out of the net revenue and the accumulated revenue of the Bridgewater department. The interest due to the Manchester Corporation, £112,500, was not paid, and the total amount owing to the Corporation now was £731,250. The toll paying merchandise passed over the Ship Canal during the half-year reached 1,173,880 tons, as compared with 957,210 tons in the first half of '97. Sea-borne traffic showed an increase of 106,712 tons, mostly in low-class articles. Coal, which yielded little revenue, showed an increase of 97,000 tons. Grain imports showed an increase of 21,400 tons, and the tank oil trade had made a good beginning, 20,300 tons having been imported, although the installation was not completed. The receipts (approximate) for the first nine months of '98 were £170,200, an increase of £18,158.

**Manchester (Thirlmere) Water Supply.**—See '96 ed.

**Mediterranean—Persian Gulf Railway.**—According to a report from Vienna, published in the *Daily Chronicle* of July 20th, '98, Count Vladimir Kapnist, nephew of the Russian Ambassador at Vienna, had submitted to the Sultan an application for a concession for a railway from Tripoli Harbour (Syria) to Koweyt or Elkuweit (Persian Gulf). The line will touch the Euphrates near Deir, traversing the stream at Hit, and continuing between this river and the Tigris to Kurna, where both rivers meet. Thence the line will run to Basra (Bussorah), and will have its terminus in the Persian Gulf. A cross line is also proposed from the Persian frontier at Khanekin to Baghdad, Kerbela, and Nedjef. The new line would, of course, considerably shorten the journey to Bombay and prove a rival to the Suez Canal. A similar report on the authority of the *Cologne Gazette* was circulated in August, when it was added that Count Kapnist asked for a Government guarantee of 6 per cent., and also for the preference for a number of other railways in Asia Minor (see *Persian Roads*, etc.).

**Mersey Great Bridge.**—This is a revival of a scheme described in a previous edition. At a meeting of the Liverpool Chamber of Commerce on April 5th, '98, Mr. John J. Webster, M.Inst.C.E., gave details of the newest development of the proposal, as prepared by himself in conjunction with Mr. J. T. Wood, M.Inst.C.E.—namely, to carry a roadway bridge, 62 ft. wide, from Liverpool to Birkenhead. It is to start in St. George's Crescent, Liverpool, passing over the site of the buildings between and at the rear of the James Street and Red Cross Street properties, turning to the left along Strand Street, then crossing the Lock Pit between Wapping Basin and Salthouse Dock at an angle, and on to the riverside south of the Manchester Dock, where the east abutment of the proposed bridge would be erected. From this position the bridge would cross the river and be carried to the corner of Hamilton Square, Birkenhead. The estimated cost of land and bridge was £2,750,000. On being put to the meeting, a vote in favour of the scheme was carried with only two dissentients. According to the *Liverpool Post*, the bridge is designed to cross the river on the suspension principle in three spans, one central of 2000 ft., and two side spans of 1000 ft. each. It is also proposed to fit lifts to the towers of the two piers in the river to command a view from a height nearly 400 ft. above sea level.

**Mersey River Improvements.**—Vice-Admiral Sir G. S. Nares, K.C.B., F.R.S., acting conservator on the Mersey Conservancy Board, in his report for '97, which appeared in the summer of '98, said that the sand pump dredging at the bar of the Queen's Channel and at shoals in that and the Crosby Channel was conducted as a rule under favourable conditions. Soundings taken over the whole of the dredging area on Dec. 17th showed only two areas as shallow as 24 ft., five others were 25 ft., while everywhere else in the dredged cut there was no depth less than 26 ft. at low-water spring tides. During the year the dredgers removed 9,122,320 tons of sand, while 893,410 tons were dredged from near landing-stages and dock entrances. The abstract of traffic through the several sea channels as recorded by the lightships shows a total of 46,801 vessels inward

and outward, of which 40,977 used the Queen's Channel. The average daily traffic in and out of the port of Liverpool was 128 vessels. The total in the previous year was 48,777, so that there was a diminution of 1976 vessels.

**Mont Blanc Railways.**—In Aug. '97 it was stated that the railway to Mont Blanc was in rapid progress, though the scheme to actually scale the summit appeared to be problematical. The engineers will next proceed with the mountain line from Chamounix across Montauvert (6260 ft.) to the Mer de Glace. The length of this mountain railway will be 5½ kilometres, and the ascent will amount to 900 metres, the first half of the climb being on the adhesion system and the other half by cog-wheel. The project includes the piercing of five tunnels and the building of thirteen bridges, the journey occupying about fifty minutes. The Mer de Glace Railway will be completed, it is expected, in 1900. The latest estimate of cost of a railway to the summit amounts to £392,000.

**Mount Sinai Railway.**—See last ed.

**Murman Bay Deep Sea Harbour.**—Some interesting details were published in Sept. '96 of a scheme, originated by Mr. Bielmor and accepted by the Russian Government, to establish a deep sea harbour and naval arsenal in Murman Bay, which is on the Russian Lapland coast west of Kola Bay. The new port is to be known as Ekaterinograd. A St. Petersburg telegram of Oct. 1st, '97, announced the arrival of the first passenger train at Archangel from Vologda, indicating the completion of the railway from Moscow to the White Sea (see '94 ed., "White Sea"). The line was opened for traffic in November, and in the autumn of '98 the approaching completion of the Perm-Viatka-Kotlass railway was announced. A company has also been formed with the title of the Kotlass-Archangel-Murman Co., with steamers and barges, for transport in connection with the railway.

**Naples Port Improvement.**—The development of this port, according to a British Consular report published in the spring of '97, is to be undertaken with vigour. A new dry dock is to be constructed, the jetty of which will cost about £15,000, while 1,000,000 francs are to be spent on the present harbour, in improving the head of the principal mole, laying railway lines on the quays, establishing cranes, and erecting sheds. Not the least important item in the programme is that the sewage of the city is to be diverted from the harbour. In the autumn of '98 it transpired that the sewage question—as to the disposal of the refuse on land—had elicited much local discussion.

**Niagara Utilisation.**—This great work has been described in our previous editions. The total energy of the Falls is calculated at 16,000,000 horse power, and the work now in hand is the beginning of "perhaps the most stupendous engineering feat ever undertaken." On April 15th, '95, the first large dynamo was run at full speed, 250 revolutions per minute, and proved quite satisfactory. On July 1st the first electric power transmitted for commercial purposes, 4000 horse power, was sent to an aluminium factory a mile distant. Various other developments were afterwards reported in rapid succession, especially in the direction of electric rail-roading, the district between the Falls and the city of Buffalo, a distance of 20 miles, being

described as alive with intense activity. On Jan. 17th, '96, the Niagara Falls Power Co. accepted a grant proposed by Mayor Jewett for the transmission of electric power for lighting and power purposes to Buffalo. In April '98 it was reported in this country that the fourth 5000-horse-power Westinghouse generator had been tested by the Niagara Falls Power Co. This machine, the first of a new set of dynamos to be installed and operated, brought up the capacity of the station to 20,000 electrical horse power, and additional dynamos of the same design are to be installed till the total capacity reaches 50,000 horse power. In July it was stated that the aluminium conductors erected as an experiment by the Niagara Falls Electric Power Co. to carry current to the works of the National Electrolytic Co., near by, were in use. The conductors consist for the first part of bars 25 ft. long, 6 in. wide, and  $\frac{1}{2}$  in. thick, and then of cables built up of No. 10 aluminium wire and insulated with rubber. The total weight of aluminium used is 22,000 lb., and it was added that the same work in copper would require 48,000 lb. of metal.

**Nicaragua Ship Canal.**—The line as suggested shows a total length of 169·4 miles, of which 26·79 is in excavation, about 56·5 Lake Nicaragua, 21·6 in Decado, and San Francisco and Tola basins, and 64·5 through the river San Juan. There are three locks each at the eastern and western divides. As a result of an agitation to secure the co-operation and guarantee of the United States Government, it was announced in the spring of '95 that President Cleveland had appointed a commission of three engineers to report on the question of the construction of the canal on or before Nov. 4th. From Washington, Nov. 2nd, it was stated that the report of the Commission contained the following points: (1) The Nicaragua route is the best for an interoceanic canal. (2) A number of deviations are recommended which would make the canal more feasible. (3) The railroad now in use is described as being in a poor condition, and the prospects of improving it do not seem satisfactory. (4) The continuous washing down of sand has greatly damaged the work done in Greytown harbour. (5) Government control of the canal is recommended, and Congress is advised to make the canal a national undertaking. The cost was roughly estimated at no less than \$133,472,893, or nearly twice the original estimate. Various rumours and reports were in circulation during '98, chiefly in relation to the action of the United States Government. In July it was reported that Rear-Admiral Walker, President of the existing Nicaragua Canal Commission, had stated before a committee of the United States Senate that his Commission had not concluded its labours, but he estimated that the canal could be constructed for £25,000,000. A New York cablegram of Nov. 1st announced that the following despatch had been received from Managua:—"The Nicaraguan Congress has approved the provisional agreement between General Zelaya, President of Nicaragua, and the Americans, Messrs. Cragin and Eyre, for the construction of an inter-oceanic canal, and empowering them to negotiate with the Maritime Canal Company, whose concession terminates on Oct. 9th, 1899."

**Nilgiri Rack Railway.**—This, the first rack railway in India, was approaching com-

pletion in the autumn of '98. It starts from Mettupalaiyam, a station on the Madras Railway, and runs to Ootacamund; it is 28 $\frac{1}{2}$  miles long, of which 12 miles is a continuous rack on a rise of 1 in 12 $\frac{1}{2}$ , with curves of a minimum radius of about 328 ft.; on the adhesion sections the ruling grade is 1 in 40. In all, the line rises 6148 ft., and reaches an elevation above sea level of 7220 ft. There are a large number of bridges and tunnels *en route*, and nine intermediate stations placed conveniently for the tea plantations. The engineer in India is Mr. W. J. Weightman, M.Inst.C.E., and the consulting engineer Mr. Horace Bell, M.Inst.C.E., of Westminster.

**Ostend Harbour Improvement.**—On Nov. 4th, '97, it was announced that the contracts would be let in December, and that the extension of the harbour would be completed in four years. The total cost is estimated at £500,000, of which the town is to find £112,000, and the Government the remainder. The scheme includes a new outer port, to occupy the position of the present inner port, the military sluice being done away with; and the landing stage of the Dover and Ostend mail steamers will be on its eastern bank. There will be a dry dock, the *bassin de marine* will be enlarged, and there will be a considerable extension of the quayage, while there is to be a permanent enlargement of the channel approach. The King of the Belgians laid the first stone on June 19th, '98.

**Panama Canal** (for previous history see former eds.).—The ordinary meeting of the new Panama Canal Co. was held at Paris on Dec. 28th, '97, M. Bounardel presiding. It was stated that the technical committee were still considering two schemes, one with five locks on each side of the central ridge and the other with three. There were 3100 navvies at work, and enlistments had been allowed in Jamaica. On Dec. 30th, the Panama trial, arising out of the "revelations" of the prisoner Arton, who himself had been sentenced to eight years' imprisonment, resulted in the acquittal of all the defendants. A cablegram from Panama, Jan. 10th, '98, was to the effect that 3500 labourers were employed, the principal work being the reduction of the Culebra Hill. Dr. Cornelius Herz, whose extradition had been demanded by the French Government, died at Bournemouth, on July 6th, from angina pectoris, after a lingering illness, at the age of 53. A *Daily Telegraph* message from New York, Oct. 26th, reported that M. Hutin, director-general of the new Company, stated that they had acquired plant worth a very large sum from the old Company without any cost, and that the canal was two-fifths finished and would be completed in a reasonable time.

**Paris Metropolitan Railways.**—Early in '98 it was announced that the Government and the Paris Municipal Council had agreed to a normal gauge system to be worked by electricity. The first six lines were sanctioned as follows:—Vincennes to Porte Dauphine; a circular line following the outer boulevards; Porte Maillot to Ménilmontant; Clignancourt to Porte d'Orléans; Boulevard de Strasbourg to Pont d'Austerlitz; and Cours de Vincennes to Place d'Italie. Besides these the Council reserves the right to put into execution three other sections—namely, Place Valhubert to the Quai de Conti, Palais Royal to the Place du Danube, and from Auteuil to

the Opéra. The total length of the first six sections, which are chiefly underground, will be 64·679 kiloms. All the underground work will be done by the Council, and the *Compagnie Générale de Traction*, which has secured the concession, will carry out the superstructure, viaducts, and stations. The Council must deliver up to the Company the first three sections within eight years, and the remainder within a period of a further five years; if the additional three lines are authorised they are to be handed over in another period of five years. Certain portions are to be ready for the Exhibition of 1900. The fares will be 25 c. first-class and 15 c. second-class any distance, and the advertisements are to be passed by the Prefect of Police; the names of the stations to be in a distinctive colour. The Chamber passed the Metropolitan Railway Bill on March 7th, and in the autumn it was announced that tenders were invited for the first portion of the works.

**Persian Roads and Railways.**—Towards the end of '95 a report came from Teheran that Mr. Felix Moral, representing several German houses, had obtained a concession for a road to join Baghdad with Teheran, and to open up a trade route between Persia and the West. Mr. Moral also secured a 90 years' concession to construct steam or electric trams between Teheran and the villages north of the city, a distance of about 10 miles. *The Financial News* of April 20th, '97, gave further details in regard to the Teheran-Baghdad road, which is to pass *viâ* Kom, Doletabad, and Kermanshah. In regard to the road-making enterprise undertaken by a Russian company, as referred to in previous editions—from Enzeli, on the Caspian, through Resht to Kazvin, whence one branch is to run to Teheran and the other to Hamadan—some details were given by our Consul at Resht in his report published in the autumn of '98. The company began the road from Resht to Kazvin in '95. Later on the concession was extended, so that now it includes a road from Enzeli to Teheran, with a branch from Kazvin to Hamadan, as well as a narrow-gauge railway on the low lands lying between Enzeli and the foot of the hills, a distance of 40 to 50 miles. The work has of late made considerable progress, and it was estimated that 3000 to 4000 men were employed on it, many Greeks and Italians having been engaged for the work amongst the mountains. Iron bridges were to replace existing wooden ones, and the Russian engineer in charge hoped to hand over a carriage road to Kazvin before the end of '98. Various statements in relation to foreign railway schemes in Persia were circulated during the year. From Berlin (April 12th) it was reported that Herr Naus, chief of the Belgian Commission for the reform of Persian customs, had promoted a German and Belgian company for a railway from the Caspian to the Gulf *viâ* Teheran; on Sept. 19th it was announced, also from Berlin, that Russia had secured valuable railway concessions (see *Mediterranean-Persian Gulf Railway*).

**Plymouth New Reservoir.**—On Sept. 21st, '98, the completion of a large storage reservoir on Dartmoor, in connection with the water supply of Plymouth, was celebrated. It has been made by the construction of a masonry dam across the Meavy, a mile below the head weir, where the river ran through the Burrator Gorge. The dam is 145 ft. high from the foundation and 77 ft. from the river bed; it

measures 410 ft. along the parapet or 361 ft. at the water line, and its maximum thickness is 80 ft. A secondary dam is situated near the village of Sheepstor. The length of the reservoir is  $1\frac{1}{2}$  miles, by  $\frac{1}{2}$  mile at its greatest width, and 77 ft. its greatest depth; when full it will contain 650,000,000 gallons. The design was by Mr. E. Sandeman, Corporation engineer, and Mr. James Mansergh, consulting engineer, and it has been carried out by the Corporation, the estimated cost being £150,000.

**Port Talbot Railway and Docks.**—A railway, 17 miles in length, was opened on Aug. 31st, '97. The half-yearly report of the company to June 30th, '98, stated that passenger traffic was commenced on this line in February and proved a source of considerable revenue; the total returns for the six months left a balance of £1051 after the payment of preference interest. The dock had not been completed by contract time, but water had now been let in, and it was expected that shipping would be admitted in the autumn. It was also hoped that the south pier would reach completion next spring. The Ogmore Valley Extension and the South Wales Mineral Junction railways were nearly finished. Before a party of engineers, who visited the works on Sept. 17th, Mr. A. H. Case, C.E., read a descriptive paper. He said the new dock will have a water-level area of 24 acres, in addition to an area of 150 acres of backwater in "The Float." The depth on the sill of the outer gate will be 28 ft. 6 in. at high-water ordinary neap tide, and there will be a constant depth over the inner sill of the dock of 27 ft. The company's main line of railway taps the Duffryn, Llynfi, and Garw valleys, while two mineral lines tap the Avon and Ogmore valleys respectively.

**Rouen "Pont Transbordeur."**—This is a contrivance for crossing the Seine similar to that thrown across the Niévrin below Bilbao. Three-quarters of a mile below the lowest existing bridge at Rouen two towers are to be erected, one on each bank, and a narrow iron bridge will be suspended between them by chain cables at a height of 160 ft. from quay level. The bridge will bear several lines of rail, on which a carriage-platform will run, being drawn from side to side by steel ropes worked by steam or electricity. From the platform will be hung by steel hawsers, and at the level of the quays, the "transbordeur," a vehicle 13 mètres wide by 10 long, in which passengers and vehicles will be carried across. The local electric tramways will make a connection at this point, the cars being taken over bodily. The British Consul at Rouen, whose report was published in April '97, stated that the concessionaire had obtained a monopoly for 80 years (at a very moderate tariff), that the bridge had been commenced, and that 18 months was the time allowed for completion.

**St. Lawrence (Massena) Power Scheme.**—In July '97 the prospectus of a company formed to carry out this project was published in this country. The enterprise, briefly described, is to construct a canal  $\frac{3}{4}$  miles long from the St. Lawrence river to a point on the Grass river close to the town of Massena (N.Y. State), which is about 60 miles above Montreal and about 25 miles below Ogdensburg. The canal is to be used for the production of electrical and water power for industrial purposes, the calculation being that

150,000 horse power will be obtained from the works already contracted for, which may be increased to 400,000 or 500,000. The consulting engineers are Messrs. Kincaid, Waller, & Co., of Westminster, and Mr. John Bogart, of New York; the latter was concerned in the Niagara development (*q.v.*). It further appears that the canal will bring the St. Lawrence water to the bluff on the north bank of the Grass river, where it will have a sheer fall of 50 ft.; it will be about 200 ft. wide, and discharge, according to calculation, 1,000,000 cubic ft. of water per minute under the head of 50 ft. In the autumn of '98 it was reported that the work was making rapid progress. There were seven steam shovels in operation on the ridge near the St. Lawrence, two having a capacity of 1000 to 1500 cubic yards a day. Cableways were being fixed for Vivian scrapers and for transporting material, the latter a  $2\frac{1}{2}$  in. steel cable stretched from two towers across the Grass river, and capable of carrying a 10-ton bucket.

**Sheffield Ship Canal.**—This project is to open up an improved waterway from Goole to Sheffield, about 57 miles, and has been described in our earlier editions. The ninth ordinary meeting of the company was held on April 2nd, '98, at Sheffield, when out of a total available sum of £31,156 a dividend of  $\frac{1}{4}$  per cent. on the ordinary shares was declared. It was subsequently decided to issue £152,000 in debenture stock, additional capital being required for new works. Mr. S. Roberts, in seconding the motion, said they required about £100,000 as their share of the expense of making a new junction canal to connect their navigation with the Aire and Calder Canal. The cut would be about 6 miles long, and would be made at the expense of the two navigations. A further £50,000 was needed to lengthen their 42 locks from 70 ft. to 100 ft. in length, and so to admit keels carrying up to 140 tons. A sum of £12,000 had been expended in building a new warehouse at Sheffield, which had been a great success. In July it was stated that the new cut was being pushed forward; the new waterway will very much lessen the distance between Sheffield and the sea, and will open direct water communication with Goole at all states of the tide.

**Simplon Tunnel** (see former eds.).—There will be two parallel tunnels, each about 66,000 ft. long, the distance between them being 57 ft., and connections will be made every 670 ft. One tunnel will be completed for railway traffic first; the other, which will be used for ventilation purposes, may be developed afterwards. By this means 1800 cubic ft. of air can be passed into the underground passages every second, bringing the temperature down to 77° Fahr. It was calculated that the Simplon Tunnel can be completed in the course of 5½ years, or in three years' less time than the St. Gothard Tunnel, although the latter is some 15,000 ft. shorter than the former, the Mont Cenis Tunnel being again some 6000 ft. shorter than the St. Gothard. The fact that the new tunnel will be at a level lower than the two others is also a point in its favour; and, although the first cost will be heavy, the working expenses are expected to be considerably less. While the altitude above the sea of the Mont Cenis is 4247 ft., and that of the St. Gothard 3789 ft., that of the Simplon is only 2312 ft. One terminus will be at Brieg in the Rhone Valley, on the same level as the existing sidings

of Brieg station. The Italian end will be at Iselle. On Dec. 21st, '96, the Federal Assembly at Berne and the Senate at Rome approved of the tunnel convention. It was estimated that the total cost will be £2,803,000; £2,000,000 is to be borne by the (Swiss) Jura-Simplon Company; £600,000 by the Swiss Government, raised by contributions from the different cantons; and £200,000 by Italy divided as follows—Italian Government, £40,000; province of Milan, £80,000; province of Genoa, £20,000; municipality of Genoa, £60,000. Operations were commenced near Iselle on Aug. 15th, '98, and they are now going on from both ends. The contractors are Messrs. Brandt, Brandau & Co., of Hamburg, with whom is associated Col. Locher, of Zurich; the cost, exclusive of land and other items, is given, as above, at about £2,800,000, and the time for completion is fixed at 5½ years. Excellent arrangements have been made for the care of the workmen, and the most modern drilling and other appliances will be used.

**Southend Shore Improvement.**—Many rumours of schemes for the improvement of the muddy foreshore at Southend, Essex, have been in circulation at one time or another. On Aug. 8th, '98, the *Times* published a statement to the effect that a plan for converting the shore into a sand parade had been submitted for approval. The suggestion is to fill in the space, which is at present useless for sea or land purposes, to above high-water mark, and thus provide a parade which would be "one of the finest seaside promenades in the kingdom."

**South Staffordshire Mines Drainage** (see previous eds.).—On May 11th, '98, the arbitrators, Messrs. Alfred Young, Tylden Wright, and Edward Terry, made a draft award for the Tipton district at *qd.* per ton on coal, ironstone, and slack, and *3d.* per ton on fireclay and limestone. The annual coal output of the Tipton district was stated to be about 700,000 tons, and satisfactory accounts were given of the working of the commissioners' engines. On June 1st it was reported, in regard to the Tipton £100,000 engineering scheme, that a heading had been completed connecting the Bradley Lodge Level to the Mosley old pumping engine pit. The water reaching the level at this point was now reduced to 1,000,000 gallons per day, which appeared to be the general flow, as no further alteration in the height of the water in the surrounding pits had taken place. This work completed the portion of the Tipton scheme which had, so far, been sanctioned. At the annual meeting of the Commissioners on Oct. 5th, further interesting particulars were given. The total water raised in the Tipton district during the year was over 17,500,000 tons, or 30 tons of water for every ton of mineral, the output of the latter (exclusive of mines exempt from rates) being 577,321 tons, against 592,755 tons in the preceding year. The cost of raising the water had been 18*d.* per ton. Dry weather had had a beneficial effect on the operations, the rainfall in the district for the year ending June 30th, '98, having been 23.91 in., or nearly 4 in. below the local average for the past 23 years. The Public Works Loan Commissioners were to be asked to lend £20,000 for a Tipton surface drainage scheme, to be worked by electric pumps; the surface works already completed have reduced the

amount of water from 36,000,000 gallons daily to 9,000,000, and it is hoped that it may be further reduced to 6,000,000. The loan is to be asked for on the understanding that only £60,000 of the £100,000 already sanctioned will be required for deep drainage.

**Staines New Reservoirs.**—On May 1st, '98, Mr. E. Boulnois, M.P., turned the first sod of this undertaking, which is being carried out by the New River, West Middlesex, and Grand Junction Waterworks Companies jointly. The reservoirs are situated to the east of Staines, are estimated to contain 3,300,000,000 gallons, and are to form a lake  $1\frac{1}{4}$  miles long by  $\frac{1}{2}$  mile in width at the northern end, and nearly 1 mile at the southern, with embankments from 21 ft. to 35 ft. in height. Messrs. Hunter & Middleton are the engineers, and Messrs. John Aird & Sons the contractors.

**Tower Bridge, London.**—A bridge on the "bascule" principle, with two Gothic towers, the centre span of 200 ft. being cut in halves, to be raised and brought flush with the towers by machinery concealed within the latter; an upper footway for passengers for use when the bridge is open, and approached by staircases or lifts within the towers. The two piers in the bed of the river are described as the largest in the world. The bridge was opened on June 30th, '94, by the Prince of Wales. The following official description of the structure was circulated on the occasion:—Total length of bridge and abutments, 940 ft.; total length of bridge and approaches, 2640 ft.; opening span—width, 200 ft.; headway above high water when opened, 139 ft. 6 in.; headway above high water when shut, 29 ft. 6 in.; side spans (each), 270 ft.; ditto headway above high water, from 20 ft. to 27 ft.; width between parapets—opening span, 50 ft.; ditto side spans and approaches, 60 ft.; steepest gradient of approaches, 1 in 40 (note: steepest gradient of approaches of London Bridge, 1 in 27); depth of foundations, 60 ft. below Trinity H. W., 27 ft. below bed of river; sectional area of waterway, 20,040 sq. ft. (note: London Bridge, 19,300 sq. ft.); depth of water in opening span at high water, 33 ft. 6 in.; depth of water in opening span at low water, 13 ft. 6 in.; size of each leaf of opening span, 50 ft. wide, projecting 100 ft. beyond face of pier; weight of each leaf of opening span, including roadway and counterbalance weights, 950 tons. The bridge was built by the City Corporation, Mr. J. Wolfe Barry, C.B., was the engineer, and the total cost £830,000.

**Transandine Railway.**—In the '91 edition an account was given of this scheme, which represents the first attempt to construct a line across the South American continent. At an extraordinary meeting of the Buenos Ayres and Valparaiso Transandine Railway Company in London on Dec. 7th, '97, a draft agreement was adopted which was intended to enable the company to complete the connection with the Chilean system. It was stated by Mr. O. C. Waterfield, the chairman, that construction had been stopped owing to the Argentine Government having failed to pay the 7 per cent. guarantee. The company now gave up this guarantee, but in place of it were entitled to the whole of the gross earnings of the line already made instead of 55 per cent.; they would receive 4 per cent. gold bonds to the extent of \$6,500,000, and gave the Government

£200,000 in deferred shares, and allowed them to appoint a director.

**Transcaspiian Railways.**—A new line from Krasnovodsk on the eastern shore of the Caspian Sea was opened to commerce in Oct. '96. It is 48 miles long. joins the main line to Samarcand, and superseded the original branch from Uzan-ada. The deeper harbour at Krasnovodsk offers many advantages over that at Uzan-ada, the latter having shallows and shifting sands. A St. Petersburg telegram of Dec. 24th, '97, reported that the construction of the Samarcand-Andijan line, and its branches towards Tashkent and New Marghilan, were expected to be opened the following year. The *Novosti*, according to a telegram of Sept. 28th, '98, announced that certain Russian engineers and a Danish company had proposed a scheme for a railway to Khiva, no guarantee being asked. The starting-point of the new railway is to be at or near Krasnovodsk, whence it will run through the great Ust-Urt desert to the town of New Urgenj, on the Lower Amu Daria. This, it was added, is in fact the revival of an old project which was once favoured by the late General Tcherniaeff in opposition to General Annenkoff's railway to Samarcand.

**Vauxhall New Bridge.**—In Feb. '98 it was announced that the London County Council had approved of the design of a granite bridge, backed with concrete, submitted by their engineer, Sir Alexander Binnie. The bridge will have five arches, supported by four piers and suitable abutments. The central span will be 149 ft. 9 in., two intermediate spans 144 ft. 6½ in., and the two land spans 130 ft. 6½ in. each in length. The structure will be 760 ft. in length, and only 28 ft. in height above Trinity high-water mark. The Parliamentary estimate of the cost was £380,000. It is interesting to note that the old bridge, which passed into the hands of the contractors for demolition during the year, cost £300,000, the first stone being laid by Prince Charles of Brunswick in 1813.

**Zermatt Gorner-Grat Railway.**—Practically a continuation of the Visp-Zermatt mountain line (which rises 3760 ft. in a distance of 22 miles), this new railway runs from Zermatt, past the Riffel Alp, to the well-known Gorner-Grat. The gauge, like that of the older line, is of one metre, and the electric trolley system is adopted, the torrent in a gorge a mile from Zermatt being utilised for the electric power. The average gradient is 1 in 6½, rack and pinion being necessary for the whole distance of 9½ kilometres. The curves are uniformly of 260 ft. radius, and there are several short tunnels in which the railway makes a spiral semi-circle, the two mouths of the tunnel facing in the same direction, though at different levels. There is one important bridge, in three steel spans of 92 ft. on masonry piers, across the gorge above mentioned. There are stations at the Riffel Alp, Riffelberg, and the summit terminus, which is 10,000 ft. above the sea and within easy walk of the glacier. The line was opened for traffic on Aug. 20th, '98.

**Zuyder Zee Reclamation.**—The Dutch Government having for some time contemplated draining this great lagoon, in Sept. '92 the Queen Regent appointed a Royal Commission of twenty-six members, under the presidency of M. Lely, Minister of Waterstaat, to examine the feasibility of a scheme submitted to the Government by a company.

From the Hague, May 5th, '94, it was announced that the Commission had concluded its labours, and that twenty-one members agreed in a recommendation that the work be carried out. It is proposed to reclaim from the sea about 450,000 acres, the value of which is estimated at 326,000,000 guilders. The cost of this important work is computed at 189,000,000 guilders, or, with the accumulated expenditure, including measures of defence and the payment of compensation to the fishermen of the Zee, at 315,000,000 guilders. The Commission was unanimous in recommending that the work should be executed by the State. Further estimates published in '96 stated that the work would take 31 years, and that every year 10,000 hectares of land would be restored to cultivation. In Jan. '97 it was announced that the Government had adopted the great scheme, part of which consists of the construction of a dam from Ewyk, on the north-eastern point of North Holland, to the Island of Wieringen, and then another dam from the eastern point of the island to the coast of Friesland.

**English Church Union** (33,899 communicants). Formed in 1859, after the Protestant riots at St. George's-in-the-East, for the purpose of uniting clergy and laity "in defence of the doctrine and discipline of the Church of England, and of the rights and liberties of her faithful children." Viscount Halifax is the President, and the Vice-presidents include many distinguished Churchmen. It comprises 31 bishops, 418 other clergy, and 29,720 laity. Its main objects are to defend and maintain unimpaired the doctrine, discipline, and ritual of the Church of England against Erastianism, Rationalism, and Puritanism, and to repel all attacks on the Church's Marriage Law, and on religious education in Church schools. The Union contends for the recognition of the Church's right to settle disputes concerning Spiritual questions in Courts of her own appointment, and refuses to acknowledge the Judicial Committee of the Privy Council, or any other court or judge appointed by Parliament alone, as possessing any authority in Spiritual matters. It advocates reforms in various Church matters, especially Convocation, Patronage, and Parish Vestries, and works for the Unity of Christendom, and the furtherance of Home and Foreign Missions. See article on ANGLICAN CHURCH for recent events as to Anglican Orders. **Organ**, *The Church Union Gazette*. **Offices**, 35, Wellington St., Strand. **Secretary**, Col. John Brathwaite Hardy, late R.A.

**English Land Restoration League**. See LAND RESTORATION LEAGUE, ENGLISH.

**English Parliamentary Parties**. See POLITICAL PARTIES, UNITED KINGDOM.

**Envoys and Plenipotentiaries**. See DIPLOMATIC.

**Erythrea**. The Italian possessions on the Red Sea were combined under this name by various decrees from '90 to '94. The colony has the control of its own administration and the management of its own finance, a civil Governor appointed by the King of Italy representing the Imperial Government. The colony extends from Cape Kasar about 670 miles along the coast of the Red Sea to a point on the Strait of Bab-el-Mandeb. The heavy reverses inflicted upon the Italian forces during '96 by Menelik's army led to a decision to limit the Italian possessions to the Mareb and the Belesa, to

abandon the province of Tigre, which had been incorporated as a part of the colony, and to give up the idea of a protectorate over Abyssinia. A treaty of peace was concluded in Nov. '96, by which the treaty of Ucciali, making Abyssinia a virtual protectorate, was abrogated, the absolute independence of King Menelik was recognised, and a commission was appointed to fix the frontiers. The area of the colony is about 88,500 sq. m., and the population, which is nomadic, numbers about 450,000. Massowah is the capital of the colony. It was an Egyptian possession till '86, when it was taken by Italy. Kassala, which was taken from the Dervishes in July '94, was held till Dec. '97, and then handed over to Great Britain. The new Civil Governor, Signor Ferdinando Martini, left Italy for Massowah (Dec. 29th, '97), charged with the reconstruction of the colony on a civil and commercial basis. See EGYPT (map).

**Erzerum**. An important Turkish town in Armenia. It is about 100 miles south-west of Trebizond, on the great commercial highway leading from that town over the plateau to the Persian frontier, and is a chief halting-place for pilgrim caravans from Teheran to Mecca. The population is variously estimated at from 30,000 to 60,000, and as the administrative capital of a Turkish vilayet, covering 27,000 square miles, with a population of 675,000, it attracts a fair amount of trade. It has a Catholic bishop of the Armenian religion. See ARMENIA.

**Established Church**. See CHURCH OF ENGLAND.

**Ethical Societies**. Associations for promoting ethical culture. Their principles are: (1) the good life has a claim upon us in virtue of its supreme worth to humanity; (2) it therefore rests for justification on no external authority, and on no system of supernatural rewards and punishments, but on the nature of man as a rational and social being; (3) in practice it is to be realised by accepting and acting in the spirit of such common obligations as are enjoined by the relationships of family and society, in so far as these are a means to a fuller human development. The ethical movement in America was initiated by Dr. Felix Adler of New York, and has spread to Philadelphia, Chicago, and St. Louis. **The London Ethical Society**, which has merged itself in a School of Ethics and Social Philosophy, organises lectures and classes in the Passmore Edwards Settlement (*q.v.*), Tavistock Place, W.C.; **Secretary**, Mrs. Gilliland Husband, 8, Marlborough Road, St. John's Wood, N.W. **President**, B. Bosanquet, M.A., LL.D. **Vice-Presidents**, Master of Balliol, Sir Frederick Pollock, Prof. Henry Sidgwick, Mr. Leslie Stephen. Other Societies in London are: **South Place Ethical Society**, Finsbury, E.C.; **Secretary**, Mr. C. F. Smith, 38, Manor Road, Stamford Hill; **West London Ethical Society**, which meets at Kensington Town Hall, Lecturer, Stanton Coit, Ph.D.; **East London Ethical Society**, 78, Libra Road, E., **Secretary**, Miss Vallance; **South London Ethical Society**, Surrey Masonic Hall, S.E., **Hon. Secretary**, Miss Law, 7, Victoria Road, Peckham; **North London Ethical Society**, Leighton Hall, Kentish Town, N.W., **Secretary**, Mr. G. A. Smith, Dartmouth Park Lodge, N.W.; **Battersea Ethical Society**, 4, Carlton Grove, Battersea Park Road, S.W., **Secretary**, Mr. James Gilbert. The North, South, East, West, and Battersea Societies

have federated into a Union of Ethical Societies: **Chairman of Council**, Dr. Stanton Coit; **Secretary**, Miss Vallance, the Deanery, Stratford. There are other Societies at Belfast, Cambridge, and Portsmouth. The Secretary of the Belfast Society is Mr. J. H. Gilliland, 66, Belmont Avenue, Strandtown, Belfast; Professor Henry Sidgwick is the President of the Cambridge Society; and Mr. W. Jannaway, 37, Great Southsea Street, Southsea, is the Secretary of the Portsmouth Society.

**Eton College.** Founded 1440. Endowment exceeds £20,000 per annum. Pupils consist of **King's scholars** or "Collegers" (of whom there are 70, and who enter college between twelve and fourteen years of age), and of **Oppidians**, who enter between ten and fourteen years of age. Exhibitions and scholarships to both Universities, ranging from £50 for four years downwards. **Motto**, *Floreat Etona*. Among its alumni occur the names of Horace Walpole; Bolingbroke; Porson; Hallam; Gray, the poet; Shelley; Wellington; Pitt; Canning; Fox; Lord North; Lord Camden; Dean Milman; W. E. Gladstone; Dr. Pusey; Lord Iddesleigh; Sir John Lubbock; Goldwin Smith; Lord Salisbury; Lord Rosebery; Lord Coleridge; Lord Justice Cotton; Justices Chitty, Kekewich, Kennedy; Bishops Chichester, Bath and Wells. **Head Master**, Rev. Edmond Warre, D.D. A mission is supported by past and present Etonians at Hackney Wick. Consult the *College Calendar*.

**Evangelical Alliance, The.** Founded 1845-6, to enable Evangelical Christians of different denominations, and of all countries, to manifest their true unity in the essential doctrines of the Gospel, and for the defence of religious liberty. **International meetings** of the Alliance have been held in London, Paris, Berlin, Amsterdam, New York, Geneva, Basle, Florence, and Copenhagen, besides **Annual Conferences** in various towns in the United Kingdom, and great national Conferences in other countries where there are branches of the Alliance. A **Week of Universal Prayer** is observed in the early part of January each year throughout the whole world. **President**, Lord Polwarth; **Treasurer**, Donald Matheson, Esq. **Office**, 7, Adam Street, Strand, W.C.

**"Evening News."** A daily halfpenny paper of Conservative principles. It is an amalgamation (May '89) of the *Evening News* and the *Evening Post*. It gives the latest political, general, and financial intelligence of the hour, and pays special attention to cable-news. Cricket, football, and sporting news are prominent features. During '96 it became the property of a limited company with a capital of £250,000 (Chairman, Mr. Alfred C. Harmsworth). **Offices**, 12, Whitefriars Street, E.C.

**Evidence in Criminal Cases Bill.** See **SESSION**, sect. 49.

**Excise.** See **FINANCE**, NATIONAL.

**Executors.** See **WILLS**.

**Exeter, Bishop of.** See under **PEERAGE**.

**Exeter Hall, Strand, London.** (Headquarters of the Central Y.M.C.A.). Erected in 1830-31 by Deering, for the holding of religious and philanthropic meetings. Celebrated as the scene of the religious meetings held annually in the month of May. Now the property of the Central Young Men's Christian Association, having been purchased and presented to that

body by friends of the Institution at a total cost of £61,000. **General Secretary**, John H. Putterill; **Financial Secretary**, Clarence Hooper. See **YOUNG MEN'S CHRISTIAN ASSOCIATION**.

**Exports.** See **BRITISH EMPIRE** (table), and **TRADE**, '98.

**Extradition.** Extradition is the surrender of a prisoner accused of a crime by the Government in whose territories he has taken refuge to the Government of which he is a subject, so that he may be punished or dealt with according to its laws for an offence committed within its jurisdiction. In the absence of treaty stipulations there is no obligation according to international law for the asylum state to surrender and deliver to the demanding state persons who have committed crimes within the dominion of the latter country; yet, as a matter of courtesy and comity between nations, fugitives from justice have sometimes been surrendered to friendly nations without treaty. The crimes for which extradition may be granted are stated in a schedule to the Extradition Act of '70, and comprise murder, and attempt and conspiracy to murder, manslaughter; counterfeiting or altering money, and uttering; forgery, counterfeiting and altering what is forged or counterfeited or altered; embezzlement and larceny; obtaining money and goods by false pretences; crimes by bankrupts against bankruptcy law; fraud by a bailee, banker, agent, factor, trustee or director, or member or public officer of any company made criminal by any Act for the time being in force; rape; abduction; child stealing; burglary and house breaking; arson; robbery with violence; threats by letter or otherwise with intent to extort; piracy by law of nations; sinking or destroying a vessel at sea or attempting or conspiring to do so; assault on a ship on the high seas with intent to destroy life, or to do grievous bodily harm; revolt or conspiracy to revolt by two or more persons on board a ship on the high seas against the authority of the master. The Extradition Act of '73 adds to this list the further crimes of kidnapping and false imprisonment; perjury and subornation of perjury; indictable offences not previously named under the Larceny and other Criminal Acts of '61 (24 & 25 Vict. cc. 96-100); and any indictable offence under the laws for the time being in force relating to bankruptcy not included in the before-mentioned schedule of the '70 Act. Under these two statutes treaties have been concluded with most civilised states. In the event of a fugitive criminal escaping from this country evidence is taken on oath before a magistrate to prove the facts alleged. Such testimony is firstly authenticated by the magistrate before whom it was taken, and afterwards by the Home Secretary, the Foreign Secretary, and the diplomatic representative in London of the nation upon which the demand for extradition is to be made. The documents so verified as accurate are sent through the British representative in the state referred to; and if the criminal is arrested therein they are offered in evidence before a court of competent jurisdiction. If this foreign tribunal decides that a *prima facie* case has been made out against the fugitive, he is surrendered and brought home to take his trial in England. If the evidence as to identity or other points against him is con-

sidered insufficient, the prisoner is remanded to obtain further proof, if this can be given, or he is immediately released. A demand by a foreign state having an extradition treaty with this country for the surrender of a fugitive criminal of that state who is suspected of being in the United Kingdom, is to be made to a Secretary of State by a diplomatic representative of that state. Unless the former thinks the offence is one of a political character, he may inform a police magistrate of this demand, and require his warrant for the apprehension of the criminal. If the criminal is brought before him he is to admit any testimony that tends to show that the offence is political or is not an extradition crime. If the evidence is such as would justify a committal for trial in England, or would show that the prisoner has been convicted, the magistrate is to send him to gaol, and after an interval of fifteen days or if a *habeas corpus* is issued after the decision

of the court, the Secretary of State may by warrant deliver him over to the representatives of the foreign country. If, however, the prisoner is not removed within two months he is to be discharged. The '70 Act applies with certain modifications to all British possessions.

**Eyton, Rev. Robert,** was ed. at Christ Church, Oxford, M.A. '72, and is a Broad High Churchman. He was ordained deacon and priest '70, and for many years was curate at St. Paul's, Knightsbridge. In '83 he was appointed Sub-Almoner to the Queen, and in '84 he was preferred to the rectory of Holy Trinity, Chelsea. In '85 he was made a prebendary of St. Paul's, and in '95 became Canon of Westminster and Rector of St. Margaret's. He is one of the ablest preachers of the Metropolis, and many of his sermons have been published. The best known are "The True Life" and "The Search for God." Address: 17, Dean's Yard, S.W.

## F

**Fabian Society.** Founded in 1883, chiefly among the middle classes, for the purposes of carrying on a Socialist propaganda. According to its manifesto, the Society "aims at the reorganisation of society by the emancipation of land and industrial capital from individual and class ownership and the vesting of them in the community for the general benefit." The parent Society has 835 members, of whom about 150 are lecturers, and lectures are given gratuitously by members in London and all parts of England. Local Fabian societies have been established in the United States, and in a great many towns in the United Kingdom; but most of those in England have since become merged in branches of the Independent Labour Party. There are also University Fabian Societies at Oxford, Cambridge, Glasgow, Edinburgh, and Aberystwith. The Society has published "Fabian Essays in Socialism," which has had a large sale, and "Fabian Tracts," dealing with the theory and the application of Socialism, especially in relation to current national and local politics. The Society has fortnightly lectures in London, followed by discussion, which are usually open to the public. **Secretary, E. R. Pease, 276, Strand, W.C.**

**Factory and Workshop Legislation.** The Factory Amendment Act passed into law in the second session of '95 was the last of a long series of measures, many of them of a complex kind, dating from 1802, when Sir Robert Peel the elder carried a Bill for the protection of pauper children in cotton and woollen mills. In '33 Lord Althorp appointed three factory inspectors, and from that year the administration of the law may be said to date. Mr. Asquith's Act greatly strengthened the protective and sanitary regulations of the statute, reduced overtime for women and abolished it for young persons, brought laundries and dock labour (in respect to accidents) for the first time under the law, besides adding in a variety of ways to the efficiency of the measure. The Act was read a second time unanimously by the House of Commons; it was fully discussed in the Grand

Committee on Trade, and it was read a third time in the Commons and passed through all its stages in the Lords (without alteration) after the resignation of the Liberal Government. A full summary of the existing law on the subject appeared in the '96 and '97 eds., the reforms introduced by the '95 Act being indicated in italics. In '98 a report on the work of the Factory Department of the Home Office for the year '97 was issued. The total number of accidents reported to the certifying surgeons in '97 was 18,987, as against 14,433 in '96. The number of minor accidents notified to H.M.'s Inspectors was 40,474 in '97, as against 33,557 in '96. The increase however was held to be due to better observance of the requirements of the Acts, rather than to an actual increase in the number of casualties. The report referred to the prevention of many more accidents effected by the constant advance in fencing of dangerous machinery and appliances. So far as fatal accidents were concerned the increase was practically limited to adult males. The number of prosecutions instituted in '97 was 3518, an increase upon the number for the previous year, 3341. Of the 3518, 3359 ended in conviction, 69 were withdrawn, and 90 were dismissed. Complaint was made by the Inspectors that magistrates too often inflicted penalties for breaches of Acts which were so small as to have little if any deterrent effect. The number of matters referred to the sanitary authorities was 5245, compared with 5127 in '96, and 1572 in '95. A return of persons employed during '96 in factories and workshops in the United Kingdom gave the total number at 4,398,983, of whom 2,903,324 were males and 1,495,659 females. These were distributed thus: in textile factories 1,077,637, including 412,841 males and 664,846 females; in non-textile factories 2,665,731, including 2,187,033 males and 478,698 females; in workshops 655,565, including 303,450 males and 352,115 females. As to poisoning by lead, phosphorus, and arsenic, the returns showed 1214 cases of lead poisoning in '97 as against 1030 in '96, 2 cases of phosphorus poisoning, as

against 2 in '96, and none in '95. There were 23 cases of anthrax notified, an increase of 6 over the figures of '96. Of lead poisoning cases, earthenware and white lead works accounted for the largest number. The '95 Act threw upon the Factory Department a new and heavy responsibility as to the means of escape provided in case of fire, none the less onerous because it is shared with local authorities, the majority of which do nothing unless pressed by the Factory Inspector. Over 100,000 factories and workshops had been inspected and reported upon for this purpose by the close of '97, with the result that about one in forty was found wanting in proper means of escape, and that 647 movable escapes were ordered to be supplied. The factories and workshops under inspection number over 220,000, employing over 4,500,000 persons, and in these figures a number of places are not included which nevertheless come under the supervision of the Department. The Factory Inspectors during the year travelled 640,328 miles in the execution of their duties. The Chief Inspector is Mr. B. A. Whitelegge, Home Office. See LAW '98.

**Faeroe Islands** ("Sheep Islands"). A group in the North Atlantic, treated as part of Denmark. Capital, *Thorshavn*, on *Stromoe* Island. The islands (22 in number, 17 inhabited) are represented in the legislature of Denmark by a deputy, named by the King. Area, 514 sq. m.; pop. 12,955. See DENMARK.

**Fairbairn, Rev. A. M., M.A. (Oxon.), D.D.** (Edin. and Yale), LL.D. (Aberdeen), Principal of Mansfield College, Oxford, was b. 1838, near Edinburgh, and was ed. at the universities of Edinburgh and Berlin. Commenced ministry ('60) at Bathgate, Linlithgowshire, removing in '72 to Aberdeen. In '77 he became Principal of Airedale Coll., Bradford. For five years he lectured at his *alma mater*, Edinburgh University, on "The Comparative History of Religions," and in '92-4 was Gifford Lecturer at Aberdeen University. In '83 he was elected Chairman of the Congregational Union of England and Wales. The great work of his life, however, commenced with his removal in '86 to Oxford, and his appointment to the principalship of Mansfield College. He has visited and lectured in America at Yale University, at the University of Chicago, and at Union Seminary, New York. He has been appointed by the University of Chicago to the Haskell lectureship on Comparative Religion in India for '98-9. Edited the Hibbert Lectures, '88, of the late Dr. Hatch. He is a frequent contributor to the *Contemporary Review*, and has also written many books, including "Studies in the Philosophy of Religion and History," "Studies in the Life of Christ," "Religion in History and in Modern Life," "Christ in Modern Theology," "Christ in the Centuries," and "The Person of Christ and the Philosophy of Religion" ('99).

**Falkland Islands.** A British Crown colony situated in the South Atlantic, about 300 miles east of Magellan's Straits. Capital and port, *Stanley*, on East Falkland, which island contains 3000 sq. m.; West Falkland has an area of 2300 sq. m., and the lesser islands of the group cover about 1200 sq. m.; pop. 1953. *South Georgia*, an island 1000 miles E.S.E., has been annexed to the colony. Its area is 1000 sq. m., but it is snow-covered, sterile, and un-

inhabited. The Falklands consist of low, hilly grass and moorland. The flora and fauna are Patagonian. Frozen mutton is exported to England. The Governor is assisted by an Executive and a Legislative Council. For statistics see BRITISH EMPIRE (table).

**Farrar, Frederick William, D.D., F.R.S.,** Dean of Canterbury, was b. at Bombay 1831. Ed. at King's College, London, and at Cambridge, where he graduated with first-class classical honours, and became a Fellow of Trinity College. He obtained the Chancellor's prize for English verse and the Hulsean and Le Bas University prizes. He has been Hulsean Lecturer at Cambridge ("The Witness of History to Christ"), and Bampton Lecturer at Oxford ("The History of Interpretation"). Ordained '57. Subsequently assistant master at Harrow, and Head Master of Marlborough School. Chaplain in Ordinary to the Queen, '73; Deputy Clerk of the Closet to the Queen '94; Canon of Westminster and rector of St. Margaret's ('76); Archdeacon of Westminster and Rural Dean, '83; Dean of Canterbury, '95. Canon Farrar is an eloquent preacher and writer, his chief works being "Life of Christ" ('74), "Life of St. Paul," "The Early Days of Christianity," "Every-day Christian Life; or, Sermons by the Way" ('87), "Lives of the Fathers" ('88), "Sketches of Church History" ('89), "Darkness and Dawn" ('91), "The Voice from Sinai" ('92), "The Life of Christ as represented in Art" ('94), a book on "Daniel" ('95), "Gathering Clouds," a tale of the days of Chrysostom ('96), and "The Bible: its Meaning and Supremacy." He is an ardent temperance reformer, and associated himself with the movement for the institution of an Anglican Brotherhood with modern aims. Chaplain to the Speaker of the House of Commons, '90-95.

**Fast oda.** See EGYPT (map), FRENCH CONGO, and FRANCE.

**Faure, Félix François, President of France,** was born at Paris Jan. 20th, 1841, and is quite a self-made man. He was a journeyman currier in Touraine for some time, but eventually became a merchant and shipowner at Havre, with which town he has specially identified himself. He was deputy mayor there during the Franco-Prussian War, and as Captain of the Mables of the Seine-Inférieure gained the riband of the Legion of Honour. Elected to the Chamber in '81, he was appointed Under Secretary of State for the Colonies in the Gambetta Administration formed in November of that year, and held the same office in the ministries of M. Jules Ferry '83, M. Brisson, '85, and M. Tirard '87. In May '94 he became Minister of Marine in M. Dupuy's Cabinet, and was appointed Vice-President of the Chamber. Naturally his business position at Havre made him an authority on shipping, commercial, and colonial questions. On the retirement of M. Casimir Perier in Jan. '95 he was chosen President by 430 votes as against 361 given to M. Brisson. His popularity has continually increased since then, and the success he has gained in his exalted position is undeniable. He went to St. Petersburg in September '97 to return the visit of the Czar, and while there the definite announcement of the treaty of alliance between France and Russia was made. See FRANCE.

**Federation, Australian.** See AUSTRALIA.

**Federation, Imperial.** See **IMPERIAL FEDERATION.**

**Female Suffrage.** See **WOMEN'S SUFFRAGE.**

**Ferdinand, Prince of Bulgaria,** was b. in Vienna, 1861, and is the youngest son of Prince Augustus of Saxe-Coburg and Princess Clémentine of Bourbon-Orleans, a daughter of Louis Philippe. He has served as an officer in the Austrian army, and possesses large estates in Hungary. After the deposition of Prince Alexander, Prince Ferdinand received a deputation from the Sobranje in '87, offering him the vacant throne. He accepted the offer, and on Aug. 14th took the oath to the Bulgarian constitution at Tirnova. His sovereignty was not formally recognised by the Porte and the Powers until February '96. He married (April 20th, '93) Princess Marie Louise of Parma, daughter of the Duke of Parma; and two sons have since been born, of whom the eldest, Prince Boris, was in '96, admitted to the Orthodox Greek Church.

**Ferghana.** A Mussulman khanate in Central Asia, annexed by the Russians in '75. It was formerly called Kokand, and its capital still bears that name. The city of Kokand (pop. 54,000) ranks next in commercial importance and size to Tashkend and Bokhara. Other principal towns are Marghilan and Samarkand. An insurrection which seemed to be of religious origin broke out in May '98, but was speedily quieted, and the leaders were hanged.

**Fergusson, Sir James, M.P.** See under **COMMONS.**

**Fernando Po.** A volcanic island in the Gulf of Guinea. Discovered in 1471 by a Portuguese sailor of same name, and ceded by Portugal to Spain in 1778. Capital, **Clarence Cove**, originally an English settlement, established in 1827. The natives, Aniyo or "Boobies," stupid and repulsive in appearance. Exports: indiarubber and palm oil. Now used as a place of exile for political offenders. See **COLONIES, ETC., OF EUROPEAN POWERS.**

**Fiji.** An island group and British Crown colony in the South Pacific. Fiji is a corruption of Viti, the native name. Consists of two considerable islands: **Viti Levu**, 4112 sq. m.; **Vanua Levu**, 2432 sq. m.; and 225 smaller. Total area, 8945 sq. m.; total pop. 129,853. Capital, **Suva**, in Viti Levu; second town, **Levuka**, in Ovalau. Island of **Rotumah** (pop. 2409), to the north, annexed to Fiji in '81. The islands are mountainous, well wooded, with luxuriant vegetation and fertile soil, tropical, the larger being of volcanic origin, the smaller of coral formation. Forests contain valuable timber. Climate tropical, but healthy and favourable to Europeans. Natives Polynesian with Papuan intermixture; are peaceable, orderly, becoming Christianised and civilised. Europeans number 2666, and there are some 11,000 Indian and Polynesian labourers. In '74 the "king" and chiefs voluntarily ceded the group to England. Boundaries determined in '80. Fiji is administered by the Governor, who is also Her Majesty's High Commissioner and Consul-General for the Western Pacific. The Legislative Council consists of six official and six unofficial members, appointed by the Governor. The colony is represented in the Federal Council of Australasia. Of the natives about 100,000 are returned as Wesleyans, and

10,000 as Roman Catholics. Two State-aided public schools, and many schools carried on by the Wesleyan Mission. Industries are growing sugar, tea, coffee, cotton, cocoanut, arrowroot, tapioca, etc., which form the exports. Bananas are also rapidly becoming an important item. See **BRITISH EMPIRE (table)** and **DIPLOMATIC.**

**Finance Act, The, '94.** A detailed study and explanation of this Act appeared in the '95 ed. The Death Duties are set out under the heading **DEATH DUTIES.**

**Finance Act, '98.** See **SESSION**, sect. 55.

## FINANCE, NATIONAL.

- I. THE REVENUE.
- II. GRANTS IN AID OF LOCAL TAXATION.
- III. PUBLIC EXPENDITURE.
- IV. THE NATIONAL DEBT.
- V. THE BUDGET.

The public revenue is now derived from customs and excise duties, estate and legacy, etc., duties, stamps, land tax, house duty, property and income tax, the post office, the telegraph service, the hereditary revenues of the Crown from woods, forests, and land, and a number of miscellaneous sources, including fee and patent stamps. Little more than half a century ago, scarcely a necessary of life, not to mention luxuries, escaped taxation; and an idea of the extent to which the system was carried may be gained from the statement that whereas the total number of articles and subdivisions of articles in the English Tariff of Import Duties was 53 in '75, in '59 it was 307, and in '40 no less than 1046. Of the aggregate revenue raised by the State, the bulk is paid into the Exchequer, but a large sum goes, as explained lower down, to the Local Taxation Accounts. The public expenditure, which is met by issues from the Exchequer, may be classed under two heads: (1) Consolidated Fund Services, or sums the payment of which from the Consolidated Fund has been already authorised by Acts of Parliament, and which are issued at the proper time without the annual intervention of Parliament; and (2) Supply Services, which are the numerous items brought forward every year in Committee of Supply. Under the first head are included the charges for interest and management of the National Debt, the Civil List and Annuities to the Royal Family, and many salaries and pensions which are set forth in some detail below, and which in the national balance sheet are included under "Other Consolidated Fund Services." The total expenditure for Consolidated Fund Services in '97-8 was £26,886,000, and for Supply Services £76,050,000. The financial year ends on March 31st, and generally after but sometimes before that day the Chancellor of the Exchequer makes the financial statement of income, expenditure, and national indebtedness, known as the Budget. There is a standing committee of the House of Commons for the examination of the accounts, showing the appropriation of the sums granted by Parliament to meet the public expenditure; and the Comptroller and Auditor-General reports to this committee whether or not the expenditure has been in accordance with the purpose for which it was granted.

## I. THE REVENUE.

As explained above, the revenue of the State collected by Imperial officers is paid part into the Exchequer and part to the Local Taxation Accounts. The aggregate revenue so raised amounted in '96-7 to £112,199,000, and in '97-8 to £116,016,000, and in the latter year £106,614,000 was paid into the Exchequer (see TABLE C), and £9,402,000 (in round figures) into the Local Taxation Accounts (see TABLE A). Here are the figures for the two years:—

1896-7. 1897-8.

Aggregate Revenue raised by State . . .	£112,199,000	£116,016,000
(a) For the Exchequer . . .	103,950,000	106,614,000
(b) For the Local Taxation Accounts . . .	8,249,000	9,402,000

The figures given below under the headings of Customs, Excise, etc., show the net receipts under the heads of duties, the total net produce, and the amount paid into the Exchequer, and in the case of Customs, Excise, and Estate Duties into the Local Taxation Accounts also. There is frequently a little variation between the total receipts and the total payments, a little being sometimes left in hand which may go to augment the payments in the next year.

**Customs.**

We subjoin figures showing the net produce from the principal articles contributing to Customs:—

Beer, Mum, Spruce, etc. . . . .	£17,500
Chicory . . . . .	54,333
Cocoa . . . . .	116,434
Cocoa Husks and Chocolate . . . . .	66,727
Coffee . . . . .	170,152
Currants . . . . .	104,281
Figs . . . . .	43,793
Plums (Dried or Preserved) . . . . .	21,544
Prunes . . . . .	7,042
Raisins . . . . .	212,913
Spirits (Colonial and Foreign):	
Rum . . . . .	2,172,948
Brandy . . . . .	1,393,981
Geneva . . . . .	179,709
Other Sorts . . . . .	761,301
Tea . . . . .	3,874,866
Tobacco and Snuff . . . . .	11,453,221
Wine . . . . .	1,327,645
All other articles . . . . .	13,108
Charges on deliveries from Bonded Warehouses . . . . .	34,375

Moneys deposited and not appropriated to Goods . . . . .	3,310
Isle of Man: Duties, etc., collected in the island exclusive of Tea, Tobacco and Wine . . . . .	52,230
Total . . . . .	£22,681,413

Of the total customs receipts £21,798,000 was paid into the Exchequer; £207,302 to the Local Taxation Accounts; and £82,157 on account of the Isle of Man.

**Excise.**

The following is the net produce under different heads of Excise duties:—

Beer . . . . .	£11,826,129
Spirits . . . . .	17,218,906
Railway Duty . . . . .	287,924
Charges on delivery from Bonded Warehouses, etc. . . . .	4,263
Chicory . . . . .	1,366
Coffee Mixture Labels . . . . .	1,521
Licence Duties, viz.:	
Auctioneers, Appraisers, etc. . . . .	87,398
Beer and Cider, and Beer and Wine . . . . .	186,894
Brewers . . . . .	11,429
Dog . . . . .	524,772
Establishment, viz.:	
Armorial Bearings . . . . .	75,276
Carriages . . . . .	504,424
Male Servants . . . . .	151,953
Game . . . . .	204,479
Gold and Silver Plate (Dealers') . . . . .	58,012
Gun . . . . .	101,301
Hawkers and Pedlars . . . . .	24,244
Medicine (Patent) Vendors . . . . .	8,282
Pawnbrokers . . . . .	37,680
Refreshment House . . . . .	9,404
Spirits:	
Distillers and Rectifiers . . . . .	12,680
Dealers . . . . .	147,043
Publicans, including Grocers in Scotland and Ireland . . . . .	1,616,183
Tobacco Manufacturers . . . . .	6,565
Tobacco Dealers . . . . .	85,218
Wine and Sweets . . . . .	75,218
Other than the foregoing . . . . .	2,513
Local Taxation Penalties . . . . .	6,614

Total . . . . . £33,277,691

Of the total net produce of Excise £28,300,000 was paid to the Exchequer, and £4,967,126 to the Local Taxation Accounts.

## PAYMENTS TO LOCAL TAXATION ACCOUNTS '97-8. Table A.

	England.		Scotland.		Ireland.		Total Payments.	
	£	s. d.	£	s. d.	£	s. d.	£	s. d.
Local Taxation (Customs and Excise) Duties . . . . .	1,181,708	11 2	158,264	3 9	134,665	14 0	1,474,638	8 11
Licences (including Penalties) . . . . .	3,342,534	18 9	357,255	5 7	.. ..		3,699,790	4 4
Share of Estate Duty, etc.:—								
(a) Under the Finance Act '94, in relief of rates generally . . . . .	2,053,116	5 10	281,428	9 9	226,234	6 2	2,560,779	1 9
(b) Under Agricultural Rates Act and consequential Acts . . . . .	1,333,680	1 0	183,381	5 7	150,039	4 8	1,667,102	11 3
Total . . . . .	7,911,041	16 9	980,329	4 8	510,939	4 10	9,402,310	6 3

**Estate, etc., Duties.**

Estate Duty payable on property of persons dying after Aug. 1st, '94	£11,911,633
Probate and Account Duty payable on Personal Property of persons dying before Aug. 2nd, '94	114,829
Temporary Estate Duty payable in like manner on:	
Personality . . . . .	8,308
Realty . . . . .	49,384
Legacy Duty . . . . .	2,595,689
Succession Duty . . . . .	727,624
Corporation Duty . . . . .	41,723
Total net produce . . . . .	<u>£15,449,190</u>

Of which £11,100,000 was paid into the Exchequer, and £4,227,882 to the Local Taxation Accounts.

**Stamps.**

Deeds and other Instruments not otherwise enumerated . . . . .	£4,121,891
Deeds, etc., Penalties . . . . .	8,870
Bills of Exchange . . . . .	660,818
Receipts, Drafts, and other <i>id.</i>	
Stamps . . . . .	1,350,691
Composition for the Duties on Bills and Notes of the Banks of England and Ireland, and of Country Bankers . . . . .	123,211
Cards . . . . .	22,954
Licences and Certificates . . . . .	166,998
Life Insurances . . . . .	68,802
Marine Insurances . . . . .	147,864
Medicines (Patent) . . . . .	260,852
Bonds to Bearer and Substituted Securities . . . . .	175,482
Companies' Capital Duty . . . . .	353,959
Contract Notes (above <i>id.</i> ) . . . . .	135,853
Total . . . . .	<u>£7,598,245</u>

There was paid into the Exchequer £7,650,000.

**Land Tax, House Duty, Income Tax, Miscellaneous.**

The items Land Tax and House Duty speak for themselves. In regard to the **Property and Income Tax**, which was at the rate of 8*d.* in the £, an approximate appropriation of the net produce under the different schedules, if based on the statistics of assessments for '97-8, would be: **Schedule A**, Lands, Tenements, etc., £4,772,000; **Schedule B**, Occupation of Lands, Tenements, etc., £148,000; **Schedule C**, Annuities, Dividends, etc., £1,168,000; **Schedule D**, Professions, Trades, etc., £9,828,377; **Schedule E**, Public Offices, Annuities from Public Revenues, etc., £1,255,000. The gross **Post Office receipts** were composed of postage collected by postmasters in the country and Metropolis, postage stamps sold (£12,862,206), commission on money orders (£124,264), commission on postal orders (£303,927), and other items. The sum which appears against the heading of **Crown Lands** is the produce of the Woods, Forests, and Land Revenues of the Crown, which was paid into the exchequer and con-

solidated with the rest of the public revenue in return for the Royal Civil List. The interest and dividend received in the year on 173,327 ordinary Suez Canal Shares amounted to £688,917, and there was also received £9,766 dividend for the same period on 3,275 "actions de jouissance." There was also received in respect of loans (Sardinian, Transvaal, and Greek), £35,213. "**Miscellaneous**" contains numerous features of interest. Small branches of the Hereditary Revenue, under which is included £885 for "Rents and Royalties of Guano, etc., Islands," brought in £19,311; and in the other Receipts by Civil Departments is included £386,071 seigniorage on silver purchased for coinage, and £103,680 profit on bronze coinage. The last great item under the head of Miscellaneous is £948,390 for Fee, etc., Stamps. Among the sums in this last total were Companies' Registration, £83,114; County Courts, Ireland, £27,367; District Audit, £47,105; Judicature, England, £350,781; Judicature, Ireland, £35,240; Metropolitan Police Courts, £5,992; Patents for Inventions, £214,716; Newspaper Registration, £347; *Edinburgh Gazette*, £3034; *London Gazette*, £23,702.

**II. GRANTS IN AID OF LOCAL TAXATION.**

The portion of the Revenue paid into the Local Taxation Accounts for local services consists of Licence Duties, a share of the Estate Duty, the additional beer duty of threepence, the extra spirit duty of sixpence, and a further share of the Estate Duty for the Agricultural Rating, etc., grants. The Probate Duty grant was allocated in the proportions of 80 per cent. to England, 11 per cent. to Scotland, and 9 per cent. to Ireland, and this ratio was followed in the distribution of the additional beer and spirit duties, and of the equivalent grants made to Scotland and Ireland in consequence of the passing of the act in relief of agricultural rates in England. It was at first estimated that the English agricultural rating grant would amount to £1,560,000 for a full year, so that with the equivalent grants to Scotland and Ireland the total payments to the three Local Taxation Accounts in respect of these grants would have been £1,950,000; but the amount required proved to be considerably less, the total for '97-8 being £1,667,102. In this particular financial year ('97-8) the sums paid to the Local Taxation Accounts were £1,474,638 8*s.* 11*d.*, being the produce of the additional beer duty and spirit duty; £3,699,790 4*s.* 4*d.* on account of Licences; and £4,227,881 13*s.* 0*d.* (including £1,667,102 11*s.* 3*d.* Agricultural Rating, etc., grants), share of Estate Duty, etc.: total, £9,402,310 6*s.* 3*d.* Table A shows the figures in more detail. The sum of £9,402,310 therein given does not, however, represent the total amount of the subventions or aids from state revenues to local taxation. There still remain upon the Civil Service estimates, which are of course met by grants from the Exchequer, many charges transferred from local to Imperial funds, and certain other expenditure of a local character amounting to a considerable aggregate. Details of these grants in '97-8 and the estimates for '98-9 will be found in Table B.

Table C.  
EXPENDITURE.

## Total Postal Services

## Total Supply Services

## Total Expenditure

Taking the sums of the two tables together, therefore, the total relief to local burdens from State funds amounted in '97-8 to £13,497,216. These figures will, during the current financial year, be varied, and the aggregate increased, in consequence of the passing of the Irish Local Government Act, and of the further equivalent grant made to Scotland; and a further increase will accrue in 1899-1900. See details as to Local Taxation under LOCAL GOVERNMENT.

## III. PUBLIC EXPENDITURE.

## Pensions.

Turning to the Expenditure for National and Imperial purposes for '96-7, some references to National Debt Charges and to the capital of the Debt will be found on p. 250. Analysing the item "Other Consolidated Fund Services," there is first the sum of £408,289 issued on account of the Civil List, which is made up of £60,000 for Her Majesty's Privy Purse; £131,260 for salaries of Her Majesty's household and retired allowances; £172,500 expenses of Her Majesty's household; £13,200 for Royal Bounty, Alms, and Special Services; £8040 unappropriated; and £23,289 for pensions on the Civil List limited to £1200 per annum (see CIVIL LIST PENSIONS). Next comes a charge of £172,049, being the amount of the annuities to the Royal Family (see ROYAL FAMILY). In addition there is a list of pensions for naval and military services, the amount and duration of the grants being ('97-8): Lord Rodney (and all and every the heirs male to whom the title shall descend), £2000; Earl Nelson (and to whom the title shall descend), £5000; Duke of Wellington (for life of present duke), £4000; the late Viscount Combermere, £2000; Lord Seaton (for life of present baron), £2000; Lord Keane (for life of present baron), £2000; Viscount Hardinge (present viscount), £3000; Viscount Gough (to present viscount), £2000; Lord Raglan (for life), £2000; the late Sir H. Havelock-Allan, Bart. (for life), £1000; Lord Napier of Magdala (to the present baron), £2000; and the heirs of the Duke of Schomberg, £720: total, £27,720. Pensions for political and civil services amounted during the year to £13,185, and the recipients included the Countess of Elgin and the Countess of Mayo, widows of Governors-General of India; the late Mr. S. H. Walpole, £2000; Viscount Cross (who receives no salary in respect of the office of Lord Privy Seal), £2000; the late Mr. C. P. Villiers, M.P., £1200; and the late Mr. A. J. Mundella, at the rate of £1200; Viscount Peel, late Speaker of the House of Commons, £4000. The names of Lord G. Hamilton, M.P.,

and Sir M. Hicks-Beach, M.P., are not included in the above list, as their pensions are suspended, as is customary, during their tenure of office. Subjoined is a return of the names of all pensioners, under the Political Offices Pension Act, '69, with the amount of each pension granted, and the total amount paid in respect of each pensioner, up to March 31st, '98.

Name.	Pension granted.	Amount per annum.	Total amount to Mar. '98.		
		£	£	s.	d.

A. J. Mundella . . . . . Jan. '95	1200	2,988	16	10	

As the above list comprises only pensions granted under the Act of '69, it does not include those pensions previously awarded under the older statute of William IV., and which were continued to be paid after the passing of the later Act. Among these recipients under the statute of William were Mr. Walpole (d. '98), the Earl of Beaconsfield, Mr. Milner Gibson, and Sir G. Grey (the English ex-minister, not the colonial statesman). Pensions for judicial services (England) amounted to £28,764; among the recipients being Lord Herschell, as ex-Lord Chancellor, £5000; Lord Esher, late Master of the Rolls, at the rate of £3750 from the date of his retirement. Lord Penzance, Lord Field, Sir Edward Fry, Lord Ludlow, and Sir Arthur Charles, retired judges, each at the rate of £3500 from the date of their retirement, and several retired county court judges—who as a rule received £1000 each. A large sum is paid by way of compensation, some amounts being issued to persons formerly attached to the old Courts of Requests, the Marshalsea, and the Ecclesiastical and Prerogative Courts. Other sums were paid as judicial pensions to retired judges in Scotland and Ireland.

#### Salaries, Allowances, etc.

The salaries and allowances comprise the sums of £5000 paid to the Speaker of the House of Commons, £20,000 to the Lord-Lieutenant of Ireland; the salaries of the judges, the Lords of Appeal in Ordinary receiving £6000 per annum each, the judges of the Court of

\* £1200 per annum from Aug. 10th, '69, to Jan. 5th, '74. £750 per annum was deducted from the pension, as he received a pension of that amount from the Suitors' Fee Fund of the Court of Chancery.

† £1200 per annum, less other emoluments.

‡ Less £866 13s. 4d. from Oct. 1st, '81, to Jan. 31st, '94, and £852 4s. 8d. from Jan. 1st, '96, received as a compensation allowance from the Colony of Victoria.

§ This pension was resigned in Feb. '89.

|| This pension was resigned in Mar. '88.

Appeal, of the Chancery Division, and of the Queen's Bench Division receiving £5000 each, with the exceptions of the Master of the Rolls (£6000), and the Lord Chief Justice (£8000); the salaries of the county court judges £1500; the salaries of the Metropolitan police magistrates, one at £1800 and twenty-four at £1500 per annum; the salaries of the Scotch judges, sheriffs and sheriffs' substitutes, and of the Irish judges. Miscellaneous services charged on the Consolidated Fund include £16,216 paid to the Receiver-General of the Duchy of Cornwall, compensation for loss of duties on the coinage of tin; £8736 being the amount of annuities for ten years payable to the National Debt Commissioners, created to redeem perpetual annuities and pensions; £40,000 being the Exchequer contribution to Ireland; and £215,000 annuity under the Indian Army Pension Deficiency Act, '85. The cost of the Army and Navy will be found under those headings.

#### Civil Service Votes.

The Civil Service Votes granted in the session of '97, with the net estimates for '98-9, are subjoined. The net total of the original estimates for Civil Services, '97-8, was £20,167,968; and the net total of the parliamentary grants in the session of '97 was £21,091,681. The net total of the original estimates for '98-9 was £21,792,646, showing an increase over the original estimate of '97 of £1,624,678, and over the net total of the grants in '78, including supplementary estimates (£923,713) for '97-8 of £700,965.

In addition to the above grants in the Session of '97 there were granted in the Session of '98, various Supplementary Estimates in respect of the financial year '97-8, among the principal items being £20,710, Public Education, England and Wales; £12,500, Public Education, Scotland; £14,500, Diplomatic and Consular Services (including £15,100 special missions and services—Behring Sea, British Guiana Boundary, and Abyssinia—and £6,000, telegrams consequent on state of affairs abroad); £85,000, Uganda and British East Africa (including £10,000 compensation for losses sustained by French missionaries during the conflicts in Uganda, Jan. '92); £161,500, Colonial Services (including £130,000 for the West African Frontier Force (see SESSION, sect. 30)); £23,038, relief of distress, Ireland; £20,000, Paris Exhibition, 1900, being for the

expenses of the British Royal Commission; and £120,000, West Indian Islands, Grants in aid (see SESSION, sect. 31). There were voted besides for the Revenue departments, £96,200, Post Office Telegraphs, Salaries and Working Expenses; and £45,000 to effect the purchase of a site for a proposed new office for the Savings Bank Department, London. The supplementary Civil Service Estimates thus voted in '98 in respect of the financial year '97-8 amounted in all to £724,451; there were also £141,200 for the revenue departments, and £1,290,000, supplementary estimate for the Army. On the other hand, the amount actually issued for the Navy fell considerably short of the estimate, as will be seen by Table C.

Here are a few details of the Civil Service Estimates for '98-9. As regards Class I., the most noteworthy feature of the class is the disappearance of the vote for extending Admiralty buildings, for which other provision was to be sought. In the estimate for Royal Palaces is included a sum of £15,000 for further restoring the State rooms and Banqueting House at Kensington Palace. The Public Buildings vote includes an item of £15,000 for necessary alterations, etc., to Hertford House, purchased in '97-8 at a cost of £80,000 for housing the Wallace collection. In Class II. the stationery estimate shows a substantial saving of £20,295 in connection with the supply of paper to public departments. In Class III. £6000 has been added to the sub-head for repayments to Sheriffs in England and Wales in respect of expenses incurred in providing lodgings, etc., for the judges on circuit. There is again a reduction on the estimate for Scottish prisons. The most noteworthy decrease in this class is, as before, under the Royal Irish Constabulary estimate, amounting this year to £10,460, as against £16,975 for '97-8. Nearly 55 per cent. of the net total of the estimates for Civil Services arises under Class IV., Education, Science and Art, which shows a net increase of £457,094 over the grants of the Session of '97. To the total of this class,—viz. £11,965,796—the three Public Education estimates contribute £11,228,776, being a net increase of £425,903. The chief causes of the increase in Class V., Foreign and Colonial Services, of £402,727, occur under the estimates for British protectorates and Colonial services. The first of these estimates, while reducing by £2000 the grant in aid of the British Central Africa Protectorate, includes increases of £93,000 for Uganda and £15,000 for British East Africa, including the expenses of the Juba Expedition. In the Colonial Services Estimate, the net increase on which is £243,805, a reduction is proposed of £30,000 in the grant in aid of Bechuanaland, while provision is sought (1) to the amount of £25,000 for the administration and defence of the Northern Territories of the Gold Coast Protectorate, and (2) to the amount of £253,000, to meet the cost of a West African Frontier Force and the cost of establishing telegraphic communication in the Niger Territories (see SESSION, sect. 30). A sum of £3700 is also included for the salaries, etc., of Imperial officers in Rhodesia. The net total of the five estimates for the three Revenue departments shows a net increase of £710,479 over the original and supplementary grants for '97-8. There is again a decrease on the Customs with an increase on the Inland Revenue department and a net increase on the Post Office vote

of £380,980, or, as compared with the original estimate of last year, of £540,855, the dominant cause of the increase being for Staff. Some additions were, as usual, made during the Session to the original estimates, but in this case they amounted to not more than £126,218, among the items being £23,000, purchase of H. M. Legation House, Copenhagen; £1500, Dublin Metropolitan Police; £41,500, grants in aid for the West Indian islands (see Session, sect. 31); £700 towards relief of distress of destitute Cretan Christians; £50,000, relief of distress in Ireland; and £2,200, expenses in connection with the public funeral of Mr. Gladstone. The total grants for the Civil Services in the Session of '98 for '98-99 were accordingly £21,918,864.

#### IV. THE NATIONAL DEBT.

Having discussed the income and expenditure for '97-8, and, so far as certain of the supply services are concerned, the expenditure for '98-9, we may pass on to consider the state of that great burden upon the country which is known as the National Debt. This debt was instituted by William III., whose first regular loan, obtained in 1694, consisted of £1,200,000. Since that time other advances have been made by the Bank, and also by the Bank of Ireland, and enormous loans have been negotiated for the Government. Thus, at the accession of Anne the debt had grown to nearly thirteen millions; when George III. ascended the throne it amounted to more than a hundred millions; at the conclusion of the American War, in 1784, it stood at £249,851,000, and though there was a small decrease during the period of peace, 1784-93, additions amounting to £601,500,000 were made during the French War, and after the battle of Waterloo the debt reached the startling figure of £885,000,000. Since that year it has been considerably reduced, and at the end of the last financial year (March 31st, '98) it stood at £634,435,704. The gross totals of debt on March 31st, '97, and March 31st, '98, were made up as follow:—

	'97.	'98.
(1) Funded Debt . . . . .	£587,698,732	£585,787,624
(2) Terminable Annuities . . . . .	44,941,947	40,515,080
(3) Unfunded Debt . . . . .	8,133,000	8,133,000

Total National Debt (D) £640,773,679 £634,435,704

Decrease . . . . . £6,337,975

(1) This consists of the various stocks, and of the debts to the Banks of England and Ireland. On March 31st, '98, the Funded Debt was made up as follows:—

2½ per cent. Consols . . . . .	£522,668,361
2½ per cents. (1905) . . . . .	4,647,223
2½ per cents. . . . .	31,826,171

£559,141,755

The debts to the Banks of England and Ireland—£26,645,869—added to the total at the end of the previous column, will be seen to produce a grand total of £585,787,624. (2) These are annuities in which the payment is made for lives or terms of years, after which it ceases altogether, the return made being increased as the period of time is shortened; in other words, a portion of the principal is repaid with the interest in each year while the arrangement continues. In estimating the amount of the Debt, these

annuities are capitalised. (3) This now consists solely of Treasury Bills. To the figure (D) of £634,435,704 there are to be added certain other capital liabilities under the Imperial Defence, Barracks, Telegraph, Uganda, and other Acts, which increased the gross liabilities of the State on March 31st, '98, to £638,266,482, as compared with £644,909,847 a year previously; on the other hand there were assets, including the estimated market value of the Suez Canal shares (£24,435,000), amounting, March 31st, '98, to £25,241,799, as compared with £23,269,905 on March 31st, '97. The balances at the Banks of England and Ireland amounted on March 31st, '98, to £10,918,422, and twelve months previously to £9,867,134. The total charge for the service of the Debt was, in '16, £32,457,000; in '66-7, £26,074,871; '73-4, £26,706,726; '76-7, £27,992,834; '79-80, £28,762,874; '85-6, £23,449,678; '86-7, £27,958,023; '88-9, £26,224,594; '89-90, £25,226,760; '91-4, £25,200,000; '94-5 and since, £25,000,000. The most material change made for many years in regard to the service of the Debt was effected under the National Debt (Conversion) Act, '88, which provided for a reduction of interest from 3 per cent. to 2½, and ultimately to 2s. The saving to the country by the operation was estimated at about £1,400,000 a year from 1889 to 1903, and from 1903 about £2,800,000 per annum.

#### V. THE BUDGET.

Sir M. Hicks-Beach introduced his third Budget in the present administration on April 21st. He remarked that he had two years before attributed the extraordinary difference between the estimates of revenue of his predecessor and the actual yield of the revenue of the year to the entirely exceptional circumstances of the year which had just concluded; but he was wrong, and they were all wrong, for ever since there had been a consistent and steady advance in the activity of our trade, in the spending power of our masses, in the profits of the nation, and in the accumulation of wealth. He did not think anything could be gathered from the foreign trade statistics of last year which would justify a doubt of our ability to compete on fair terms with any foreign competitor. The total revenue raised by the State in the past financial year was £116,016,000, of which £106,614,000 was received into the Exchequer, his estimates being exceeded by as much as £3,570,000. The most remarkable feature in the revenue of the past year was the death duties, which had produced £1,407,000 more than his estimate. Four thousand more estates paid duty than in the previous year. Out of the estates which paid duty seventy-three exceeded the value of £250,000 each, and these were so valuable that they paid £1,000,000 more duty than the sixty-six above £250,000 which came under duty in the previous year. Out of those seventy-three, nine were the estates of millionaires, valued in all at £15,750,000, as against five valued at £5,500,000 in the previous year. The net expenditure of the year exceeded the Budget Estimate by £395,000, and amounted to £102,936,000; deducting this from the Exchequer receipts, he was left with a realised surplus of £3,678,000. Of that surplus, £2,550,000 had been appropriated for a separate fund for public buildings in the Metropolis, leaving £1,128,000 as Old Sinking Fund or to augment the Exchequer balances for the

coming year. Adding to the Exchequer expenditure the £9,402,000 which went to the Local Taxation Accounts, and £2,751,000 capital expenditure for Naval and Military Works, Barracks, Telephones, Purchase of Sites for Public Offices, and expenditure on the Uganda Railway, there was a total expenditure for which the State provided of £115,089,000, the largest expenditure that ever a Chancellor of the Exchequer had been called upon to provide in the twelve months; and yet it had not depleted the Treasury—in fact, the Exchequer balances had been increased during the year. Adding to the ordinary estimates of expenditure for '98-9, £365,000, the cost to the Exchequer of the Irish Local Government Bill in '98-9, and £9,178,000 which it was estimated would be paid to the Local Taxation Fund, there was a total expenditure of £116,007,000, of which he had to provide in his Budget £106,829,000, being no less than £5,038,000 more than his original Budget Estimate of '97-8.

#### Competition Armaments.

In discussing the increase which had been made during the past three years in the Army and Navy Estimates, the Chancellor of the Exchequer made a little comparison of our Empire with the empires of Germany, Russia, and France in regard to naval and military expenditure, and in regard to extent and population. We spend £26,000,000 on our Navy, £37,500,000 on our Army: total, £63,500,000. France spends £11,485,000 on her Navy, and £24,902,000 on her Army: total, £36,387,000. Germany spends £6,083,000 on her Navy, and £29,143,000 on her Army: total, £35,226,000. Russia spends £7,990,000 on her Navy, and £30,579,000 on her Army: total, £38,569,000; but we have in our Empire 365,000,000 of population scattered all over the globe—18,000,000 more than the three other empires he had named put together. Our territories extend over 11,250,000 sq. miles of the habitable globe, their territories all put together are only 13,753,000 miles. For every thousand square miles of empire we spend in defence £5664, France spends £9523, Germany £28,654, and Russia £4454. For every thousand inhabitants of the Empire we spend £174, France £399, Germany £560, Russia £298. Of course there were differences between the circumstances of our Empire and those of the three empires he had mentioned; but, allowing for them all, it could not be said that our expenditure, great as it is, is unnecessary in view of the great interests we have to defend, and the expenditure for the same purpose of other countries. Turning to his estimates of Revenue for the coming year, he set down his total at £108,615,000, and as on the other side he had estimated his expenditure at £106,829,000, he was left with a provisional surplus of £1,786,000; but he had to deduct something from this to meet a claim from Scotland for an increased payment for local purposes, due to the large grant made to Ireland under the Local Government Bill, and a vote for the West Indian colonies. He had not sufficient means to take 1d. off the Income Tax, and thought besides, that, in view of the great increase that had accrued during the last three years in receipts from direct taxation, the indirect taxpayer ought to be considered as well as the direct. He thought, however, that there was a class of income-tax payers entitled

to special consideration, and that was the class just above and just below the present limit of abatement. While he proposed to leave the law as to incomes up to £400 the same as before, he would make an abatement of £150 on incomes between £400 and £500, of £120 between £500 and £600, and of £70 between £600 and £700. With regard to the death duties, he proposed to relieve persons other than lineals who have to pay legacy or succession duty as well as estate duty by a remission of duty to the extent of 1 per cent.; and in cases of devolution by husband to wife, or wife to husband, of property settled on the marriage, to postpone payment of duty until the death of the survivor of the two married persons. In reference to Land Tax, he proposed to exempt all properties under £5 annual value which were not assessed before 1896.

He also proposed to deal more stringently with "grogging," meaning the extracting from a cask of spirits after the duty had been paid of the spirit which had been absorbed by the wood, and selling it without paying any duty. In regard to indirect taxation, the choice was between tea and tobacco, and deciding in favour of the latter, upon which the duty bore a proportion of something like 500 per cent. to the value of the article, he proposed to reduce the duty on unmanufactured tobacco by 6d. per lb., and on other classes of tobacco proportionately, with the exception of cigars. He also proposed a change as regards the question of moisture, reducing the legal limit from 35 per cent. to 30 per cent. The reduction of duty was to commence on May 16th. The following shows the financial effect of the above statement:—

#### Budget Estimate, '97-8.

	£
Revenue . . . . .	103,044,000
Expenditure . . . . .	102,541,000

Estimated Surplus (including allowances for charges for education in Scotland, technical education in Ireland, and entertainment of Jubilee guests) . . . . .	503,000
---	---------

#### Actual Figures, '97-8.

Exchequer Receipts . . . . .	106,614,000
„ Issues . . . . .	102,936,000
Realised Surplus . . . . .	3,678,000
Of this there went for—	
Public Buildings . . . . .	£2,550,000
To increase Exchequer Balances . . . . .	1,128,000
	3,678,000

#### Budget Estimate, '98-9.

Estimate of Revenue . . . . .	108,615,000
Original estimate of Expenditure . . . . .	106,829,000
Disposable Surplus . . . . .	1,786,000
Deduct	
Income Tax . . . . .	£100,000

	1,505,000

Leaving for Local Taxation Grant for Scotland, for the West Indies, and for small margin . . . . .	£281,000
--	----------

The final figures, as readjusted, are shown in Table C. (See SESSION, sect. 55, for Finance Act; sect. 63, Local Government (Ireland) Act; sect. 64, Local Taxation (Scotland) Act; sect. 82, Public Buildings Expenses Act, etc.

**Finland.** The Grand Duchy of Finland, now a Russian province, was ceded to Russia in 1809, and has a national Parliament of its own, consisting of four estates, nobles, clergy, burghers, and peasants. The Czar is the Grand Duke, but the assent of all four estates is necessary to any changes in the Constitution or for making new taxes. The Parliament has not been convoked of recent years. There is a Senate nominated by the Crown, presided over by the Governor-General, which sits at Helsingfors, and is the chief administrative body. A State Council, also nominated by the Crown, sits at St. Petersburg. Provincial affairs are principally managed by the Senate, military and foreign affairs by the Imperial officials. The chief products are timber, farm produce, etc. Area, 144,255 sq. miles; pop. about 2,500,000. See RUSSIA.—History, '98. An Imperial ukase was issued in '98 sanctioning a reform to bring the Finnish law of military service into conformity with that of the rest of the Empire. Special military privileges had up to this time been enjoyed by Finland, the Finnish regiments being required to perform active service only within the bounds of the Duchy. It was announced in October that an extraordinary session of the Diet was to be opened at Helsingfors in Jan. '99 to obtain its formal sanction to the scheme.

**Fire Brigade, Metropolitan.** See METROPOLITAN FIRE BRIGADE.

**Fisheries.** See SEA FISHERIES.

**Flax.** See TRADE, '98.

**Fletcher, A. E.**, was b. at Long Sutton in 1841, and was ed. at Owens College, Manchester, and Edinburgh University. After a short scholastic career he gave up teaching for journalism, and contributed to various periodicals till '72, when he became editor of the *Barrow-in-Furness Vulcan*. In '76 he accepted the post of London correspondent of the *Barrow Times*, wrote for the *Educational Times*, and acted as sub-editor of the *Pictorial World*. He became connected with the *Daily Chronicle* in '78, and succeeded to the editorship in '89. Under his direction the *Chronicle* advanced and improved greatly, but in '95 Mr. Fletcher resigned. He has since edited *The New Age*, and has lectured in many parts of the country. His editorship of the *Cyclopædia of Education* must also be noted. Address: 7, De Crespigny Park, Denmark Hill, S.E.

## FOOTBALL, '98.

**1. Association Contests.**—These matches continue to excite great interest every year, and the popularity of the game seems to increase. The International Matches resulted as follows:—England beat Wales. England has now won 16, Wales 2, drawn 2. England beat Scotland. England has now won 9, Scotland 13, drawn 6. England beat Ireland. England has now won 15, Ireland 1, drawn 1. Scotland beat Ireland. Scotland has now won 14, Ireland 0, drawn 1. Scotland beat Wales. Scotland has now won 20, Wales 0, drawn 3. Ireland beat Wales. Ireland has now won 5, Wales 9, drawn 3.

Cambridge beat Oxford. The Inter-Hospital Cup was won by the London Hospital. The Amateur Cup was won by Middlesbrough. Notts Forest won the English Cup after beating Derby County. The Scottish League beat the English League and the Irish League. The appended tables show the position and points obtained by the competing clubs in the League Matches for '98:—

### FIRST DIVISION.

	Plyd.	W.	D.	L.	Pts.
Sheffield United .....	30	17	8	5	42
Sunderland .....	30	16	5	9	37
Wolverhampton Wanderers .....	30	14	7	9	35

Lincoln City .....	30	6	5	19	17
Darwen .....	30	6	2	22	14
Loughborough .....	30	6	2	22	14

**2. Rugby Contests.**—The International Games resulted as follows: England v. Scotland drawn. England has now won 9, Scotland 8, drawn 9. England beat Wales. England has now won 11, Wales 4, drawn 1. Ireland beat England. Ireland has now won 5, England 16, drawn 1. Scotland beat Ireland. Scotland has now won 17, Ireland 2, drawn 2. Wales beat Ireland. Wales has now won 7, Ireland 5, drawn 1. There was no match between Scotland and Wales, the trouble of last year about the Gould affair not having been settled in time to allow of a game being played between these teams. Oxford beat Cambridge. South beat North. Guy's Hospital won the Inter-Hospital Cup. The County Championship was won by Northumberland.

### FOREIGN ARMIES.

The latest particulars relating to the military power of the countries of Europe, Abyssinia, Egypt, China, Japan, Mexico, the United States, and some other countries, will be found below.

**Abyssinia.**—Recent events have lent a good deal of interest to the forces at the disposal of Menelik. The organisation is feudal in character, and the constitution is by provinces, each governor or Ras having a standing force

as garrison and at call in case of war, and a considerable number of retainers not embodied. The garrison forces united constitute the new army of Menelik, and are estimated at 70,000 men. The central control is weak, and there is no organised division into the three arms, as to Europe; but the forces are readily grouped, the mounted men forming an irregular cavalry, and have great mobility. Practically every man has a sword and a rifle, but the firearms are extraordinarily varied, and the mounted troops also carry a javelin or spear. They do not exceed 5000 altogether. The guns are mostly adapted for mountain work, there being 53 modern and 30 old ones. Marksmanship is a weak point in the Abyssinian army. The unembodied retainers, who may be likened to a militia, number about 140,000 men.

**Austria-Hungary.**—The law of universal service was introduced in Dec. '68, and is codified by statutes of '89. The forces consist of the **Army proper**, the **Landwehr**, the **Ersatz Reserve**, and the **Landsturm**. The Regular Army requires an annual contingent of 101,000. Service is for three years with the colours and seven in the Active Reserve; ten years for those enrolled direct in the Ersatz (or supplementary) Reserve. Service in the Landwehr is for two years for those who have served their ten years in the senior service, and for twelve years for those who have been sent straight into the Landwehr for various reasons. The men who pass before the selecting boards number nearly 750,000, and the final contingent selected for the various branches of the service is 144,000. There is increased stringency in training. The Landwehr is called out for training in time of peace, and in war both Active Army and Landwehr men are drafted from the Ersatz Reserve. After the Landwehr service, the soldier is sent for five years to the 1st Landsturm, and for a further period of five years to the 2nd Landsturm. For all who do not serve in the first or second line forces, service with the Landsturm is obligatory from the nineteenth to the end of the forty-second year. The Mannlicher is the Infantry arm. There are 15 **Army Corps**, comprising in all 31 **Infantry divisions** of the Active Army; and it is the intention to increase their strength on mobilisation by allotting a Landwehr division to each. Normally there are 462 battalions (102 regiments of the line, 4 of Tyrolese Rifles and 4 Bosnian, and 26 battalions regular Rifles), 252 squadrons (15 regiments of Dragoons, 11 of Uhlans, and 16 of Hussars), and 251 batteries, exclusive of 18 battalions of Fortress Artillery and 15 of Pioneers. The **Artillery** is formed in 14 brigades, and the reorganisation gives the Field Artillery 14 corps and 42 divisional regiments, with a mountain battery division, and increases the field guns to 1792, and the Horse Artillery guns to 96, while the mountain guns will number 120, with 16 smaller pieces; 60 Ersatz batteries will also be organised. Several new batteries have been formed. The Austrian and Hungarian cavalry have won the admiration of European soldiers, and the empire unquestionably possesses a thoroughly practical mounted army fit for service at a moment's notice. The total strength of the **Austro-Hungarian Army**, on a peace footing, is 334,000 men and 25,000 officers (divided between the Active Army, the Cisleithan Landwehr, and the Honved forces; while, mobilised

on a war footing, it is estimated at 2,500,000 officers and men. The infantry number 187,000, the cavalry 47,000, and the field and fortress artillery 38,000. The year '98 has seen some additions to the forces, and a continued reorganisation. The **Honved** (national Hungarian army) is subject in war time only to the Commander-in-Chief, and in peace time only to the Royal Hungarian Jurisdiction. The infantry was reorganised in '96, and there are now 28 regiments, some of 3 and some of 4 battalions, the first of these having 73 officers and 661 men, the last 93 officers and 872 men. Training, command and equipment are as in the Regular Army. The Honved has also in peace time 10 Hussar regiments, having each a regimental staff, 2 divisions (*en cadre*) and 1 Ersatz reserve. The officers are trained in the Honved Ludovica Academy at Buda-Pesth.

**Belgium.**—The long-deferred reorganisation has not yet been accepted. The army is maintained by the embodiment of 13,300 men yearly (substitution being allowed), and the period of liability is thirteen years (two with the colours), but of these at least two-thirds are as a rule allowed. The composition is as follows: **Cavalry**—2 regiments of Chasseurs, 2 of Guides, and 4 of Lancers. Each regiment consists of 4 squadrons Active and 1 Reserve. To the above have to be added the Gendarmerie (over 1700 men). **Artillery**—4 field and 4 fortress regiments (in all 204 guns). **Engineers**—1 regiment of 3 battalions. **Infantry**—14 regiments of the line, of 4 battalions of 4 companies each, 3 Active and 1 Reserve battalion; 1 regiment of Grenadiers, similarly organised; 1 regiment of Carabiniers of 6 battalions (4 active and 2 reserve), and 3 regiments of *chasseurs-à-pied*. About 40,000 men are serving with the colours, of whom 6000 are cavalry. The forts of the Meuse are now completed. The great objection raised against them by nearly all military men is that the present army organisation of Belgium cannot furnish the men necessary for their defence. They say the mobilisation would produce only a little above 100,000 men, and that, therefore, sufficient garrisons for Antwerp and the Meuse forts could not be provided. They estimate the number of men necessary for an efficient defence of Belgium at 185,000 men; and urge that steps shall be taken to make this force available. On mobilisation 4 army divisions are to be formed, each of 4 regiments, and a carabineer battalion, with 2 squadrons, 8 field batteries, 1 company of engineers, with train and auxiliary services. The infantry has to be expanded from its existing strength of 27,738 men by the addition of 80,500, drawn from the reserve classes, while the cavalry receives 3463 men, the artillery 18,035 men, and other branches in proportion. A total strength of about 3515 officers and 140,000 men is anticipated.

**Brazil.**—Gradual progress is being made in the reorganisation of the army, but much remains yet to be done. The peace effective of the forces has been set down at 4 marshals, 8 generals of division, 17 generals of brigade, 66 colonels, 79 lieutenant-colonels, 142 majors, 438 captains, 490 lieutenants, and 666 second lieutenants, together with 24,877 non-commissioned officers and men. In case of war or of extraordinary circumstances arising, this number of men can be doubled. During peace time recruiting is carried on partly by voluntary enlistment and partly by ballot,

each of the states and federal districts having to supply annually a certain quota proportionally to its population. The peace organization of the Army consists of 40 battalions of infantry, 16 regiments of cavalry, 1 transport corps, 5 regiments of field artillery, 5 batteries of position artillery, and 2 battalions of Engineers.

**Bulgaria and Eastern Roumelia.**—The army was reorganised on Jan. 1st (o.s.), '95. There are 6 divisional districts—Sofia, Philippopolis, Slivno, Schumla, Rustchuk, and Widin. The Infantry regiments are 24 in number, each with 2 battalions, and a company of train, and there are 24 skeleton reserve regiments attached. There is one cavalry division of 4 regiments. The artillery is now divided into 6 regiments. The peace strength is 2114 officers and 37,204 non-commissioned officers and men. Upon mobilisation the army would number 208,966 men, 38,788 horses, and 432 guns. The reserve army has 6 divisions of 4 regiments, 2 squadrons of cavalry, 6 artillery batteries, and 1 engineer company, nearly all now attached to the active forces. The purpose is to give better opportunity for training, and to establish a sounder preparation for war. The recruits are to remain from their twentieth to thirtieth year with the first line, and from their thirtieth to thirty-seventh with the second. A third battalion of Fortress Artillery has been established at Schumla.

**Chili.**—The army does not exceed 6000 men, in accordance with the law of Feb. 2nd, '92, and the formations are: 7 regiments of infantry, 4 of cavalry, 3 of artillery, and a corps of engineers. The National Guard numbers over 50,000 men.

**China.**—According to the most credible accounts very little improvement has been made in the Chinese army since the war with Japan, which revealed its worthless character. It was never easy to ascertain facts concerning the Chinese forces. The *élite* of the army was composed of the Shen-Che-Ying or Black Flag troops, and the Pa-Ki or Eight Banner men. The former were said to number 50,000 men with the colours. These men more nearly approach our European standard in drill and arms than any other troops in the Imperial service. The nucleus of the Black Flags was constituted of the veterans of the Gordon's army which suppressed the Taiping rebellion, and the troops had been trained largely by European officers, who had spoken highly of their steadiness and efficiency in drill. Next in importance to the Black Flags came the Banner men and the army of Manchuria, composed of soldier-like troops, but some of them still armed with bow-and-arrows, or with the old gingall. The Banner men were estimated at something like 300,000. They consisted largely of Manchus, Mongols and Chinese or Han-chun. The army of Manchuria was raised from the Banner men of Fengtien, Kirin, and Hei-lung-chiang. These were all fighting men, perhaps 180,000 in all; but fully 100,000 had received no European training. Outside the ranks of the Black Flags and Banner men and other Manchurian forces, of whom perhaps 175,000 possessed various modern arms, and were drilled somewhat upon the European plan, was the vast array of the Luh-ying or Green Flags, with a paper strength of 650,000 men, scattered through

the empire, under the control of the local viceroys and governors. This heterogeneous force possessed little military value, and proved of no real service. But the reverses of the Chinese are not unlikely to give something of new character to their military defences, and the army will probably yet be stripped of some of its archaic character; though nothing can avail if the corruption and nepotism of the official classes be allowed to prevail. If it be possible to bring picked men under the training of European officers, as is proposed ('98), they would no doubt become good soldiers.

**Denmark.**—Service is obligatory on all able-bodied men who have reached the age of 22. Terms of service, eight years with the colours and eight in the extra reserve. A reorganisation of the Danish army was introduced in '94, and the late War Minister, General Bahnsen, calculated that the contingent brought under training 7947 men yearly. The service in the various branches of the army is 16 years, but, reckoning 14 years only, and allowing for waste, the General concludes that by the year 1910 Denmark will be able to mobilise 83,000 men, of whom 58,500 will be infantry, 5000 cavalry, 6800 field artillery, and 8600 fortress artillery. The really effective force would be about 70,000.

**Egypt.**—In the operations in the Soudan the Egyptian forces have displayed most admirable soldier-like qualities under British officers. They are a fine example of what our officers can make out of the soldiery of native races. After Tel-el-Kebir and the victories of the Mahdi practically no army remained; but now, after sixteen years, the Egyptian army, in physique, training, and soldierly qualities, compares well even with the armies of Europe. Under strong leadership, and the command of British officers, it has lately shown what it is made of in the victories of the Atbara and Omdurman. Until the last campaign, when the proportion was higher, the normal number of white officers has been three to an Egyptian and four to a Soudanese battalion. When first raised, in '83, after the campaign of the previous year, the army consisted of about 6000 men, but was gradually increased until the existing establishment was reached. All the inhabitants are liable for service—six years in the army, five in the police, and four in the reserve, and there are always about 150,000 young men on the rolls for conscription; but the burden is very light, and the men are all selected. The army now consists of 18 battalions of infantry, 10 squadrons of cavalry, 1 horse and 4 field batteries (each with a British officer in command), and Maxims, a camel corps of 8 companies, and non-combatant services. The cavalry are recruited from the fellaheen of the Delta, and the training was uphill work. The infantry battalions are drawn mostly from the fellaheen, but 6 are Soudanese blacks. The first are filled by conscription, and have about 800 men each, mostly fellaheen, in 6 companies. The interior economy and drill of the recruits is excellent, and the musketry good. The arm is the Martini-Henry. In the Soudanese battalions the service is voluntary, the pay higher, and the service practically for life. This force was raised largely from the Khalifa's Bazingers or black riflemen, but men from Lower Egypt have been enlisted. The surrender of many of the Soudanese tribesmen will open up fields for recruiting this force which have long been closed. The artillery is the force that shows

the impress most markedly of the European training. The Egyptian is an excellent gunner, and takes to the work with enthusiasm. The horse battery has Syrian horses and light Krupp guns. The field batteries have Krupp mountain guns carried by mules, with a second line of camels. There is also a battalion of garrison artillery, organised as in our service. The effective strength of the Egyptian forces is stated to be about 18,000. More than 140 British officers were employed in the Egyptian army during the last campaign. The command is vested in a British officer with the title of Sirdar.

**France.**—A gradual reorganisation of the French army is at the present time going forward in virtue of the law of March '97. In each subdivisional infantry regiment a fourth battalion is to be formed, making 145 new battalions in all; but these are to be organised progressively, as the means become available. In the autumn of '97 12 battalions were added in the 6th and 15th corps, and 40 others were provided for by the estimates of '98. When the measure has been fully carried out the French infantry will have an increased peace establishment of 50,000 men. The estimated strength for '98 is 28,409 officers and 561,141 men of the Active Army, 724 officers and 25,121 men of the gendarmerie, and 142,038 horses. A considerable increase of officers is due to the new formations. There are various opinions as to the value of the French army, but the military correspondent of the *Times*, after witnessing the manœuvres of '98, expressed himself in enthusiastic terms. The infantry marched excellently, the cavalry did splendid work, and their charges were magnificent. The conditions of service have been modified three times during about twenty years. The law of July 15th, '89, practically abolished all exemptions, and extended the period of service to twenty-five years, thus adding five years; but reduced the time to be served with the colours to three years. The law of '92 added three years to the time to be spent in the Active Reserve, and correspondingly reduced the period to be passed in the Territorial Reserve. In future, every Frenchman should serve three years in the Active Army, ten years in the Reserve of the Active Army, six years in the Territorial Army, and six years in the Reserve of the Territorial Army. A *loi d'encadrement*, having for its purpose to provide for the embodiment of the Reserve Forces upon mobilisation, has not fully answered expectations. There is now constituted in every infantry regiment a *cadre complémentaire*, the purpose being to consolidate the Reserves, and the officers of this *cadre* are partly sufficing for the new fourth battalions. For administration, training, and mobilisation, the units of the Territorial Army, as well as the Active Reserve, are attached to the corresponding units of the Active Army. The Army is constituted as follows: 636 battalions of Infantry, including 30 battalions of Chasseurs, 10 Foreign, 16 Zouaves, 16 Algerian Tirailleurs, and 5 African Light Infantry. The Cavalry form 30 regiments of Dragoons, 21 of Chasseurs, 13 of Hussars, 13 of Cuirassiers, 6 of Chasseurs d'Afrique (all of 5 squadrons), and 4 of Spahis, variously constituted, numbering in all 446 squadrons. The organisation of the Artillery is as follows: Field batteries, 429; Horse batteries, 52; Moun-

tain batteries, 27; Foot (or Fortress) batteries, 112: in all, 620. The Engineers (including Railway troops) number 5 regiments (12 battalions and 3 Train companies); and the Military Train has 20 squadrons (comprising 72 companies). The Reserve Troops are: 145 Infantry regiments, 30 Chasseur battalions, 38 Cavalry regiments formed with the Line and Light Cavalry regiments of the Corps Cavalry brigades, 41 other squadrons formed with the Divisional Cavalry regiments, and 216 batteries of Field Artillery, 12 to each Artillery brigade. All these are attached to the Active Forces, charged with their administration, mobilisation and command. The Territorial Forces linked with each of the 18 army corps are 8 Infantry regiments (9 with the 5th corps), 4 to 8 squadrons of Cavalry, 1 regiment of Artillery, 1 Engineer battalion, and 1 company of Train; but there are special dispositions in regard to some army corps, and a large number of battalions and independent companies are employed in the Customs and Forest service. In regard to the localisation of the troops, it should be noted that a large force is quartered in the region of the 6th corps on the German frontier, where the command included 6 divisions of Infantry and 11 battalions of Chasseurs, 110 squadrons, 79 various batteries, 1 Engineer battalion, and 1 squadron of Military Train. The 6th corps has been divided into two ('98), and a new corps thus created. It is in this region that the new battalions are to be formed by constituting the *cadres* in great part from the regiments themselves. The Reserve of the Active Army includes about 1,320,000 men, and the Territorial Army and its Reserve about 2,270,000. It has been estimated that the French Army, with its various Reserve and Territorial Forces, includes 4,670,000 trained men—on a war footing, and that 4,000,000 untrained might be embodied.

**Germany.**—The reorganisation of the German army, which was to take effect from April 1st, '97, has now been completed as planned. By the Army Act of '93, a two years' colour service was introduced, and the enrolled peace establishment from Oct. 1st, '93, until March 31st, '99, was fixed at 479,229 men. The Infantry consisted of 538 battalions and 173 half-battalions, the Cavalry of 465 squadrons, the Field Artillery of 494 batteries, the Foot Artillery of 37 battalions, the Pioneers of 23 battalions, the Railway troops of 7 battalions, the Train of 21 battalions. The main effect of the Act was to enable 70,000 men more than formerly to be called to the colours every year, and in this manner to increase the reserves of trained men. As a consequence of the new dispositions, in 133 Prussian Infantry regiments the fourth half-battalions were constituted. Like dispositions affected 20 Bavarian, 8 Wurtemberg, and 12 Saxon regiments. The Field Artillery acquired 16 new divisions of 3 batteries each. The fourth half-battalions, which have been alluded to, were intended to act as auxiliary and training depôts for the senior battalions; but the system was cumbrous, and resulted in over 15,000 men being passed into the reserve yearly, imperfectly trained according to the German standard. Accordingly, by the further reorganisation, these skeleton formations have been linked and strengthened, thus creating full battalions, united as regiments, the purpose being to add a brigade to each army corps. The effect of the new disposition is to furnish the army with 626 battalions of

infantry, instead of 538 as prescribed in '93. The number of regiments has risen from 173 to 215—33 Prussian, 2 Würtemberg, 3 Saxon, and 2 Bavarian regiments being formed out of the late fourth half-battalions. The distribution and association of the Army are, upon a territorial system, described in the ed. of '96. The service in the standing army is of six years, two of these with the colours in the infantry and three in the cavalry and horse artillery, and the rest in the reserve. After quitting the reserve of the Active Army the soldier passes five years in the Landwehr and seven in its reserve. The recruiting service for the Guard, consisting of the tallest and finest-looking men, is carried out by a commission consisting of officers specially nominated for the purpose. Under the system of recruiting there are always more men than are necessary to keep up the army strength, the surplus constituting the Ersatz Reserve. The peace strength of the army is 18,044 officers and 526,079 non-commissioned officers and men, divided thus by services: infantry, 12,208 officers, 356,000 non-commissioned officers and men; cavalry, 2356 and 64,496; field artillery, 2,524 and 56,491; foot artillery 810 and 21,650; pioneers and railway troops, 738 and 18,882; train, 308 and 7360. The strength upon mobilisation is estimated at nearly 4,000,000 trained men. The general staff by which the work of the Army is prepared for in peace and moulded in war is at once a close and yet flexible organisation, which permeates the whole structure of the army, consisting for Prussia of about 200 officers. Nearly 100 of these are detached on service with the staffs of corps or divisions, while the remainder constitute the great general staff in Berlin. There is constant interchange between regimental work and staff work, and between the latter locally and with the headquarters' staff in Berlin. Scarcely any regimental officer rises high in his corps without having been called to staff service, so that the ideas of the staff are based upon practical experience, and react upon the whole army, to which they come as a kind of tradition of duty and policy, sharpening and directing the life and work of the army. Recently the inspection of the cavalry and artillery has been improved. A quick-firing field gun has been provided for the artillery, and gave excellent results in the manœuvres of '98.

**Greece.**—During the war with Turkey the Greek army gave proof of the ineptitude of its officers, the want of discipline in its men, and the extreme weakness of its organisation. Service is for 2 years with the colours and 8 in the reserve, 8 in the National Guard and 10 in its reserve; the cavalry, however, spending 10 years in the National Guard and 8 in its reserve. The **Standing Army** consists of ten Infantry regiments, eight battalions of light infantry and rifles, three Cavalry regiments, and three regiments of Field Artillery. Two battalions go to a regiment with a *cadre* battalion, and four companies to a battalion. The Cavalry regiments are in four squadrons. The Artillery is divided into eleven Field and nine Mountain batteries, with 120 guns. The Engineer corps consists of a double battalion regiment, exclusive of the Survey, Sanitary, and Intendance companies. The *Gendarmerie* consists of sixteen divisions, and the men are borne upon the strength of the line. The peace strength of the army is 1,880 officers and

23,453 men, with 3,294 horses and mules. As a matter of fact these numbers are never attained under ordinary circumstances, the number with the colours varying from 16,000 to 18,000. There are three general commands. The total war strength is 82,000 men, and 114 guns. Including the territorial army, and its reserve, there are said to be some 200,000 men available, but the organisation is very defective. The Evzonoi highlanders are by far the best troops.

**Italy.**—A gradual reorganisation of the Italian army has long been progressing. Retrenchment some time ago became imperative, and an economical reorganisation was authorised by decrees promulgated in Dec. '94, having, in anticipation, the force of law. The economy was estimated at something like 7,500,000 lire. The general staff has been reduced, the inspectorate of Bersaglieri has been suppressed, the military districts have given place to simple recruiting districts, and the work of constituting and organising the Mobile and Territorial Militia has been thrown upon the Active Army. The organisation of '94 was modified by a law passed in June '97, laying down the principle to be followed, the details being left to be determined by decrees having the force of law. The Infantry have 48 line brigades, including 96 regiments, each of three battalions, and a depot; 12 regiments of Bersaglieri similarly constituted; 7 Alpine regiments (175 companies and a depot). These troops are assigned to 88 military districts, with disciplinary companies, etc. In the Cavalry the 24 regiments (each 6 squadrons) are in 9 brigades, with 4 remount depôts. The Artillery is formed in 24 regiments, and comprises 146 batteries and 36 companies of train, in addition to a horse regiment of 6 batteries, a mountain regiment of 15 batteries, and 21 fortress brigades. The Engineers have 5 regiments of sappers and 10 companies of train, with a Railway Brigade of 6 companies. The mobilisation and training service of the army have also been modified. There are 12 army corps. The standing army consists of 14,397 officers and 207,630 men, with 366 horsed guns, and the mobile militia of 5,298 officers and 207,630 men, with 366 guns, composing together the field army, the Sardinian militia and territorial army being in addition. Considerably more than half the last-named class have received no training at all. Liability to service, which is universal, commences at the completion of the twentieth year, and continues up to the completion of the thirty-ninth. The men are enrolled by lot in three classes. Those of the first class, if drafted to the Carabineers, serve five years with the colours and four with "unlimited leave"; if to the Cavalry, four years and five years respectively; and all ten years in the Territorial Militia with "unlimited leave." If drafted to other corps, the service is two or three years with the colours and six with "unlimited leave," four or three years in the Mobile Militia, and seven years in the Territorial Militia. The men of the second class are enrolled for eight years in the Standing Army with "unlimited leave," and four and seven years in the Militias; those of the third category serve their nineteen years wholly in the Territorial Militia. The resources of Italy in men are given thus: Permanent army with the colours, 216,723; on "unlimited leave," 546,771; mobile militia,

478,348; territorial militia, 2,083,924; total, 3,325,766. The available officers are 38,617, giving a number very inadequate for the untrained territorial forces.

**Japan.**—The army is composed of excellent material, and is organised, armed, and drilled wholly upon the European system, under officers who have received their training in Germany and other European countries. In all respects the highest degree of mechanical efficiency has been maintained. The men are armed with the newest weapons of precision, turned out at a smaller Japanese Woolwich. Conscription on the European model was introduced in '74. At the close of the war the army consisted of six divisions, and the Imperial Guard, with a peace footing of 70,000 in round numbers, and a war footing of 268,000 (exclusive of gendarmerie and Ezo Militia). The Government proposal is to raise the number of divisions to twelve, exclusive of the Guards, so that the peace footing should be 145,000, and the war footing 520,000. It is estimated that such a force can be maintained at an outlay of 26,167,043 yen, or £2,800,000 approximately. To meet the outlay upon the Army and Navy the Chinese indemnity has been largely depended upon; but difficulties have arisen, and the Government has resorted to a Public Undertakings Loan of 135,000,000 yen, spread over seven years. The existing military regulations were laid down by edict of '83. Every male inhabitant is subject to military service between 17 and 40 years of age in (a) the Standing Army, three years; (b) the Standing Army Reserve, four years; (c) the Territorial Army, five years; while the "National Army" (which corresponds to the European Landsturm) embodies all eligible men between 17 and 40 who have not been enrolled, or have completed their service, in the other branches of the service. The Regular or Field Army is formed of 28 regiments of Infantry (each 3 battalions of 4 companies, giving nearly 48,000 men); 7 regiments of Cavalry (each 3 squadrons), about 3000 horse; 6 regiments of Field Artillery (each 6 batteries); 4 regiments of Coast Artillery; 6 battalions of Pioneers; and 7 battalions of Military Train. In addition to these is the Yeddo Brigade, comprising 4 battalions of Infantry, besides Cavalry, Artillery, and Pioneers. The Army of the Second Line (garrisons and reserves) consists of 36 battalions of Infantry, besides Cavalry, Pioneers, and Depot Troops. The National Army is organised in 2 brigades (each of 2 regiments), and a regiment each of Cavalry, Field Artillery, Pioneers, and Train. The Military College and Academy train accomplished officers of great intelligence. They were pronounced by General Grant to be amongst the foremost of the kind in the world. The barracks and gymnasias are of the best type, and every care is paid to the physical development of the men.

**Mexico.**—A reorganisation of the Mexican army began in '97, and provides for the following standing army: 28 infantry battalions of 4 companies, 12 cadre battalions of 2 companies, 2 regional infantry battalions of 2 companies, 7 regional infantry companies, 1 battalion of pioneers of 4 companies, 1 battalion of invalids, 14 cavalry regiments of 4 squadrons, 8 cavalry cadre regiments of 2 squadrons, 4 four-battery battalions of field artillery, 1 machine-gun battalion, and some auxiliary formations. The

peace strength is 2432 officers, 6547 non-commissioned officers, and 25,090 men, with 13,059 horses and mules, and the war strength 3600 officers and 144,500 of other ranks. The Infantry is armed with the Remington rifle. Guns are being manufactured at the New National Gun Foundry. The horses ridden by the Cavalry are small, but exceedingly hardy. Mules are mostly employed for draught purposes. Recruiting is chiefly among full-blooded Indians, who are very brave and easily amenable to discipline. As soldiers they are excellent marchers, and are second to no other troops in the world on this score, and in frugality and contentment. The Military Academy is at Chapultepec, near the city of Mexico.

**Netherlands.**—There are three military districts, but the forces are organised for the defence of the "Amsterdam position." Holland has no "Standing Army," but a cadre of officers and non-commissioned officers (establishment about 2200) for the training of an annual contingent of some 11,000 Schüttereij or Militia. There is a force of Volunteers, with an establishment of about 10,000, which is rarely complete. The service is from six to eight years. All able-bodied males are liable to be drawn for the Militia, but about 11,000 only are embodied, the greater part of the force being on indefinite furlough. The combined establishment of Volunteers and Militia is about 14,000 men. The combatant establishment of the field army is 726 officers, 34,897 men, 3258 horses and 120 guns; and of the garrison troops, 362 officers and 16,744 men. The Army of the Dutch East Indies numbers about 35,000 officers and men.

**Portugal.**—Upon a peace footing the army is composed of 24 line and 12 chasseur infantry regiments, 10 cavalry regiments, 3 regiments of artillery, each of 10 four-gun batteries, with 2 reserve *cadre* four-gun batteries, 1 six-gun mountain battery, 2 fortress regiments, and 1 regiment of engineers. The strength upon the estimates of July 1st, '98, is 15,000, with 1000 attached for the customs service. A reorganisation of the forces is under discussion. A new law was introduced in Sept. '95, by which the service is three years with the colours, five years with the first reserve and four with the second. There is in addition a Colonial Army of 9000. The rules of exemption are most liberal, a sum of money paid to the Government being accepted as an equivalent. There are 4 military districts—Lisbon, Vizeu, Oporto, and Evora, with garrisons at the Azores and Madeira.

**Roumania.**—Four army corps, the independent division in the Dobrudscha, and an independent cavalry division, together with Dorobanzen (infantry) and 8866 Kalaraschen (cavalry) not permanently embodied. An independent cavalry division composed of 6 permanent regiments (Roschieri) has been formed. A new cavalry regiment (2 permanent and 2 half-permanent squadrons) has been attached to the Dobrudscha forces, and the remainder (10) of the Kalaraschi regiments are assigned to the 4 army corps. The peace strength is 3,089 officers, 44,400 non-commissioned officers and men, 366 field guns and 9,000 horses, with 68,000 men and 9,100 horses of the territorial class. The total war strength is 3,040 officers, 167,316 men, 52,604 horses and 384 guns, or a fighting strength of over 140,000 men.

**Russia.**—We have to note, as the work of '98, a very important change in the creation of two new army corps, the 20th and 21st, in the military districts of Wilna and Kiev. Some of the reserve formations are being brought up to the first line, so that the constitution of other army corps is foreseen. A third independent cavalry brigade formed of 2 new regiments has also been added, and the artillery has been increased by the addition of about 70 batteries. The vast organisation of the Russian army is not easy to describe. The peace strength is given thus:

	Europe and the Caucasus.	Elsewhere.
Infantry . . .	497,000 men.	66,000 men.
Cavalry . . .	109,000 "	10,000 "
Artillery . . .	107,000 "	8,000 "
Engineers . . .	21,000 "	3,000 "
Administration . . .	34,000 "	5,000 "
Total . . .	768,000 "	92,000 "

Vast bodies of troops are massed on the western frontier, facing Germany and Austria; there is a great army in the Caucasus; and the strengthening of the troops in Asia, especially in the district of the Amur, goes on progressively. The Russian field force in Eastern Siberia, upon a war footing, consists of: Cavalry, 38 squadrons; Artillery, 17 batteries; Infantry, 37 battalions. There are in addition 5 battalions of Garrison Infantry, and 7 companies of Garrison Artillery, together with Engineers and a Submarine Mining Corps, for the local defence of Vladivostok. Exclusive of an Infantry battalion and a company of garrison Artillery quartered at Nikolaviesk at the mouth of the Amur, the Russian forces are distributed in two main groups east and west of the Manchurian frontier. In the neighbourhood of Vladivostok, on the adjacent frontier, and at Grafskaya, Iman, and Khabarovka on the railway there are about: Cavalry, 10 squadrons; Artillery, 13 batteries (including 2 6-in. mortar batteries); Infantry, 18 battalions. A Verkhní Udinsk in the extreme west, an echeloned along the Shilka river, there are Cavalry, 18 squadrons; Artillery, 2 batteries Infantry, 17 battalions. Along the northern frontier, at the important port of Blagovestchensk, on the Amur, and at Ekaterino-Nikolskaya there are 2 battalions, 6 squadrons, and 3 squadrons respectively. The headquarters of the Commander-in-Chief of the Ussuri force are at Nikolski on the railway, a short distance to the north of Vladivostok. The Military Budget for '98 amounted to 288,808,664 roubles, being an increase of 4,428,670 roubles, compared with 288,521,969 roubles in '96. The law of compulsory service dates from '74. For Finland compulsory service came into force on Jan. 1st, '81. The period of liability to personal service lasts from the twenty-first to the forty-third year of age. Those who join the Standing Army spend five years with the colours (four in the Infantry), thirteen in the Reserve, and the remainder in the Opoltschenie, or Militia. In some instances, however, the War Minister has power to retain men for a longer period with the colours; whilst, on the other hand, this period is shortened by one, two, three, or four years for those possessing a superior education. The Opoltschenie, which has been developed from a simple militia into a first reserve forma-

tion, now embraces two different classes: (1) Men between twenty-one and forty-three years of age, who have never served; (2) men who have completed five years' service with the colours and thirteen years in the Reserve. The ages of the men vary between thirty-nine and forty-three years. The organisation of the Cossacks is on a different footing. Every Cossack becomes liable to serve as soon as he has completed his eighteenth year. For the first three years, which are looked on as "preparatory," his service is, however, purely local; but for the next twelve years he is considered as belonging to the "front" category. This category consists of three bans, the first of which is formed of men actually serving, and the two others of men who have been granted unlimited leave. The last five years are spent in the Reserve category. There is, however, a still further category, for which no limit of age is fixed: this comprises all able-bodied Cossacks not otherwise classified. The Cossacks have to supply and maintain their own horses, besides providing their own clothing and equipment. In the Russian Empire some 950,000 men annually attain the age for joining the Army, and of these approximately 265,000 are entered, in addition to some 2500 Caucasians. Seventy per cent. of the men so entered are illiterates. About 5000 enlist annually as volunteers, and 16,000 join the Cossacks. The war strength of the Russian forces consists of about 2,500,000 men. These form the Active Army of all classes. To these figures must be added the available Reserve, estimated at 1,064,000; Frontier battalions, 41,000; Cossacks, 142,000. There are besides these the Territorial Reserve, some 2,000,000 men, and the National Militia, 1,200,000, which could be employed in case of emergency. It is expected that under new organisation the Opoltschenie, or Militia, in time of war will form 40 Infantry divisions, 640 battalions; 20 regiments of Cavalry, 80 squadrons; 80 batteries of Artillery, and 20 battalions of Sappers; but owing to the vast distances to be covered, and the want of railway accommodation, the mobilisation of this great force would be neither easy nor rapid. In regard to the embodiment of the reserve force in the event of war great advances have been made by the establishment of brigade commands and the organisation of reserve brigades.

**Servia.**—The permanent army of Servia is made up of the following troops: Infantry, 15 regiments of 4 battalions; Cavalry, 4 regiments with a total strength of 11 squadrons; Artillery, 5 regiments comprising 10 groups, with 24 mounted batteries and 1 independent horse battery; Fortress Artillery, 1 regiment of 2 battalions, forming 8 batteries; Mountain Artillery, 1 regiment with 5 batteries; Engineers, 2½ battalions or 10 companies; Train, 5 squadrons; and Hospital staff, 5 companies. To these must be added the gendarmerie—1500 men—and 700 of the Customs guard. The effective of the army is given as 22,170 officers, non-commissioned officers, and soldiers, with 184 guns, but the real effective is from 15 to 20 per cent. less. The total strength of the Army upon a war footing is said to be 337,323.

**Spain.**—In the late war the Spanish soldiery, both officers and men, showed the best military qualities, but they were in a position that made defeat inevitable. In the year '97 alone they

lost by sickness 32,534, and since that time, by fever and loss in battle (the last the least serious), they have suffered terribly. There have been as many as 200,000 troops in Cuba, 30,800 in the Philippines, and 600 at Porto Rico, bringing up the total number under arms, with the troops at home, to 360,000 men. There are now eight **army corps**, one having been added in '96, commanded either by captain-generals or by lieutenant-generals. The headquarters of the several corps are respectively: 1st, Madrid; 2nd, Seville; 3rd, Valencia; 4th, Barcelona; 5th, Saragossa; 6th, Burgos; 7th, Valladolid; 8th, Corunna. The following is the constitution, by units, of the army: **Infantry**, 56 regiments; 20 battalions of Chasseurs; 4 African regiments; 1 disciplinary battalion at Melilla (500 men); 2 regiments in the Balearic Isles; various formations in the Canaries, recruiting *cadres*, etc. The **Cavalry** (28 regiments, exclusive of colonial forces). **Artillery**, 13 Field, 1 Horse and 3 Mountain regiments (all with four 6-gun batteries), 10 Fortress battalions, 1 Central Gunillery School, 1 Central Remount Committee, 4 companies of Artificers, and 7 Reserve Depôts. The **Engineer Corps** consists of 4 regiments of Sappers and Miners, 1 Pontoon regiment, 1 Telegraph battalion, 1 Railway battalion, 1 Topographical brigade, 1 division of Artificers, and 7 Reserve Depôts, with a separate company of Sappers and Miners for the Balearic Islands. Each of the regiments consists of two battalions, one of which, however, is only organised as a *cadre* in peace time. The Pontoon regiment and the Railway battalion each have four companies, two of which, however, are reserve companies. The proportion of superior officers in the Spanish army is very high, while the subalterns are few. For recruiting purposes the Peninsula is divided into 61 districts, each active Infantry regiment and half-brigade of Chasseurs having a special district. On leaving the colours the men enter the corresponding reserve regimental district.

**Sweden.**—The army has 104 battalions of Infantry, 24 squadrons of Cavalry, 12 companies of Guides, and 50 batteries of Artillery. The obligation of service is twenty years—eight in the first line, four in the second, and eight in the Landsturm, which is not yet organised. The permanent establishment consists of skeleton forces, and the men called out for service are embodied for training periods each year, 90 days continuously in the Cavalry and Artillery, and in the other arms 68 days in the first year and 22 in the second. The peace strength is 1905 officers, 36,265 men, and 6742 horses, largely increased at training times. This estimate includes the Gothland forces, which have a separate establishment. The war strength is 52,300 men, but the embodying of all the classes would give 100,000. A large sum of money is proposed to be spent upon the defences of Stockholm, Carlskrona, Upper Norrland, and Gothenburg.

**Switzerland.**—The Swiss army is a federal organisation, composed of excellent material, and maintained in a state of efficiency. The principle is that of a militia, the liability to serve being twelve years in the Active Army, or Elite, twelve in the Landwehr, and six in the Landsturm. During the twelve years in the Elite the aggregate service is 141 days in the Infantry, 146 in the Engineers, 160 in the Cavalry, and 163 in the Artillery. The uni-

fication of the army has been agitated since '48, and the movement to bring this about took firmer character after the war of '70. In June '95 a large project, tending to practical unification, was approved by the Federal Council, but afterwards rejected by the referendum, the Swiss people thus pronouncing against further centralisation. In '98 the effective of the forces was: Elite, 144,822, being 3468 more than in '97; Landwehr, 70,000; Landsturm, about 300,000, of whom about 60,000 are trained. The recruits number 18,680, being a considerable increase upon previous levies. A fundamental law forbids the maintenance of a standing army. Large sums have been spent on the fortifications of the St. Gothard, and a garrison of 3604 occupies the works in '98.

**Turkey.**—The Turkish military forces are organised on the territorial system, the whole empire being divided into seven territorial districts. By the recruiting law all Mussulmans are liable to military service. Christians and certain sects pay an exemption tax. The nomad Arabs, although liable to service by law, furnish no recruits, and many Kurds evade service. The conscription therefore falls somewhat heavily on the Osmanlis, or Turks proper. The men liable to service are divided into—(1) **Nizam**, or regular army, and its reserve; (2) **Redif**, corresponding to Landwehr; and (3) **Mustahfurz**, or Landsturm. Liability to service commences at twenty years of age, and lasts for twenty years—i.e., with colours of Active Army, four years; in the Reserve of Active Army, two years; in Landwehr, four years in first class, and four years in second class; and in Landsturm, six years. The **Cavalry** are set down at 55,300; the **Artillery** (174 field and 22 mountain batteries) at 54,720—1356 guns; the **Engineers** at 7400; **Infantry**, 583,200. The officers number in all 23,931, of whom 19,612 are on the active list. An irregular "Hamidieh" Cavalry has been raised among the Kurds, and has been responsible for much outrage. The Ottoman Army has been trained and reorganised largely by German officers, and is composed of the best fighting material, as the recent war with Greece proved. It was stated (Oct. '98) that 32 regiments of Redifs were to be formed, to be added to the 1st, 2nd, 3rd, and 4th Army Corps.

**United States.**—During the war with Spain the United States forces covered themselves with honour by their excellent qualities. All the recrimination that followed the war was due to the shameful incompetence of those responsible for supplying the forces. For command and discipline the Army is under a military chief. The regular forces of the United States are limited by Acts of Congress to a peace force not exceeding 2147 officers and 25,710 men. The term of service is five years, with power to re-engage. Increase of the forces will necessarily follow the war, and it is understood that the peace strength will probably be brought up to 100,000, which would enable garrisons to be placed in Porto Rico, Cuba, and the Philippines. The Volunteers who served during the war were considerably over 100,000 men. The Secretary for War strongly advocates a three-battalion infantry organisation in lieu of the cumbersome ten-company formation, and the weak army corps will be reduced from eight to four. In case of national danger, the Constitution of the United States contemplates the liability of every able-bodied male citizen between the

ages of 18 and 45 to render service. A certain proportion of the citizens receive military training in the state troops of the organised militia. According to late returns the total numbers of this force amounted to 11,897 officers and men—105 troops of Cavalry, 97 batteries of Artillery, and 1537 companies of Infantry.

\*\*\* In consequence of the constant changes in the armies of Foreign Powers, the figures given are liable to variation.

### FOREIGN NAVIES.

Subjoined are the latest (Nov. '98) details of the progress made in naval affairs by the chief maritime Powers, and a succinct history of the year's naval events. It should be noted by those who consult these or other lists of navies that, although the larger vessels referred to therein are classified as either battle-ships or armoured vessels and cruisers, or protected vessels, such classification, by whomsoever used, is quite relative. There are many so-called "protected cruisers" which are quite capable of holding their own with certain of the so-called "armoured battle-ships"; but because this is the case, it must not be hastily assumed that all cruisers can adequately fulfil the duties of a battle-ship. If, in any circumstances, a cruiser takes her place in the line of battle, then she becomes a battle-ship; and it is obvious that where the navies of two belligerent Powers are principally composed of vessels which in Europe would be classed as cruisers and perform cruiser work, these must take their places in the line of battle. Vessels which are classified as "armoured" have protection given to them in patches by iron, composite, or steel armour, vertically placed on the hull or gun positions, sometimes in conjunction

with armoured decks and sometimes without. "Protected" vessels, on the other hand, have their chief defence in sloping armoured decks and shields around the gun positions. Coal and cellulose are used as a secondary defence in both classes of vessels, and all the larger ships in both categories have armoured conning towers for the protection of the captain, helmsmen, and officers directing the movements of the vessel and the use of her armament.

**Argentine Republic.**—The Argentine navy is now being greatly strengthened by the purchase of vessels abroad. The Italian Government sanctioned the sale of the *José Garibaldi* and *San Martín* (ex *Varese*) to the Republic. These vessels are sisters, armoured cruisers of 6840 tons, 328 ft. long, 59 ft. beam, with 23 ft. 7 in. draught, propelled by engines of 13,000 horse-power, intended to give a speed of 20 knots. They are fully described in the *ANNUAL* of '96. More recently two other vessels of the same class have been purchased—the *Varese II.* from Orlando of Leghorn, and the *Garibaldi III.* (for *Garibaldi II.*, a sister ship, renamed the *Cristóbal Colon*, was sold to Spain). This last acquisition of the Argentine navy has been named *Pueyrredon*. Both the new vessels are very fine armoured cruisers of great speed and range, with 6-in. armour and other good protection. They have not yet been delivered by their builders, who have contracted to build other superior vessels for the Italian Government in their place. The Florio Company has lately sold to the Argentine Republic the steamships *Arno*, *Regina Margherita*, and *Sempione* to be converted into cruisers. An account of the new vessels of the torpedo flotilla will be found in the *ANNUAL* of '98. The small armour-clad *Almirante Brown* has received, instead of her eight 8-in. breechloaders, a new armament of ten 5·9-in. Canet quick-firers, two fore, two aft, and six in the battery, in a French yard. The *Libertad*, *Independencia*, and *9 de Julio*, were described in edition '93, and the *Patria* in '94. The following is a list of the principal ships of the fleet:—

#### Armoured.

Ships.	Tons.	I.H.P.	Principal Ordnance.
Garibaldi	6,840	13,000	48" q.f., 10'5"9" q.f.
San Martín	6,840	13,000	
Varese II.	6,840	13,000	
Pueyrredon	6,840	13,000	
Almirante Brown	4,200	5,380	10'5"9" q.f., 6·4·5" B.
Libertad	2,500	3,000	2'9"4", 4'4"7" q.f.
Independencia	2,500	3,000	2'9"4", 4'4"7" q.f.

Constitucion	400	430	1'9" B.

#### Torpedo Gun-vessels.

Patria	1,225	4,500	2'4"7" q.f., 4·8-pr. q.f.
Espora	515	3,250	2'14-pr. q.f., 1·9-pr. q.f.
Aurora	500	2,300	2·20-pr. q.f., 4·3-pr. q.f.

**Torpedo Boats:** The armoured destroyers *Corrientes*, *Missiones*, and *Entre Rios* (190 ft., 280 tons); *Commodore Py* and *Murature*, 150 ft. long, 110 tons, 25 knots speed; *Bathurst*, *Buchardo*, *Jorge*, *King*, *Thorne*, and *Pinedo*, 130 ft. long, 82 tons, 23-24 knots speed; *Alerta*, *Centella*, *Ferre* and *Py*, 100 ft. long, 52 tons, 20 knots speed; Nos. 1 to 8, 60 ft. long, 16 tons, 17 knots speed; Nos. 9 and 10, 60 ft. 6 in. long, 17 knots speed; and four vedette boats.

**Austria Hungary.**—The year '98 was marked by considerable public interest in the plans of Admiral von Spaun for an increase of the navy. The government organs energetically supported the policy, on the ground that Austria is losing her naval position among the Powers; while the democratic journals strongly condemned any additional expenditure. Many of the older vessels are quite obsolete, and the plan is to replace these by modern vessels, on the basis of creating a fleet of 15 armourclads of from 6000 to 9000 tons, 7 cruisers of from 4000 to 7000 tons, and 7 others between 1500 and 2500 tons, with 15 torpedo gunboats and 90 torpedo boats. The estimated expenditure is 55,000,000 fl., to be spread over a period of ten years. The so-called coast-defence vessels—really small and powerful battleships—*Monarch*, *Wien*, and *Budapest*, are completed. The last-named was described in the ANNUAL of '97. The armoured cruiser of the *Maria Theresia* type, "D," built at San Rocco, near Trieste, has been launched under the name of *Kaiser Carl VI*. Her displacement is 6250 tons, and her length 367 ft. 6 in. In addition to the belt and the armoured citadel, the ship has a cellular bottom and numerous water-tight compartments. The armoured turrets will be worked by electricity, and there will be eight 5.9 in. quick-firers and other light guns in an armoured redoubt. Two other small battleships of about 8000 tons are provided for, and one is in hand, as well as a couple of torpedo gunboats. The following are the more important vessels of the fleet:—

Armoured.		Principal Ordnance.	
Ships.	Tons. I.H.P.		
Rudolf . . .	6,940 7,500	3 12" B., 6 4.7" B.	
Stephanie . .	5,150 8,300	2 12" B., 6 5.9" B.	
Custoza . . .	7,060 4,400	8 10.2" B.	
Carl VI. . . .	6,250 12,300	2 9.4", 8 5.9" q.f.	
Monarch . . .	5,550 8,500	4 9.4" B. 6 5.9" q.f.

Planet . . . . .	500 3,500
Satellit . . . . .	540 4,000
Trabant . . . . .	500 3,500

Austria also possesses two new armoured river monitors, *Körös* and *Szamos* (448 tons), and two older like vessels *Leitha* and *Maros* for the Danube. She has twenty-four first-class torpedo boats, and about six others are being added. The *Cobra* and *Boa* (152 ft. 6 in., 24 knots) have been launched ('98) at Poplar. The *Adler* and *Falke* are of 135 ft. length and 22.4 knots speed, and the remainder, which are all named, of 128 ft. length and 17.5 knots to 21.5 knots speed.

**Brazil.**—The following is a list of the principal vessels:—

Armoured.		Principal Ordnance.	
Ships.	Tons. I.H.P.		
24 de Maio . .	5,000 6,200	4 9.4" B., 4 5.5" B.	
Riachuelo . . .	5,700 6,000	4 9.2" B., 6 5.5" B.	
Marshal Deodoro	3,162 3,400	2 9.4", 2 5.9".	
Bahia . . . . .	930 1,600	2 7" M.	
Alagoas . . . .	340 180	1 7" M.	
Piahy . . . . .	340 180	1 7" M.	
Rio Grande . .	340 180	1 7" M.	

Protected Cruisers.	
Ships.	Tons. I.H.P.
Tamandare . . .	4,735 7,500
Barrozo . . . .	3,450 7,500
Republica . . .	1,300 3,300
Benj. Constant	2,750 2,800

Cruisers.	
Ships.	Tons. I.H.P.
Guanabara . . .	1,910 3,000
Tupy . . . . .	1,030 6,000
Tiradentes . . .	800 1,200
Parnahyba . . .	740 900
Primeiro di Março	730 750
Aurora . . . . .	480 2,300
Nitheroy . . . .	1,790 800

Torpedo Gunboat.	
Ships.	Tons. I.H.P.
Caramuru . . .	1,030 6,000

Seven screw gunboats of about 9 knots; two paddle gunboats of about 7 knots. **Torpedo Boats:** five (Nos. 1 to 5), of 52 tons and 29 knots; three (*Araguary*, *Iguatemi*, and *Marcilio Diaz*), of 150 tons and 25 knots; three Elbing boats of 130 tons and 26 knots; *Piratinhy* (130 ft.), *Poly* (126 ft.), and others added during the revolt; besides six second-class boats and some smaller. The protected steel cruiser *Amazonas*, sister of the *Barrozo*, described in the ANNUAL '97, launched at Elswick, as well as her sister, the *Abreu*, was sold to the United States at the outbreak of the war with Spain. The small armourclads, *Marshal Deodoro* and *Marshal Floriano* (3162 tons), are being built at La Seyne—the first-named was launched in June '98—and the twin-screw monitors *Para* and *Maranhao* at Rio de Janeiro. The torpedo cruisers *Tupy* and *Timbira* have been launched at Kiel. Various destroyers and torpedo boats are in hand.

**Chili.**—The Chilean navy, though small and not rapidly expanding, except in the matter of torpedo craft, is, next after the Argentine, the most efficient and important in South America. The following are the fighting-vessels:—

Armoured.		Principal Ordnance.	
Ships.	Tons. I.H.P.		
O'Higgins . . .	8,500 16,500	4 8" q.f. 10 6" q.f.	
Esmeralda . . .	7,000 18,000	2 8", 16 6" q.f.	
Capitan Prat . .	6,900 12,000	6 9.4" B., 8 4.7" q.f.	
Alm. Cochrane . .	3,500 2,920	6 8" B., 4 6-pr. q.f.	
Huascar . . . .	1,760 1,050	2 8" B., 2 4.7" q.f.	

## Deck-Protected Cruisers.

Blanco Encalada	4,500	14,000	2 8" B., 10' 6" q.f.
Ministro Zenteno	3,450	4,000	.8 6", q.f.
Pres. Errazuriz	2,080	5,400	4 5' 9" q.f.,
Pres. Pinto	2,080	5,400	2 4' 7" q.f.

## Torpedo Gunboats.

Alm. Molinas	1,200	6,000	4 4' 7" q.f.
Alm. Simpson	812	4,500	2 4' 7" q.f.
Alm. Condell	750	4,500	3 14-pr. q.f.,
Alm. Lynch	750	4,500	4 3-pr. q.f.

Also four destroyers of 300 tons, launched at Birkenhead in '96, two others of the same class launched at Balcachuano in '98, seventeen first-class and four second-class torpedo boats, two old corvettes, and eight small gunboats and transports. Four of the first-class torpedo boats (*Viper* type) are newly built by Messrs. Laird at Birkenhead. Of these the trial speeds of the *Ingeniero Hyatt* and *Cirujano Videla* were 27'2 and 26'8 knots respectively. Of the finest vessels in the navy, the *Capitan Prat* was described in ed. '93, and the *Blanco Encalada* in ed. '94, the *Esmeralda*, steel built, sheathed and coppered, in ed. '97, and the *O'Higgins* in ed. '98. Until recently the Chilean destroyers have been built in England, but, upon the pattern of those supplied, two—the *Capitan Thompson*, and the *Teniente Rodriguez*—have just ('98) been put into the water at Balcachuano, as well as a couple of first-class torpedo boats.

**China.**—It must still be said that there is no effective Chinese fleet, and the future naval policy of China cannot be forecast. The *Kang-Chi* and the *Chen-Hai* were all that remained to her of the Pei-Yang squadron, and the southern squadron contains no ships of real value. A torpedo cruiser of 850 tons, the *Fei-Ying*, has been added to the Pei-Yang force; and in '97 the protected cruisers *Hai-Yung*, *Hai-Shen*, and *Hai-Shew* for the same squadron, were launched at the Vulkan yard, Stettin. They displace 2950 tons, and are 315 ft. long, with 41 ft. beam and 16 ft. draught. They carry three 5'9-in., eight 4'1-in., and six 1'4-in. quick-firers, six Maxims, a light gun, and will have three torpedo tubes. Engines of 7500 I.H.P. are to give a speed of 19'5 knots. Several sea-going torpedo boats, ordered before the war, have been added to the fleet.

**Denmark.**—The following are the principal modern vessels of the fleet:—

Armoured.			
Iver Hvitfeldt	3,260	5,100	2 10'2" 4 4'7".
Tordenskjold	2,400	2,600	1 14" 4 4'7".
Skjold	2,150	2,200	1 9'4" 3 4'7".
Protected.			
Valkyrien	2,900	5,300	2 8'2" 6 5'9".
Fyen	2,556	2,700	18 5'9".
Geiser	1,280	3,000	2 4'7" 4 3'4".
Heimdal			
Hekla			

A coast-defence ship of the *Lindormen* type (1500 tons), and two first-class torpedo boats, have been laid down. The armoured coast-defence ship *Herluf Tralle* (5000 tons) is in hand at Copenhagen.

**France.**—Owing to the frequent changes in the person of the Minister of Marine, and the conflicting views of various parties, French naval policy has undergone many modifications, and programme has succeeded programme as the estimates have been presented. In previous

volumes of the ANNUAL these have been described, and the curious in such matters will find many facts recorded in them. The "decennial programme" laid down at the close of '91, and since modified, is almost forgotten. It was then determined that 82 obsolescent vessels should be replaced by the year 1901 by 82 new ones, thus giving the French fleet the tactical composition established by the Superior Council of the Navy. Eight vessels were to have been laid down in each year, exclusive of torpedo boats. In practice a considerably smaller number has been laid down. Instead of repeating here an account of the various programmes which have been elaborated and modified, the reader will gain a much clearer idea of what is going forward if a list is given of the ships now actually in hand. Of the battleships it will suffice to say that the *Gaulois*, *Charlemagne*, and *St. Louis*, which mark the adoption of the British plan of coupling the big guns in turrets (instead of disposing the four at the angles of a lozenge, as it were, with one on each beam) have been launched, as well as the *Iéna*, which is of the same class. A sister of the battleship *Iéna*, which has received the name of *Suffren*, has already been laid down at Brest. The smaller battleship, *Henri IV.*, is still in hand at Cherbourg. During the last two years great attention has been devoted to the building of armoured cruisers, and six, of 9517 tons (the *Dupetit-Thouars*, *Gueydon*, *Montcalm*, *Gloire*, *C 7*, and *C 8*), are now in hand, as well as three of 7700 (the *Desaix*, *Dupleix*, and *Kléber*). The armoured cruiser *Jeanne d'Arc* is completing. Of the new unarmoured vessels, the principal are the *Châteaurenault* and *Guichen* (practically ready), being "commerce destroyers" of 8000 tons; the *D'Entrecasteaux*, which is now (Nov. '98) completing her trials, and is to proceed to China; the first-class cruiser *Jurien de la Gravière*; the second-class cruiser *Protet*; the third-class cruiser *Infernet*; the torpedo gunboats *Dunois* and *La Hire* (both launched), *Durandal* and *Hallebarde*, with several more gun vessels and torpedo boats. In the following table are grouped some of the latest vessels, some completed and others approaching completion:—

## Armoured.

Name.	Tons.	I.H.P.	Principal Armament.
Iéna	12,052	15,500	4 12" B., 6'4" q.f.
Chas. Martel	11,882	13,500	2 12" B., 2 10'6" B.
Jauréguiberry	11,824	14,200	2 12" B., 2 10'6" B.
Carnot	11,988	15,000	2 12" B., 2 10'6" B.
Charlemagne	11,275	14,500	4 12" B., 10 5'5" q.f.
Bouvet	12,200	14,000	2 12" B., 2 10'6" B.
Masséna	11,924	13,500	2 12" B., 2 10'6" B.
Brennus	11,395	14,000	3 13'4" B., 10 6'2" q.f.
Hoche	10,997	11,300	2 13'4" B., 2 10'8.
Henri Quatre	8,948	11,500	2 10'6" B., 7 5'5" q.f.
Jeanne d'Arc	11,270	28,000	2 7'4" B., 8 5'5" q.f.
Bouvines	6,610	8,000	2 12" B., 8 3'9" q.f.
Tréhouart	6,610	8,000	
Bruix	4,650	8,000	2 7'4" B., 6 5'5" q.f.
Latouche-Tréville	4,756	8,300	2 7'6" B., 6 5'5" q.f.
Pothuau	5,345	10,000	2 7'4" B., 10 5'5" q.f.

The *St. Louis* and *Gaulois* are sisters of the *Charlemagne*, and the *Valmy* and *Jemmapes* of the *Bouvines* modified. The *Magenta*, *Marceau*, and *Neptune* are of the *Masséna* type, but earlier.

[The Suffren is a sister ship to the Jena, which was also laid down at Brest, and the following particulars apply to both ships : — Length, 400ft 9in; beam, 68ft 2in; draught, 27ft 6in; displacement, 12,052 tons. There are three propellers, and steam is supplied to three vertical triple expansion engines by twenty Belleville boilers. With 15,500 h.p., the speed is to be 18 knots. The main armament comprises four 12in. guns, mounted in pairs in turrets, forward and aft, and the secondary battery is very formidable. It must be remembered that the claim with respect to the Suffren has yet to be made good; nor can the fact be overlooked that at the beginning of the present year it was stated that "the Suffren had already been laid down." In any case, the Suffren merely proves that the French naval authorities, by a special concentration of their energies on a single ship have been able in one solitary instance to approach the normal British rate of building. Thus, one of the cruisers of the Diadem class, displacing 11,000 tons, was launched from the famous Fairfield yard on the Clyde in 214 working days from the date of laying down. The Magnificent, first-class battle ship, 14,900 tons, was completed for sea in one year four months and twenty days—a record which no other Power has even approached.]

in and read. This was that deponent had sat on the Bench at Broadmeadow on the 7th April, and had heard Mansfield deny that he had his coat off at the Inverness Hotel on the 26th March.

Witness William M'Kenzie resumed his evidence. He stated that he was at the Inverness Hotel on the 26th March, and saw the accused, two Ritchies, and several others. Accused was on the verandah, standing still, and had his coat off. Malcolm Ritchie said he was as good a man as David Mansfield, and the latter retaliated that he was as good a man as Ritchie. None of the men was as old as Mansfield. Accused went in and had a drink — half a drink — with John Ritchie.

Mr Purves : What were you doing at the hotel on the Sunday afternoon? How long were you there?

Witness : About three hours.

Drinking all the time?—Oh, no (Laughter.)

I should hope not. How many?—About five or six "pony" beers. (Laughter.)

What did John Ritchie say to you about Mansfield?—He said : "There's the old man"

Come on, out with it.—No answer.

I have it down. Did he not say "There's the old man drunk?" — Something like that.

Did he have drink taken? (Laughter)

The French fleet also includes a number of smaller modern cruisers, torpedo gunboats, 8 destroyers (still in hand), 35 sea-going torpedo boats, and large numbers of the fast and smaller classes.

**Events and Launches.**—In Oct. and Nov. '98 great attention was devoted to the mobilising of the French fleet, which took place upon the discussion of the Fashoda incident. M. Lockroy, Minister of Marine, determined, at the close of the summer season, to reconstitute the principal squadrons, and with that view several fine vessels, and four coast-defence battle-ships, were despatched from the Channel to the Mediterranean, exchanging stations with other battleships of the older types which are now in the Channel. The new constitution given to the squadron was as follows: Mediterranean — battleships, *Bouvet*, *Bronnus*, *Carnot*, *Charles Martel*, *Jauréguiberry*, and *Maséna*, and the *Magenta*, *Marceau*, and *Neptune* assigned to gunnery training; cruisers, *Bugeaud* (to be flagship in Cretan waters), *Cassard*, *Chanzy*, *D'Assas*, *Du Chayla*, *Galilée*, *Lalande*, *Latouche-Tréville*, *Lavoisier*, *Linois*, and *Pothuau*; with gun-vessels and six torpedo boats; Channel—battle-ships *Amiral Baudin*, *Amiral Duperré*, *Courbet*, *Dévastation*, *Formidable* and *Redoutable*; cruisers, *Catinat*, *Dupuy de Lôme*, and *Surcouf*; two gunboats and three sea-going torpedo boats. This reconstitution had barely been completed when the preparation of the fleet for war, as deemed possible, began. The four coast-defence armour-clads, which had been sent to the Mediterranean, were fitted for service, and active measures were taken to bring the fleet into a condition to go to sea, with full bunkers and sufficient stores and ammunition. There was great activity in all building and repairing operations, and large numbers of troops were drafted to the ports to man the batteries. The Minister had made a tour of inspection of the principal forts in the Channel and Mediterranean, and the insufficiency of the coast defences had been forced upon his attention by the urgency of many naval officers. While this was going forward the China squadron, which had been constituted upon a larger scale in the spring of '98, was ordered to be reduced to the rank of a division; but this has not yet (Nov.) been carried out. In the

settlement of the Cretan difficulty the Levant Division of the Mediterranean squadron, under command of Admiral Pottier, has played an active part. The new Commander-in-Chief in the Mediterranean is Vice-Admiral Fournier, who was selected for the appointment, contrary to precedent, when he was the youngest of his rank, while Vice-Admiral de Lamornaix has been appointed to the Channel command. The most important launch of '98 has been that of the battle-ship *Iéna*, at Brest (Sept.). The *Iéna* is somewhat larger than the *Gaulois*, described in the ANNUAL of '97, displacing 12,052 tons, with a length of 400 ft. 9 in., beam 68 ft. 2 in., and draught 27 ft. 6 in. The armament also differs from that of the sister ships, and consists of four 12-in. guns coupled in turrets, eight 6.4-in. guns in a central battery, and eight 3.9-in. guns on the superstructure, besides lighter pieces and four torpedo tubes. Engines of 15,500 horse-power are to give a speed of 18 knots, and the range will be 5200 miles with 820 tons of coal. The only other armoured ship launched during '98 is the cruiser *Jeanne d'Arc*, at Toulon. She is a very fine belted cruiser of 11,270 tons, well protected with 6 in. of Harvey steel, and carrying a large armament of two 7.6 in. guns, and 44 various quick-firers. She has two torpedo tubes, and is calculated for a speed of 23 knots. The 23-knot cruisers *Guichen* and *Châteaurenault* have also been launched (and are vessels built upon fine lines to attain their speed, much like the United States *Minneapolis*), as well as the cruiser *Protet* (4065 tons), with the *Dunois* and *La Hire*, torpedo gunboats, and several torpedo boats, and other vessels. The ship-building proposals of '99 include 2 battleships (14,500 tons), 2 cruisers (4000 tons), 2 destroyers (400 tons), 4 large and 7 small torpedo boats.

**Germany.**—The year '98 has been a very important one in the history of the German navy, as marking the beginning of a definite shipbuilding policy and programme. The ANNUAL, during recent years, has recorded the extraordinary efforts made by the Emperor and the Government to win credits for ship-building from an unwilling Reichstag. At length, after many refusals, the programme has been definitely approved, and a beginning has been made with the work. It is now the adopted policy that Germany shall possess twenty-four battle-ships (with an extreme age of 25 years), thirty-two various cruisers (20 and 15 years, according to class), eleven despatch vessels, four gunboats, and 113 torpedo boats. In order that this strength may be reached, it is necessary to lay down five battle-ships, ten cruisers, five despatch vessels, two gunboats, and twenty-two torpedo-boats. The plan is that, as the vessels reach their limit of age, they shall take their position in the reserve, while others are built to replace them. The battle-ships at present in hand are the *Kaiser Friedrich III.* (11,113 tons), the *Kaiser Wilhelm II.*, and the reliefs *König Wilhelm*, and *Kaiser*, all of the same class. A relief ship for the *Deutschland* is proposed. The armoured cruisers are the *Fürst Bismarck*, and *Ersatz Prinz Adalbert* (the latter upon the estimates of '98-99), while the new protected cruisers are the *Freya* (5650 tons) and *Hertha*, *Victoria Luise*, *Hansa*, and *Vincta*, of the same class, and the "G," of 2650 tons, and there are a number of gunboats. The

armoured cruiser to replace the old *Prinz Adalbert* is like the *Fürst Bismarck*. She will displace 10,650 tons, and be 393 ft. 8 in. long, with 66 ft. 9 in. beam, and have 77-in. Harvey steel on her sides and gun positions, and a 3-in. deck. She will be armed with four 9.4-in., twelve 5.9-in., and twenty smaller quick-firers. Engines of 14,000 I.H.P. are to give a speed of 19 knots. The cruisers of the *Freyja* class are sister ships of a type new to the German Navy and displace 5650 tons, 344 ft. 6 in. long, with 57 ft. beam, and 20 ft. 5 in. normal draught (with 500 tons of coal on board). There is a steel deck with an extreme thickness of 3.9 in. The armament comprises two 8.2-in., eight 6-in., ten 3.4-in., and ten 1.4-in. quick-firers, and there are three submerged torpedo tubes. Three independent screws driven by engines of 10,000 horse-power combined, these being supplied by water-tube boilers, are to give a speed of 21 knots. Each cruiser will have two fighting masts on the French system. The only important launch of the year '98 has been that of the *Hansa* of this class, early in the year. A divisional torpedo boat has taken the water at Chiswick. Eight torpedo boats are in hand in the estimates of '98-9. The total shipbuilding expenditure during the year is given as 59,070,000 marks.

**Italy.**—A new shipbuilding programme is promised, but, owing to financial difficulties, Admiral Palumbo has been obliged to defer his proposals another year. The following are the tabulated characteristics of the most interesting modern Italian vessels:—

## Armoured.

Name.	Tons.	I.H.P.	Principal Armament.
Re Umberto	13,251	19,500	} 4 13.3" B., 8 5.9" q.f.

The new shipbuilding programme, about which there has been much discussion, has been finally settled and has received the sanction of the Emperor. Altogether it is proposed to spend £12,000,000 over a term of years, and to build nineteen various vessels, and a hundred torpedo craft. This will comprise four battleships, six cruisers of 9700 tons, three second-class cruisers of 4800 tons, two third-class cruisers of 3200 tons, three torpedo gunboats of 1200 tons, one torpedo depot ship of 6750 tons, eleven destroyers, and eighty-nine other torpedo boats. The four battleships are under construction in this country (see below), as well as three of the first-class cruisers, while two others are in hand abroad. The second-class cruisers are enlarged *Yoshinos*, of 4760 tons and 22.5 knots, with a large quick-firing armament. The torpedo transport is intended to displace 6750 tons, with a speed of 20 knots. The two battle-ships *Yashima* and *Fuji*, respectively built at Elswick and Blackwall, have been completed. The *Yashima* attained a mean speed of 19.4 knots at her trials. These vessels are of the *Majestic* type; and a sister ship, though of greater displacement, the *Shikishima*, is now completing at the Thames Ironworks. The following are her chief characteristics:—400 ft. long, with a breadth of 75 ft. 6 in. and mean draught of 27 ft. 3 in., normal displacement 14,850 tons. Armament, four 12-in. 49-ton guns placed in pairs in two barbettes situated forward and aft, fourteen quick-firing 6-in. guns carried on the broadside, and twenty 12-pounder quick-firing guns. There are four submerged torpedo discharges, and one above-water discharge in the bow. The Harvey armour-belt is 226 ft. long by 8 ft. deep, the thickness of armour being 9 in. On the barbettes the armour is 14 in. thick above the main deck and 9 in. below in front. The ship is propelled by twin screws, the engines being of 14,500 indicated horse-power, supplied by Belleville boilers, and the contract speed is 18.5 knots. The coal capacity at normal draught will be 700 tons, but the bunkers will hold 1200 tons. Complement, 741 officers and men. A sister ship of the *Shikishima* is in hand at Elswick, another somewhat larger (15,200 tons), the *Asahi*, at Clydebank, and still another of the same class at Barrow. Thus four magnificent battleships for the Japanese Government are now in hand in this country. The following armoured cruisers are also building in England:—the *Asama* (9750 tons, 4 8" and 14 6" quick-firers, 21.5 knots), and the *Tokiha*, and an unnamed sister of the same class, all at Elswick. Two other cruisers of the same class are in hand severally at Rochefort and Stettin. The *Kasagi* and *Chitose* are approaching completion at Philadelphia and San Francisco. Of torpedo craft Messrs. Yarrow are building four, and Messrs. Thornycroft four; and four 31-knot boats of 150 tons are in hand at Elbing.

**Netherlands.**—With the budget of '97 a ship-

building programme was introduced which, within the following thirteen years, will involve an expenditure of £4,987,000. The programme includes six armoured vessels, twelve protected cruisers, six monitors, fifteen gunboats, and thirty-two torpedo-boats. The three protected cruisers, *Holland*, *Zeeland* and *Friesland* (see ed. '96), have been launched. The Minister declares that, with the exception of the *Reinier Claезen*, *Evertsen*, *Kortenaer*, *Piet-Hein*, *Koningin Wilhelmina*, *Sumatra*, and some torpedo-boats, all the other vessels are too old for much service. In the oldest the hulls are decayed, and the boilers and engines in a useless condition. A complete reconstitution of the fleet is therefore called for. The three new cruisers named above are to take the place of the *Van Galen*, *Koning der Nederlanden* and *Johan Willem Friso*. The *Evertsen*, *Kortenaer* and *Piet-Hein*, small coast-defence ships, will replace the *Buffel*, *Guinea* and *Tiger*, and three new coast-defence vessels will displace the *Skorpion*, *Stier* and *Panter*. The reconstitution is to be brought about gradually. Three cruisers are to be completed in 1900, and of the six projected coast-defence vessels, the first three will be ready in 1902, and three others in 1905.

**Portugal.**—The new vessels are the *Admiral*, which Messrs. Orlando have built at Leghorn, and the cruiser *Reinha Amelia* (1660 tons) launched at Lisbon. Two 15-knot cruisers of 1800 tons and 2650 I.H.P. are in hand at Havre—the *San Gabriel* (launched in '98), and the *San Rafael*. The *Dom Carlos I.* and another cruiser, both of 4100 tons and 20 knots, are in hand at Elswick, the first-named having been launched.

**Russia.**—The general basis of the naval budget for the next seven years has been confirmed by the Czar, the total outlay for the period being 473,000,000 roubles for the whole period. The total estimate for '98 was 67,050,000 roubles, of which 19,316,976 roubles were for shipbuilding. The principle underlying the naval expenditure and construction appears to be that on the appearance of every new British war-ship a Russian one of equal or superior power shall be laid down. None of the ships of the extraordinary programme have been ordered in this country. The *Peresviet* and *Oslabya* are completing at St. Petersburg. A coast-defence ship of the *Apraxine* type is in hand at St. Petersburg, and the battleship *Kniaz Potemkin* *Tavrichesky* at Nicolaieff; also the cruiser *Gromoboi* (12,336) at St. Petersburg. The three battle-ships *Poltava*, *Sevastopol*, and *Petropavlovsk* and the *Apraxine* are ready. Three first-class cruisers, *Diana*, *Pallada*, and *Aurora* (6500 tons and 11,000 indicated horse-power), are in hand on the Neva, where twelve torpedo boats of the *Sokol* type are to be built. Schichau is building a cruiser of 17,000 horse-power at Elbing, and eight vessels have been ordered in France. The Forges et Chantiers de la Méditerranée are to build at La Seyne a battleship, an armoured cruiser, and three destroyers. The battle-ship will displace 13,110 tons, and have a length of 388 ft. 8 in., with 75 ft. 5 in. beam and 26 ft. draught; armament, four 12 in. b.l., and twelve 6 in., twenty 18 in., and six 14 in. q.f.; engines of 16,300 horse-power; speed 18 knots. The armoured cruiser will have the following characteristics:—Displacement, 7,800 tons; length, 442 ft. 11 in.; beam, 57 ft.; draught,

21 ft. 11 in.; armament, two 8 in. b.l., and eight 6 in., twenty 29 in., and seven 18 in. q.f.; engines of 16,500 horse-power; speed, 21 knots. The three destroyers will displace 320 tons, and be 185 ft. 10 in. long, with engines of 5,700 horse-power, to give a speed of 27 knots. A protected cruiser of the *Svevlana* class is to be built at Havre, and M. Normand, of the same port, has received an order to construct three destroyers of the French *Durandal* type—300 tons and 26 knots. The following are the more important Russian war-ships recently constructed or in hand. Those named in italics are in the Black Sea.

The entire *personnel* of the navy is over 32,477 officers and men, including 1658 executive officers.

**Spain.**—In the war with the United States the Spanish Navy suffered terrible disaster. The new fleet was more than half destroyed. At Manila, on May 1st, '98, Admiral Montojo's squadron, mostly of the older and inferior vessels, perished by gun fire. The ships lost were the *Castilla*, *Antonia de Ulloa*, *Juan de Austria*, *Isla de Cuba*, *Isla de Luzon*, *Reina Cristina*, *Velasco*, and *Mindanao* transport. In the battle of Santiago, July 3rd, Admiral Cervera lost the five new armoured cruisers *Cristobal Colon*, *Infanta Maria Teresa*, *Almirante*, *Oquendo*, and *Vizcaya*. They took fire and were run ashore, the two last-named beyond all hope of recovery. The Americans refloated the *Maria Teresa*, but she sank (Nov. '98) off the Bahamas, when she was being towed to a United States harbour. It is doubtful whether the *Colon* can be saved; other vessels lost in the course of the war were the *Furor* and *Pluton*, destroyers, in the battle of Santiago, the *Reina Mercedes* sunk at the mouth of the bay, July 5th, the gunboats *Centenilla* and *Delgado Parayo*, burnt at Manzanillo July 22th, and the sloop *Jorge Juan*, sunk in Nipe Bay July 21st. Though the material destruction was enormous and the loss of life very considerable, the Spanish officers and men fought with heroic bravery and devotion that won the admiration of their adversaries.

The following is a list of the most important recent vessels of the fleet that remain, and of some now in course of construction:—

Name.	Tons.	I.H.P.	Armoured.		Principal Armament.	
<i>Carlos V.</i> . . .	9,235	15,000	2 11"	B.,	10 5 5"	B.

Alfonso XIII. . . 4,800	12,000	
Lepanto . . . 4,800	12,000	
Ensenada . . . 1,060	2,700	

The armoured cruiser, *Pedro D'Aragon*, is in hand at Sestri Ponente, and other cruisers building are the *Isabel la Católica* and *Reina Regente*. The *Río de la Plata* (1,800 tons) has been launched at Havre.

**Sweden and Norway.**—Fourteen years ago a committee discussed the necessities of national defence, and recommended that, within a period of thirty years, fourteen *Sveas*, ten armoured gunboats, four cruisers, and eighty large and small torpedo-boats should be built, the annual cost being estimated at 1,900,000 crowns. Progress has been slower than was intended, for up to the present time there are built or building of this programme four armourclads, three torpedo gunboats, fifteen torpedo boats, and one mining vessel. The considerable sums voted seem to indicate a more vigorous policy. The *Odin* (3300 tons), an improved *Svea*, was launched in '96, and the *Njord* and *Thor*, of the same class, are in hand. Other vessels of the class are to be built probably in England. The Norwegian *Harald Haarfagre*, built on the Tyne, where a sister, the *Tordenskjold*, is in hand, is an armourclad of 3,556 tons, well protected and heavily armed for her displacement.

**United States.**—The war with Spain brought deservedly high honour to the fleet, and the effect of the victory will be to bring about a considerable naval expansion. The principal vessels with which the United States embarked upon the war, some not completed, are given in the subjoined table, the *Albany* and *New Orleans* being the two protected cruisers bought from Brazil:—

The battleships of the *Illinois* class were very fully described in the edition '98. The following are their principal dimensions and characteristics:—Length, 368 ft.; extreme breadth, 72 ft.; displacement, 11,525 tons; indicated horse-power, 10,000, with a speed of 16 knots on trial for four consecutive hours, and a mean draught with 800 tons of coal of 25 ft. The armament of each ship consists of four 13-in., fourteen 6-in. quick-firers, seven 6-pounder and four 1-pounder quick-firers. The *Alabama* and *Illinois* were launched in '98, three other battleships are to be built of the same class—the *Maine*, *Missouri*, and *Ohio*. Four monitors have also been planned, the *Connecticut*, *Wyoming*, *Arkansas*, and *Florida*, carrying 2 12-in. guns in single turrets; but it is stated (Nov. '98) that they have been countermanded, owing to Admiral Sampson's unfavourable report upon the behaviour of the older monitors during the war. In addition to battleships and monitors, a plan has been prepared for the building of 3 armoured cruisers of 12,000 tons, three protected cruisers of 6,000 tons, and three of 5,000 tons, and six other cruisers of 2,500 tons. There are now seven torpedo destroyers, and sixteen new ones are to be built, as well as twelve other torpedo boats.

**Foreign Trade with Great Britain.** See: GREAT BRITAIN AND HER FOREIGN TRADE.

**Foresters, Ancient Order of.** The origin of the Ancient Order of Foresters dates back more than a century. The earliest notice of Forestry may be said to be a list of members, made in "Court No. 1" of the "Ancient Royal Order of Foresters" in the parish of Leeds. The date of this list is 1790. Slow progress marked the early years of the movement, but in 1813 "Court No. 2" was commenced at Knaresborough. General laws for the rule of Forestry were sanctioned on June 3rd, '16, but the life of this "Royal Order" was practically cut short in '34. In the first twenty-one years of its existence no fewer than 358 Courts had been opened. The "Ancient Order" soon eclipsed the "Royal Order," and within three months of the momentous meeting ('34) at Rochdale, at which the disruption in the ranks of the "Royal Order" was made apparent, 294 courts of the latter were incorporated in the Ancient Order of Foresters. Mr. G. F. Mandley became its first High Chief Ranger. Salford was the meeting-place of the first High Court ('35), when three days were occupied in discussion of the business of the Order. It was notified that 16,510 members had received certificates. In '32 Forestry was introduced into the United States, and there, as well as in Canada and Australasia, it has thriven. In '40 the first Juvenile Foresters' Society was formed, in Hull. It provided for funeral benefits only. The official magazine is *The Foresters' Miscellany*, published monthly. Reports are also published quarterly by the Executive Council, and an annual report is issued under the title of *The Foresters' Directory*, containing about 750 pages. During '97 it appears that in the numbers of male and female adult benefit members and juvenile members of the Order there was an increase of 10,378. Its funds amount to £6,117,072, the gain in funds in '97 being £289,523, (the largest

increase on record). The total membership is 895,769, comprising 724,897 male adult benefit members, 6545 female members, 19,477 contributing widows, 21,209 honorary members, and 123,641 juvenile members. In the year ending September '98 the Order had opened 180 Female Courts. The meeting-place for '99 is Cardiff. The High Chief Ranger for '98-9 is Mr. John Edwards. The Permanent Secretary is Mr. J. Lister Stead, 42, Oakfield Street, Cardiff.

**Forestry.** See AFFORESTATION.

**Formosa.** This island, which came into prominence during the Chino-Japanese war and was one of the spoils taken from the vanquished nation in '95, lies off the Chinese coast, and is about 200 miles in length. Its area is about 13,500 sq. m., and the pop. is estimated at about 2,000,000. It is very mountainous, and the almost inaccessible inland parts are held by a primitive race of the Malay type. The chief towns are Tamsui at the north and Tainanfu and Auping at the south end. The chief products are tea, sugar, rice, and camphor, and these make the island a desirable acquisition for Japan, leaving out of account its proximity to the Chinese mainland. Considerable energy has been shown by the conquerors in developing internal communications, and good roads have been also made in all directions. The administration of the island, which at first was very faulty, was, during '97, largely reorganised, benevolence in the treatment of natives being specially enjoined upon the Japanese officials. See CHINA (map).

**Forrest, Sir John, K.C.M.G.,** the Premier of Western Australia, was b. in 1847. After serving in the Survey Department, and commanding various expeditions into the interior, he was appointed Surveyor-General. He was elected a member of the Legislative Council of Western Australia '83, and has been a member ever since, and Premier since '90, when the first Ministry was formed. He has succeeded admirably in coping with the situation created by the gold discoveries in the colony, and was made a K.C.M.G. in '91. In '97 he was President of the Federal Council of Australasia, came to England to attend the Jubilee festivities, and was made a member of the Privy Council. He has published "Exploration in Australia" and "Notes on Western Australia."

## FRANCE.

France is a republic governed by a President and two chambers under the constitution of 1871, revised in '75, '84, '85, and '89. The legislative power resides in the Assembly, sitting in two houses: viz., the Senate of 300 members, of whom 225 are indirectly elected for 9 years (one-third retiring every 3 years) by delegates chosen by the municipal councils and by the Senators, Deputies, Councillors-General, and District Councillors of the Departments, there being also 75 Senators originally elected for life by the two Chambers (though as these die the vacancies are filled up by the election of Senators for a period of 9 years only), and the Chamber of Deputies of 584 members, elected for 4 years by universal suffrage. The method of election is by *scrutin d'arrondissement*. Each Department is divided into *arrondissements* returning one Deputy, though where the population of the *arrondissement* exceeds 100,000, it is divided into two or more constituencies. Each elector votes for

one Deputy only. Candidates are compelled to declare for which constituency they will stand. Voters are required to be over 21 and to have a 6-months' residential qualification. Both Houses can initiate and frame laws, except in the case of financial laws, which must first be presented to and voted by the Chamber of Deputies. Deputies and Senators are both paid. The President is elected for seven years, and receives 600,000 fr. a year, and a further allowance of 600,000 fr. for expenses. The executive power is confided to the President, elected by the two Houses united in National Assembly. War can be declared by the President only with consent of the two Houses. As to local government, the unit is the commune, governed by a municipal council and a mayor. The communes are combined into cantons, containing on an average 12 communes, and also, for electoral purposes, into *arrondissements*, these *arrondissements* again forming the Departments, of which there are 86. Prefects, with large and somewhat vague powers, control the Departments. All religions are on a legal equality, every sect being entitled to a grant from the State if its numbers exceed 100,000. But the Roman Catholics form the large majority of the population. Primary education is free and obligatory, and admirably organised. Secondary education is given in over 400 schools specially organised for that purpose, with about 100,000 pupils, and there are also numerous technical schools, besides 15 universities. The colonies are looked upon as being politically part of France, and are represented in the Senate and Chamber. At the end of '96 there were 23,500 miles of first-class railways being worked, and 2500 miles of second-class. The chief exports are textiles, wine, raw silk, wool, etc., leather, and small ware. Agricultural operations include not only the growing of cereals, wheat principally, but roots, cattle, sugar, silk, wine, vegetables, and poultry and eggs. The quantity of wine made in '97 was 727,791,245 gallons, of the estimated value of £32,000,000, while the yield of cider was only 152,745,885 gallons. Area, 204,092 sq. m.; pop., '96, 38,518,975. Estimated revenue, '97, £141,356,440; expenditure, £141,342,760; public debt, estimated at £1,280,000,000; imports, '96, £158,404,000; exports, £142,183,000. See COLONIES, ETC., OF EUROPEAN POWERS. DIPLOMATIC, FOREIGN ARMIES, FOREIGN NAVIES, FRENCH GUINEA, FRENCH WEST AFRICA, GREAT BRITAIN AND HER FOREIGN TRADE, etc.

**Political Parties.**—A few years ago the two main groups in politics might have been roughly, but accurately defined, as Republicans and Reactionaries, the latter including the Royalists or followers of the Duc d'Orléans, and Imperialists, followers of Prince Victor. Recently, however, and more especially since '93, when so many supporters of the Monarchy and the Empire, under the advice of the Pope, stood as the "Rallied" or independent Republican party, this grouping of parties has disappeared; and at the present time the only division that can be made is into the Government Republicans and the Opposition, an Opposition embracing the most diverse elements. After the '93 election referred to above there were in the Chamber about 292 Government or Moderate Republicans; 187 Radicals; 35 "Rallied" or independent Republicans; and about 58 Reactionaries, including

both Royalists and Imperialists. The Radicals, however, contained a very strong Socialist element, and as time went on the Socialists separated themselves and became a distinct party. In '95 a Radical administration was formed under M. Bourgeois, but the influence of the Socialists, upon whom M. Bourgeois had to depend for a majority in the Chamber, brought about its downfall; and a strong Moderate Republican administration under M. Méline succeeded in April '96, and held office till June '98, when it fell and was replaced by a Radical Ministry with M. Brisson as President. The General Election in May '98 showed a notable increase in the numbers of the Radicals and Socialists elected, and the Moderate Republicans were no longer able to stand against the combined forces that the Opposition could bring against them. The strength of parties was as follows: Moderates 254; Rallied 40; Radicals 178; Socialist Radicals 57; Reactionaries 44; Anti-Semites, 10. M. Brisson in turn succumbed in October, and was succeeded by a Ministry of "Republican Concentration" under M. Dupuy.

**History, '98.**—The agitation caused by the attempt to cancel the conviction in '94 of Captain Dreyfus, on the charge of having divulged military State secrets to a foreign Power, recommenced early in November '97, occupied the attention of all France, and increased when Count Esterhazy was accused of being the author of the *bordereau*, or document on which Captain Dreyfus was said to have been condemned. M. Zola took the view that Dreyfus was innocent, and declared in the *Figaro* that the attempt made by the military authorities to prevent the case from being reopened was a crime (Dec. 1st). The Chamber of Deputies, however, supported the military authorities, and gave overwhelming support to the Premier and General Billot, the Minister for War, when they declared (4th) that the charges against Esterhazy could have no reference or relation to the Dreyfus case. General Billot further solemnly affirmed his belief in the guilt of Dreyfus, and the Chamber adopted a resolution expressing "respect for the authority of the judgment delivered" against Dreyfus. A court-martial on Major Esterhazy was held (Jan. 10th, '98). The proceedings for the most part were conducted with closed doors, and ended in the acquittal of the accused. Thereupon M. Zola wrote a letter to the *Aurore*—denouncing Colonel du Paty de Clam, a member of the War Office staff, as being at the bottom of the Dreyfus prosecution, describing the incriminating document as an impudent swindle, accusing the War Office of having endeavoured to screen rather than admit their mistake in condemning Dreyfus, and of having ordered the acquittal of Esterhazy, although he was guilty. The Government immediately ordered a prosecution of M. Zola (13th). By this time the affair had resolved itself into this—that most unprejudiced people regarded the *bordereau* or incriminating document upon which Dreyfus was said to have been condemned as ridiculously insufficient to prove his guilt; while if, as was suggested, he was condemned on other evidence, then it was secret evidence, not communicated to him or his counsel, and the sentence was illegal. A violent scene occurred in the Chamber during a debate on the case (22nd), fists being used and inkpots

thrown by the Deputies. It arose on a speech by M. Jaurès, in which he pointed out that if Dreyfus was condemned on a secret document the judgment was illegal. M. Méline refused to reply, and the Chamber approved his action by a very large majority. Herr von Bülow, German Foreign Secretary, declared publicly to the Budget Committee of the Reichstag (24th) that Dreyfus had never had any relations with the German Government or with any of its agents. The trial of M. Zola began (Feb. 7th), and all attempts by the defence to introduce the Dreyfus case, or to show the grounds on which the judgment against Dreyfus was declared illegal, were ruled out by the Court; though opportunities without number were given to the military authorities to declare that the condemnation of Dreyfus was legal and just. General de Boisdeffre went so far as to threaten resignation were Zola acquitted. In the end the jury returned a verdict of "Guilty," and M. Zola was sentenced to a year's imprisonment and a fine of 3000 fr., and the publisher of the *Aurore* to four months' imprisonment and a fine of 3000 fr. An appeal against the judgment was at once lodged, and the Cour de Cassation quashed it (April 3rd), and annulled the prosecution on the ground that the Minister for War could not take action on behalf of the court-martial. Whereupon the Minister convened the members of the court-martial, and a fresh prosecution of M. Zola was decided upon (8th). The General Election of Deputies took place (May 8th), and the second ballots (22nd) revealed the fact that the Government could only count on a majority of from 12 to 15, including the Rallied. Their weakness became apparent directly the Chamber met (June 1st). The first vote for the Presidency was indecisive, but the second only put the Government's candidate, M. Paul Deschanel, temporarily in office by 282 votes against 278 cast for M. Brisson. The election was confirmed by 287 votes to 277 (9th). The Niger Convention, negotiated by a Commission which had been sitting for months, was signed at Paris (13th). Full details of the Convention are given in the articles on the French and British colonies affected—*e.g.* FRENCH GUINEA, NIGERIA, LAGOS, GOLD COAST, etc. See also map showing the effects of the Convention, under NIGERIA. The Government only secured a majority of 12 in a vote on an interpellation as to the Government's policy (14th). M. Méline and his colleagues thereupon resigned (15th), and ineffectual attempts to form a conciliation cabinet were made by M. Ribot, M. Sarrien, and M. Peytral. The President then entrusted the task to M. Brisson, and he succeeded (28th) in forming a Radical administration. M. Cavaignac became War Minister, and took an early opportunity of declaring his conviction of the guilt of Dreyfus, basing his belief on three documents which he communicated to the Chamber (July 7th). He announced at the same time that an inquiry would be held into the action of Major Esterhazy. Colonel Picquart at once wrote to the Premier that he could prove that two of the documents dated '94 could not apply to Dreyfus and that the third, dated '96, had all the marks of a forgery. At the same time M. Demange, the advocate of Captain Dreyfus, stated that none of the documents were communicated either to him or to Dreyfus at the trial. The second Zola trial took place, and on the Court

deciding that no reference to the Dreyfus case would be permitted, the defendants allowed judgment to go by default, and were sentenced to 12 months' imprisonment and a fine of 3000 fr. (18th). M. Zola thereupon left Paris before the judgment was notified to him, in order to secure, what the French law allows, a retrial of the case at a later date. The inquiries into the actions of Major Esterhazy and Colonel du Paty de Clam resulted in a decision that there was no ground for prosecuting them; but the tide turned suddenly when Lieut.-Colonel Henry, the head of the espionage department of the War Office, was arrested (Aug. 30th), and confessed that he had forged one of the three documents mentioned above, the very one denounced by Colonel Picquart. He then committed suicide whilst under arrest (31st). General de Boisdeffre, head of the General staff, resigned immediately, and after some discussions M. Cavaignac resigned his portfolio as Minister of War. It appeared that he still believed firmly in the guilt of Dreyfus, and was obstinately opposed to a revision of his case, differing therein from the rest of the Cabinet. General Zurlinden, the Military Governor of Paris, was appointed in his place, but he in his turn declared himself opposed to a fresh trial, though Colonel du Paty de Clam was virtually disgraced by being placed on the retired list. The Cabinet authorised the Minister of Justice to take the opinion of the Revision Commission of the Ministry of Justice as to whether the application for revision should be granted (Sept. 18th), and thereupon General Zurlinden and M. Tillaye, Minister of Public Works, resigned. General Chanoine was appointed to succeed at the War Office, and M. Godin as Public Works Minister. Colonel Picquart and M. Leblois were brought up before the Correctional Tribunal (21st), charged with divulging information (obtained in the Colonel's investigation of Major Esterhazy's conduct) affecting the national defence. The Deputy Procureur, however, asked for an adjournment, since General Zurlinden, as Military Governor of Paris—a post resumed by him after resigning from the War Office—had ordered the prosecution of Colonel Picquart on the charge of forging a telegram (referred to as the *petit bleu*) which purported to show suspicious relations between Major Esterhazy and the authorities of a foreign Power. Colonel Picquart was then handed over to the military authorities, and made a dramatic statement, warning the court that if he found in his cell the noose of Lemercier-Picard or the razor of Henry it would be an assassination, for he had no intention of committing suicide! The Revision Commission reported to the Cabinet that they were equally divided, and therefore must decide in the negative, according to the custom in such cases (25th). Thereupon the Cabinet decided to transmit the application for revision to the Cour de Cassation (26th). The result was that M. Manau, the Public Prosecutor, made formal application for the revision of the trial at the registry of the Criminal Chamber of the Court of Cassation (Oct. 5th). The affair was thus taken out of the hands of the Executive and the Legislature and confided to the supreme judicial authority. The British Foreign Office issued a Parliamentary paper containing "Correspondence with the French Government respecting the Valley of the Upper

Nile." The correspondence covered the period from Dec. 10th, '97 (when the British Ambassador in Paris reminded the French Government of the views held by H.M. Government as to the exclusively British sphere of influence in the Nile Valley, as expressed by Sir E. Grey's declaration in the House of Commons in '95) down to Oct. 3rd, '98. In Sept. '98 Lord Salisbury instructed the British Ambassador to point out to the French Foreign Minister that all the territories which had been subject to the Khālifa had passed by right of conquest to the British and Egyptian Governments, and that H.M. Government did not consider this right open to discussion. The French reply was that France had never recognised the British sphere of influence in the Upper Nile region, and had protested at the time against Sir E. Grey's declaration. The British Ambassador then stated that his Government would consent to no compromise as to Fashoda, which formed part of the territories that had passed from the hands of the Khālifa back into the hands of Great Britain and Egypt. The French Government, on being informed of the Sirdar's report on his visit to Fashoda, requested that a telegram might be sent to Major Marchand, instructing him to send home a copy of his report, which he had already dispatched in duplicate by way of Abyssinia and French Congo, by one of his officers. To this the British Government agreed, while reaffirming their views as to the ownership of Fashoda, and insisting on the withdrawal of Major Marchand as a condition precedent to negotiations on the matter. The French Government in turn issued a Yellow Book on the Fashoda question (23rd), the remarkable feature of which was the declaration of Baron de Courcel, the French Ambassador in London, that Lord Salisbury had pressed him to make proposals on the part of the French Government; and that thereupon the Baron had claimed the valley of the Bahr-el-Ghazal for France, giving her access to the Nile. But in a Parliamentary paper issued by the British Foreign Office two days later Lord Salisbury gave his version, and a very different one, of the conversation, asserting that he had declined to discuss the claims of France to an outlet on the Nile for the Ubangi province. Attention could not long be withdrawn from the Dreyfus affair, however, and before the Deputies reassembled it was rumoured that a military plot had been formed to overturn the Cabinet and put an end to all attempts to revise the Dreyfus case. At the opening of the Chamber (25th) General Chanoine, after an attack had been made on the Ministry by M. Déroulède, rushed to the tribune, declared that his view of the Dreyfus case was that of his predecessors, and, most irregularly, resigned his portfolio. M. Brisson then announced that a provisional Minister of War would be appointed; but in the discussion that followed a motion expressing confidence in the Government was lost by 254 votes to 286, and M. Brisson and his colleagues resigned (25th). The report to the Criminal Chamber of the Court of Cassation on the application for revision was presented (27th) by M. Bard, one of its members, who insisted on the need for a further judicial inquiry, and was eloquently supported by the Procureur-Général, M. Manau, and by M. Mornard, counsel for Mme. Dreyfus. The Court decided that it would institute and itself conduct "a supplementary investigation"

(29th). On the same day Major Esterhazy was expelled from the Legion of Honour. M. Dupuy succeeded in forming a Cabinet (Nov. 1st), retaining M. Delcassé as Minister for Foreign Affairs, and giving the War Office to M. Freycinet. The Ministerial declaration (4th) affirmed the supremacy of the civil power, but also confidence in the army, and expressed the resolve to stop the insults directed against it. The Fashoda question came briefly to the fore again with the official announcement (5th) that the Government had decided to withdraw Major Marchand. The French press as a whole deplored the retirement, and some papers expressed themselves with the utmost bitterness against Great Britain; but the country generally and the Chambers seemed to treat the matter with indifference.

**France, President of.** See FAURE.

**Franchise.** See REGISTRATION, PARLIAMENTARY, for a full account of the qualifications for the franchise.

**Francis Ferdinand of Austria, Archduke,** son of the late Archduke Charles Louis, by his second marriage with the Princess Maria Annunciatia, daughter of Ferdinand II., King of the two Sicilies, was b. at Gratz, in 1863, and is a major in the 4th Dragoon Regiment. A few years ago he inherited the large fortune of his relative, the Grand Duke of Modena, and in so doing took the name of Este. On Feb. 1st, '89, he renounced the fortune and name in favour of his brother, Archduke Otho. Archduke Francis is unmarried, and has never made any great figure in Austrian society. By the death of the Crown Prince Rudolph and the abdication of his father, who died in '96, he became the heir apparent to the Austrian throne.

**Francis Joseph I., Emperor of Austria, King of Hungary and Bohemia,** was b. 1830. His father was the late Archduke Francis Charles. Succeeded his uncle, Ferdinand, on the throne when he abdicated ('49). The beginning of his reign was marked by important events. Hungary was in a state of rebellion, which was quelled by the help of Russia. His Italian dominions were saved by the genius of General Radetzky. The Emperor made strenuous efforts to prevent the Crimean war, and refused to join France and England. After the Austro-French war ('59), he was compelled to sign the treaty of peace of *Villafranca*, by which Lombardy was ceded to Italy. In '66 he lost the duchy of *Holstein*, obtained by the convention of Gastein, and in the same year, as the result of the war with Prussia, *Venetia* also. That year was fatal to the supremacy of Austria in Germany, the contest being decided in favour of Prussia by the treaties of *Nikolsburg* and *Prague* respectively. The Turkish provinces of *Bosnia* and *Herzegovina* were, by decision of the *Berlin Congress* ('78), placed under the administration of Austria-Hungary. In '54 the Emperor Francis Joseph married the Princess Elizabeth Amalie Eugénie, (daughter of the Duke Maximilian Joseph of Bavaria), who was murdered by an Italian anarchist at Geneva in '98. The death of the Crown Prince Rudolph made the Archduke Francis Ferdinand (*q.v.*), a nephew of the Emperor's, the heir to the throne.

**Frederick William Louis, Grand Duke of Baden,** was b. 1826. Succeeded his father, the Grand Duke Leopold, '52. By right of succession the government of the duchy belonged to

his brother Louis, who was older than himself; but Duke William had to assume the government, his brother being mentally incapacitated. As a ruler he has proved himself a firm ally of Prussia, and in the war of '70-71 against France he fought side by side with Prussia, and took a prominent part in the struggle. In home politics he declared himself a stern opponent of the Jesuits, and in '55 he put an end to their existence as an organised ecclesiastical community, by banishing them from the duchy. His wife is a daughter of the late Emperor William of Germany.

**Free Church of England.** A Protestant episcopal organisation, originated in 1844 (enrolled in Chancery 1863) as a counteracting movement to the Oxford Tractarianism. Being free from State control, the Free Church claims the liberty to enter a parish where ritualistic practices prevail, and establish a liturgical service on the basis of the Evangelical party in the National Church, with which section it is in ritual practically identical. It is governed by Convocation and bishops, consecrated in the line of the Canterbury succession by the Rt. Rev. Bishop Cummins, of the American Protestant Episcopal Church, whose bishops were consecrated at Lambeth Palace 1787. The churches, although not numerous, are widely spread. Convocation held yearly (June). Bishop Primus, Rev. S. J. C. Dicksee, Crowborough. Missionary Bishop, Rev. H. O. Meyers, Hounslow. Treasurer, A. H. Wilson, Esq., 5, Westminster Chambers, S.W. Hon. Secretaries, Rev. E. T. Boon, Worcester; Rev. A. F. G. Jullion, New Malden. Registrar, Rev. G. H. Jones, Cliftonville, Margate. Offices, 5, Westminster Chambers, S.W.

## FREEMASONRY.

The Masonry of the present day—especially British Masonry—is famous for two things: conviviality and charity. The latter was recognised 170 years since by the formation of a committee of charity in connection with the Grand Lodge in 1725. This committee from time to time underwent various alterations in its title, and it is now called *The Board of Benevolence*, its province being to administer the *Fund of Benevolence*. To this Fund every one initiated in a lodge under the English constitution contributes a sum on his initiation; and as long as he is a subscriber to a lodge in London 4s. a year is paid by his lodge for him to this fund, and 2s. if he subscribe to a country lodge, another 2s. going to the fund of his province. In 1788 Chevalier Ruspini, surgeon-dentist to George III., established the Freemasons' Girls' School, now known as *The Royal Masonic Institution for Girls*, and ten years later the *Boys' School* was started. The Institution for the Aged is the youngest of the three, the Institution for the Men not having been established till 1842, and for the Widows not till '49. The Girls' School boards, clothes and educates 263 girls, and the Boys' School 268 boys; while the Benevolent Institution grants annuities to 442 persons—£40 a year to men

and £32 a year to widows; there being now 200 men and 242 widows on the Funds. It is also paying £560 a year to widows of deceased annuitants. The total receipts of these three institutions in '97 were: Benevolent Institution, £27,129; Boys' School, £23,303 5s. 7d.; Girls' School, £21,405 14s. 3d. The roll of the Grand Lodge to September '98 showed a total of 2726 warrants for lodges under the English constitution; but this does not represent the actual number of lodges now subject to Grand Lodge, as out of 446 of this total some lodges have ceased to exist since '63, while some have merged in other lodges or gone under the jurisdiction of Colonial Grand Lodges.

The United Grand Lodge of England acknowledges only two species of Freemasonry—the **Craft** and the **Royal Arch**, both of which are exceedingly powerful. Scotch, Irish, American and Continental jurisdictions acknowledge higher degrees; but these, with the exception of the **Mark Degree**, are not universal—that is, they are Christian degrees, and the Jew, the Turk, the Mohammedan and the Parsee will not join them. Strong endeavours were made thirty-nine years since to induce the Grand Lodge to recognise the Mark Degree, but the attempts were unsuccessful, and the Mark Masons established a Grand Lodge of their own in 1856. It has already 518 lodges in England and Wales and the colonies, with 38,669 registered Mark Masons subject to its authority; has a large Benevolent Fund, an Educational Fund, and out of the interest of its annuity funds grants £26 a year to each of seven decayed Mark Masons and £21 a year to each of eight widows. The charitable work of English Freemasonry does not end here, because there are several provincial organisations which grant annuities to local brethren and widows, and pay the expense of educating Masons' children.

The principal events of the year strongly evidenced the growing power of the Craft in England. Business at Grand Secretary's office had so much increased that at Grand Lodge on Dec. 1st, '97, the Grand Secretary's salary was increased from £1000 to £1250, with a £50 yearly increment until it should reach £1500. The Prince of Wales was elected on March 2nd, '98, for the twenty-fourth year as Grand Master, and his reinstallation took place on April 27th, when Lt.-Col. H. D. Davies, M.P., Lord Mayor of London, was appointed a Past Grand Deacon. At Grand Lodge on June 1st, the brethren received a message from the Grand Master, and in consequence thereof withdrew recognition of the Grand Lodge of Peru and its subordinate lodges for excluding the Volume of the Sacred Law, and omitting all mention of it from their meetings. Grand Lodge thus followed its action towards the Grand Orient of France on March 6th, '78. Grand Lodge, at the same meeting of June 1st, '98, sanctioned the purchase of additional property contiguous to Freemasons' Hall, on account of the insufficiency of the present building for the requirements of the Order. On Sept. 7th there was a happy termination to a controversy about the establishment of a new and independent Grand Lodge of New Zealand, by the recognition of that Grand Lodge by the Grand Lodge of England.

Grand Lodge possesses many archæological curiosities in a library and museum, to which valuable additions are constantly being presented; but it is only of late years that Masonic

brethren seem to have become aware of the importance of collecting and preserving authentic traditions of the craft. In connection with Freemasonry there exists a lodge, the **Quatuor Coronati** (founded 1884), whose membership is restricted to persons possessing either literary or artistic qualifications (Sec. G. W. Speth, Bromley, Kent). Of a similar nature is the **Savage Club Lodge**, which is restricted to members of the Club. The **Eccentric Lodge**, consecrated Oct. 20th, '93, is of the same class. There are other lodges established expressly for the convenience of members of different professions and callings, such as barristers, gas engineers, physicians and surgeons, and chemists; and there is also the **Gallery Lodge**, 1928, which was consecrated in Aug. '81, and is composed solely of newspaper reporters and writers. Several volunteer corps also have lodges, the membership of which is restricted to members of the respective corps. There are other class lodges in connection with the public schools, and the professions of the law and physic. Consult Mackay's "Lexicon of Freemasonry"; Kenning's "Cyclopædia of Freemasonry"; Gould's "History of Freemasonry" (6 vols.). English Freemasonry has two London weekly newspapers devoted to its interests—the *Freemason* and the *Freemason's Chronicle*. The former has been established thirty years, and the latter twenty-four. The *Craftsman*, published at Cardiff, was started in Jan. '94 as a monthly illustrated paper devoted to Welsh and general Masonic matters. The *Masonic Visitor* was first published in Dublin in May of the same year as a journal of Irish Freemasonry. The *Scottish Freemason* followed in June, and is published in Glasgow. In America Masonic papers are numerous, and they are also known in India, Australia, New Zealand, and other colonies.

**Fremantle, The Hon. and Very Rev. W. H., D.D.**, Dean of Ripon, was born in 1831, and is the second son of the first Baron Cottesloe. He was educated at Eton and Balliol College, Oxford, taking a first class in classics and holding a Fellowship of All Souls '55-63. Ordained in '56, he became curate at Middle Claydon, vicar of Lewknor, resident chaplain to Bishop of London (Tait) '61-6, rector of St. Mary's, Bryanston Square '65, Fellow and Tutor of Balliol, '82-96, and Canon Residentiary of Canterbury Cathedral '82. In April '95 he was appointed to the Deanery of Ripon. He was Select Preacher at Oxford '78-80, and Bampton Lecturer for '83, and has written several theological works.

**French Colonies, The.** See FRANCE, and COLONIES, ETC., OF EUROPEAN POWERS; also under their various headings.

**French Congo and Gaboon.** A French colony in Western Africa, bounded on the north-west by the Cameroons, on the north by Wadai, one of the Central Soudan States, on the east by the Egyptian Soudan, on the south-east by the Congo Free State, and on the west by the Atlantic. The **Gaboon** is strictly only a great estuary by which several minor streams discharge their waters. The **Ogowé** is a large river, which reaches the Atlantic by several mouths, forming a great delta, not far south of the Gaboon estuary. **France** has possessed the Gaboon estuary and district since 1843, and in '94 she extended her rule over the inland part of the colony by an agreement made with Germany in March '94 settling the

boundary between the French and German spheres from the southern boundary of the Cameroons to Lake Tchad. A line of communication between French Congo and the French possessions in the Soudan was thus assured. Efforts have since been made to push the French sphere farther eastwards, so as to secure a footing on the Nile, although the British Government announced in '95, through Sir Edward Grey, that it would regard the sending of an expedition into the Nile Valley as an unfriendly act. Notwithstanding this, an expedition led by Captain (now Major) Marchand made its way from the Congo and along the Upper Ubangi through the Bahr-el-Ghazal province to Fashoda, on the Nile, where it was discovered by the Sirdar, commanding the Egyptian army, after the defeat of the Khalifa and the fall of Omdurman, in Sept. '98. Major Marchand had been attacked by the Dervishes, and had entrenched himself on a peninsula jutting into the river, which was practically an island. The Sirdar invited him to retire, but this he declined to do without orders from the French Government; therefore a British force was posted at Fashoda so as to cut off his communication with the mainland, and the matter was left to the diplomatists to settle. M. Liotard, Governor of Upper Ubangi, arrived at Paris in October, and, in acknowledging the welcome accorded him, said that he had been directed by M. de Brazza in '90 to occupy the territories to which access was given by Upper Ubangi, and to make of them a French region, with an opening on the Nile. The result of the work thus undertaken was the presence at Fashoda of Major Marchand. Posts had been established along the Ubangi, Mbomu, and Such. What was specially wanted was better means of communication between Brazzaville and the first post of Upper Ubangi. The French Government decided (Nov. 5th) that Major Marchand must retire from Fashoda, in deference to the attitude of Great Britain, but nothing was settled as to the Bahr-el-Ghazal. The area of the colony is 496,920 sq. m. and the population 8,950,000. The colony is under the control of a Commissioner General, and a number of stations have been established throughout the territory. The exports are ivory, ebony and other woods, caoutchouc, and palm oil. See COLONIES, ETC., of EUROPEAN POWERS, EGYPT (maps), FRANCE, and SOUDAN.

**French Guiana.** A colony in South America, on the Atlantic coast, bounded by Dutch Guiana on the west and by Brazil on the south. The area is about 46,850 sq. m., and the population about 22,710. The capital is Cayenne. The colony is used as a penal settlement, and is under a Governor with a Council-General. It is represented at Paris by a deputy. Off the coast of the colony lies the Ile du Diable, where Captain Dreyfus has been imprisoned since his conviction.

**French Guinea.** This colony was detached from that of Senegal in 1890, and now contains three districts geographically distinct from one another, and since March '93 administered by separate governors. The three possessions are (1) French Guinea proper, capital Conakry; (2) the Ivory Coast (formerly called Gold Coast) settlements, capital Grand Bassam; and (3) the Benin settlements, capital Porto Novo, comprising the districts of Porto Novo, Grand Popo, Agoué, and Kotonou. The colony has complete

administrative autonomy, and each district has its own governor. A convention with the Republic of Liberia settled the boundaries of the French possessions on this side in Aug. '94. France gave up all rights over the coast west of the Cavally river, and Liberia gave up similarly her rights over the coast to the east of the river, which was thrown open for navigation and traffic to French subjects, with the right for France to construct works on the banks. As to the interior, by this convention and the agreement with Great Britain made in '95, France secured the control of the hinterland of Liberia and Sierra Leone, and so joined her possessions in French Guinea and the French Soudan. The chief products of the whole region are indiarubber, palm oil, sesame, gum. The coast is generally low and sandy, and the climate is unhealthy. See COLONIES, ETC., of EUROPEAN POWERS, and NIGERIA (map). **History '98.**—The Anglo-French Commission sitting at Paris drew up a convention, which was signed June 15th, settling the boundary line between the French territory and the Gold Coast hinterland. From the intersection of the river Volta with the 9th parallel of N. lat. the line follows the river northwards to its intersection with the 11th parallel, and then turns east along that parallel till the hinterland of Togoland is reached, deflecting so as to give the kingdom of Bawku to the Gold Coast. France thus gained Bona and Dokta and the kingdom of Mossi north of the 11th parallel, but had to give up Wa and other points to the east of the Volta, occupied by them. Lieut. Woelfel attacked a large force of Sofas (Sept. 9th), and repulsed Samory's son and killed his chief lieutenant. Large numbers of prisoners were captured, and over 20,000 natives were reported to have submitted as a result of the action. An even greater result followed. Samory himself and all his family and chiefs were captured by Captain Gourand (Oct. 13th). His power was thus completely broken, and the main, if not the sole, cause of disquiet in the colony was removed.

**French Somaliland** is a wedge of territory on the coast of the Gulf of Aden, which includes the two ports of Obok and Jibutit, and the town of Tajura on the bay of the same name. The colony lies between the British Somali Coast Protectorate on the east and the Italian colony of Erythrea on the north-west. From Jibutit a railway is being built to Harar, in order to open up trade with Ethiopia. Coffee, gold, ivory, musk, and skins are the chief exports. An Administrator was appointed in Aug. '98, with a Council of Administration. The area is about 8500 sq. m., and the population about 30,000. See EGYPT (maps).

**French Soudan.** See SOUDAN.

**French West Africa.** The French colonies in West Africa include Senegal, the Soudan, French Guinea, and the French possessions in the Bight of Benin, as well as Dahomey. Accounts of these will be found in the articles on the Colonies under their various headings. The whole coast-line from Cape Blanco in the north to Togoland is French, with the exception only of the British colonies, Gambia, Sierra Leone, and the Gold Coast, of Portuguese Guinea, and of Liberia. French territory also stretches inland from the coast to the Upper and Middle Niger, thence eastwards to Barraua, on Lake Tchad, and north to

Tunis and Algeria. French Soudan and the French Sahara are included in this vast territory. The latter embraces about 1,000,000 sq. m.; the former probably about 300,000 sq. m. The aim of France is, according to a French writer, to unite the French possessions in Algeria, Tunis, and Senegal, and on the Congo by way of the Central Soudan, and thus to found the greatest colonial empire in the world. A Convention for the delimitation of the French and German possessions in the *hinterland* of Dahomey and Togoland was signed (July 23rd, '97). An Anglo-French Commission to settle the boundaries of the respective territories of the two nations in West Africa met at Paris in November '97, and drew up a convention in which the settlement was embodied (June 15th, '98). See SOUDAN.

**Friendly Societies.** The Friendly Societies Act, '96, and the Collecting Societies and Industrial Assurance Companies' Act, '96, consolidates all the law upon the subject. The last annual report of the Chief Registrar of Friendly Societies is for the year ending Dec. '96. The societies include Friendly Societies proper, with their branches, Benevolent Societies, Cattle Insurance Societies, Working Men's Clubs, and specially authorised societies for various purposes, and in addition to these the Registrar has to deal with Industrial and Provident (co-operative) Societies, Building Societies, Trade Unions (*q.v.*), certified Loan Societies, Trustee Savings Banks, Railway Savings Banks, and certain Scientific and Literary Societies certified for exemption from rates. The Registrar has exclusive jurisdiction in the settlement of disputes with the Post Office Savings Bank and Trustee Savings Banks. The following figures give an interesting summary of the latest information available as to the various classes of societies making returns to the Registrars of Friendly Societies in the United Kingdom:—

Holy Spirit, and their belief that no one should be paid or appointed by human authority for the exercise of the gift of the ministry. In obedience to this belief they hold their meetings without any prearranged service or sermon, and sometimes in total silence. The Friends believe that the sacraments of Baptism and the Lord's Supper are to be taken spiritually, and not in an outward form. Their protests against the use of oaths and against the exaction of tithes and church rates cost them much suffering and frequent imprisonment during the first fifty years of their existence. The simplified dress which Friends adopted from conviction two hundred years ago became stereotyped into a uniform. This dress has generally been given up, as have the "testimony" against music and singing in its rigid application, and the peculiarities of speech, such as the use of "thee" and "thou" instead of "you" (though many Friends still retain this custom amongst themselves), and the avoidance of all titles of courtesy. Of late years there has been a very decided evangelical movement among Friends, under the influence of which the old quietism is dying out. As a result of this change the influence of the Society beyond its own borders, through home and foreign missions and adult First Day (Sunday) Schools, has developed to a remarkable extent. In this country Friends have recently been increasing in numbers. The latest statistics of the Society are as follows: members in Great Britain, 16,854; in Ireland, 2592. Total membership, 19,446. Attenders of meetings in Great Britain and Ireland not in membership, 8046; First-Day scholars—Adults, 29,106; Juniors, 16,407. There are probably about 92,398 in the United States and Canada, besides small numbers in other countries. There is also in America a numerous body of Friends called "Hicksites" (from their founder, Elias Hicks), who about sixty years ago separated from the orthodox community,

	Number of Returns.	Number of Members.	Amount of Funds.
Friendly Societies (not collecting) and Branches . . . .	23,998	4,203,601	£22,695,039
Collecting Societies . . . . .	43	3,875,215	2,713,214
Other Societies under the Friendly Societies' Acts. . . .	557	241,446	594,808
Industrial and Provident Societies . . . . .	1,921	1,401,872	20,998,901
Building Societies . . . . .	2,625	637,635	55,559,186
Trade Unions . . . . .	588	1,077,890	1,789,285
Loan Societies . . . . .	356	39,116	273,449
Railway Savings Banks . . . . .	16	34,139	2,845,213
Total . . . . .	30,104	11,510,914	£107,469,095

Central Office, 28, Abingdon Street, S.W. Chief Registrar, E. W. Brabrook, C.B. (salary £1500); Assistant Registrar, J. Duncan Stuart Sim (£800); Actuary, W. Sutton (£800); Chief Clerk, W. Bingham (£500).

**Friends.** The Society of Friends, commonly called Quakers, was founded in the middle of the 17th century by George Fox. "Friends" are distinguished from other Christian bodies by the special stress they lay on the immediate teaching and guidance of the

and hold latitudinarian views. The Wilburite section are conspicuous in Pennsylvania by their adherence to the livery and the "plain language." Large numbers of persons who do not appear in the statistical returns attend the Mission meetings of the Society of Friends, and very large numbers come under their influence in the foreign mission field, where 82 missionaries are at work. Headquarters in Great Britain: Devonshire House, 12, Bishopsgate Without, London, E.C.; in Ireland, 6, Eustace St., Dublin.

## G

**Gambia.** A British colony on Gambia river, the most northerly and the oldest of the British settlements on the coast of West Africa. Capital, Bathurst, pop. 6138. Consists of St. Mary's Island, with Combo on south, Albreda, Barra, and The Ceded Mile on north bank. Up the river are several stations, of which McCarthy's Island, 187 miles from the mouth, is the highest. The area of the whole colony is about 2700 sq miles, and the population 50,000. Produces ground-nuts, hides, beeswax, rice, cotton, maize, grain, indiarubber, etc. Ruled by Administrator, a Legislative Council of seven members, two non-official, and an Executive Council. See BRITISH EMPIRE (table).-

**Game Laws.** Animals *feræ naturæ* (wild animals) are not in English law subjects of property, and therefore are not protected by the law of larceny. Special statutes, accordingly, have been enacted for the preservation of game, and these are known as the game laws. Game, as a legal term, comprises hares, pheasants, partridges, grouse, heath or moor game, black game and bustards (1 and 2 Will. IV., c. 32, s. 2). By the Ground Game Act, '80, it is provided that the occupier of land (the tenancy of which has been created since Sept. 7th, '80) shall have the right to kill ground game (hares and rabbits) thereon equally with the landlord, and shall be unable to alienate this right; but he may authorise certain others to kill his game. See ed. '87.

**Gaming.** See Law, '98.

**Gardiner, S. R., D.C.L., LL.D.,** the distinguished historian, was b. in 1829 at Ropley, Hants. He was ed. at Winchester and Christ Church, Oxford, and is a Fellow of Merton. His chief historical works include a "History of England, 1603-1642," and a "History of the Great Civil War," published in four volumes in '93. Two volumes of a "History of the Commonwealth and Protectorate" appeared '94-7. Dr. Gardiner was for some time Professor of Modern History at King's College, London. In '82 a Civil List pension was granted to him. Address: 7, South Park, Sevenoaks.

**Garther King of Arms.** The holder of this office of dignity and historic interest is, within the College of Arms, above all other officers. His powers include the adjustment of arms in England and Wales, and the power of granting arms under the authority of the Earl Marshal in conjunction with the provincial Kings of Arms, according to their several jurisdictions, to persons qualified to bear them, and the creation of arms, crests, cognisances, and devices, as well as the power and authority to grant armorial bearings. He has, under the Earl Marshal, the regulation of the proceedings at State ceremonies, and the guidance of coronations; and he controls and manages all matters concerning the Order of the Garther. At the commencement of every Session he lays on the table of the House of Lords the roll of the lords temporal, and he assists at the introduction of all newly created peers (see PEERAGE). The present holder of the office, Sir Albert Woods, K.C.B., K.C.M.G., F.S.A.,

is son of the late Sir William Woods, Garther King of Arms, and entered the College of Arms (Queen Victoria Street, E.C.) as Pursuivant. 1838, was appointed Lancaster Herald '41, and assumed his present office '69.

**Garther, The Most Noble Order of the.** Was originally established by King Edward III. in 1349. As reconstituted in 1831 it is limited to the Sovereign, the Prince of Wales, and such descendants of George I. as may be elected to be members of it, and to twenty-five Knight Companions; but sovereigns and princes of other realms, and other foreigners of distinction, may be admitted by special statutes. Its abbreviation is K.G., and it is the highest order of knighthood. Its insignia and habit are most elaborate and imposing, and include the George, a gold medallion of St. George and the Dragon, suspended from a blue ribbon; the Garther, which is worn below the knee of the left leg, and is made of dark blue velvet, edged with gold, its motto being "*Honi soit qui mal y pense*" ("Evil be to him who evil thinks"); a mantle of blue velvet lined with taffeta, with the star of the order embroidered on the left breast; a hood and surcoat of crimson velvet, and a hat of black velvet; a collar of gold weighing thirty ounces, and the star with the cross of St. George in the centre, encircled by the Garther. There are at present fifty K.G.'s in all, including the Sovereign, and the following is a full list of them, the date of creation being prefixed in each case:—

## THE SOVEREIGN.

- 1835. Cambridge, H.R.H. the Duke of.
- 1867. Connaught, H.R.H. the Duke of.
- 1878. Cumberland, H.R.H. the Duke of.
- 1863. Saxe Coburg Gotha, H.R.H. The Reigning Duke of (Edinburgh, the Duke of).
- 1841. Wales, H.R.H. the Prince of.
- 1884. York, H.R.H. the Duke of.
- 1893. Saxe Coburg Gotha, The Hereditary Prince of.

- 1867. Austria, the Emperor of.
- 1866. Belgians, the King of the.
- 1865. Denmark, the King of.
- 1896. Denmark, the Crown Prince of.
- 1877. German Emperor, the.
- 1873. Hellenes, the King of the.
- 1892. Hesse, the Grand Duke of.
- 1866. Schleswig-Holstein, H.R.H. Prince Christian of.
- 1878. Italy, the King of.
- 1862. Mecklenburg-Strelitz, the Grand Duke of.
- 1891. Naples, H.R.H. the Prince of.
- 1895. Portugal, the King of.
- 1889. Prussia, Prince Henry of.
- 1892. Roumania, King of.
- 1893. Russia, H.I.H. the Czar of.
- 1882. Saxony, the King of.
- 1882. Sweden and Norway, the King of.

## THE KNIGHT COMPANIONS.

- 1892. Abercorn, Duke of.
- 1886. Abergavenny, Marquis of.
- 1883. Argyll, Duke of.
- 1867. Beaufort, Duke of.
- 1894. Breadalbane, Marquis of.
- 1897. Buccleuch, Duke of.
- 1891. Cadogan, Earl.

- 1865. Cowper, Earl.
- 1897. Derby, Earl of.
- 1892. Devonshire, Duke of.
- 1862. Fitzwilliam, Earl.
- 1883. Grafton, Duke of.
- 1885. Kimberley, Earl of.
- 1895. Lansdowne, Marquess of.
- 1873. Leicester, Earl of.
- 1888. Londonderry, Marquis of.
- 1886. Norfolk, Duke of.
- 1886. Northumberland, Duke of.
- 1867. Richmond and Gordon, Duke of.
- 1869. Ripon, Marquis of.
- 1892. Rosebery, Earl of.
- 1891. Rutland, Duke of.
- 1878. Salisbury, Marquis of.
- 1864. Spencer, Earl.
- 1870. Westminster, Duke of.

The Bishop of Winchester is Prelate, the Bishop of Oxford Chancellor, and the Dean of Windsor Registrar of the Order. Sir Albert W. Woods, K.C.B., K.C.M.G., F.S.A., is Garter Principal King of Arms. General Sir Michael Biddulph is Gentleman Usher of the Black Rod.

**Gas Companies' Charges.** See SESSION, sects. 66 and 104.

**Geikie, Sir Archibald, F.R.S.,** was b. at Edinburgh 1835. Ed. at the High School and the University. Appointed to the Geological Survey in '55. On the extension of the Survey in '67 he was appointed director of the Survey of Scotland, and in Dec. '70 was nominated by Sir Roderick Murchison as first occupant of the chair of Mineralogy and Geology, founded in the University of Edinburgh by Sir Roderick and the Crown. In '81 he was appointed **Director-General of the Geological Survey of the United Kingdom**, and Director of the Museum of Practical Geology, London. Sir Archibald has been Foreign Secretary of the Royal Society, President of the Geological Society, and President of the British Association. He has written numerous works on geology. The honour of **knighthood** was conferred upon him on the Queen's Birthday, '91. He has received the hon. degree of D.Sc. from the Universities of Cambridge and Dublin, that of LL.D. from those of Edinburgh and St. Andrews, and that of D.C.L. from the University of Oxford. He is a Correspondent of the Institute of France, and Foreign Member of the Academy of the Lincei at Rome and of the Royal Academies of Berlin, Vienna, Stockholm, Brussels, Göttingen, Munich, etc. Official address: Geological Survey, 28, Jermyn Street, London, S.W. Town address: 10, Chester Terrace, Regent's Park, N.W., and Athenæum Club.

**General Assembly.** See CHURCH OF SCOTLAND, PRESBYTERIAN.

**Gentlemen-at-Arms.** A bodyguard to the sovereign instituted in 1509 by Henry VIII., and the oldest corps in H.M. service except the Yeomen of the Guard. Its members were "chosen of Gentlemen that be comen and extracte of Noble Blood." Towards the close of last century it fell into great degeneration, and the posts were systematically bought and sold. But the corps is now of a far higher social standard. It contains over forty members, all of them ex-commissioned officers of distinction. It is only mustered for duty on such occasions as drawing-rooms, levées, and great state ceremonies. The captain of the corps changes with the Ministry (*q.v.*).

## GEOGRAPHICAL PROGRESS, '98.

Wide-spread activity and steady progress marked the year's record. In Asia Captain Deasy continues his explorations in the heart of the continent. He has made important corrections in the mapping of the Yarkand. From Langar (about  $37^{\circ} 41' N.$ ) it runs almost due N. to Kosaral, near which it makes a sharp bend to the E. Great difficulties were experienced by Captain Deasy, especially in the Sandal Dawan, a region hitherto unmarked on the maps. A Hungarian expedition, conducted by Count Zichy, has gone out to make investigations regarding the early home of the Magyars and their subsequent migrations, the special objective points being the country of the Bashkirs and certain districts near Lakes Balkash and Baikal. An expedition led by Professor Karl Futterer, primarily geological in its object, has crossed Asia, doing excellent work in the neighbourhood of Kashgar and in the south-west of the Gobi desert, whence an exploration of Lake Koko-nor and the upper waters of the Hoang-ho is planned. Professor M'Kenny Hughes has been examining the country around Lake Gokcha, on the margin of the Armenian plateau. Baron von Grünan has been able to rectify some errors in existing maps of Korea, as the result of his recent travels in that country.

**Africa.**—M. Foa has successfully completed his journey across the continent from the Zambesi to the Congo. Much work was accomplished, including the fixing of many positions by astronomical observations. An interesting account has recently appeared of the Inyanga plateau, in Southern Rhodesia. It has an elevation of 7,500 ft. and over, and is noteworthy for the vast series of narrow artificial terraces, which some unknown tribe constructed for irrigation purposes along the sides of its mountains and valleys. The members of Major Macdonald's survey party have been able to do useful work in Uganda, notwithstanding the Soudanese rebellion. Lieut. Hobart, one of the officers, discovered a small lake, drained to the Victoria Nyanza by the Kibale or Kuvale River. M. Durragon, in the execution of a mission entrusted to him by King Menelik, took an important journey in the Galla country. To the north of Lake Pagade he found a small lake, Abbascu, east of which a range of mountains rises to over 9000 ft. His map of this region differs in some points from that of other travellers. Mr. Wallace affords definite information with regard to the condition of Lake Rukwa, as to which uncertainty had arisen, some travellers having reported that it was drying up. Mr. Wallace made the circuit of the lake, and found the greatest length to be 25 geographical miles; he thinks, however, that in rainy seasons it may extend to 75 or 80 miles. Major Marchand's mission, though of primary interest in its political aspect, has also important geographical bearings. His journey from French Congo to Fashoda is the most remarkable journey made in Africa for many years. The regions examined during its progress include the Sueh river, the Wau valley, and part of Mboma. M. Foureau, the Saharan explorer, assigns to Insaleh a longitude considerably to the east of that usually given. This is a point of more than local importance, as the mapping of the whole of

Tuat and the neighbouring country is based on the position of Insaleh. Recent surveys by Captains Germain and Laperrine show that it must be marked more to the east, though not quite to the extent suggested by M. Fourreau. M. Gentil, sent out by the French Government to place a steamer on Lake Chad, has successfully accomplished his mission. The Shari, and its tributary the Gribengi, were surveyed, and the mouths of some rivers discovered. The expedition of Captain Cazemajou to the country north of Sokoto has met with disaster. Several of the members, including, it is feared, the leader, were massacred by Zindu natives. Captain von Carnap, after exploring the interior of the Cameroons, journeyed by the Sanga valley to the Lower Congo, being the first European to trace a land route between these regions.

**North America.**—The measurement of the Transcontinental Arc of the United States, a work which has occupied more than a quarter of a century, is now practically complete. Its length, between the lighthouses of Cape May and Point Arena, is 2625·6 miles. The network of triangulations from which it is deduced includes 266 primary stations; more than 20 of the lines have a length of over 100 miles; and one of 183 miles, between Uncompaghe Peak and Mount Ellen, stands unique as the longest line of single sight.

**South America.**—Some almost unknown parts of Colombia have been visited by Mr. Pratt, and like service has been done in Northern Venezuela by Major Stanley Paterson. Major Orton Kerbey has made an important journey in the basin of the Upper Amazon. Starting from Cuzco, he descended the valleys of the Urubama and Ucayli to the junction of the latter with the Marañon. Dr. Hermann Meyer has resumed his investigations in Brazil, on the Atelchu, one of the head streams of the Xingu, discovered by him two years ago. Sir Martin Conway is leading a party to explore the lofty Bolivian Andes. The ascent of Illimani (22,500 ft.) has been successfully accomplished, the climb from the highest point of cultivation occupying five days. Two important Chilean expeditions sent out this year have proved very successful. One, led by Dr. Steffin, known for his exploration of the Aisen river, entered the Poychuapi fiord and discovered a large unknown river, which was ascended, the party eventually working their way to Nahuel-huapi. The other expedition, led by Dr. P. Krüger, with whom was Dr. Ernst Rethwick, explored the unknown upper portions of the Corcovado. The river was found to issue from a glacier about 30 miles from the coast, its basin eastward being bounded by a steep range. The Feutaleufu, discovered on a previous expedition, was found to have no connection with the Corcovado. Two other travellers, Messrs. Hatcher and Paterson, discovered in Patagonia another river (which they named Meyer) having its source in a glacier on the east side of the Andes, through which it flows by a deep gorge to the Pacific.

**Australasia.**—Of work in the island-continent there is none calling for particular notice here. Special interest attaches to the very important scientific expedition sent out by the University of Cambridge to investigate the islands of Torres Straits and the neighbouring lands. The expedition, led by Dr. A. C. Haddon, accompanied by a very strong staff of specialists,

reached Murray Island at the end of April, and forthwith commenced work. Sir W. Macgregor has made a second journey across New Guinea, in the reverse direction to his journey of 1896, and gained much additional information of the country. Catholic missionaries have also been exploring the upper branches of the St. Joseph river, in a region covered with rugged mountains, one summit of which, Omu Manai, is said to reach an elevation of 14,000 ft. Signor A. Giulianetti traversed the Owen Stanley Mountains, and found that the principal branch of the Vampa, formerly supposed to rise in Mount Victoria, has its head streams farther north in the Wharton range and Mount Albert Edward. Lieut. Tappenbeck, in German New Guinea, has proved the identity of the Ottoman river with the Ramu discovered by Dr. Lauterbeck. The river, which proves to be an important highway, was descended for 125 miles. Its outfall is a little E. of the Kaiserin Augusta. In Borneo the Rijanj river was ascended by Dr. H. M. Miller for 300 miles, and found to have its source in the unexplored mountains called Apok Byang. Mr. Andrews, of the British Museum, has returned from a very successful expedition to Christmas Island. The island is covered with exceedingly dense vegetation, and immense numbers of land-crabs and swarms of tree-climbing rats characterise the fauna.

**Geographical Societies.** See ROYAL GEOGRAPHICAL SOCIETY and ROYAL SCOTTISH GEOGRAPHICAL SOCIETY.

**Geological Survey.** This organisation was founded by Sir H. T. De la Beche, who commenced work single-handed in the south-west of England about 1830. The Geological Survey was officially recognised as a branch of the Ordnance Survey in '34. In '45 it was placed under the office of Woods and Forests, and in '54 under the department of Science and Art. A detailed summary of the progress of the survey is now issued annually. The entire geological survey of England on the **one-inch ordnance maps** (scale 1 : 63,360) has been completed, with the exception of the drifts; the **six-inch scale** (1 : 10,560) has been used for coal-fields and other important districts. The Geological Survey of the South Wales, Leicestershire, and North Staffordshire coal-fields on the six-inch scale is in progress, and the re-survey of Cornwall has been commenced. The drifts were formerly neglected; but for many years past these have been mapped, and hence many sheets are issued in two editions—one showing the solid geology, while the other, or drift-map, shows the superficial deposits. An index map (scale 4 miles to 1 inch) has been issued, and is now printed in chromo-lithography, all the maps of the Survey issued up to '96 having been hand-coloured. The large survey maps are illustrated by horizontal and vertical sections, and by explanatory memoirs. The principal memoir issued in '98 was Mr. Strahan's on the Geology of the Isle of Purbeck and Weymouth. The geological survey of Scotland was commenced in '54, and that of Ireland in '45. The geological map of Ireland on the one-inch scale having been completed, the Irish survey was broken up in '90; but a small staff is retained at the Dublin office to revise the maps of certain districts as occasion may require. The Scotch survey is engaged principally on complicated work in the Highlands. The survey of each country was formerly placed

under a director, and all united under a director-general. The successive directors-general have been Sir H. T. De la Beche ('45-55), Sir Roderick I. Murchison ('55-72), Sir A. C. Ramsay ('72-81), and Sir A. Geikie ('81).

### GEOLOGY, '98.

The probable occurrence of coal-fields beneath the newer rocks of the south and east of England continues to engage the attention of geologists. The experimental borings in East Anglia have not been successful; and, having reached what appear to be very ancient rocks, instead of coal-measures, have been abandoned. In Kent and Sussex, however, work is still being vigorously pushed forward. Mr. R. Etheridge has described the trial-boring at Brabourne, near Ashford, where after passing through 1875 feet of strata, ranging from the Gault to the Lias, a conglomerate was struck, the age of which is supposed by some to be that of the Upper Old Red Sandstone. This does not, therefore, appear very hopeful; but the boring will be continued, it is said, to 2000 feet. In Belgium coal is worked under Devonian rocks, the strata having suffered inversion. Mr. Huddleston, in presiding over the geological section of the British Association, referred to the probability of finding workable coal to the east of the proved Somersetshire coal-field. The concealed coal is probably in a narrow line of east and west basins, and the Vale of Pewsey is regarded as a suitable locality for trials along the supposed subterranean axis. So far as the Kentish experiments are concerned, Mr. Huddleston advises the borers to keep near the line of the North Downs, as operations on the Sussex side may lead them into the thick Kimmeridge beds which attained so remarkable a development in the famous sub-Wealden boring near Battle. A deep boring in quest of coal is being made at Pluckley, a little to the west of Ashford.—The borings into the coral reef at Funafuti, in the Ellice Islands, which were commenced by a committee of the Royal Society, and have been continued by the Australian explorers, have yielded results which appear to support Darwin's views as to the formation of such reefs. The cores, sent over by Prof. E. David, of Sydney, will be examined in this country. A committee of the British Association has explored some caves near Tremairechion, in the Vale of Clwyd, known as the Ty Newydd caves; the actual work having been conducted by the Rev. G. C. H. Pollen. The chambers had been completely filled with stratified material of local origin, introduced before the appearance of the boulder clay with western and northern drift. The tooth of a rhinoceros found in the lower part of the cave showed that this animal lived in North Wales in pre-glacial times.—The geology of Spitzbergen has been described before the Geological Society, by Mr. Garwood and Dr. Gregory, who accompanied Sir Martin Conway's expedition. Their observations throw much light on the movements and habits of glaciers; but they failed to find any characters whereby it would be possible to decide whether a given deposit had been formed by land-ice or by sea-ice, by glacier or by iceberg. They saw how material could be uplifted to a great elevation by glacial action; and hence there is nothing improbable in the famous shell bearing drifts at a considerable height on Moel Tryfaen, in Carnarvon-

shire, having been upraised by means of land-ice. Remains of the mammoth and rhinoceros have been found in a pleistocene deposit above the London clay at Carshalton, in Surrey; and Dr. Hicks has called attention to the occurrence of similar remains in the drift of Hendon.—The gravels of the Southern counties have been carefully studied by Mr. A. E. Salter, who has contributed recent papers on the subject to the Geologists' Association. A curious discovery of natural gas has been made near the Heathfield station, in East Sussex, while sinking through the Wealden and Purbeck beds in quest of water. The gas contains a large proportion of methane, or marsh-gas, and issues under considerable pressure. The phenomenon has been studied and described by Mr. C. Dawson.—In the prosecution of the work of the Geological Survey of Scotland, some interesting fossil fishes, new to science, have been discovered and submitted to Dr. Traquair for description. These fossils were obtained from the Ludlow beds at the top of the Silurian system, and from the Downtonian strata which form passage-beds leading upwards to the Old Red Sandstone.—Mr. Smith Woodward, of the British Museum, has contributed a valuable volume on *Vertebrate Palæontology* to the Cambridge series of Natural Science Manuals.—Geology is represented in this country by the Geological Society of London, which has offices at Burlington House, and issues a quarterly journal. President for '98-9, W. Whitaker, F.R.S.; Secretaries, W. H. Herries and Prof. W. W. Watts. The Geologists' Association meets at University College, Gower Street. President, J. J. H. Teall, F.R.S. The Palæontographical Society is only a publishing body for the issue of figures and descriptions of British fossils.

**George I.** (Christian William Ferdinand Adolphus George), **King of Greece**, is the second son of King Christian of Denmark, and a brother of the Dowager Empress of Russia and the Princess of Wales; was b. 1845. Chosen King of Greece in '63, in succession to Otho I. The vacant throne had previously been offered to Prince Alfred (Duke of Edinburgh), and to Duke Ernest of Saxe-Coburg Gotha. King George married in '67 Princess Olga, daughter of the Russian Grand Duke Constantine, and has five sons and one daughter. An attempt to assassinate him was made in '98, but happily failed. The eldest son and heir-apparent is Prince Constantine, Duke of Sparta, who married Princess Sophia of Prussia in '89.

**George of Wales, H.R.H. Prince.** See YORK, H.R.H. GEORGE, DUKE OF.

**German South-West Africa.** A German protectorate in West Africa, coast extending from Cape Frio to Walfisch Bay, inland to 20° E. long. The area is estimated at 320,000 sq. miles, and the pop. 200,000. Coast infertile and desolate; inland are richer tracts. Damaraland is the name of the northern district, Namaqualand and Luderitzland lying to the south. Damaraland is occupied by the **South-West African Company**, an Anglo-German syndicate, which was formed in London in '92, and obtained from Berlin a concession to search for and work the minerals of the district, including the copper mines of Otavi, but outside of the district worked and occupied by the German South-Western Africa Colonial Company, which district consists chiefly of the coast lands. The German Government, owing to complaints that too great favour had been shown to the Anglo-

German Company, decided to give preference to German settlers, and to reserve certain parts of the country for them for ten years. The country is apparently rich in copper and in agricultural resources, though as yet it is quite undeveloped. Coffee is exported. The seat of administration is at Great Windhoek, 170 miles inland from Walfisch Bay. The German Government decided in '97 to commence the building of a railway from the coast to the interior. The line is to be 90 kilometres long, with narrow gauge, and, although it is to be built for mule traffic, some engines were sent over with the railway material. The first section of the line, to Windhoek, in Damaraland, was opened in December, '97. The Reichstag granted 1,000,000 marks for continuing the railway and telegraph lines from Swakopmund to Windhoek (Feb. 13th, '98). They were declared by the Governor to be necessary for the 1300 whites settled there, and for a large number of natives as well.

### GERMANY.

The German Empire is a confederation of German states under the presidency of the Emperor William II., of Hohenzollern, King of Prussia. According to the constitution of April 16th, 1871, all the states of Germany are to form an eternal union; the direction of political and military affairs is vested in the Emperor, who may declare war, but if it is not defensive, the consent of the Bundesrath, or Federal Council is required. The legislative functions of the empire are vested jointly in the Reichstag and the Bundesrath. This body, which represents the individual states of the empire, as the Reichstag represents the German nation, consists of fifty-eight delegates, appointed by the governments of the individual states for each session. Of these, seventeen sit for Prussia, six for Bavaria, four each for Württemberg and Saxony, three each for Baden and Hesse, two each for Mecklenburg-Schwerin and Brunswick, and one each for the remaining states, including Hamburg, Lübeck, and Bremen. Of its functions, it may be said that the Bundesrath is mainly a confirming body, although it has the privilege of rejecting measures passed by the Reichstag. It has also a limited initiatory power, which it occasionally exercises. Members of the Bundesrath have the right of appearing in the Reichstag, and of speaking on any question in which the state they represent is directly interested. Members of the one chamber, however, are not eligible for election to the other, although they may sit in their respective provincial diets. The Reichstag is composed of 397 members, elected by universal suffrage and ballot for the term of five years. Of these 236 constitute the elected of Prussia, 48 represent Bavaria, 23 Saxony, and the remainder the other states in due proportion, ranging from 1 to 17. The following states are included in the confederation: The kingdoms of Prussia, Bavaria, Württemberg, and Saxony; the imperial province of Alsace-Lorraine; the grand duchies of Baden, Mecklenburg-Schwerin, Hesse, Oldenburg, Brunswick, Saxe-Weimar, Mecklenburg-Strelitz, and fourteen smaller states.—Religion. Owing to its federal constitution, the relations of Church and State vary in different parts of the empire, but liberty of conscience prevails. The Protestants form 62·7 per cent. of the population, and Roman Catholics 35·9 per cent.,

Jews making up 1·2 per cent. of the remainder. Education is general and compulsory throughout the empire. There are elementary schools, supported from the local rates, in every town and village; and besides the elementary there is an admirable system of secondary education, with special schools for technical education. There are, besides, 21 universities in the empire. Uniform codes of commercial and criminal law prevail throughout the empire, and a uniform civil code was adopted in '96, though it will not come into force till 1900. Agriculture is a very considerable industry, supporting about 19,000,000 of the population. Manufactures employ and support a still larger number, and the chief articles exported are textiles, metal-work, machinery, sugar and other food products, chemicals, etc. Most of the railways, which traverse 28,882 miles, belong either to the Imperial or the State Governments. Area (with Alsace-Lorraine), 208,830 sq. miles; pop. '96, 52,279,915. Revenue, '98-9, £69,157,400; expenditure, £70,561,800 (the revenue is derived from the customs and other Imperial sources, and the balance is made good by contributions from the confederate States); public debt, £113,063,000; imports, '97, £243,230,000; exports, £189,310,000. See COLONIES, ETC., OF EUROPEAN POWERS, DIPLOMATIC, FOREIGN ARMIES, FOREIGN NAVIES, and GREAT BRITAIN AND HER FOREIGN TRADE.

**Political Parties.** The centre of political life in the German Empire is the Reichstag, the constitution of which is somewhat complex. The general election of June '93 resulted as follows: Centre, 96 members; Conservatives, 75; National Liberals, 53; Social Democrats, 44; Radical Popular Party, 24; Imperialists, 23; Poles, 19; Anti-Semites, 17; Radical Union, 14; and a miscellaneous assemblage of the South German People's Party, Guelphs, Danes, Alsations, etc., making 32 in all. The chief features of '94 were the severe rebuke administered by the Emperor to the nobles at the head of the Agrarian party, which resulted in their submission, and the dead set made by members of all parties, notably the Conservatives, against Count Caprivi, the Imperial Chancellor, who ultimately resigned in October, and was succeeded by Prince Hohenlohe. The expulsion of Baron von Hammerstein from the Conservative party and from the editorial chair of its organ, the *Kreuz Zeitung*, and the decision of the Social Democrats not to support the agrarian policy, were the most noticeable events of '95. In '96 a section of the Conservative party, led by Dr. Stöcker, separated to form the *Christian Socialist* group, opposing both reactionary Conservatism and revolutionary Social Democracy. The Agrarian party lost much ground during the year, and what they lost the Liberals and Radicals gained. The National Liberal party showed a tendency to break up, the more progressive members of the party drawing towards the Moderate Radicals, and the more Conservative towards the agrarian and reactionary party. During '97, in prospect of the general election of '98, there were some efforts at promoting union between the various sections of the Liberals, but little came of it. A noteworthy decision, however, was arrived at by the Social Democrats in October—viz., that the party should abandon its policy of obstruction with regard to elections to the Prussian Diet, and work, as far as possible, with the Liberal and Progress-

sive candidates. The General Election took place in June '98, and resulted in the return of the following members: Centre, or Clerical party, 103; Social Democrats, 56; Conservatives, 53; Free Conservatives, 21; National Liberals, 48; Advanced Radicals, 30; Moderate Radicals, 13; Poles, 14; Anti-Semites, 12; South German People's Party, 8; Agrarians, 5; and a miscellaneous group of Hanoverian Guelphs, Alsatians, Bavarians, and others. The Social Democrats thus gained heavily, but the Centre were still left with the balance of power in their hands. The total number of qualified electors was officially returned at 11,200,000, and of voters 7,600,000, or about 67 per cent. The votes cast for the leading parties were:—Social Democrats, 2,120,000; Clericals, 1,333,000; National Liberals, 1,160,000; Conservatives, 900,000; Radical Left, 500,000; Free Conservatives, 220,000; Anti-Semites, 310,000; Moderate Radicals, 230,000; Poles, 180,000; South-German Democrats, 120,000; Alsatian Party of Protest, 90,000; Bavarian Peasants' League, 140,000; Agrarian League, 60,000.

**History, '98.** The naval policy of the Government was laid before the Imperial Diet (Dec. 6th) at the opening of the new Session in the Navy Bill, which embraced proposals for considerably extending and strengthening the Navy during the period 1898–1905, so as to “render it adequate for the effective maintenance of the interests of the Empire on the seas.” A Bill for the reform of military judicial procedure was also introduced, of which the chief feature was the institution of a Supreme Court of Military Jurisdiction, to which appeals might be made from Courts of First Instance. It was also provided that where the offence was purely military, only officers should take part in the proceedings. The occupation of Kiao-Chau (see CHINA) came opportunely enough for the naval proposals, especially when it was decided to send a strong force of marines and a naval squadron under Prince Henry to Kiao-Chau (8th). The squadron left Kiel (16th), after a farewell banquet at which the Emperor spoke of its mission and counselled Prince Henry to meet any meddling with “the mailed fist,” and Prince Henry declared that it was his aim “to declare in foreign lands the gospel of your Majesty's hallowed person.” In January the lease of Kiao-Chau to Germany for 99 years was announced (5th), and China agreed to Germany's constructing a dock and a fortified coaling station. The Bill for the reform of military judicial procedure passed its second-reading stage (March 20th). The Government Bill as to the strengthening of the Navy was also approved of in the main; though on the suggestion of the Clerical party the period named in the Bill for carrying out the Government programme and bringing the fleet up to the requisite strength was reduced from 7 years to 6. The Bill was read a second time (26th), and the Estimates for the first of the six years were also passed. A Bill authorising a provisional commercial agreement with Great Britain for one year, from July 30th, was passed (April 28th), the Government stating that the negotiations for a new treaty had been hampered by Great Britain's insisting upon reserving liberty of action for British Colonies. It was made clear that the most-favoured-nation clause would be continued in general, but would not apply to such colonies as gave a preferential treatment

to British goods over German. The Military Judicial Procedure Bill was carried (May 4th), and the Emperor closed the Session with a speech from the Throne reviewing the work of the past five years (6th). The results of the elections, after the second ballots, which took place in June, showed that the Social Democrats had again increased their strength, while parties were still so distributed that the compact Centre or Clerical party, which was returned practically unaltered, held the balance of power (27th). Prince Bismarck died (July 30th) at Friedrichsruh, and the Emperor decreed national mourning for him. The Emperor and Empress attended the simple funeral service at Friedrichsruh (Aug. 2nd), and the body was laid to rest in the park. Although no definite official statement was made, it appeared to be certain, from statements in the British and German press, that an agreement had been concluded with Great Britain as to British and German interests in Africa, dealing in particular with Delagoa Bay and the Transvaal. The Emperor and Empress left Potsdam en route for Constantinople and the Holy Land (Oct. 12th). Prior to the Emperor's departure, newspapers had occupied themselves very much with the projected journey, and considerable objection to it had been expressed in some quarters, notably in France. At Venice an interview took place with the King and Queen of Italy, and then the Imperial party embarked in the *Hohenzollern* for Constantinople (13th), where they were received with great state by the Sultan in person (18th). The Imperial Chancellor, replying to a request of the German Colonial Society that he would publish the contents of the agreement said to have been arrived at between Great Britain and Germany as to Delagoa Bay and South African affairs, declined to do this, saying that important political considerations prohibited such a course (20th). The Imperial party, after leaving Constantinople, went on to Haifa, Jaffa, Jerusalem, and Damascus. At Jerusalem the Emperor accomplished the ostensible object of his journey by attending the dedication of the new Evangelical Church of the Redeemer, and presented to the German Catholics at Jerusalem the property which he had obtained from the Sultan, known as “Le Dormitoire de la Sainte Vierge.” He also assured all and sundry Germans of his desire and ability to extend to them his powerful protection. The results of the Prussian elections were announced (Nov. 4th), and showed that the Conservatives of all shades had secured 204 seats, the Clericals 100, the National Liberals 77, the Radical Left 25, the Moderate Radicals 10, the Poles 14, and the Danes 2.

**Germany, Emperor of.** See WILLIAM II. OF GERMANY.

**Gibraltar.** The name is a corruption of *Jebel el Tarik*, the Mount of Tarik. Anciently *Calpe*, one of the pillars of Hercules. Is a rocky promontory, 2½ miles long and with an extreme breadth of ¾ mile, on the south of Spain, connected with Andalusia by a low isthmus, and is a British fortress and the “key” of the Mediterranean. Area, 2 sq. m.; pop. 26,050, including a garrison of 5664 men. The rock rises to 1439 feet, and is impregnablely fortified. The town lies within the bay, on the western side. Anchorage is bad. The port is free, and is the *entrepôt* of a considerable trade between North Africa and the United Kingdom. It is also a

coaling station of first-rate importance. Ruled as a Crown colony by the military Governor. For financial statistics see BRITISH EMPIRE (table); see also DIPLOMATIC.

**Giffen, Sir Robert, K.C.B.**, late Controller-General of the Commercial, Labour, and Statistical Department of the Board of Trade. He was born 1837, and educated at Glasgow University, which gave him the LL.D. degree in '84. After a legal training in a solicitor's office, he became a journalist, and was sub-editor of the *Globe* '62-6, and assistant-editor of the *Economist* '68-76. He was then appointed Chief of the Statistical Department of the Board of Trade, and has since discharged the duties of that office and of Assistant Secretary to the Board ('82), and Controller of the Commercial Labour and Statistical Department ('93). He was President of the Statistical Society '82-4, and has published various works, such as "Essays in Finance," "The Progress of the Working Classes in the Last Half-Century," and "The Case against Bimetallism." He retired from the Board of Trade in Oct. '97. Address: 9, Bina Gardens, South Kensington, S.W.

**Gilbert, William Schwenck**, Barrister of the Inner Temple, was b. 1836. Entered the literary world as contributor of "Bab Ballads" to *Fun* and several magazines. Came into note as a play writer on production of his pieces "Palace of Truth" and "Pygmalion and Galatea" ('70-71). Mr. Gilbert has written the librettos of a series of comic operas, which have been set to music by Sir Arthur Sullivan. The list comprises "Trial by Jury," "Sorcerer," "Pinafore," "Pirates of Penzance," "Patience," "Iolanthe," "Princess Ida," "The Mikado," "Ruddigore," "The Yeomen of the Guard," "Utopia, Limited" ('93), and "The Grand Duke" ('96), all of which have attained great popularity. Mr. Gilbert's other notable productions are "Dan'l Druce," "Engaged," and "Sweethearts." Published "Songs of a Savoyard" in Nov. '90. He was appointed a magistrate for Middlesex in June '91, and in that year also wrote "The Mountebanks," which the late Mr. Cellier set to music. He wrote "His Excellency" to the music of Mr. Osmond Carr in '94, the piece being produced at the Lyric. "The Fortune Hunter," a new play, was produced at Birmingham in Sept. '97.

**Gilchrist Educational Trust.** A fund left by the late Dr. John Borthwick Gilchrist (1759-1841) to trustees, "for the benefit, advancement, and propagation of education and learning in every part of the world, as far as circumstances will permit." The income is applied to the support of scholarships for young men and young women, awarded on the result of competitive examinations; in occasional grants to Educational Institutions under special circumstances; and to the delivery of high-class scientific lectures for the people, at a charge for admission of 1d. each per lecture. Secretary, R. D. Roberts, M.A., D.Sc. Office, 17, Victoria Street, Westminster, S.W.

**Girls' Friendly Society.** See YOUNG WOMEN, ORGANISATIONS FOR.

**Girton College.** See HIGHER EDUCATION OF WOMEN.

**Gladstone, Rt. Hon. W. E.** See OBITUARY, and for the proceedings in Parliament, see SESSION, sect. 10.

**'Glasgow Herald.'** A morning newspaper, independent in politics. Founded in 1782. It circulates all over Scotland, and has the highest

reputation in commercial circles throughout the United Kingdom. Editor, Charles Russell. From the same office are issued the *Weekly Herald* and the *Evening Times*. Head Office, 65 to 69, Buchanan Street, Glasgow; London Office, 65, Fleet Street.

**Glasgow University.** Founded by a bull of Pope Nicholas V. in 1450; received a new charter from James VI. of Scotland in 1577; remodelled by the Universities (Scotland) Acts, 1858 and 1889. There were last session 1820 students (257 women), and of the total 771 were students in Arts (179 women) and 665 students of Medicine (71 women). Women students are taught separately at Queen Margaret College. See article on HIGHER EDUCATION OF WOMEN. Chancellor, Rt. Hon. the Earl of Stair, K.T., LL.D. Rector, Rt. Hon. Joseph Chamberlain, M.P. Principal and Vice-Chancellor, Robert Herbert Story, D.D. Parliamentary representative, J. A. Campbell, LL.D. Registrar of General Council, James Coutts, M.A. Degrees: M.A., D.Phil., D.Litt., B.Sc., D.Sc., B.L., LL.B., LL.D., M.B. and Ch.B., M.D., Ch.M., B.D., D.D. Among the distinguished alumni are Adam Smith, Thomas Campbell, Francis Jeffrey, Archbishop Tait, Principal Caird, Principal Shairp, Rev. R. S. Candlish, and Lord Kelvin.

**"Globe, The."** Established 1803, and subsequently incorporated with *The Traveller*. It was started by the old Whig party, and always was recognised as an authority on political matters, its contributors including some who held high office in the State. It retained its Whiggism until 1866, when a new proprietary, recognising the changed times, made it an outspoken though independent Conservative organ, reducing its price from fourpence to twopence, and eventually to one penny. It is now a recognised evening journal of the Constitutional party. Editor, George Elliot Armstrong. Offices, 367, Strand, W.C.

**Gloucester, Bishop of.** See under PEERAGE.

**Goa.** A port-town and territory between the boundaries of Madras and Bombay, India. Once the seat of great trade, now decayed and ruinous. Belongs to Portugal. See COLONIES, ETC., OF EUROPEAN POWERS.

**Gold Coast Colony.** A British Crown colony on the coast of West Africa. The colony has a coast-line of about 350 miles, and though the interior boundaries are not strictly defined, the area may be put at about 45,000 square miles, and the population at 1,500,000, including 37,500 professed Christians. The native state of Ashanti lies inland, at the back of the central portion of the colony. Trouble arose between the King of Kumassi, who had declared himself King of Ashanti in '94, and the British authorities and in '95 an expedition was sent against him, under the command of Sir Francis Scott, which resulted in the submission of the King, who was afterwards taken to the coast. The kings of Bekwai and Abodom also made their submission, and the country was placed under British protection, and a Resident appointed at Kumassi. Accra is the administrative centre of the colony, and has a population of 16,267. The Government includes a Governor, an Executive Council, and a Legislative Council of nine, none of whom are elected. The products are chiefly palm-oil, gold, palm kernels, rubber, timber, etc. See BRITISH EMPIRE (table), DIPLOMATIC, and NIGERIA (map).—History, '98. The Niger Convention, drawn up by the Anglo-French Commission sitting at Paris,

and signed June 15th, settled the boundaries of the *hinterland* to the west and the north. From the intersection of the river Volta with the 9th parallel of north latitude, the boundary runs up the course of the river northwards to its intersection with the 11th parallel, and then turns east along the 11th parallel, deflecting northwards so as to include Bawku, till it reaches German territory in the *hinterland* of Togoland. Bona and Dokta were thus given up to France, and the French had to concede Wa and other points to the east of the Volta which had been occupied by them. (See also NIGERIA.) A number of railway officials left Liverpool (Aug. 4th) in connection with the laying of a Government railway from Sekondi to Tarquah in the gold-mining district of the colony. Railway material had already been sent out, and it was estimated that the construction of the line, which will be about 40 miles long, will occupy three years. The old Ashanti capital of Kumassi is 170 miles from Tarquah, but up to the date given the country between the two points had not been surveyed for railway purposes. The new line will have a gauge of 3 ft. 6 in., and the starting point will be Tacorday Bay, where wharves and piers will be erected.

**Gold Fields and Production.** Gold is found in every quarter of the globe: in reefs or veins among quartz, from which it is separated by quarrying, crushing, washing, and treatment with mercury; in alluvial deposits, from which it is extracted by washing, in dust, grains, laminae, or nuggets. Alluvial deposits are of several kinds—namely, (1) beds of running rivers, involving the employment of dredging apparatus; (2) superficial or not deep deposits, capable of being worked by diggers single-handed; (3) deep alluvial beds, often underlying hard rock, necessitating thorough mining; (4) deposits of gravel, schist, and disintegrated rock, often on hillsides, now generally washed gradually down by means of hydraulic engines. Mining in quartz entails the employment of large capital and expensive machinery, including heavy stamps, cyanide works, etc. The ore is in the first instance crushed by stamps, the separated gold being collected. This process being, however, ineffectual in separating the whole of the gold, the residue is again treated by cyanide, and a considerable further quantity is obtained. Until recently the ore then left, technically known as “slimes,” was regarded as worthless, but now that in its turn is made to yield a further quantity of gold. One of the most interesting developments of recent years has been what is known as deep-level mining in the Transvaal—that is, sinking shafts to a great depth in order to work an existing reef known to dip at a considerable angle. In the Witwatersrand field many deep-level mines are now yielding very satisfactory results. The initial expenditure in connection with quartz mining is so great, that it is mainly conducted through the agency of limited companies, the buying and selling of the shares of which are an important part of the business of the Stock Exchange (*q.v.*). Thanks to the rapid development of gold mining in the Transvaal, Western Australia, and India of recent years, there has been a rapid increase in the production of the metal after unimportant fluctuations for a considerable period. This is clearly shown in the following table, the main figures of which are quoted from the *Statist*:—

Year.	Production in—		
	Australasia.	America.	Whole World.
	£	£	£
1851	1,319,000	11,000,000	17,200,000
1855	11,277,000	11,000,000	27,015,000
1860	10,554,000	9,200,000	23,850,000
1865	10,253,000	10,600,000	24,040,000
1870	8,939,000	10,000,000	21,370,000
1875	7,326,000	6,700,000	22,700,000
1880	6,174,000	7,200,000	22,130,000
1885	5,597,000	6,400,000	21,250,000
1888	5,530,000	6,600,000	21,985,000
1890	6,004,000	6,600,000	24,260,000
1891	5,305,000	6,600,000	26,700,000
1892	6,835,000	6,600,000	29,900,000
1893	7,127,000	7,200,000	32,600,000
1894	7,282,000	7,900,000	37,765,000
1895	8,870,000	9,300,000	41,000,000
1896	8,983,000	10,800,000	45,000,000
1897	11,075,000	11,400,000	51,706,000

As regards the new fields of importance, that of the Witwatersrand takes the first place. Deposits were only discovered there so recently as '86, but owing to the reefs being good and regular, and to the fact that the best scientific methods of mining have been employed, the output has increased by leaps and bounds. It is now practically certain that many years—probably from eighty to a hundred—must elapse before the field is worked out. Gold is known to exist in other parts of the Transvaal, such as the Lydenburg, Klerksdorp, and De Knap districts, but these are being only partially worked at present. The existence of payable gold in Rhodesia has been a much disputed point for many years past. In the autumn of '98 a few mines began to crush, and the question is therefore likely to be determined one way or the other before long. The output in Western Australia is also steadily increasing, but the gold there is scattered over a wide area, and the reefs in many parts are irregular and patchy. In the neighbourhood of Kalgoorlie, however, very large and rich reefs are being systematically worked. In none of the other Western Australian districts have important developments taken place during the year. In India there has been steady progress without any occurrences worthy of note. Gold mining in New Zealand continues in a somewhat unprogressive condition, but in British North America, especially in the Klondike region, rapid progress is being made.

### GOLF, '98.

Golf retains and even increases its hold on popular favour, and each year more links are added to the large number that now exist. The following are the most important matches that have taken place during the year. On Feb. 17th J. H. Taylor and J. Braid played a grand game in a 36-hole match at Wimbledon, for a prize presented by Sir George Newnes, Bart., in which Taylor won, his score being 150 against Braid's 154. On April 2nd, at the opening of the new Wimbledon Park Golf Club, a match was played between Rowland Jones, the professional of the new club, and P. Paxton, when the former won by 2 holes up and 1 to play. An 18-hole match between J. Braid and Jack White at Seaford, on April 13th, resulted in Braid's victory by 4 holes up and 3 to play. A return match was played on the following day at

Newhaven, when Braid again won by 7 holes up and 6 to play. A 72-holes professional Four-some for £100 was played between A. Kirkaldy and A. Herd on one side and B. Sayers and A. Simpson on the other, on April 14th and 21st. At the end of the first day the former were leading by 3 holes, which advantage they increased to 12 up and 11 to play, by which they won. On April 14th J. Braid beat Jack White. On April 19th, at Aberfeldy, A. Kirkaldy beat A. Herd in an exciting match by 1 up. On April 23rd W. Fernie beat J. Kinnell in a 36-holes match, the scores being 151 to 154. A. Herd beat Tom Vardon in a 36-holes match on April 30th by 148 strokes to 155. At Hastings, on May 4th, a match between many noted professionals resulted in favour of A. Herd, whose score was 148. On May 11th, at Burnham, Somerset, J. H. Taylor beat J. Braid, the scores being 163 and 160; and on the 18th, at East Finchley, a match between the same professionals ended in a tie, the scores being 154. Miss Lena Thomson won the Ladies' Golf Championship at Great Yarmouth on May 20th. The Amateur Championship was won by Lt. F. G. Tait (Black Watch) for the second time, at Hoylake, on May 27th. Mr. S. Muir Ferguson was beaten in the final by 7 up and 5 to play. Mr. Tait also won the St. George's Challenge Cup at Sandwich on June 1st, with a score of 163. W. Park, in a match for £200 against W. Fernie, beat him by 13 up and 12 to play. The Open Championship was played over the Prestwick Links, when Harry Vardon for the second time won, with a score of 3.7, Willie Park being second with a score of 308. Miss K. Moeller won the Ladies' Championship of Yorkshire, Mr. Frank Woodhead being the Amateur Champion of the same county, beating his brother Arthur in the final by 3 up and 4 to play. On July 9th, in two matches at Romford, J. Braid defeated the champion, H. Vardon; but on the 23rd H. Vardon won a match at the North Surrey Ground against other professionals. The Calcutta Cup was won by Mr. E. Blackwell at St. Andrew's on Aug. 5th. At the Carnoustie Tournament for Professionals, on Aug. 13th, Harry Vardon won the 36-holes match, and he also won at the Elie Professional Tournament. The Borough of Deal Amateur Challenge Cup was won by Mr. Schacht. Mr. Macfie won the Queen Victoria Jubilee Vase at St. Andrew's. The Irish Golf Championship was won by Mr. W. B. Taylor, of the Edinburgh Carlton Club, in a most exciting match, an extra hole being played to decide the game. Mr. Dallmeyer, of the London Scottish, was his opponent. On Aug. 26th Kirkaldy beat Scott by 4 up and 3 to play, and a few days afterwards A. Herd defeated H. Vardon by 3 holes up and 2 to play. Mr. Lawson won the Midlothian Cup with a score of 77. Mr. H. W. de Zoete won the King William IV. Medal, at St. Andrew's, with a score of 80, and Mr. F. G. Tait the Club Gold Medal with a score of 78. Harry Vardon won the Newcastle (Co. Down) Professional Tournament on Oct. 1st.

**Goluchowski, Count Agenor**, Austro-Hungarian Minister for Foreign Affairs, was born in 1849. He entered upon his diplomatic career in the Ministry for Foreign Affairs, and in '72 was appointed Attaché and afterwards Secretary of Embassy at Berlin. He then went to Paris as Counsellor of Embassy, and there married a daughter of Prince Joachim Murat. He was Minister at Bucharest, '87-93.

He is a large landed proprietor in Galicia, and has sat as a Conservative in the Austrian Chamber of Peers. He was appointed Minister of Foreign Affairs on Count Kalnoky's resignation in May '95.

**Good Templars, The Independent Order of**, a total abstinence fraternity originated in New York in 1851. In '68 it was extended to England by Joseph Malins, who, by '70, had instituted the Grand Lodge of England, from which the Order has spread round the world. It administers a pledge of lifelong abstinence from intoxicating beverages, and advocates the legal suppression of their common sale. It seeks to protect the abstinent and reclaim the inebriate. It admits both sexes to equal privileges and office. Only a small fee of 6d. or 1s. per quarter is exacted, as it is non-beneficiary in basis. The Order consists of (1) local "Subordinate" lodges, meeting weekly; (2) county "District" lodges, meeting quarterly; (3) national "Grand" lodges, meeting annually; and an "International Supreme Lodge." The latter has met in the United States, Canada, England, Ireland, Scotland, Wales, and Sweden, and next meets at Toronto, Canada, on the fourth Tuesday in June '99. The Order publishes about forty newspapers and magazines in various languages. It has a membership of over 550,000, in about 12,000 branches, governed by 100 different Grand Lodges. There are in the United Kingdom nearly 200,000 adult and junior members, of whom 55,000 adults and 45,000 juniors are under the Grand Lodge of England, whose permanent offices are in Edmund Street, Birmingham. This Grand Lodge has over 1300 lodges, of which 100 are in the army and navy. The Grand Lodge annual session at Plymouth, Easter '98, was attended by 600 representatives and officers. The Juvenile Section of the Order enjoins abstinence from strong drink, tobacco, gambling and bad words, and has 70,000 British members, in 1000 branches. The members have founded a Temperance Orphanage at Sunbury, at a cost of about £10,000. They have Mission Vans, with travelling missionaries to hold open-air meetings and circulate temperance literature in rural parts, and in many counties have latterly formed Good Templar Cycling Brigades. The Grand Lodge of Scotland has 1061 adult and 380 junior branches, with a total of 79,000 members; its office is 72, Great Clyde Street, Glasgow, and its monthly organ is *The Good Templar*. Ireland and Wales have about 500 adult and junior branches, and have an increasing membership. The organ in England is *The Good Templar's Watchword*, weekly; and several local monthlies are issued, besides much literary matter, from the Grand Lodge printing presses, at 168, Edmund Street, Birmingham.

**Gore, Rev. Charles, M.A., D.D. (Edin.)**, was b. 1853, and is the son of the late Hon. Charles Alexander Gore, the brother of the 4th Earl of Arran. He was ed. at Harrow and Balliol College, and was a Fellow of Trinity College, Oxford. Mr. Gore has taken a prominent position in Oxford as the exponent of High Church tenets. The publication of "*Lux Mundi*," for which he was largely responsible, caused almost as much controversy as that of "*Tracts for the Times*." He published in Nov. '91 "*The Incarnation of the Son of God*," being the Bampton Lectures for that year. In May '93 he resigned the headship of Pusey House, and in '94 became

Canon of Westminster. In '95 and '96 he took a prominent part in the Armenian agitation, and in '97 attended, with the Bishop of Rochester, the Convention of the Brotherhood of St. Andrew, at Buffalo, U.S.A. In '98 he edited "Essays in Aid of the Reform of the Church." Address: Little Cloisters, Westminster.

**Gorst, Sir John, M.P.** See under COMMONS.  
**Goschen, Rt. Hon. George J., M.P.** See under COMMONS.

**Gosse, Edmund,** was b. in London 1849. Ed. privately. His book "Seventeenth Century Studies" was published in '80 (3rd edition '97). "The Masque of Painters," which was performed with great success by members of the Royal Institute of Painters in Water-Colours in May '86, was written by Mr. Gosse. In '89 he published "The History of 18th-Century Literature, 1660-1780." His later works include a volume of most interesting essays entitled "Gossip in a Library" ('91); a novel, "The Secret of Narcisse" ('92); a collection of essays, "Questions at Issue" ('93); a critical volume on "The Jacobean Poets"; a collection of lyrical poems, "In Russet and Silver" ('94); "Critical Kit-Kats" ('96), a series of modern monographs; and "A Short History of English Literature" ('97). An edition of Mr. Gosse's works, in 7 vols., was issued in '96. Mr. Gosse is now engaged on the "Life and Letters" of the great Elizabethan poet and divine, Dr. John Donne. Address: 29, Delamere Terrace, W.

**Gothenburg System, The.** See special articles in '93 and '96 editions, "The Gothenburg System of Public-house Licensing," published by the Church of England Temperance Society, 9, Bridge Street, Westminster; a book on the Gothenburg system, by Mr. Edwin Goadby, "Sober by Act of Parliament," published by Swan Sonnenschein & Co., and "The Gothenburg and Bergen Schemes," by D. Lewis, J.P., published by Elliott, Edinburgh. See also LOCAL OPTION.

**Gould, F. Carruthers,** one of the greatest cartoonists of the day, was b. at Barnstaple in 1845, and was ed. in that town. He entered a local bank at the age of 16, and at 20 came up to London and entered a stockbroker's office, eventually himself becoming a member of the Stock Exchange. As a boy his genius for caricature was noticeable, and on the Stock Exchange he found plenty of material ready to his hand. In '79 he began to illustrate the Christmas number of *Truth*, but his first journalistic work was done on the *Pall Mall Gazette* and *Budget* when Mr. Stead was editor. He very soon became a regular member of the staff, and with his colleagues transferred his services to the *Westminster Gazette* when the former paper passed into Mr. Astor's hands. For years his pictorial commentary on the proceedings at Westminster has been brilliant in the extreme, and latterly he has done the literary commentary also with equal success. His "Cartoons for the Crisis" during the general election of '95, afterwards republished separately, put his name into all men's mouths, and firmly established his reputation as a political caricaturist. He is now assistant editor of the *Westminster Gazette*.

**Government.** See MINISTRY, TREASURY, and other articles.

**Grace, Dr. W. G.,** the renowned cricketer, was b. at Downend, Bristol, 1848, and made his

first appearance in important matches in West Gloucestershire v. Bedminster, at Mangotsfield. Between '64 and '79 he made 20,842 runs in a total of 415 innings. His exploits as a batsman, fielder, and bowler, became so celebrated, that the title of "champion" was spontaneously conferred upon him. On July 22nd, '79, at Lord's, the enthusiasm of his admirers took the form of a presentation of the value of £1400. Although pursuing the medical profession, Dr. Grace has still kept his place in first-class cricket. An interesting book upon Cricket was published by him in '91, and another is in preparation. He celebrated his Jubilee in '98, and it was announced in the autumn that he had accepted the position of secretary of the London County Cricket Club, whose ground will be at the Crystal Palace.

**"Graphic, The,"** founded 1869, by Mr. W. L. Thomas, its present manager, is an illustrated weekly of high-class character, and treats of current events. Its Christmas and Summer numbers are especially excellent, and have a very wide circulation. Editor, Mr. T. Heath Joyce. See also DAILY GRAPHIC. Office, 190, Strand.

GREAT BRITAIN AND HER COLONIAL TRADE.

The British dominions are expanding rapidly both in wealth and in population. According to the best estimates, there were 320,000,000 persons subject to the Empire in '87, over 351,000,000 in '93, and about 400,000,000 in '97, exclusive of the inhabitants of Protectorates and spheres of the Empire. In fact, more than a quarter of the population of the civilised world reside under the British flag. The importance of the trade of such multitudes needs no demonstration, and it is therefore not surprising that attention has been closely directed to the best means for making it of mutual benefit, and to the dangers of foreign competition. The Canadian preferential tariff, adopted in '97, and put into full operation in '98 (see CANADA), is of great interest in this connection. Whether other colonies are likely to follow Canada's lead seems very doubtful. It would be extremely difficult, if not impossible, for many of the colonies at present to dispense with a tariff on imports. It is probable that for the present such changes as do take place will be rather in the relation of adjacent colonies to each other than in that of those colonies to the mother country. It is calculated that 70 per cent. of British exports go to foreign countries, while 77 per cent. of British imports are derived from outside the British Empire. The following tables, compiled from the Colonial Office list, show the state of things in the Colonies. The percentage of some of the minor colonies has been omitted to save space, but the general average at the bottom includes all British possessions:—

	Percentage to		
	United Kingdom.	British Possessions.	Foreign Countries.
Cape Colony ..	95	1	4
New Zealand ..	78	15	7
Ceylon ..	70	18	12
Natal ..	64	12	24
Victoria ..	57	29	14
British Guiana ..	52	6	42

## Percentage to

	United Kingdom.	British Possessions.	Foreign Countries
Canada ..	52	4	44
South Australia ..	41	54	5
Queensland ..	39	60	1
West Australia ..	38	61	1
New South Wales ..	36	45	19
Newfoundland ..	36	41	23
India and Burmah ..	31	20	49
West Indies ..	29	8	63
Tasmania ..	21	79	—
Straits Settlements ..	21	14	65
Av'ge for all Colonies	47	27	26

There are great variations in this table, and the colonies are purposely so arranged as to show how much more some colonies send here than others. Of course the fact that some of the exports sent here are for distribution only must not be lost sight of, but broadly it may be said that as regards foreign trade our colonies fall into three distinct categories. There are those which lie contiguous to foreign countries and naturally do a large amount of business with them. Of these Canada, the West Indies and the Straits Settlements are conspicuous examples. There are others which are greatly isolated from the world at large, and therefore depend mainly on Great Britain as a market—for instance, New Zealand, Cape Colony and Natal. The third category comprises those colonies, mainly Australian, which lie near to each other and trade largely with each other. This classification is important, as we are too apt to speak generally of the colonies as if their conditions were similar, while the differences between them are great and have a vital bearing on inter-Imperial trade relations.

With some variations, the classification of imports on the same lines is very like that of exports, as will be seen from the following table:—

## Indian and Colonial Imports.

## Percentage from

	United Kingdom.	British Possessions.	Foreign Countries.
Cape Colony ..	80	7	13
Natal ..	76	9	15
India ..	71	11	18
New Zealand ..	65	27	8
British Guiana ..	55	16	29
West Australia ..	49	49	2
West Indies ..	46	12	42
Victoria ..	42	49	9
New South Wales ..	40	52	8
Queensland ..	36	60	4
Canada ..	36	2	62
Tasmania ..	33	66	1
Ceylon ..	26	68	6
South Australia ..	25	67	8
Newfoundland ..	20	19	61
Straits Settlements ..	14	26	60
Av'ge for all Colonies	47	27	26

Leaving out of account those colonies already alluded to, which, owing to their geographical position, necessarily trade largely with neighbours, it will be seen that foreign competition is much less than many suppose. Allowance has of course to be made for the fact that all the goods exported from this country are not necessarily made here, but even then it is obvious that we command the bulk and the pick of colonial trade in manufactured goods. See COLONIAL CONFERENCE '97.

## GREAT BRITAIN AND HER FOREIGN TRADE.

In the ANNUAL of the last three years much attention has been paid to the rapidly changing conditions of our foreign trade, owing to the eager rush for the development of new markets and the increasing and organised competition of enterprising rivals. The special conditions affecting particular markets throughout the world were surveyed, partly with the view of inducing traders to remedy some of the defects in our commercial system, the existence of which was demonstrated. Generally speaking, it may be said that the conditions explained have changed but little, though in some directions the competition has become accentuated. It is not proposed here to repeat the particular survey of foreign markets (see eds. of '96, '97, '98), but merely to collect certain particulars concerning the mercantile energy of our rivals and the unsatisfactory methods which many British traders employ. Some credit may fairly be taken for the part played by the ANNUAL in calling the attention of the public to these matters.

Early in '97 a Memorandum was laid upon the table of the House of Commons embodying Comparative Statistics of Population, Industry, and Commerce in the United Kingdom and some Leading Foreign Countries. The general conclusion was that the conditions of the manufacturing and industrial predominance of the Kingdom were different from what they were when the non-agricultural population of every country in the world was smaller than in our own—in other words, that industries and manufactures abroad are becoming much bigger things than they were. Later on, a paper embodying Correspondence respecting Diplomatic and Consular Assistance to British Trade Abroad was presented to both Houses of Parliament, and a great deal of information was derived from the Chambers of Commerce throughout the country as to the manner in which this assistance might be increased.

A very important step was taken by the Board of Trade in July '97, in the appointment of a Departmental Committee to undertake an Inquiry into the Development of British Trade. The special instructions to the Committee were that they should consider and advise as to the best means of bringing to the knowledge of the home trades the information furnished by Consuls and Commercial Attachés, and by Agents-General and other representatives of Colonial Governments and of India, as to the supply and demand and other conditions of the markets in their respective districts, and as to the opportunities which they afford for the introduction and development of British trade. They were also to report as to whether in their opinion it was desirable that Consuls and Agents should be instructed to remit home from time to time samples of goods most in demand—this being a recommendation which had been made by many Chambers of Commerce—and if they should be of that opinion they were to advise in regard to arrangements for the exhibition or circulation of such samples.

The Committee presented their Report in July, '98, making a number of general suggestions in relation to the dissemination of commercial intelligence. In regard to a suggested Commercial Intelligence Office, the Committee with practical unanimity recommended the

establishment of an office whose function it should be to meet the constantly increasing demand for prompt and accurate information on commercial matters, so far as it can be met by Government action. There was no desire to suggest anything which would, even if it could, impair the value of the information already obtainable by individual enterprise. It was more than ever essential in these days that our manufacturers and traders should rely mainly on their own efforts to extend the area of their transactions and the amount of their business. Sir James Mackay, a member of the Committee, laid great stress upon this matter, and was of opinion that the establishment of such an office as was proposed would tend to rob the trader, who has embarked in operations in distant regions, of the just fruit of his enterprise, while at the same time it would lay open to foreigners and competitors information that would be very valuable to them. "The State may, however," said the report, "usefully afford assistance in the interests of the trading community as a whole, and may supply information from a broader point of view than that of the individual trader." The Committee further came to the conclusion that it is desirable to obtain more completely than at present particulars and samples of foreign-made goods mostly in demand in foreign, Indian and Colonial markets, and to make arrangements for the exhibition of those samples in our centres of industries and commerce.

In such helps to commerce foreigners are particularly energetic. There are typical museums of the class in Brussels and Vienna, and Commercial Information Bureaus exist in several of the capitals of Europe. In July '98 the French Minister of Commerce announced the institution of a Commercial Intelligence Bureau in Paris, which was to collect and disseminate information concerning raw materials or products which France can import for manufacturing purposes, for consumption, or transit; on customs, tariffs, port dues and taxes affecting trade or navigation; on products capable of finding an outlet in foreign markets, etc., with particulars of conditions of transit, payment, package, the position of markets, firms, etc.; and on undertakings to be opened in foreign countries. Later, in Oct. '98, it was announced that the loss of the Spanish colonies had caused the Spanish Government to form a special sub-department of the Ministry of Foreign Affairs for the purpose of supplying commercial information and statistics to traders. These are but illustrations of the new commercial activity being displayed abroad. In Austria-Hungary a plan has been formed which is striking, though not new, of despatching a Floating Exhibition to make known the products of the dual monarchy in various countries. The exhibition is intended to be installed in a ship of the Austrian Lloyd's Steamship Company, to leave in Dec. '98, carrying a large assortment of samples, with experts and catalogues in four languages, for the Piræus, Salonika, Constantinople, Smyrna, Alexandria, Massowah, Aden, Bombay, Colombo, Calcutta, Akyab, Rangoon, Singapore, Bangkok, Saigon, Batavia, Macassar, Sandakan, Cebu, Manila, Pakhoi, Kiungchow, Canton, Hongkong, Swatow, Amoy, Kelung, Foochow, Shanghai, Chin-Kiang, Wei-hai-wei, Chefoo, Port Arthur, Yuensan, Nagasaki, Kobe, and Yokohama.

But certainly the most important commercial rival we have is Germany, which is everywhere displaying extraordinary energy and enterprise. The Berlin correspondent of the *Times*, writing in October '98, gave an exceedingly interesting account of the development of German influence in Turkey since 1888, largely through the operations of the Deutsche Bank group of financiers, both directly and indirectly. The transaction of business was facilitated, and German enterprise was not slow to take advantage of the new opportunities. Everywhere the beginnings of new business connections are visible, and in many cases it is the promise of future development rather than what has been achieved which merits the intelligent attention of Englishmen. This expansion will doubtless receive a new impetus from the visit to Constantinople of the German Emperor, who said to the German community on his arrival, "I have it from the ruler of this land himself that you have established for yourselves a high position in this capital." The correspondent made some remarks which are confirmed by all experience:—"The German export trade, I am assured on all hands, owes its successes to the stolid, steady perseverance of German industrialists, who imitate the methods of the German general staff, and, it may be added, those of our own admirable Sirdar, in neglecting no detail, however trivial, in their plan of campaign. Putting their pride in their pockets, they accommodate their system to the task in hand. Like great generals and strategists, they are perfectly content to labour for long years in obscurity, and to 'cast their bread upon the waters,' conscious that 'after many days' it will return to them. Above all, they study the business ways of their customers, and do not thoughtlessly apply Western standards to Eastern transactions. Fertility of resource and a prompt willingness to abandon their own experiments, when these prove unsuitable for the purpose in view, are also characteristic of German commercial methods. In the Balkan States, for example, they tried the establishment of warehouses for the exhibition of German products. This was found not to answer, and the idea of commercial museums was simply dropped. In its place the system of sending out large numbers of energetic, well-educated, and experienced commercial travellers was adopted, and it has hitherto yielded the best results."

This commercial activity of the Germans is even more marked in the Far East, where Kiao-chau is expected ultimately to overshadow the prosperity of Chefoo, and to lead to a wonderful increase of German trade. Our system of trade is obviously of a stiff and unbending character. Mr. Byron Brenan, Consul at Canton, in a report to the Foreign Office has made a useful comparison of German and English methods. The young German puts up with trouble and disagreeable experiences much more readily than the young Englishman. English makers, he says, show less eagerness to secure orders than Continental and American rivals. If the critical eye sees vagueness in the applications of a would-be Japanese purchaser, the vendor thinks there can be no real business, whereas the possibility is that the Japanese does not know precisely what he requires. "But the loss of business caused by this unbending adherence to established standards is not limited to the makers who refuse to be accommodating. It

sometimes reacts upon others. One British firm in Japan lost a good order for rails, and consequently some English maker also, because with the rails it was necessary to supply a certain kind of crossing and switches which are not now made in England. The English firm had hitherto got over the difficulty by supplying the rails from England and obtaining from the Continent what the British ironmasters refused to make; but their Continental rivals here saw their opportunity. The order had to be executed as a whole, and if the British firm could be prevented from obtaining the switches, the order would have to be transferred to such parties as could supply all that was desired; so a paternal Government applied a little pressure to the Continental maker of the right kind of switches, and he refused to sell any more to the British firm, who thus were unable to fulfil their orders, and in the end both switches and rails were procured from the Continent."

A remarkable illustration of German commercial zeal is the **Commercial Mission** which was sent out to the **Far East**. The mission visited Canton, Swatow, Amoy, etc., and penetrated 1100 miles up the Yang-tse, staying at the towns on the banks, and especially the newly opened treaty port of Shashi. Samshui and Wuchow were visited, and an accurate knowledge was gained of the province of Chekiang and the southern portion of Kiangsu, as well as of the silk districts of Canton. Some members of the party made an overland journey from Tientsin to Newchwang and the neighbouring districts. The mission also thoroughly investigated the trade conditions of Japan, and had a glance at Korea. The result is that a vast amount of special commercial intelligence has been made available to German traders, with careful provision that it shall not be divulged to others. In April '98 an exhibition of 5,000 samples brought back was opened in two large rooms in the Reichstag buildings, which showed that the collection was the result of close study of technical men thoroughly versed in their work. The exhibition, which was transferred to Dresden before the end of April, had the twofold object of showing what European and American goods are exported to East Asia, and what goods can be purchased out there. The commercial attaché to the British embassy in Berlin has described the interesting conditions on which the collection was on view. These should be carefully noted by British traders as an excellent example of the German commercial system. "The exhibition is only open to those persons actually interested in the trades concerned, and to members of the Chambers of Commerce and some officials; no other persons are admitted, and entrance is only permitted on the presentation of a permit from the Society of Industrialists. The general report, and the valuable special reports on the different branches of particular trades to the East will not be published, except for private circulation amongst those persons interested in each particular branch. Copies of these reports are not to be obtained anywhere for the general information of the public." There is reason to hope that our manufacturers and merchants are now alive to the serious nature of the attack which is being made upon our commerce. With a fair field and no favour the British trader can probably in most things hold his own against the world; but he must

abandon the antiquated and unbending methods of business which forbid him to study the wants of his customers, and cause him to attach great faith to his catalogues in the English language, with English prices, weights and measures, deposited at British consulates, and to a system of payment which is often not suited to his correspondents, as well as to methods of packing goods which are generally far inferior to those of his commercial rivals.

A memorandum lately (Oct. '98) published by the Board of Trade on the **ways and methods of British trade** is a complete exposition of the defective system referred to. Not less than 116 consular and diplomatic officers throughout the world report with much thoroughness upon the prevailing currents of trade, and, with few exceptions, all deplore the supineness and short-sighted policy of the British trader. He finds eager rivals in markets where once he was supreme, and these gain the advantage because they rush forward, while he is apt to be stationary. He has not seen, as this memorandum makes plain, that the conditions of trade are rapidly changing. He makes things that are good, solid, generally honest, and often expensive; and if the customer asks for cheaper objects he will not supply them. Much as he may regret that quantity is valued more than quality all the world over in these days, he must sail with the stream, or his fortunes will be shipwrecked. This is, in effect, what the consuls say. We have almost lost the trade with Poland in agricultural implements because we would not suit our productions to the purses of our customers. Many of the consuls report that our merchants will not sell unless they get large orders, whereas the German will book and execute small orders. One consul quoted in the memorandum says that the chief cause of success in foreign competition is the greater attention paid abroad to the art of exactly suiting the foreign customer's "pocket, taste, and convenience." In regard to the first matter, the Germans seem particularly obliging, though, of course, with an ulterior object in view. While English houses will give only two or three months' credit, or even demand cash on delivery, the German will give six months' credit, so that the consignment may perhaps be sold before payment is made. To give credit without making many bad debts requires an intimate knowledge of the stability of individuals, which can only be obtained by diligent and careful travellers; and these not all English houses take the trouble to send out. Many of the consuls whose opinions are collected in this important memorandum declare that too much reliance is placed in flooding the consulates with elaborately and artistically got-up catalogues, price lists, etc., containing a request that they should be distributed or placed at the disposal of dealers—a system pronounced "absolutely valueless." "In many cases the first thing the recipients of these catalogues and price lists do, on seeing the drawing or design which has taken their fancy, is to apply to the representative of the foreign firms with whom they have been in the habit of dealing in order to ascertain all particulars concerning the articles described in the English language." "One commercial traveller," says the consul at Cherbourg, "who knows the language and the ways of the people, will do more than ten thousand circulars";

while his colleague at Naples remarks that "it is pitiable to see the British commercial traveller stumbling along with an interpreter, while his German competitor is conversing fluently; and one is still more sorry for him when his patterns and samples are marked with British weights and measures." The notes here collected have the purpose of enforcing and recording much that has lately been said, for the condition of our foreign trade has been one of the keenest interests of the year '98.

**Great Central Railway.** See RAILWAYS.

## GREECE.

A kingdom under George I. (*q.v.*), of Glücksburg. The country gained its independence in the famous struggle of 1821-9, after centuries of subjection to Turkey. The present monarch, who is the second son of the King of Denmark, was elected in '63, after the expulsion of King Otto. Executive vested in King and responsible ministers. The legislative authority is in the hands of the *Boulé*, a chamber of 207 representatives elected by manhood suffrage for four years. The deputies are each paid about £72 per session. There are large numbers of Greeks outside the limits of the Kingdom. In Asia Minor there are probably about 2,000,000, in European Turkey about 3,500,000, and large numbers dwell in Crete, Cyprus, etc. The Greek orthodox Church is the State religion, but complete liberty of worship prevails. Education is compulsory, but the law is not enforced. The State has a monopoly in salt, petroleum, matches, and playing-cards. The chief exports are currants, ores, wines, fruit, and olive oil. There are 591 miles of railway open. By the war with Turkey, which arose in '97 out of Greek sympathy with Crete, Greece underwent humiliation and defeat, and had to agree to pay an indemnity of £T4,000,000, and to submit to a strategic reconstruction of the frontier in Turkey's favour. She also had to accept international control in financial matters. **Area** about 25,014 sq. m.; **pop.** ('96) 2,433,806. **Revenue**, '98, £2,502,188; **expenditure**, £2,492,996; **old public debt**, £22,068,660; **guaranteed debt**, £6,800,000; **imports**, '97, 4,590,461; **exports**, £3,229,363. See DIPLOMATIC, FOREIGN ARMIES, and FOREIGN NAVIES.

**Political Parties.** Until '90 the two chief party leaders were M. Tricoupi and M. Delyanni. But in '90 a section of the Opposition under M. Delyanni broke away from him to follow M. Ralli, who posed as the chief of the Neo-Hellenic party. M. Delyanni ruled the country from '90 till March '92, and M. Tricoupi from June '92 (with the exception of a few months during '93) till Jan. '95. In April '95 M. Delyanni was returned to power with 140 supporters, 16 supporters of M. Tricoupi, 18 of M. Ralli, 24 Independents, 8 Progressists, and others being elected. M. Tricoupi thereupon withdrew from political life, and died during '96. M. Delyanni remained in office till April '97, when the popular feeling against him aroused by the Greek reverses during the war with Turkey led the King to dismiss him. M. Ralli succeeded as Premier, and held office till Sept. 30th, '97, when he was succeeded by M. Zaimis. With the formation of the Zaimis Cabinet (Oct. 2nd, '97) a split occurred amongst the Delyannists. M. Zaimis himself had for-

merly been a follower of M. Delyanni; but on his accession to office there was a rupture between them, and very many members of the party supported M. Zaimis. Nevertheless M. Zaimis deemed the opposition too strong for him, and resigned (Nov. 7th, '98).

**History, '98.** The treaty of peace with Turkey was at last signed at Constantinople (Dec. 4th), and the details of the law for the institution of an International Commission of Control over the revenues assigned for the service of the foreign debt and the indemnity loan were settled by the Foreign Minister and the European delegates (Jan. 12th). The Commission consists of six members, one from each of the Great Powers, each in turn acting as president for six months. The Commission nominates its own agents and employés, collecting the money through a Greek company under its absolute control, and furnishing an account of its operations to the Greek Government every six months. In case the assigned revenues should not suffice to pay the foreign loans the Greek Government is responsible for the deficiency. The arrangements with the bondholders were made an integral part of the law, the foreign loans being divided into three categories. The first category comprises the two privileged loans, the Monopoly and Funding; the second includes the Five-per-cent. loans of '81, '84, and '90, and the third the Four-per-cent. Rentes. The revenues assigned as security were monopolies (including emery from Naxos) valued at 12,300,000 drachmas per annum, the tobacco tax valued at 6,600,000, stamps at 10,000,000, and the Piræus Customs at 10,700,000—total 39,600,000 drachmas. In case of a deficiency, the Customs of Patras, Volo, Corfu, and Laurium, valued at 7,200,000 drachmas, were assigned as supplementary revenues. The indemnity loan was successfully arranged (Feb. 24th) with the help of Great Britain, France, and Russia. £T4,000,000 were furnished by a Syndicate under the guarantee of the three Powers, and £T1,000,000 without guarantee. The Greek Bank found the remainder of the loan £T6,600,000. A cowardly attempt to assassinate the King by shooting him while out driving with the Princess Marie failed (27th). The King displayed great courage, and his escape awoke an outburst of enthusiastic loyalty. The two would-be assassins were caught and condemned to death. The Chamber reassembled and the Finance Minister introduced the Bill for the international control of the revenues set apart for the service of the foreign debt (March 3rd). It passed quickly, and practically unopposed, through its various stages, and was carried (7th). The Bill authorising the issue of the loan guaranteed by the three Powers was also carried (April 3rd), and the Session was then closed. The Porte was notified by the Powers (May 6th) that the evacuation of Thessaly must begin, and it was announced (June 6th) that all the Turkish troops had left, and that the province had been reoccupied by the Greeks. M. Zaimis and his Cabinet resigned (Nov. 7th), declining to meet a Chamber which he knew beforehand contained a majority of members hostile to him; but was commissioned by the King to form, and formed, a new Cabinet. The date for the opening of the Chamber was postponed from Nov. 12th to Nov. 27th.

**Greece, King of.** See GEORGE I

**Greene, W. Conyngham, C.B.**, appointed British Agent in the Transvaal, Aug. 27th, '96, is a nephew of Lord Plunket, Archbishop of Dublin, and was b. in 1854. He was ed. at Harrow and Oxford, and then entered the Foreign Office, '77. He has acted as *Chargé d'Affaires* at Athens, Stuttgart, and Teheran, being Secretary of Legation at the latter place. His rank at Pretoria is that of *Chargé d'Affaires*.

**Greenland.** An extensive region or island north-east of America, extending into the Polar regions. The interior is all ice, but parts of the south and west coast are habitable, with verdant pasture, some shrubbery, and mossy valleys. **Principal exports:** oil of seals and whales, fox, seal, and reindeer skins, eider-down, feathers, and cryolite. The chief trade is with Denmark, to which country the colony belongs. **Area**, 46,740 sq. m.; **pop.** 10,516, of whom 309 are Europeans and the rest natives. See **COLONIES, ETC., OF EUROPEAN POWERS.**

**Grenada.** An island in the West Indies forming part of the British colony of the **Windward Islands**. It is the largest of the group, and is the residence of the Governor of the Windward Islands. Its area is about 133 square miles, and the population 60,367. Capital, **St. George**, with a population of 4919. **Products** are sugar, cacao, cotton, coffee, and spices. The Government includes the Governor-in-chief of the Windward Islands, an Executive Council of six, and a Legislative Council of thirteen—six official, and seven nominated by the Crown. For financial statistics see **BRITISH EMPIRE (table)**.

**Grenadines.** A cluster of islets lying between Grenada and **St. Vincent**, some of which are subordinate to Grenada and some to **St. Vincent**. The largest is Carriacou, with an area of 10 sq. m. and pop. 6031. **Exports:** fish, oil, wood, sugar, corn, and cotton. **Area**, 86 sq. m.; **pop.** 6400.

**Gresham College.** The Gresham Lectures, as well as the College in which they are delivered, owe their institution to the munificence of **Sir Thomas Gresham**, the "Royal Merchant" of Queen Elizabeth. By his will, dated July 5th, 1575, Sir Thomas bequeathed certain rents growing out of the Royal Exchange, which he built, to the Corporation of the City of London, and to the Mercers' Company, for the "erecting and maintaining of divers lectures in sundry faculties"—divinity, law, physic, geometry, astronomy, music, and rhetoric. The lectures were organised and commenced in June 1597. The buildings of **Gresham House**, which had thus become Gresham College, were pulled down in 1768, and the General Excise Office erected on the site, the property having been acquired by the Crown for an annuity of £500. In '76, whilst the Earl of Selborne was Master of the Mercers' Company, the Gresham Lecturers submitted two schemes for the improvement of the Lectures, and the recommendations under this head were adopted, the principal being that all the Lectures should be delivered in English instead of Latin and English, twelve lectures to be given in each year by each Professor. The names of the present Gresham Lecturers are as follows: **Physic**, E. Symes Thompson, M.D.; **Rhetoric**, J. E. Nixon, M.A.; **Astronomy**, Rev. E. Ledger, M.A., F.R.A.S.; **Law**, G. H. Blakesley; **Geometry**, W. H. Wagstaff, M.A.; **Music**, J. F. Bridge, Mus. Doc. (*q.v.*); **Divinity**, Rev. Henry E. J. Bevan,

M.A.; Clerk to the Gresham Committee, John Watney, Mercers' Hall, London, E.C.

**Grey, Earl.** See **PEERS.**

**Guadeloupe.** This colony is one of the principal French possessions in the West Indies, and consists of two islands, *Basse-terre* and *Grande-terre*, separated by a narrow salt-water river, with five smaller dependent islands. It is situated in the Leeward group of the Lesser Antilles. Capital, **Pointe-à-Pitre**. **Products:** sugar, rum, coffee, cotton, cacao, bananas, etc. The colony is represented at Paris by a Senator and two Deputies, and has an area of about 680 sq. m., and a total population of 167,000. It is administered by a Governor with an elected Council. See **COLONIES, ETC., OF EUROPEAN POWERS.**

**Guatemala.** The most northern republic of Central America, bounded on the east and north by Mexico, west by Belize, the republics of Honduras and Salvador, and south by the Pacific. Governed by a President, elected for six years, and a National Assembly, elected by universal suffrage for a term of four years. Roman Catholicism is the chief religion, but liberty prevails. Education free and compulsory. **Chief products:** coffee, hides, bananas, and sugar. Army numbers about 7000 officers and men, with militia about 50,000. **Area**, 63,400 sq. m.; **pop.** 1,750,000. Capital, **Guatemala la Nueva**, pop. 85,000. **Revenue**, '97, \$22,073,588; **expenditure**, \$21,433,194; **internal debt**, \$3,000,000; **external**, £1,482,800; **imports**, '97, \$21,462,053 (silver); **exports**, \$19,775,800 (silver). See **CENTRAL AMERICA**; for Ministry, etc., see **DIPLOMATIC.—History**, '98. Señor Barrios, the President, was assassinated (Feb. 9th), and Señor Cabrera, the first Vice-President, at once assumed office. The National Assembly afterwards formally proclaimed him President for the period '99—1905 (Sept. 25th).

**Guernsey.** One of the Channel Islands (*q.v.*).

**Guildhall School of Music**, Victoria Embankment, E.C., was established by the Corporation of London in '80, for the purpose of providing high-class instruction in the art and science of music at a moderate cost. Students are nominated by an alderman or a member of the Court of Common Council. The school commenced with 62 pupils, but now there are more than 3600 pupils. Its origin is traceable to the Guildhall Orchestral and Choral Society, founded in '78. The Common Council having had a report of this school laid before it, granted £350, and lent some buildings in Aldermanbury with which to establish the present school. Its speedy success led the Corporation of London to vote £20,000 for the fine buildings in which the school has carried on its work since '87. The total sum which the Corporation have expended on the school is £50,000, in addition to an annual contribution of £2300. There are several exhibition scholarships in connection with the school. **Principal**, Mr. W. H. Cummings; **Secretary**, Mr. Hilton Carter; **Lady Superintendent**, Mrs. Charles P. Smith.

**Guy's Hospital and Medical School**, London Bridge, S.E. This institution, now one of the great general hospitals of the Metropolis, was built and endowed in the year 1725 by Thomas Guy, a City bookseller. The wards contain accommodation for 650 patients. Agricultural depression has of late years decreased

by £20,000 per annum the income derived from the endowments, and public aid has had to be invoked. The Medical School has recently received an important addition in the erection of the **Physiological Laboratories**, opened in '97 by H.R.H. The Prince of Wales. Guy's also possesses a **Dental School** for complete instruc-

tion in dental surgery and mechanics, being the only institution in London in which the whole of the dental curriculum for the College of Surgeons' examination can be taken. The **Residential College** furnishes accommodation for fifty students and the resident medical staff.

## H

**Haggard, Henry Rider**, was b. at Bradenham Hall, Norfolk, 1856. He was private secretary to Sir Henry Bulwer at Natal, and was subsequently on the staff of Sir Theophilus Shepstone, H.M. Commissioner to the Transvaal, during the temporary annexation of that territory in '77. He was afterwards appointed **Master of the High Court of the Transvaal**. At the commencement of the Zulu war he was adjutant-lieutenant of the Pretoria Horse. He began his career as an author with the publication of "Cetewayo and his White Neighbours" in '82, and subsequently wrote "Dawn," "The Witch's Head," and "King Solomon's Mines." This won for him immense popularity, which was further increased by his romantic allegory "She," "Allan Quatermain," "Jess," "Mr. Meeson's Will," "Maiwa's Revenge," "Colonel Quaritch, V.C.," "Allan's Wife," and "Cleopatra" followed. Then came "The World's Desire," in collaboration with Mr. Andrew Lang, "Beatrice," "Eric Bright-eyes," "Nada the Lily," "Montezuma's Daughter," "The People of the Mist" ('91), "Joan Haste" ('95), "Heart of the World" ('96), and "Swallow" ('98). He is a barrister of Lincoln's Inn and a magistrate for Norfolk and Suffolk, and was Chairman of the Committee of the Society of Authors, '96-8. Address: Ditchingham House, Norfolk.

**Haileybury College**, Herts. Founded 1862, received Royal Charter '64. Exhibitions to Oxford and Cambridge five annually (£60, £50, £50, £40, and £20) for three years. Pupils 500. **Head Master**, Hon. and Rev. Edward Lyttelton, M.A., Hon. Canon of St. Albans.

**Hallé, Lady**, the famous violinist, known before she married the late Sir Charles Hallé in '88 as Madame Norman-Néruda. She comes of a famous musical family, and was b. at Brönn, in '40. After studying under Jansa, she made her *début* at Vienna in '46, and at once excited enthusiasm by her wonderful execution. Her first appearance in London was at a Philharmonic concert in '49. Thenceforward her career has been one long success, both here and on the Continent. Her first husband was a Swedish musician, Ludwig Norman. Sir Charles Hallé died Oct. 25th, '95. Address: Greenhayes Lane, Manchester.

**Halsbury, Lord**. See under PEERAGE.

**Hamilton, Lord George**, M.P. See under COMMONS.

**Harcourt, Sir W.** See under COMMONS.

**Hardy, Thomas**, novelist, was b. 1840, in Dorsetshire, and commenced his career as an architect. For an essay dealing with "Coloured Brick and Terra-cotta Architecture," he received the medal and prize of the Institute of

British Architects. His first noteworthy literary effort was a novel published in '71, entitled "Desperate Remedies." In '74 the work by which he is best known appeared in the pages of *Cornhill Magazine*—"Far from the Madding Crowd." Other novels from his pen have been "Under the Greenwood Tree" ('72), "A Pair of Blue Eyes" ('73), "The Trumpet Major" ('80), "A Laodicean" ('81), "Two on a Tower" ('82), "The Hand of Ethelberta," "The Return of the Native," "The Mayor of Casterbridge," "Wessex Tales," "A Group of Noble Dames," "Tess of the D'Urbervilles" ('91), which was held by some of the critics to be the finest of all his works, "Life's Little Ironies" ('94), "Jude the Obscure" ('95), and "The Well-Beloved" ('92 and '97). In June '93 Mr. Hardy followed an early dramatic version of "Far from the Madding Crowd" with a dramatic piece called "The Three Wayfarers," which achieved a striking success. "Tess" also has been recently dramatised and played in America. He was made a J.P. for Dorchester in '84, and for Dorsetshire in '94.

**Harris, Lord**. See under PEERAGE.

**Harrison, Frederic**, M.A., was b. in London 1831; educated at King's Coll., Lond., and Wadham Coll., Oxford; scholar, '48; first class in classics, '53; fellow and tutor, '54. Called to the bar, Lincoln's Inn, '58; practised in the Equity Courts; examiner in jurisprudence for Inns of Court '69-76; for London University '75-9; **Professor of Jurisprudence**, Inns of Court, '78-89; member of Royal Commission on Trades Unions '67-9; secretary to the Royal Commission for the Digest of the Law '69-70. Is a member of the State Trials Committee and Vice-President of the Royal Historical Society. Is President of the London Positivist Committee, Newton Hall, and has published numerous essays and addresses on Positivism. Author of very many articles in the *Fortnightly*, *Contemporary*, *Nineteenth Century*, *Cosmopolis*, and *Positivist Reviews* from their commencement; of "The Meaning of History" ('62); of "Order and Progress" ('75); "Social Statics," the second volume of Comte's "Positive Polity" (a translation), '75; the "Choice of Books" ('86); "Oliver Cromwell" ('88); "Annals of an Old Manor House" ('93); "The Meaning of History" ('94); "Early Victorian Literature" ('95); "William the Silent" ('97); and a great number of lectures, printed privately, on historical, social, and religious questions. He is editor and part author of "The New Calendar of Great Men," a dictionary of general biography. He was elected an **alderman** by the London County Council in Feb. '89, but resigned in Oct. '93. Address: 38, Westbourne Terrace, W.

**Harrow School.** Founded 1571, by John Lyon, a yeoman, b. at Preston, near Harrow. Age of admission from 12 to 14. Among the scholarships to either University are Isabella Gregory's of £100 a year for four years, Earl Spencer's, £30 a year for three years, Botfield's, £60 a year for three years, Leaf's, £70 a year for three years, Anderson's, £50 a year for three years; to Hertford College, Oxford, Baring's three of £100 a year for five years; to Caius College, Cambridge, Sayer's two of £52 10s. for four years; and to any College, Oxford, Neeld's two of £30 for three years. Pupils, about 600. **Head Master,** Rev. Joseph Wood, D.D. **Motto,** *Stet fortuna domus.* Some distinguished alumni: Butler, afterwards head master, Sir R. Peel, Cardinal Manning, Sheridan, Earl of Aberdeen, Sir William Jones, Byron, Archbishop Trench, Trollope the novelist, Sir George Trevelyan, Lord Shaftesbury, Dr. Parr, Lord Palmerston, Rodney, Theodore Hook, Rt. Hon. E. Stanhope, M.P., Rt. Hon. Lord Knutsford, Rt. Hon. H. Chaplin, M.P., Rt. Hon. Lord George Hamilton, M.P., Rt. Hon. Sir W. Hart Dyke, Bart., M.P., Earl Spencer, K.G., and the present Master of Trinity Coll., Cambridge. Six or seven entrance scholarships, one of not less than £80 a year, two of not less than £60 a year, and the rest of not less than £30 a year, are offered every Easter to boys (not members of the school) who were under fourteen years of age on the previous 1st of January. These scholarships are held during the scholar's stay in the school, provided that both his conduct and diligence continue satisfactory. One at least of the scholarships will be, and others may be, given for proficiency in mathematics, or in modern subjects. No boy can be elected under twelve years of age. The governors can, at their discretion, add £20 a year to any scholarship, if the circumstances of the scholar appear to make it desirable. There are also two scholarships, each of £20 a year for two years, open to boys in the fifth form, which are awarded for proficiency in such subjects as are common to both sides (classical and modern) of the school.

**Harte, Bret,** was born at Albany, New York, 1839. At the age of fifteen he settled in California, and went through a variety of experiences. He worked for a time in the mines, and subsequently served a short apprenticeship to a printer, and also acted as teacher in a school, express messenger to a newspaper editor, and secretary to the Mint at San Francisco; United States Consul at Crefeld, and at Glasgow in '80. He became the first editor of the *Atlantic Monthly*, in '68. His reputation as a humorist was established by his well-known poem "The Heathen Chinee," which appeared in that journal in '69. "The Luck of Roaring Camp" greatly increased his popularity. In '82 he published a collected edition of his works. His latest works are "Cressy," "The Heritage of Dedlow Marsh," "A Waif of the Plains," "A Ward of the Golden Gate," "A Sappho of Green Springs," "Sally Dows" ('92), "Susy" ('93), "A Protégée of Jack Hamlin's" ('94), "Clarence" ('95), "Three Partners" ('97), "Some Later Verses," and "Tales of Trail and Town" ('98). Address: 74, Lancaster Gate, W.

**Hausa Association, The.** This association was formed in '92, for the purpose of securing scientific study of the Hausa language, so that the Scriptures might be translated into the Hausa tongue, and the higher interests of

the people be furthered in other ways. Hausa is the *lingua franca* of the Central Soudan, extending from the Sahara to the pagan tribes near the Gulf of Guinea, and from the Egyptian Soudan to the French colony of Senegal. The greater portion of this region is in the sphere of British influence. It is estimated that no fewer than fifteen millions of persons speak the Hausa tongue, and many of these can read and write it in a modified form of Arabic character. The first student, the Rev. C. Robinson, was sent out in April '93. Since then he has visited Lokoja and Kano, the commercial centre of Hausaland, and collected the materials for a grammar of the Hausa language, besides having translated two of the gospels into Hausa, and revised and corrected Dr. Schon's dictionary. The Cambridge University has accepted the offer of the Association to endow a Lectureship in Hausa for three years; and the University Press in '96 published under Mr. Robinson's editorship a volume containing facsimiles of the fragments of Hausa literature brought home by him from Kano. **Hon. Secretary,** Rev. J. O. F. Murray, Dean of Emmanuel College, Cambridge; **Hon. Treasurer,** Mr. J. H. Tritton, 54, Lombard Street, E.C.

**Hawaiian Islands.** A group of eight inhabited and four uninhabited islands in the North Pacific. Area, 6677 sq. m.; pop. 109,020. Capital, Honolulu, on the south-west coast of the island of Oahu, pop. 29,020. Until '93 the Government of the islands was that of a limited monarchy, under Queen Liliuokalani; but then a revolution broke out, and a President and provisional executive were appointed. The Hawaiian Republic was proclaimed and a new Constitution was promulgated on July 4th, '94. Mr. Dole was elected President for a term of six years. The islands were annexed to the United States in '98 (see History, below). The legislature now consists of a Senate of 15 members, and a Chamber of Representatives of 15 members. There is a State Council of 15 members, 5 appointed by the President, 5 by the Senate, and 5 by the Chamber. The natives almost all profess the Christian faith, and education is general. **Exports:** sugar, rice, coffee, hides, wool, whale oil, and bone. The bulk of the trade is with the United States. Steamers connect the islands with America, Australasia, and China. **Revenue,** '96, £496,470; **expenditure,** £445,220; **imports,** '97, £5,127,370; **exports,** £3,304,491; **debt,** '97, £858,160. For Ministry, etc., see DIPLOMATIC.—**History.** '98. The islands were definitely annexed by the United States and attached to the military department of California (July 11th), a garrison being sent out to Honolulu. The formal transfer took place (Aug. 12th), and the American flag was raised. Mr. Dale took the oath of allegiance as President, and the islands were made "a new territory of the United States."

**Hay, Colonel John,** b. at Salem, Indiana, in 1838, and ed. at Brown University. He was a barrister practising in the Supreme Court of Illinois till '61. when he gave up his profession in order to become private secretary to President Lincoln. He also served as his aide-de-camp, and took an active part in the field as Adjutant and Lieut.-Colonel. After President Lincoln's death he continued his political and diplomatic career, and was appointed Secretary of Legation and Chargé d'Affaires at Paris ('65), Vienna, and Madrid. He then became Presi-

dent Hayes' First Assistant Secretary of State '79-81. But Colonel Hay is best known in this country by his literary efforts, the "Pike County Ballads" having won him high favour with the reading public. In conjunction with Colonel Nicolay he wrote the Life of President Lincoln, a task for which he was specially fitted. In Feb. '97, on President McKinley's accession, he was appointed Ambassador to Great Britain, a post which he filled with distinction till he became Secretary of State in '98.

**Hayti**, called Hispaniola by Columbus, and afterwards San Domingo. The second largest island of the Antilles, lying between Cuba and Puerto Rico. Area, 28,249 sq. m.; pop. 2,000,000. There are two states in the island. The largest is the Republic of San Domingo (q.v.). The Republic of Hayti occupies the western portion of the island. Area, 10,204 sq. m.; pop. 1,500,000. Capital, Port-au-Prince, pop. 50,000. It was originally a French colony, but was proclaimed independent in 1804, and is governed under a constitution drawn up in '67. The executive power is in the hands of a President, elected by the people in theory, but in practice by the Senate and House of Representatives, in whom rests the legislative power. The House is elected directly for three years by all male citizens, and the Senate indirectly for six years. The religion is Roman Catholic, and elementary education is free, though inefficient in many districts. There is an army of about 7000 men, and a navy of six small vessels. Revenue, '97, £1,500,000; expenditure, £1,580,000; debt, '97, £4,700,000; exports (coffee, mahogany, logwood, cotton, cocoa, turtle shells, and hides), '97, £2,614,500; imports, £1,140,000. See DIPLOMATIC.

**Healy, T. M., M.P.** See under COMMONS.

**Henley, W. E.**, poet, critic, and dramatist, LL.D. St. Andrews '93, was b. in 1849 at Gloucester, at which city he was also educated. In his youth he suffered greatly from ill health, and his "In Hospital: Rhymes and Rhythms" ("A Book of Verses," fourth edition '93) was largely a reflection of certain experiences in the Old Infirmary, Edinburgh, between '73 and '75. In the latter year he began to contribute to various London journals, and was one of the founders of *London* ('77-9), which he edited for some time, and in which many of his verses first appeared. His editorial career subsequently led him to the chair of the *Magazine of Art*; in '89 to that of the *Scots Observer*, afterwards the *National Observer*, which he left in '94; and in '95 to that of the *New Review*. In these journals and in others—the *Athenæum* and the *Saturday Review* among them—Mr. Henley's critical work has been done; but a reprint of some selected passages appeared in '90 as "Views and Reviews" (second edition '92). His dramatic work in collaboration with the late R. L. Stevenson included four plays republished in '96. His second book of verse, "The Song of the Sword," went into a second edition as "London Voluntaries" in '93. A corrected reprint of both volumes, with deletions and additions, was published in '97, under the title of "Poems." He is the editor of a series of "Tudor Translations," the editor and compiler of "Lyra Heroica" ('93); and, in collaboration with Mr. Charles Whibley, the editor and compiler of an anthology of English prose. The fourth and last volume of "The Centenary Burns,"

to which he contributed an essay on the poet's "Life, Genius, and Achievement," and "English Lyrics: Chaucer to Poe," appeared in '97. In '98 he was granted a pension (£225) on the Civil List for his services to literature. He is at present—after a long spell of ill-health—engaged on a new edition of Byron's prose and verse (12 vols.), with a fuller commentary than has ever been essayed before. Address: Stanley Lodge, Muswell Hill, N.

**Hereford, Bishop of.** See under PEERAGE.

**Herkomer, Hubert, R.A.**, was b. 1849 at Waal, in Bavaria. At an early age he settled with his parents first in America and subsequently in England. Joined the Institute of Painters in Water Colours '71, but resigned '91, and to the gallery of this Society and to the Grosvenor and Academy exhibitions he contributed many drawings, chiefly of Bavarian subjects. His oil picture, "After the Toil of Day," in the Academy exhibition of '73, was followed by his "Last Muster," the memorable picture of the Chelsea pensioners ('75), which gained him the "Grande Médaille d'Honneur" at the Paris Exhibition, '78. He was ('79) elected an A.R.A. Since '80 he has devoted much time to portraiture, and his portrait of Miss Grant is one of his many successes in that branch of art. He personally directs the well-known Art School at Bushey, of which he is the founder, and in connection with which a new theatre was opened in '88 with the performance of a romantic fragment entitled "The Sorceress," followed in '89 by a more important opera, "An Idyll," both composed by the Professor himself. Elected a Royal Academician in '90. He is also Deputy President of the Royal Society of Painters in Water-Colours, and was elected an Associate of the French Academy of Fine Art in '95.

**Herschell, Lord.** See under PEERAGE.

**Hervey Archipelago, or Cook's Islands.** See COOK ISLANDS FEDERATION.

**Hesse.** See DIPLOMATIC.

**Hicks-Beach, Sir Michael, M.P.** See under COMMONS.

**High Church.** See CHURCH OF ENGLAND.

**Higher Education of Women.** See WOMEN, HIGHER EDUCATION OF.

**Historical Manuscripts Commission.** A Royal Commission was appointed in 1869 to examine and report upon the collections of manuscripts in the possession of private families and municipal authorities, who have rendered the commissioners every assistance in the investigation and classification of manuscripts illustrative of history, constitutional law and general literature. Fourteen reports and many appendices thereto have been issued by the Commission describing some hundreds of private collections of manuscripts in Great Britain and Ireland. The Commission at present is constituted as follows: Sir Nathaniel Lindley, Master of the Rolls (chairman); the Marquess of Lothian, K.T.; the Marquess of Salisbury, K.G.; the Marquess of Ripon, K.G.; the Earl of Crawford; the Earl of Rosebery, K.G.; Viscount Esher; Lord Edmond Fitzmaurice, M.P.; the Bishop of Oxford; Lord Acton; Sir Edward Fry; Mr. W. E. H. Lecky, M.P.; Sir H. C. Maxwell-Lyte, K.C.B.; and Dr. S. R. Gardner; with Mr. J. J. Cartwright as Secretary. The reports are prepared by various inspectors acting under the authority

of the Commission, many of the historical papers examined being deposited by their owners in the Public Record Office for the purpose. **Office**, Public Record Office, Chancery Lane, W.C.

**Hockey** continues to be most successful, and gains ground every year. The number of clubs grows annually, and most towns have a club now. Ladies play a great deal, especially in the country, though in the suburbs of London there are not many ladies' clubs at present. The hon. sec. of the **Hockey Association** is Mr. Stanley Christopherson, of the Wimbledon Hockey Club, who is also one of the best players of the game. Of the teams round London, Teddington is perhaps the best, having won 22 out of the 28 matches the Club played—only losing 2 and drawing 4—a record hard to beat. Some of the principal matches resulted as follows:—England beat Wales, Ireland beat Wales, England *v.* Ireland drawn. Cambridge beat Oxford, Cambridge Ladies beat Oxford Ladies, North of England beat Midland Counties, South of England beat Midland Counties, Kent beat Surrey, Cheshire beat Lancashire, Cheshire beat Middlesex, Lancashire beat Middlesex, Kent beat Middlesex, South beat North, Warwickshire beat Shropshire, Gloucestershire beat Somersetshire, Durham *v.* York drawn. Denbighshire beat Merioneth, Middlesex beat Surrey.

**Hohenlohe, Prince**, appointed Chancellor of the German Empire and Prime Minister of Prussia in Oct. '94, was b. in 1819. He is a native of Bavaria, and a Roman Catholic, and his long public career has given him exceptional experience and influence. So long ago as '66 he was Prime Minister of Bavaria, and in the war of '70 he took a most important part. In '74 he was chosen to succeed Count Arnim as the German Ambassador to France, and held the post till '85, when he became Governor-General of Alsace-Lorraine. When the crisis which resulted in the resignation of Count Caprivi and Count Eulenbergh arose, in '94, he was appointed Chancellor and entrusted by the Emperor with the continuance of Count Caprivi's policy. He is married to Princess Sayn-Wittgenstein, a daughter of an aide-de-camp of the Czar Nicholas I.

**Holland**. See NETHERLANDS.

**Holland, Queen of**. See WILHELMINA I.

**Holloway College, The Royal**. See WOMEN, HIGHER EDUCATION OF.

**Home Arts and Industries Association**. Founded Nov. 1884. Supported by voluntary contributions. Its aim is to teach hand-work to the children of the poorer people by means of classes taught voluntarily by members of the association, and through such training to revive hand-work, and keep the people from the evils of idleness and drink. **President**, The Rt. Hon. Earl Brownlow; **Hon. Treasurer**, Mr. A. K. Hitchens. **Office and studios**, Royal Albert Hall. **Bankers**, London and County Bank, High Street, Kensington, Branch.

**Home Office**. This is a many-sided department, and makes great demands upon the time and judgment of its parliamentary chief. He grants certificates for the naturalisation of aliens. Addresses to the Sovereign and the gracious replies thereto pass through his office; reports of Royal Commissions are forwarded to him to be laid before the Sovereign, by whose command they are subsequently presented to Parliament; he nominates the principal officers

of the Isle of Man and the Channel Islands; and most civil knighthoods are conferred upon his recommendation. Heavy fees are paid to the Department by those upon whom peerages and other dignities are bestowed. The Home Secretary may grant Provisional Orders for the improvement of unhealthy areas in the Metropolis, and the functions of licensing and inspection in regard to the practice of vivisection, schools of anatomy, and retreats for habitual drunkards are vested in him. One staff of inspectors from the Department is charged with the supervision of coal and metalliferous mines; another sees that the Acts relative to the manufacture and storing of explosives are properly carried out; and a third visits factories, printing works, bleaching works, brickyards, white lead works, and workshops. The Home Secretary is also charged with powers of inspection under the Burial Acts, and may permit in certain special cases interments in closed burial grounds, or the exhumation of bodies where there is suspicion of foul play. Under the Prevention of Cruelty to Children Act he is given authority to direct a factory inspector to see that the conditions and restrictions of any licence granted in respect of the employment of children of between the ages of seven and ten years in theatres are duly complied with. His consent is required before certain steps can be taken under the Building Societies Act, '94, and he may, on the application of a County Council, make orders for the protection of wild birds, or prohibiting the taking or destroying of wild birds' eggs. His duties in connection with the police include the appointment of the Chief Commissioner of the Metropolitan Force, and the approval of rules made for the service by that officer (see POLICE OF THE UNITED KINGDOM); he must be satisfied, before granting his certificate under the County and Borough Police Act, that the police of a county or borough has been maintained in a state of efficiency in point of numbers and discipline; and should his certificate of efficiency be withheld, the sum annually payable by the County Council in substitution for local grants towards the cost of pay and clothing of the police is forfeited. The prevention and suppression of local disorder lies with the local authorities, but he may authorise the employment of the armed forces of the Crown in order to aid the local forces in the suppression of riot and disorder. He appoints and frequently puts in motion the Director of Public Prosecutions. The control of the prisons and convict establishments, and the inspection of reformatory and industrial schools are exercised by his Department, and he has the charge of criminal lunatics and insane prisoners. He may recommend to the Crown the remission of punishment passed upon offenders, either by justices of the peace or by the judges, his most anxious and responsible function in this connection being in regard to petitions for commutation of the death sentence; but before deciding in such grave matters he usually takes such judicial, legal, and, in cases where insanity is suggested, medical opinion as he may think necessary, to enable him to arrive at a just conclusion. The present Home Secretary is the Rt. Hon. Sir M. W. Ridley, Bart. See MINISTRY and SECRETARY OF STATE.

**Home Rule**. In the '94 edition, under the heading Session, Part I., sect. 3, and Part II.,

sects. 79-101, full particulars are given as to the provisions and progress of the Home Rule Bill, which was introduced by Mr. Gladstone in the Session of '93. For the Local Government (Ireland) Act '98, see SESSION, sect. 63.

**Honduras**, a republic in Central America. **Area**, 43,000 sq. m.; **pop.** 450,000. **Capital**, Tegucigalpa, **pop.** 12,000. Governed by a President and Congress, elected for four years. During '98 Honduras, Nicaragua and San Salvador combined to form the United States of Central America. Costa Rica and Guatemala may eventually join the combination. The country possesses great agricultural resources and much mineral wealth, but these lie neglected because of internal disagreements and the consequent paralysis of enterprise. Agriculture, however, is now showing signs of development. **Chief products**: tobacco, sugar, conee, indigo, wheat, mahogany, hides, and cattle. **Revenue**, '96, £400,000; **expenditure**, £471,750; **imports**, '96, £275,000; **exports**, £651,000; **debt**, £5,400,000. The loans were raised for the purpose of constructing an inter-oceanic railway, but a small proportion only was expended for this purpose. The arrears of interest amount to over £11,000,000. Army small, but there is a militia of about 20,000. See CENTRAL AMERICA and DIPLOMATIC.

**Hong Kong**. An island and British Crown colony, situated close to the mouth of the Canton river, and divided from the southern coast of China by a narrow strait—the Ly-eem-moon pass. It was ceded to Great Britain in 1841, at the close of the opium war. The peninsula of Kowlung, opposite the island, and the small adjacent Stonecutter's Island, now strongly fortified, appertain to the colony. **Capital**, Victoria (commonly called Hong Kong). **Area**, 32 sq. m.; **pop.** 261,258. **Government** is in the hands of a Governor, with Executive and Legislative Councils. Religion and education are abundantly provided for. The island is our "Eastern Gibraltar," and is both a military and naval station, forming the headquarters of the China Squadron. It is also the great emporium for the European trade with China, and for the local coast trade, and is a free port. **Imports**, chiefly goods for China, cottons, and other manufactured articles; **exports**, tea, silk, and other Chinese produce. For latest financial statistics see BRITISH EMPIRE (table); and for Executive Council see DIPLOMATIC. **History**, '98.—For the better protection of the colony, the territories on the mainland opposite, behind Kowlung up to a line joining Mirs Bay and Deep Bay, as well as the island of Lau-tao, were leased for 99 years to Great Britain by a convention (June 9th). The area leased amounted to 200 sq. miles.

**Hope, Anthony**, is the pen-name of one of the most brilliant of the younger novelists of the day. His real name is Mr. A. H. Hawkins, and he is a younger son of the Rev. E. C. Hawkins, vicar of St. Bride's, Fleet Street, and was b. in London, Feb. 9th, 1863. He was ed. at Marlborough Coll. and Balliol Coll., Oxford, of which college he was a scholar. He gained a first class in Classical Schools in '85, and took his M.A. degree in '89. He took the step which is apparently necessary to success in literature by devoting himself at first to the law, and was called to the Bar at the Middle Temple in '87. His significantly named first book, "A Man of

Mark," was published in '90, and there have since followed, "Father Stafford," "Mr. Witt's Widow," "Sport Royal," "Half a Hero," "The Prisoner of Zenda," "The God in the Car," "The Dolly Dialogues," a collection of exquisitely finished dialogues, "Count Antonio" ('95) "Comedies of Courtship," and "The Heart of Princess Osra" ('96), "Phroso" ('97), "Simon Dale" and "Rupert of Hentzau," a sequel to the "Prisoner of Zenda" ('98). A dramatic version of "The Prisoner of Zenda" proved very successful in '96, and a comedy, "The Adventures of Lady Ursula," was successfully produced in the United States, and in London ('98). Address: 16, Buckingham Street, Strand, W.C.

**Horological Institute, The British**, has for its main object the encouragement of the English watch trade. Technical classes and examinations are held by the Institute at its headquarters, Northampton Square, E.C., and certificates of competency are granted. It publishes monthly the "Horological Journal," which circulates among watchmakers, jewelers, and silversmiths. There are 315 members and 15 associates. **Secretary**, F. J. Britten.

**Horton, Robert F.**, M.A., D.D., Congregational minister, was b. 1855, ed. at Shrewsbury, whence he went to New Coll., Oxford ('74), where he commenced a brilliant college career by obtaining First Class in Moderations, and was President of the Union, and in '78 a First in Classical Greats. Elected Fellow of his college '79, but excluded from an examinership in the Rudiments of Faith and Religion by reason of his Nonconformist views. He began his ministry at Hampstead ('80), and his success there soon necessitated the building of a larger church, in the Lyndhurst Road, which was opened in '84. He has published "Inspiration and the Bible," '87; "Revelation and the Bible," '93; a course of lectures on "Preaching," delivered at Yale, and subsequently issued in book form as "Verbum Dei" '93; "The Cartoons of St. Mark" '94; "The Teaching of Jesus" '95; "The Life of John Howe," "The Book of Proverbs," in the Expositor's Bible, "The Art of Living Together" '96; "The Four Pillars of the Home," "Oliver Cromwell, a Study in Personal Religion," "Success and Failure," "The Women of the Old Testament," all in '97; "Brief Sermons to Busy Men," "England's Danger," and "The Commandments of Jesus," '98. Address: Chesils, Christ Church Road, Hampstead, N.W.

### HOSPITALS AND DISPENSARIES.

The first annual meeting of the Council of the Prince of Wales's Hospital Fund was held at Marlborough House on Feb. 4th, '98. The total paid to the Fund for the eleven months ending Dec. 31st, '97, was £227,553. Of this amount £56,286 5s. was given to the various London Hospitals, and £167,022 19s. 8d. was invested; the expenses were £3704 7s. 9d. The sale of stamps produced £34,776; the *Daily Telegraph* fund reached £36,730, and that of *Lloyd's News* £2618: a total of £74,174, the greater portion of which represents efforts not likely to be repeated. The annual subscription list is about £22,000. It will thus be seen that the object of the Prince of Wales—viz., "to raise a sum of £100,000 to £150,000 a year from persons not subscribers to Hospitals at all"—is, as yet at least, far from being realised.

The following list comprises most of the important hospitals and dispensaries in London, with their last notified annual income and secretary's address:—

**Alexandra Hospital for Children with Hip Disease** (£2661), Stanley Smith, Queen Sq., Bloomsbury.

**Belgrave Hospital for Children** (£1741), Percy Gates, 7, Victoria St., Westminster, S.W.

**Bethlehem Royal Hospital** (£37,000), A. H. Martin, Secretary and Steward, Lambeth, S.E.

**British Hospital for Diseases of the Skin** (£1444), Albert Wills, Hon. Sec., 61, Great Marlboro' St., W., 29, Euston Road, N.W., and 5, Newtonington Butts, S.E.

**British Lying-in Hospital** (£1829), A. C. Wickins, Endell St., Long Acre.

**Cancer Hospital, The**, free—no letters of admission required (£7972), W. H. Hughes, Brompton, S.W.

**Central London Ophthalmic Hospital** (£1289), John Griggs Bryant, 238a, Gray's Inn Rd., W.C.

**Central London Throat and Ear Hospital** (£1973), R. Kershaw, Gray's Inn Rd., W.C.

**Charing Cross Hospital** (£57,091), A. E. Reade, West Strand, Charing Cross.

**Chelsea Hospital for Women** (£5144), Herbert H. Jennings, Fulham Rd., S.W.

**Cheyne Hospital for Sick and Incurable Children** (£4145), Reginald Blunt, Cheyne Walk, Chelsea.

**City Dispensary** (£1357), F. J. T. Moore, 98, Cannon St.

**City of London Hospital for Diseases of the Chest** (£9380), H. T. Dudley Ryder, Hospital, Victoria Park, E.

**City of London Lying-in Hospital**, established 1750 (£4498), No. of patients 2197, R. A. Othwaite, 102, City Rd.

**City Orthopaedic Hospital** (£1645), E. Derenth, 27, Hatton Garden.

**Convalescent Hospital for Seamen** (£22,254), included under Seamen's Hospital Society, P. Michelli, Seamen's Hospital, Greenwich.

**Dental Hospital of London** (£2730), J. F. Pink, 40, Leicester Sq.

**East London Hospital for Children and Dispensary for Women** (£12,820), T. Hayes, Shadwell, E.

**Evelina Hospital for Sick Children** (£5330), T. S. Chapman, Southwark Bridge Rd., S.E.

**Finsbury Dispensary** (£881), W. H. Pratt, Brewer St., Goswell Rd., E.C.

**Foundling Hospital** (£19,260), W. S. Wintle, M.A., Guilford St.

**German Hospital** (£8979), H. Gülich, Superintendent, German Hospital, Dalston.

**Mrs. Gladstone's Free Convalescent Home for the Poor**, more especially of the East of London (£1158), Lieut.-Colonel Neville, Hon. Sec., Thurgoland, Sheffield. Office, Woodford Hall, Woodford.

**Great Northern Central Hospital** (£15,747), Lewis H. Glenton-Kerr, Holloway Rd., N. The local hospital for London.

**Guy's Hospital** (£49,895), H. Williams, Clerk, Counting House, St. Thomas St., Boro., S.E.

**Hampstead Hospital**, the local hospital for Hampstead (£3033), R. A. Othwaite, Hon. Sec., 1, Parliament Hill Rd., Hampstead.

**Hospital for Consumption and Diseases of the Chest** (£27,410), W. H. Theobald, Brompton.

**Hospital for Diseases of the Throat** (£4507), W. Holt, 32, Golden Sq., Regent St. [Closed for rebuilding.]

**Hospital for Epilepsy, Paralysis and other Diseases of the Nervous System** (£1908), H. Howgrave Graham, 32, Portland Terrace,

Regent's Park, near St. John's Wood Road Station.

**Hospital for Sick Children** (£17,424), Adrian Hope, 49, Great Ormond St., and Cromwell House, Highgate.

**Hospital for Women** (£3944), D. Cannon, 30, Soho Sq., W.

**King's College Hospital** (£21,205, including legacies), Rev. N. Bromley, Lincoln's Inn Fields, W.C.

**Lock Hospital and Rescue Home** (£7600), A. W. Cruikshank, Harrow Rd., and 91, Dean St.

**London Fever Hospital**, specially for infectious patients who can pay a small fee (£11,342), Major W. Christie, Liverpool Rd., N.

**London Homoeopathic Hospital** (£7054), G. A. Cross, Superintendent, Great Ormond St.

**London Hospital** (£74,440), G. Q. Roberts, M.A., Sec. and House Governor, Whitechapel Rd.

**Magdalen Hospital** (£5056), Warden and Secretary, Rev. W. Watkins, Streatham, S.W.

**Metropolitan Dispensary** (£6970), W. Norvell, 9, Fore Street, Cripplegate.

**Metropolitan Hospital** (£8144), C. H. Byers, Kingsland Rd., N.E.

**Middlesex Hospital** (£19,920), F. Clare Melhado, Sec. and Superintendent, Mortimer St., Berners St.

**National Hospital for the Diseases of the Heart and Paralysis** (£2006), Capt. F. Handley, 32, Soho Sq.

**National Hospital for the Paralysed and Epileptic (Albany Memorial)** (£17,649), R. Burford Rawlings, Queen Sq., Bloomsbury.

**National Orthopaedic Hospital for the Deformed** (£2138), H. J. Tresidder, 234, Great Portland St., Regent's Park.

**North-Eastern Hospital for Children**, Hackney Rd., N.E. (£5684), T. Glenton-Kerr, 27, Clement's Lane, Lombard St., E.C.

**North London or University College Hospital** (Ordinary, £17,329; Extraordinary, £8065), N. H. Nixon, Gower St., St. Pancras.

**North-West London Hospital** (£3581), A. Craske, 18, Kentish Town Rd.

**Paddington Green Children's Hospital** (£3046), W. H. Pearce.

**Poplar Hospital for Accidents** (Ordinary, £6972; Extraordinary for Building, £1223), Lieut.-Col. Feneran, 303, East India Rd., E.

**Queen Charlotte's Lying-in Hospital** (Ordinary, £3339; Legacies, £1100), Arthur Watts, 191, Marylebone Rd.

**Royal Free Hospital** (£10,138), C. W. Thies, Gray's Inn Rd., W.C.

**Royal Hospital for Children and Women** (£4221), Thos. S. Conisbee, 51, Waterloo Bridge Rd.

**Royal Hospital for Diseases of the Chest**, for the gratuitous relief of poor persons suffering from diseases of the chest in any of their various forms (£6,176), John Harrold, 231, City Rd., E.C.

**Royal Hospital for Incurables** (£36,278), F. Andrew, 106, Queen Victoria St.

**Royal London Ophthalmic Hospital** (£5072), R. J. Bland, Bloomfield St., E.C.

**Royal National Hospital for Consumption and Diseases of the Chest on the Separate Principle**, Ventnor (£10,980), E. Morgan, 34, Craven St., Charing Cross, W.C.

**Royal Orthopaedic Hospital** (£1556), Bates Mansford, 297, Oxford St.

**Royal Sea-Bathing Hospital**, Margate (£6913) M. Biddulph, Esq., M.P., Treasurer, 30, Charing Cross.

**Royal South London Ophthalmic Hospital** (£3498), Mrs. T. E. Cope, St. George's Circus, Southwark.

**Royal Westminster Ophthalmic Hospital** (£2661), T. Beattie-Campbell, 19, King William St., West Strand.

**St. Bartholomew's Hospital** (about £67,151), W. H. Cross, B.A., Clerk, West Smithfield, E.C.

**St. George's Hospital** (£27,346), C. L. Todd, Hyde Park Corner.

**St. John's Skin Hospital** (£4435), J. Dunlop Costine, Superintendent, 49, Leicester Sq., W.C.

**St. Mark's Hospital for Fistula and other Diseases of the Rectum** (£2530), Edgar Penman, City Road, E.C.

**St. Mary's Convalescent Home** (£2643), Miss F. Ashdown, 27, Kilburn Park Rd., N.W.

**St. Mary's Hospital** (£32,925), T. Ryan, Praed St., W.

**St. Peter's Hospital for Stone, Stricture and Urinary Diseases** (£3238), Irwin H. Beattie, Henrietta St., Covent Garden.

**St. Thomas's Hospital** (£74,130), R. Brass, Albert Embankment, Westminster, S.W.

**Samaritan Free Hospital for Women and Children** (£7030), G. Scudamore, Marylebone Rd., N.W.

**Seamen's Hospital Society** (£22,254), P. Michelli, Greenwich.

**University College**, see **North London**.

**Victoria Hospital for Children** (£5370), A. Cameron Skinner, Queen's Rd., Chelsea.

**West London Hospital** (Ordinary, £5621; Extraordinary, £2138; for Building, £2582), R. J. Gilbert, Hammersmith Rd., W.

**Westminster Hospital** (£13,998), S. M. Quennell, Broad Sanctuary, S.W.

For Charitable Societies see **CHARITIES**. See also **METROPOLITAN HOSPITAL SATURDAY FUND** and **METROPOLITAN HOSPITAL SUNDAY FUND**.

**Hospitals Association, The (Street Ambulance Branch)**. Was established in '89 for the succour and safe removal of cases of street accident in the Metropolis. Possesses 57 stations, of which 30 are public thoroughfare stations, 14 are at fire brigade stations, and 13 are at hospitals. Office, 28 and 29, Southampton Street, Strand, W.C. Treasurer, Mr. H. L. Bischoffsheim; Hon. Secretary, Mr. Thomas Ryan, Secretary of St. Mary's Hospital, W., to which address all urgent communications should be sent.

**House of Commons**. See **COMMONS**, **HOUSE OF**.

**Howard Association** (founded 1866) was instituted, under the patronage of Lord Brougham, to promote the best methods of treatment and prevention of crime and pauperism. The principles of the great philanthropist, John Howard, have been generally embodied in the work of the Association. It collects information both at home and abroad bearing on the present systems of punishment and prevention of crime. Many books and pamphlets dealing with pauperism, boarding-out neglected children, vagrancy, and kindred subjects, have been disseminated by the Howard Association. A remarkable work, entitled "**Penological and Preventive Principles**," which has received high official recognition, and reached a second and enlarged edition in '95, is the work of Mr. William Tallack, who is the **Secretary** of the Association. Office, 5, Bishopsgate Street Without, E.C.

**Howells, William Dean**, the eminent American novelist, was b. in Ohio, 1837. After

serving his time with his father as a printer, he adopted journalism as his profession, and in '66 was appointed editor of the *Atlantic Monthly*, from which he retired in '81. His poems, sketches, and stories are characterised by a lightness of artistic touch which marks the individuality of their author, and have had a wide circulation on both sides of the Atlantic. Mr. Howells was American Consul at Venice '61-5. Amongst the most popular of his numerous writings are "**A Foregone Conclusion**" and "**The Rise of Silas Lapham**." In '92 he became the editor of the *Cosmopolitan Magazine*, but after a short tenure resigned the post. Published "**The World of Chance**" ('93), "**A Traveller from Altruria**" ('94), "**Impressions and Experiences**" ('96), "**The Landlord of Lion's Head**," "**An Open-eyed Conspiracy**" ('97), and "**The Story of a Play**" ('98). Address: Authors' Club, New York, U.S.A.

**Hughes, Rev. Hugh Price, M.A.**, the leader of the "**Forward Movement**" of Wesleyan Methodism, is a native of Wales, and was b. 1847. Ed. at Richmond Theological Coll., and graduated M.A. at London Univ. Has held appointments at Dover, Brighton, Tottenham, Dulwich, Oxford, Brixton, and West London. Is a member of the Legal Conference. Has edited, with conspicuous success, the *Methodist Times* since '85, and is the Superintendent of the Wesleyan Mission to the West End. He is the author of "**Social Christianity**," "**The Philanthropy of God**," "**Ethical Christianity**," and "**Essential Christianity**." In '92 he took a prominent part in the "**Review of the Churches**" Conference at Grindelwald. He is one of the founders of the Evangelical Free Church Movement, and was President of its National Council in '96. He is a Vice-President of the United Kingdom Alliance, and an active member of the Anti-Gambling League. In '98 he was elected President of the Wesleyan Conference.

**Humanitarian League, The**, was founded in 1891, its main object being to apply and emphasise, wherever possible, the principle that it is iniquitous to inflict unnecessary suffering on any sentient being. The League proposes a thorough revision and more equitable administration of the criminal law and prison system, deprecates the various provocations to aggressive warfare, and urges the need of amending present social conditions. With regard to the treatment of animals, it denounces the practice of vivisection as incompatible with the fundamental principles both of humanity and sound science, condemns cruel sports, and aims at the mitigation of the sufferings to which animals are subjected in the cattle traffic and the shambles. The **Hon. Secretary** is Mr. Henry S. Salt, and the offices are at 55, Chancery Lane, London, W.C.

**Humbert I., King of Italy**, was b. 1844; succeeded his father Victor Emmanuel '78. While **Crown Prince** he distinguished himself by the active part he took in the movement for promoting **Italian Unity**. He shared with Garibaldi the triumph of the reorganisation of the kingdom of the two Sicilies. Prince Humbert served with distinction in the war of '66, and displayed much personal bravery in the moment of disaster at the battle of Custoza, in which the Italians were defeated. He married in '68 his cousin, Princess Marguerite, daughter of the late Duke of Genoa. Their son, the **Crown Prince Victor Emmanuel, Prince of Naples**, was born Nov. 11th, '69. His marriage to Princess Helen of

Montenegro took place in October '96. During his Majesty's visit to Naples, Nov. 17th, '78, a would-be assassin named Giovanni Passananti made an attempt upon his life with a poniard, and another attempt in '97 also happily failed. His Majesty is very popular among his subjects. The Queen is well known as an accomplished artist. The royal silver wedding was celebrated at Rome with splendid pomp in April '93.

**Hungary.** See AUSTRIA-HUNGARY.

**Hunting.** According to figures given by the *Field* there has been of late years a steady increase in the number of packs kept in all parts of the kingdom. There were in the United Kingdom in '98 24 packs of staghounds, 193 of foxhounds, 137 of harriers, and 47 of beagles, as against 26 packs of staghounds, 195 of foxhounds, 152 of harriers, and 50 of beagles in '97. The packs were thus distributed: In

England and Wales there were 19 packs of staghounds, 160 of foxhounds, 108 of harriers, and 43 of beagles. In Ireland there were 5 packs of staghounds, 23 of foxhounds, 26 of harriers, and 4 of beagles. In Scotland there were 10 packs of foxhounds and 3 of harriers.

**Husband and Wife.** See LAW, '98.

**Hypnotism.** See '95 and previous editions for an exhaustive article upon this subject. Also consult Vincent's "The Elements of Hypnotism: the Induction of Hypnosis, its Phenomena" (Kegan Paul); Moll's "Hypnotism" (Walter Scott); Binet and Féré's "Animal Magnetism" (Kegan Paul); Bernheim's "Suggestive Therapeutics" (Pentland); Tuckey's "Psycho-Therapeutics" (Baillière); Kingsbury's "Practice of Hypnotic Suggestion" (Simpkin); Felkin's "Hypnotism" (Pentland).

**Ibsen, Henrik,** the Norwegian dramatist and poet, was b. on March 20th, 1828, at Skien. After serving his apprenticeship to an apothecary, he went to Christiania Univ. to study medicine. In '50 he produced his first play, "Catilina"; and in '51 was appointed director of the National Theatre at Bergen by Ole Bull. In '52 he travelled for a time in Denmark and Germany; and in '57 he received the post of director of the Norske Theatre at Christiania, which he managed till '62. During this period several of his plays were written and produced. Most of his works are translated into German, and many into English. His "Doll's House" was produced at the Olympic, in London, July '89, and his drama "Rosmersholm" at the Vaudeville Theatre in Feb. '91, followed by "Ghosts," and "Hedda Gabler." Ibsen's characters are most powerfully drawn, and impress even the reader of his plays as being living men and women. The "Pillars of Society" perhaps represents his social philosophy as closely as any of his plays, while "Brand" is held to be his masterpiece. "Ghosts" is a striking, almost ghastly, study of heredity. "The Master-Builder" was translated, published, and performed in English early in '93. It produced violent dissensions amongst the critics, and even alienated some who had before been pronounced Ibsenites. Two English translations of "Brand" were published in '94, "Little Eyolf" in November of that year, and "John Gabriel Borkman" in '96. A distinguished group of English admirers presented him with a set of silver on his 70th birthday, '98.

**Iceland.** A large island, 130 m. east of Greenland, and 850 m. west of Norway, belonging to Denmark. Area, 39,756 sq. m.; pop. 70,927. Capital, Reykjavik. The legislature, called the Althing, consists of two houses, the Lower containing twenty-four members elected by household suffrage and the Upper twelve members, six elected, and six nominated by the King of Denmark. **Exports:** sulphur, Iceland moss, wool, dried fish, seal-skins and oil, whale-oil and baleen, eiderdown, bird-skins and ponies. Manufactures domestic.

There has lately been a considerable exodus from the island of emigrants to Manitoba.

**Ile du Diable.** See FRENCH GUIANA.

**"Illustrated London News,"** established by Mr. Herbert Ingram, then a Nottingham printer, in 1842. Published weekly; contains illustrations of a high order, bearing upon current events and subjects of interest, with explanatory letterpress. Its first editor was Mr. Bailey, who was succeeded by Dr. Charles Mackay ('48-'59), and Mr. John Lash Latey ('59-'90). **Editor,** Mr. Clement K. Shorter. From the office of the *Illustrated London News* are also issued the *Penny Illustrated Paper* (edited by Mr. John Latey), the *Sketch*, which immediately after its appearance made for itself a very high reputation, which it has since maintained, and the *English Illustrated Magazine*.

### IMPERIAL FEDERATION.

The Imperial Federation League was formed at a Conference held in '84 under the chairmanship of the late Right Hon. W. E. Forster. A special committee of the League appointed in '91 prepared a practical scheme of Federation, and presented its report on Nov. 12th, '92. The substance of the report was as follows:—It being admitted that in order to combine the resources of the Empire for the purpose of defending and maintaining its common interests, some central body, in which all its parts are represented, is essential, the question of the nature and functions of such a body at once arises. It remains then to consider—(1) How shall a Council of the Empire be constituted? The Council should consist of members appointed by the United Kingdom and the self-governing Colonies. The three great groups of self-governing Colonies, North American, Australasian, and South African, should be directly represented in that Council. India and the Crown Colonies would be represented through her Majesty's Secretaries of State at present charged with the administration of their affairs, and in such other manner as might become desirable. The Council might include on the part of the United

Kingdom, the Indian Empire, and the Crown Colonies, the Prime Minister, the Secretaries of State for Foreign Affairs, War, Colonies, and India; the First Lord of the Admiralty and the Chancellor of the Exchequer; and on the part of the self-governing Colonies, of representatives of the three groups. (2) By what means can the resources of the Empire be most effectively combined? Such a Council, being furnished with adequate information relating to matters of foreign policy, should deal with Imperial Defence; and in matters of defence should supervise the appropriation of any moneys provided for the defence of the Empire by the common contribution of the United Kingdom and the Colonies. It is in the maintenance of the sea communications of the Empire that the community of interests is most absolute. The primary requirements of combined defence therefore are a sea-going fleet and naval bases. It may be laid down as a leading principle that as all parts of the Empire enjoy the benefits of Imperial Defence they should contribute to its cost. In the case of India and the Crown Colonies the United Kingdom would continue to be responsible for all matters relating to their respective contributions. The method of raising contributions would be left at the outset to the choice of the individual self-governing states, but future developments may disclose a means of raising the necessary contributions upon some uniform principle throughout the Empire, by the allocation to this purpose of special sources of revenue or otherwise. The amounts to be contributed by each country should be fixed in the first instance for a term of years by a conference, and be subject to periodical revisions. There is no reason to doubt that if the necessities of the case were made clear, the Colonies would be prepared to take their share in the cost of the general defence of the Empire, provided that they were given a proper share in the control and expenditure of the common fund. It is pointed out that by so doing those countries would be undertaking an incomparably smaller financial expenditure than would be required for their own defences if these did not form part of the general scheme of defence adopted for the empire.

After the adoption of this report by the Council it was recognised by the leaders of the movement that its first stage, that of general discussion without any plan, had been passed, and that it would be necessary in future to advocate practical steps for bringing the matter to an issue. As the League had been avowedly founded without any defined policy as to the way in which Federation should be carried out, and as it was evident that opinions within the League would be likely to differ upon this point, it was decided to dissolve the League at the end of '93, in order that complete freedom of opinion should be afforded in advocating practical steps. The League was accordingly dissolved on Dec. 31st, '93, by resolution of the Council adopted some months previously. This step has had the effect of giving increased activity to the movement in some directions, and it is now being prosecuted by several bodies in the United Kingdom, as well as by branches founded by the League in Canada and Australia. Among the former may be mentioned **The United Empire Trade League**, Sir Howard Vincent, M.P., Hon. Sec., which advocates a commercial union of the Empire by means of Protection;

**The British Empire League**, Sec., C. F. Murray, 112, Cannon Street, London, E.C. (see separate account under the heading **BRITISH EMPIRE LEAGUE**); **The Imperial Federation (Defence) Committee**, Hon. Sec., A. H. Loring, 25, Old Queen Street, Westminster, which advocates combination for the purposes of Defence on the lines of the report quoted above, in the first instance by maintaining a common Navy; the **Unity of the Empire Association**, Edinburgh.

The celebration of the sixtieth year of Her Majesty's reign during '97 was the occasion of a gathering in London of the Prime Ministers of all the self-governing Colonies, who were entertained by H.M. Government as the guests of the country. This was the second occasion of a meeting of representatives of the Colonies in London, the first having been the conference of '87. After taking part in the Queen's procession and the attendant festivities, the Premiers met the Secretary of State for the Colonies (Mr. Chamberlain) in conference (see **COLONIAL CONFERENCE**, '97). The subject of Imperial Federation was discussed at one of these meetings; and though more than one of the Premiers directly advocated the representation of the colonies in a Council sitting in London, the opinion of the greater number was expressed in the observation that the Colonies were very well as they were at present. The importance to the Colonies of maritime defence was recognised by Cape Colony in the offer to Her Majesty's Government of an ironclad as a contribution to Her Majesty's Navy. It has since been proposed to convert this offer into an annual contribution of money. The Canadian Tariff Act came into force on Aug. 1st, '98, setting up a preferential tariff in favour of the United Kingdom and various Colonies (see **CANADA**). Penny postage between Great Britain and Canada and Cape Colony was also set up in '98. A movement was set on foot in Canada with the object of securing the enrolment of Canadians in the Royal Naval Reserve, the proposal being that they should be trained at the expense of the Canadian Government but paid by the British taxpayer. See **GREAT BRITAIN AND HER COLONIAL TRADE**. Consult "Round the Empire" (Cassell), and "Imperial Federation" (Macmillan), by Mr. G. R. Parkin; "Britannic Confederation" (Philip); Publications of Imperial Federation (Defence) Committee (P. S. King & Co.); *Britannia*, monthly (Simpkin, Marshall & Co., Ltd.).

### IMPERIAL INSTITUTE.

The Imperial Institute of the United Kingdom, the Colonies, and India, was founded in 1887 as a record of Her Majesty's Jubilee. (See eds. '87 and '88.) In the main, the aims of the Institute may be said to be the formation of complete collections of the natural products of the British Empire, the establishment of a system of commercial intelligence to work with and supplement the display of the specimens, and the practical adaptation of both to the purposes and advancement of trade. The government of the Institute is carried on by a chartered body, whose form of constitution was approved by a royal warrant dated April 21st, '91. The governors are 125 in number, 12 being nominated by the Sovereign, 6 by the President, 36 by Colonial Governments, 15 by the Government of India, by 21 county and municipal authorities of the United

Kingdom, and 27 by the various learned and technical societies and institutions of the Empire. The full complement is made up with certain *ex-officio* governors, who are principally high officials of the State. The foundation-stone was laid by Her Majesty on July 4th, '87, and the buildings were partially opened in June '92. The Fellows of the Institute number over 8000, but nearly 1500 of them are Chartered Life Fellows, principally by reason of being original subscribers, and therefore exempt from payment of subscription. The annual subscription for the United Kingdom is £2; for Indian and Colonial Fellows £1: the wives of Fellows are entitled to Fellowship on election at half rates. The Institute practically offers all the advantages of a club-house. Vast quantities of specimen products from all parts of the Empire are in the galleries. Collections of products have been prepared and transmitted by the Governments of India, Ceylon, Straits Settlements, Mauritius, and Seychelles; the Canadian provinces of Quebec, Ontario, New Brunswick, Nova Scotia, British Columbia, and Manitoba; New South Wales, Victoria, South Australia, Queensland, Western Australia, Tasmania; West Coast of Africa, Zanzibar, Cape Colony, Natal, Bechuanaland and Mashonaland; Jamaica, Bahamas, Bermuda, Hong-Kong, British North Borneo, and Malta. Curators and officers in charge of collections have been appointed by the Governments of India, Ceylon, the Canadian provinces, Cape Colony, Jamaica, and Bahamas.

The formal inauguration by the Queen took place on May 11th, '93. During the summer of '98 an Exhibition of Acetylene Gas apparatus was held, and the celebrated Concert Orchestra from La Scala, Milan, under the directorship of Leandro Campanari, gave a series of concerts twice daily. Admission to the Institute during the summer season is free from 10 a.m. to 1 p.m. on every week-day except Wednesday; after 1 p.m. on payment of 1s. On Wednesdays the Institute is exclusively reserved for the inspection of Fellows and friends introduced by them with tickets. During the autumn and winter seasons the Commercial Collections and the Commercial and Industrial News Room are open free to the public from 11 a.m. till 5 p.m. Lectures and concerts are also given during the winter season. In connection with the School of Modern Oriental Studies, the Ouseley Scholarships of '99, each of £50 per annum for two years, will be awarded, should sufficient merit be shown, the first for proficiency in Arabic, the second for proficiency in Sanskrit, and the third for proficiency in Persian. In Jan. '95 was published the first number of the *Imperial Institute Journal*, which is issued every month as a record of the trade and commerce, finance, and agriculture of the British Empire. The *Imperial Institute Year-book* is a unique and most valuable compilation dealing with the history, physical geography, natural resources, industries, and commerce of the Colonies and India, and collating facts and figures with regard to those mainly taken from official sources which had never before been comprehensively brought together. A most valuable feature of the book is the inclusion in it of diagrammatic charts, showing the fluctuations in money and discount, in the exchange value of silver, etc. The Scientific and

Technical Department of the Institute, opened in '94 for the practical investigation of economic products furnished by the Empire, is partly supported by special contributions from the Royal Commissioners of the Exhibition of 1881 and the Goldsmiths' and Salters' Companies. In '96 the Laboratories and staff were much extended, and the department was placed under the direction of Professor W. R. Dunstan, M.A., F.R.S. The Department has attached to it a special staff of Scientific and Technical Referees. Hon. Secretary and Director, Sir Frederick Abel, Bart., K.C.B., D.C.L., F.R.S.; Director of the Scientific and Technical Department, Professor Wyndham R. Dunstan, M.A., F.R.S.; Assistant Secretary, Lieut. Gerald R. Maltby, R.N. (ret.). Offices, Imperial Institute, Imperial Institute Road, S.W.

**Imperial Penny Postage.** See SESSION, sect. 12.

**Imports.** See BRITISH EMPIRE (table) and TRADE, '98.

**Income Tax.** The rates at which the Income Tax has been charged from '42 to '95 are as follows. £100 but under £150: '53, '57-8, 5d. in the £; '54, 10d.; '55-6, 11½d.; '59, 6½d.; '61-2, 6d. £150 and upwards: '42-52, and '57, 7d.; '54, 1s. 2d.; '55-6, 1s. 4d.; '58, 5d.; '59, '61-2, 9d.; '60, 10d. Uniform duties on Incomes of £100 a year and upwards, with abatement of £60 on Incomes under £200: '63, 7d.; '64, '68, '71, 6d.; '65-6, '70, 4d.; '67, 5d. Abatement extended to £80 on Incomes under £300: '72, 4d.; '73, 3d.; '74-5, 2d. Exemptions extended to Incomes under £150, and abatement to £120 on Incomes under £400: '76-7, 3d.; '78-9, '81, '83-4, 5d.; '80, '84, 6d.; '82, 6½d.; '85-6, 8d.; '87-8, 7d.; '88-93, 6d.; '93, 7d.; '94, 8d. and exemptions extended to £160, and abatements to £160 on Incomes under £400: '95-8, 8d., and Abatements of £150 allowed on Incomes between £400 and £500, of £120 between £500 and £600, and of £70 between £600 and £700.

**Incorporated Law Society, The.** From papers discovered a few years ago at the Incorporated Law Society, and recently published, it appears that in the year 1739 a society called the "Society of Gentlemen Practisers in the several Courts of Law and Equity" was established, for the promotion of fair and honourable practice and the detection and discountenance of all unfair practice. This Society continued in active existence from that time till 1822, from which period all trace of it is lost. In the year 1825, however, certain leading solicitors issued a prospectus advocating the establishment of a "Law Institution." The deed of settlement of the Institution was completed in Feb. '27, and a royal charter was obtained in Dec. '31. In '45 the Society, which had been originally constituted as a joint-stock company, was remodelled upon the principle of other learned and professional bodies, and received a new charter. This charter was amended by a supplemental one in '72. Any solicitor practising in England or Ireland, and any writer practising in Scotland, as well as any solicitor or writer who has ceased to practise, is eligible for election as a member of the Society. The administration of business is in the hands of an elective council of forty ordinary members, of whom ten vacate their seats every year, and ten extraordinary members chosen by the council from among those members of the Society who are

presidents of provincial law societies. The President and Vice-President are annually elected by the members of the Society from the members of the council. The members of the Society at present number 782. Its buildings are situated in **Chancery Lane**, and comprise a handsome hall and a library of upwards of 36,000 volumes. The general function of the Society resembles that which the Inns of Court are supposed to discharge. It takes care of the professional training, character, and interests of solicitors. When it was founded no test was required from any person wishing to become a solicitor beyond evidence of character and of having served under articles for the prescribed time. The Society instituted lectures on law in '33, and in '36 obtained from the judges authority to examine students on the completion of their articles. Since then **Preliminary** and **Intermediate Examinations** have been added, and the entire control of all the examinations has been transferred to the Society. Under recent legislation, all cases of alleged malpractice by solicitors are heard before a specially appointed committee, which, when necessary, makes a report to the High Court. The Society exerts itself to promote what it considers the legitimate interest of the public and of the profession. It has also assisted in promoting reforms beneficial to the whole community, such as the concentration in one building of the various Courts, the Conveyancing Acts, the Trustee Act, and the Companies Act of '98. The improved standing of solicitors is in great part due to the exertions of the Society. **Secretary**, E. W. Williamson. **Office**, Chancery Lane. Consult the Handbook of the Society.

**Incorporated Society of Authors, The**, established in 1884 by the late Sir F. Pollock, and other eminent literary men, under the presidency of the late Lord Tennyson. Its object is to defend the interests of literary, dramatic, and musical property, to maintain the rights of authors of all the above works, to advise them as to questions of copyright, and in other ways to render them assistance in their agreements and the publication of their works; to assist them to recover accounts and moneys due under their agreements, or for work sent to magazines, etc. Also to procure in England the passing of an Act which shall amend and consolidate the law of Domestic Copyright. During '96 the Society drafted a small Copyright Bill to amend some of the worst features at present existing. This Bill passed the Lords in '97. It is hoped that either this Bill will become law, or that in the near future the Government will bring forward a full consolidating Bill. It is the only association of the kind in England, but its model, "*La Société des Gens de Lettres*," has been flourishing for over fifty years in France. The works published by this Society are "Grievances of Authors," "Literature and the Pension List," "History of the *Société des Gens de Lettres*," "The Cost of Production," "The Methods of Publication," "Copyright Law Reform," and a short record of the Society's work from its foundation down to '92. The organ of the Society is *The Author* (monthly). **Office**, 4, Portugal Street, Lincoln's Inn Fields, W.C. **Chairman**, Sir W. Martin Conway ('98); **Secretary**, G. Herbert Thring. Affiliated to the Society is an agency, the Authors' Syndicate, which undertakes business arrangements for

members. Mr. W. Morris Colles is **Managing Director**.

**Independent Labour Party.** See SOCIALISM.

**Independent Order of Oddfellows.** See ODDFELLOWS.

## INDIA.

India is a dependency of Great Britain, consisting partly of territory under the direct administration of British officials, and partly of native states, all subordinate, in varying degrees of relationship, to the suzerain power. The British territory was acquired by the **East India Company**, by conquest or treaty, in the course of one hundred years, dating from the battle of Plassey (1757). As a result of the mutiny of the Sepoy army (1857-8), the East India Company ceased to exist; and the direct sovereignty was vested by Act of Parliament in the Crown. In accordance with an Act of Parliament passed in '76, Queen Victoria assumed the title of "**Empress of India**," *Kaisar-i-Hind*. The Parliament of the United Kingdom is, of course, supreme over India; but this supremacy is enforced rather by means of ministerial responsibility than by direct legislation. Practically, all the statutes relating to India are in the nature of either constitutional enactments or financial provisions. The Act of Parliament that abolished the Company also created a **Secretary of State for India**, together with a **Council** (selected for a period of ten years from among Indian officials for the most part), in which is vested the authority of the Crown. In England every measure concerning India runs in the name of the Secretary of State; and he alone is responsible to Parliament. In practice he is always a Cabinet minister of the first rank. In India the supreme authority, both executive and legislative, is vested in the **Governor-General in Council**. The Governor-General, or Viceroy, has power to overrule his Council in cases of emergency. For ordinary purposes the Council is composed of six members, all appointed, like the Governor-General himself, by the Crown. These six members preside over the departments of Finance and Commerce, Home Affairs, Revenue and Agriculture, Military Administration, Legislation, and Public Works. The Commander-in-chief is appointed as an extraordinary member. For purposes of legislation this Council is augmented by about twelve additional members, nominated by the Governor-General, of whom one-half must be non-official persons, and of whom some are always natives. The four provincial legislative councils and the Calcutta Chamber of Commerce have each the right to recommend one member. The seat of the Supreme Government is Calcutta, with an annual migration to the hill station of Simla for the hot season. As regards the **work of administration**, India is divided into several divisions. Two of these, Madras and Bombay, which boast a historic existence for two centuries, are styled Presidencies, and enjoy a certain precedence. They are each ruled by a Governor, appointed by the Crown, with legislative and executive councils modelled on those of the Governor-General. They each possess an army and a civil service of their own. Bengal and the North-West Provinces are under Lieut.-Governors and have each a legislative council only. The other provinces

have no councils or legislative powers. The Punjab is under a Lieut.-Governor. Three more, of less importance (the Central Provinces, Burma, and Assam), are under Chief Commissioners. In addition, there are some smaller tracts under the direct administration of the Governor-General. Within the provinces the actual unit of administration is the **District**, which forms the charge of an officer, usually styled Collector or Deputy-Commissioner. His principal duties are executive, magisterial, and fiscal; but he also exercises supervision over police, jails, schools, public works, forests, etc. The Districts are combined into Divisions under Commissioners. As to justice, the Collector in each District is usually judge both of first instance and appeal. Madras, Bombay, Bengal and the North-west Provinces have each a High Court, from which there is an ultimate appeal to the Privy Council in England. The Punjab has a Chief Court, and Burmah, the Central Provinces, Oudh and Sind, have each a Judicial Commissioner. For local government purposes there are the municipal bodies, numbering about 750, in all towns of sufficient size, appointed on the elective principle, and in the rural districts there are over a thousand district and local boards. The staff of administration consists of: (1) the covenanted civil service, appointed after competitive examination in England; (2) the statutory civil service, selected from among natives; (3) military officers of the staff corps in civil employ; (4) a miscellaneous class of uncovenanted civil servants of different grades, who may be either Europeans or natives. There still remain a number of **native or feudatory states**, over which the British Government has indeed control, but not control of the direct character which it exercises over the wholly British territory. Some, but not all, of these states pay tribute to the supreme Government. The nature of British control over these states varies, and is exerted chiefly through a political resident, who assists the native princes. These princes can manage their internal affairs, but have no power to make war or peace. Their external relations are in the hands of the Supreme Government, and they can only maintain a limited military force. The latest census of India ('91) states that the total area of these states was 595,167 sq. m., and pop. 66,050,479. **Religion.** The Hindu religion is that of three-fourths of the whole population. The Mohammedans number about 57,000,000 adherents, the Buddhists about 7,000,000 (chiefly in Burmah), and Christians about 2,500,000. The total number of **schools and colleges**, '97, was 152,841, attended by 4,303,109 pupils, of whom only 397,103 were girls. The large majority of the population are engaged in agricultural pursuits, nearly 200,000,000 either being engaged in tilling the soil or dependent upon those so engaged. Metal and textile workers, glass and pottery workers, with their dependants, number close on 20,000,000, and there are large numbers employed in service. In every province a special department is established for the purpose of improving agricultural methods and disseminating information. The principal crops cultivated are rice, wheat, and other food grains, tea, cotton, sugar-cane, tobacco, and indigo. There are two kinds of tenure under which the land is held. The first, the **Zamindari tenure**, prevails principally in Bengal, the Punjab, and the North-west Provinces and Oudh, while it

also exists in the Central Provinces, Madras, and Assam. Under this system the land is held in large estates by zamindari and by village communities, and the state revenue is assessed and paid on each estate as a whole for stated periods. The **rayatwari system** prevails in Bombay, Madras, Sind, Burma, Assam, and to some extent in the Central Provinces. Under this system the land is held by petty proprietors direct from the Government, and the revenue is assessed with each holding, and is paid directly to the State. The country is rich in coal, though little mining has as yet been done. The production in '97 was nearly 4,000,000 tons. The **railways** of India have been constructed either by private companies to which the State guarantees interest, or directly by the State. The total number of miles open for traffic in March '97 was 20,390, while over 4000 more miles were sanctioned. The area of British territory alone (excluding native states) is 964,993 sq. m., and the population, 221,172,952. The **total area** of India, including Burma and the native states, amounts to 1,560,160 sq. m., and the **total population**, according to the corrected census of '91, numbers 287,223,431. The revenue for '96-7 was, reckoning the rupee at 1s. 4d., £62,753,160, and the **expenditure** £63,889,840; the estimates for '97-8 showed a revenue of £64,374,000, and expenditure of £67,963,000; the estimates of '98-9 a revenue of £66,057,000, and an expenditure of £65,463,000. The **public debt** is Rs. 114,862,983 in India, and £107,404,143 in England. The **imports**, including merchandise and treasure, for the year ending March 31st, '97, were £59,453,000, and the **exports** £72,607,000. For all details as to the army see **ARMY, BRITISH**; see also **BRITISH EMPIRE** (table), **BURMA**, **DIPLOMATIC**, **INDIAN CURRENCY COMMISSION**, **INDIAN FINANCE**, **ROYAL COMMISSION ON**; **MEDICAL SUMMARY**, '98, and other articles.

**History, '98.**—The retirement of the British forces from Tirah, in the Afridi country, to winter quarters in the lower valleys, necessitated by the approach of the cold weather, was skillfully and successfully effected early in Dec. '97, but the troops were much harassed by the enemy all the way. Various amendments to the penal code and the code of criminal procedure were proposed at the Legislative Council's meeting (21st), so as to make it a penal offence to excite hatred, contempt, or disaffection against the Government, and extending the meaning of sedition so as to include attempts to promote feelings of disloyalty or enmity between different classes of Her Majesty's subjects. The 13th Indian National Congress met at Amraoti (28th), with Mr. Sankaran Nayar as President. Resolutions were passed unanimously condemning the Government's frontier policy, and calling on Great Britain to pay a substantial share of its cost. The direct representation of the people in the Viceregal Legislative Council was recommended, a protest was made against the gagging of the Press in the native States, and permanent settlement all over the country was suggested as the only means of mitigating and preventing famine. Gratitude was enthusiastically expressed for the aid given by Great Britain during the famine; and finally a protest was made against the proposed changes in the penal code. Sir James Westland introduced a Bill in the Legislative Council (Jan. 14th) providing for the issue of currency

notes to an amount equal to the value of gold deposited with the Secretary of State in London. He said that the Bill was necessary to relieve the stringency in the money market, and that it would certainly have this effect. The Bill was shortly afterwards carried, and its operation extended for two years. Most of the Afridi tribes had been brought into a submissive frame of mind by the middle of this month, except the Zakka-Khels of the Khaibar, who seized every opportunity of harassing the British force. Serious plague riots, accompanied by some loss of life, occurred at Bombay (March 9th). The Criminal Procedure Bill was finally passed by the Legislative Council (12th), 22 amendments having been accepted and 17 rejected. Sir William Lockhart had an interview with a number of chiefs representing all the frontier tribes, and gave them their final choice of peace or war (13th). The Zakka-Khels gave in (April 1st), paying the full fine and giving up all the rifles demanded. This virtually concluded the submission of the tribes, and the Tirah force was reduced to three brigades, while Sir W. Lockhart left Peshawar (4th). By September the caravan traffic through the Khaibar was in full swing again, a brigade under Colonel Egerton holding Landi Kotal, and the Khaibar Rifles serving between that point and Jamrud. A few rifles were still in the hands of the Khasroji section of the Zakka-Khels, but the outlook all over the frontier districts was eminently satisfactory. The conditions drawn up by the Government for the control of the Khaibar Pass were announced to the Afridi jirgahs at Peshawar (Oct. 24th). Forts will be built at Landi Kotal, and at other places between there and Jamrud, to keep the pass open. A railway will be built, if necessary. The Afridis will manage their own affairs; but in the Khaibar they will be responsible to the Government, which will continue the allowances and will maintain a militia recruited from the Afridis and other clans, commanded by British officers. The jirgahs, which were of an absolutely representative character, and numbered nearly 200 men, accepted the terms (Nov. 4th). A full account of the recrudescence of the plague during the year, and of the steps taken to combat it, will be found under the MEDICAL SUMMARY, '98. The question of currency, so much debated during the year, is also treated in a separate article, INDIAN CURRENCY COMMISSION. Lord Elgin's term of office expired during the year, and Mr. G. N. Curzon, M.P., then Under-Secretary for Foreign Affairs, was appointed to succeed him, and raised to the Peerage as Lord Curzon of Kellleston.

**India Frontier Operations.** See SESSION, sect. 13.

**India, Imperial Order of the Crown of,** was instituted Jan. 1st, 1878, and consists of the Sovereign and such as the Sovereign may think fit to appoint of the Princesses of Her Majesty's Royal and Imperial House; the wives and female relatives of Indian Princes; and the wives and other female relatives of any of the persons who have held, now hold, or will hereafter hold the office of Viceroy and Governor-General of India, Governors of Madras and Bombay, or Principal Secretary of State for India. Registrar of the Order, Sir Albert W. Woods.

**Indian Association, National.** Established in 1870 (by Miss Mary Carpenter) for the pur-

pose of promoting social progress and education in India, and extending friendly intercourse between the English people and the people of India. The Association carries out these objects by the diffusion of information; by grants in encouragement of education, especially of female education, in India; organising lectures on Indian subjects, social meetings, etc.; selecting English teachers for Indian families and schools; helping and advising Indian students who visit England. The Princess of Wales is Patroness of the Association, and Lord Hobhouse, K.C.S.I., the President. The Vice-Presidents include a large number of influential natives of India, Anglo-Indians, and other ladies and gentlemen interested in the welfare of the Empire. **Organ of the Association, The Indian Magazine and Review** (monthly), published by Archibald Constable & Co., 2, Whitehall Gardens, S.W. There are several branches of the Association in India. **Hon. Secretary in England, Miss E. A. Manning, 5, Pembroke Crescent, Bayswater, London, W.**

**Indian Civil Service** embraces a much wider field of employment than does the Home Civil Service. Besides the ordinary departments of civil administration, it includes judicial posts, the medical service, the forest department, and officers of the staff corps in civil employ. **Situations in the Covenanted Civil Service** are gained by passing a competitive examination in England—which examinations are as a rule held annually during August in London. The candidates who have successfully competed are required to undergo two years' probation, and to pass periodical examinations in special subjects of study before proceeding to India. Candidates must be above 21 and under 23 on the 1st of April preceding the date of the examination. Application for admission to the examination must be made before May 31st in each year. Candidates are encouraged, though it is not imperative, to obtain a **university training**; and to this end the Government makes an allowance of £100 per annum to all who pass their one year's probation in residence at a university. Having arrived in India, the candidate must within a specified period elect to serve either in the **executive** or the **judicial branch** of the service. In the former branch the lieutenant-governorship of a province is the highest post to which a civil servant can attain, and in the latter branch a judgeship of the High Court. The members of the **Statutory Civil Service of India** are selected purely from among the natives. Many appointments are in the gift of the local governments. The **Public Works Department** is recruited from the Royal Indian Engineering College (*q.v.*) at Cooper's Hill, from the corps of Royal Engineers, and, as regards natives, from the Civil Engineering Colleges in India. The **Telegraph Department** is recruited much in the same manner. Examinations for the **Forest Department** and the **Medical Service** are also held in this country, and successful candidates are required to attend a four months' course at the Army Medical School at Netley, during which period they receive an allowance to cover the cost of living. A resolution was carried in the House of Commons (June 2nd, '93) to the effect that all open competitions for appointments to the Civil Services of India should be held simultaneously both in India and England, and that, such examinations in both countries being identical in their nature,

all who competed should be finally classified in one list according to merit. The Government immediately requested the Indian Government to give prompt and careful consideration to the subject. This was done, and the result was that that Government pronounced emphatically against the proposal. Her Majesty's Government, therefore, came to the conclusion that by far the best method of meeting the legitimate claims and aspirations of the natives of India was to bestow such of the higher posts as could be made available for them on those who distinguished themselves by their capacity and trustworthiness in the performance of subordinate duties, and that the existing system, subject to such alterations in detail as experience might prove to be necessary, should be maintained.

### INDIAN CURRENCY COMMISSION.

As early as 1878 the Indian Government, in consequence of the fall in silver then beginning to be seriously felt all over the world, conceived the idea of closing the Indian mints against the free coinage of silver until the rupee should rise in value to 2s., or one-tenth of an English sovereign. This they hoped would counteract the cheapness of silver, by raising the value of the rupee. This proposal was referred to a committee, appointed, like the present Committee, by the Secretary for India. But the difficulties of interfering with the currency were felt to be so grave, that the proposal was finally rejected at that time. The financial troubles of the Indian Government, however, increased. That Government undertakes large responsibilities in the way of railways and public works of all kinds; it has heavy official expenses; it imports largely from Europe, and has borrowed from other countries. The debt thus incurred is entirely a gold one, and must be paid back in gold. But it receives its revenue in rupees, and since these rupees are principally raised by land taxes, it follows that when silver became low in value the Government required more rupees to pay its obligations with than it had at its command—the amount of these land taxes in rupees having been already determined and settled with the natives, either for ever or for very extended periods of years. The suggestion that the extra revenue thus called for might be met by increasing those taxes was deemed impracticable, as likely to cause riots and other political dangers; and eventually the closing of the Indian mints to silver in '93 was sanctioned by the Imperial Government on the strength of recommendations to that effect received from India and from a second committee, commonly called Lord Herschell's Committee, which had been appointed to consider the question. The mints were accordingly closed, and it was provided that when the scarcity of silver coin should bring the value of the rupee up to 1s. 4d. the mint would be opened to the coinage of rupees at that price; but, as a matter of fact, that has never been realised. The consequences of this step have been variously estimated by its upholders and opponents. The believers in a gold standard consider it as the first move in a change that will finally end in gold being made full legal tender in India as in England. The advantages gained by the Indian Government are obvious; the rupee has gone up in price, as was hoped, and exchange is altogether

in favour of remitting home. As far as the official side of the question is concerned the position of the Government financially has improved.

But there is another side, which is of equal importance. While the Government has gained, the producer, whether native grower or European planter, finds he has to lose whenever he has to place his tea, cotton, or whatever it may be, on a market where he is paid for his goods in gold. When he has turned the gold into rupees he now has proportionately fewer for each sovereign than he had when the value of the rupee was less, and as he has to pay his labourers as many rupees as he did before the mints were closed, it follows that his own profits are smaller. In other words, while all expenses of production remain the same, he is left with fewer rupees as his own share of his industry. In addition, the capital which a few years ago flowed easily from Great Britain to India to be invested in the planting industries, etc., has now almost entirely ceased, investors declining to lend their money where they cannot be sure of a profitable return. Hence the opponents of the Government's financial policy contend that the improved balance sheet of the Indian Government shown since '93 is no real criterion of the state of trade in that country or in Ceylon, which, although a Crown Colony, must be included with India in any consideration of the question, as it uses the same coinage as its greater neighbour. The natives have lost heavily by the closing of the mints. Many of them are compelled by poverty or some other cause to turn their hoards of silver ornaments into money, and it has been estimated that not less than £60,000,000 has been lost by the poorest classes in weight and exchange from this cause alone. There have not been wanting, indeed, politicians who have argued that the recent Indian famine was caused less from scarcity of food than of the means with which to buy it. All these facts combined have resulted in a strong feeling of discontent with the action of the Government, and it may be said without fear of contradiction that commercial opinion is practically agreed that the reopening of the mints is the only possible cure for the present state of affairs. Strong memorials representing that view have been received by the India Office from the merchants in India, London, and other centres of trade. On the other hand, a proposal was brought before Parliament in the spring of '98 to mend matters by sending out from this country a gold reserve of £20,000,000 to India; and finally a Departmental Committee to consider the whole question was appointed by Lord George Hamilton. This Committee, which is now sitting, consists of the following members:—Sir Henry Fowler, G.C.S.I. (Chairman), Lord Balfour of Burleigh, Sir David Barbour, K.C.S.I., Sir John Muir, Bart., Sir Francis Mowatt, K.C.B., Sir Charles Crosthwaite, K.C.B., F. C. Le Marchant, Esq., Everard Hambro, Esq., W. H. Holland, Esq., Robert Campbell, Esq., Sir Alfred Dent, K.C.M.G., Robert Chalmers, Esq. It has already heard a large number of witnesses and experts, but its report is not to be looked for till the spring of '99 at the earliest. A considerable number of the witnesses endeavoured to demonstrate that there was really no other course possible to the Indian Government but to close the mints, whereas

the unofficial evidence has been all the other way. The final recommendations of the Committee are awaited in much anxiety by all having official or commercial interests in India.

**Indian Empire, The Most Eminent Order of.** Instituted in 1878 to commemorate the proclamation of Her Majesty as Empress of India, and enlarged in '86, and in the Jubilee year, as a means of rewarding those whose services to the Indian Empire have merited the Imperial favour. This order consists of the Sovereign, a Grand Master, who is the Viceroy of India for the time being, and of three classes of members—viz., Knights Grand Commanders (G.C.I.E.), Knights Commanders (K.C.I.E.), and Companions (C.I.E.). Only the two first of these, being knights, are entitled to the prefix "Sir." The motto of the order is *Imperatricis Auspiciis*.

**Indian Expenditure, Royal Commission on.** A Royal Commission was appointed in May '95 to inquire into the administration and management of the military and civil expenditure of India, and into the apportionment of the charge between the Governments of the United Kingdom and of India. The Commission was constituted as follows:—Lord Welby (Chairman), Rt. Hon. L. Courtney, M.P., Rt. Hon. W. L. Jackson, M.P., Field-Marshal Sir Donald Stewart, Sir W. Wedderburn, M.P., Sir E. W. Hamilton, Sir James Peile, Sir Andrew Scoble, M.P., Mr. T. R. Buchanan, M.P., Mr. W. S. Caine, M.P., Mr. Dadabhai Naoroji, M.P., Mr. R. G. C. Mowbray, Sir Ralph Knox, Mr. G. L. Ryder, and Mr. Collin G. Campbell (Secretary). The main problems to be solved are how far the Indian Treasury ought to be charged for a number of services for which no charge is made to other dependencies of Great Britain, and especially for military charges designed primarily in the interests of Great Britain and without reference to India. A Select Committee in '74 acknowledged the right of India to equitable treatment, but also declared her liability for the cost of improvements in the general military administration. If the principle be maintained, it is questionable whether the present capitation charge for the British troops employed in India will be materially reduced by any fresh scrutiny. If the principle be modified with a view to the financial effect of the reforms as regards the troops on Indian service, and of the unsuitability of certain of the charges to Indian military requirements, then a field for the readjustment of home charges opens up. And so as to the civil establishments in England which are charged to the Indian Exchequer. India now has to pay the total cost not only of the services which the India Office renders to her, but also of the functions it discharges as a branch of the Home or Imperial administration. The fundamental question is—How far are Parliament and the nation willing to reconsider the principle, and to readjust the financial settlement which has been gradually formed upon it? The Commission began its work at the end of Nov. '95, and a mass of material was at once placed before it by the Indian Committee in the House of Commons, consisting of those members who devote themselves specially to Indian questions. No report had been issued by Nov. '98, though it was understood that it was then in preparation.

**Indian National Congress.** Some fourteen years ago a movement took definite shape,

among the educated classes of India of all races, religions, and provinces—to meet together and discuss their political wants. Hitherto the people of India had been widely separated from one another by differences of language, creed, and caste; and these differences had been intensified by distance. It was the English Government that for the first time made it possible for them to unite in a common object. The original stimulus came from the education in English, which is given in all the colleges and higher schools, and in many of the common schools; but the scheme could never have been realised if it had not been for the development of the railway system. The first Indian National Congress was held at Bombay in Dec. '85; the president was Mr. W. C. Bonnerjee, a Bengali Brahmin. Calcutta was the scene of the twelfth Congress, in December '96, Amraoti of the thirteenth Congress, Dec. 28th, '97, and Madras of the Fourteenth Congress, December '98. The political meetings of the Congress being ended, a Social Conference for the discussion of social reforms in the Hindu community is regularly held. From one-half to two-thirds of the delegates to the Congress attend this Conference. The resolutions adopted at all the congresses have been of a similar character. Questions of social reform—such as child marriage—have been altogether avoided, as affecting only special religions and castes. Loyalty to the British Crown has been unhesitatingly avowed, both in the resolutions and in the speeches; and certain political changes in the administrative system have been as unhesitatingly demanded, special stress being laid upon the excessive growth of Indian military expenditure, the evils of the "forward" frontier policy, the want of an adequate system of education, and the urgent necessity of giving effect to the resolution of the House of Commons in favour of holding examinations to the Indian Civil Service simultaneously in India and England. The Right Hon. Sir Richard Garth, Q.C., late Chief Justice of Bengal, has described the Indian National Congress as "a large, influential and important assembly of earnest and patriotic gentlemen," and says that it "affords an open, honest and loyal means of making the views and wishes of the most intelligent section of the Indian people known to the Government." The Indian Parliamentary Committee, which consists of 120 members of the House of Commons, and acts in concert with the British Committee of the Indian National Congress, watches Indian interests in Parliament, and was chiefly instrumental in securing the appointment of the Royal Commission on Indian expenditure. The chairman of both Committees is Sir W. Wedderburn, M.P. The official report of the various sessions of the Congress may be obtained from the British Committee, 84 and 85, Palace Chambers, Westminster, S.W. A weekly journal, named *India*, "a record and review of Indian affairs," is published at the same address. It is edited by Mr. Gordon Hewart, M.A. (Oxon), who is also Secretary of the British Committee. *India* publishes a full report of all proceedings in Parliament relating to Indian affairs.

**India, The Most Exalted Order of the Star of.** Established by letters patent in 1861, and enlarged in '66 and '78. Its badge is a light-blue ribbon with white stripes edge-wards, and with motto, "Heaven's Light our Guide." It consists of the Sovereign, a Grand

Master, who is the Viceroy of India for the time being, and three classes of members:—

G.C.S.I. . Knight Grand Commander.

K.C.S.I. . Knight Commander.

C.S.I. . . Companion.

Members of the first two classes, being Knights, are entitled to the prefix "Sir." Of the first class there may be the statutes of the Order be 30, of the second class 72, and of the third (or Companions) 144; but extra and honorary members may, and have been, from time to time appointed. The Registrar of the Order is Sir Albert W. Woods; and the Secretary is the Foreign Secretary to the Government of India.

**Indo-China** is the name given to the French possessions in the Annamese peninsula. They include Cochin China, Annam, Cambodia, and Tonquin, of which separate accounts will be found under their respective headings. A convention with China (signed June 25th, '95), completed the delimitation of the boundaries between French Indo-China and Chinese territory, and settled all commercial arrangements in connection therewith. Among these one of the most important points was the right given to France to extend the Annamite railway into Chinese territory. This convention made French and Chinese territory contiguous from the Mekong to Laokai, on the Tonquin-China frontier. French access to China through Tonquin and Yunnan was thus definitely assured; but British rights seemed to be infringed, for Great Britain had definite rights over the Shan States of Kiang-Hung and Kiang-Kheng, to which France laid claim under the convention. However, by an agreement made in '96 between England and France the matter was settled. The Kiang-Kheng territory was handed over to France by Great Britain, the Mekong river being made the dividing line between the possessions of the two nations from the north of Siam to the boundaries of China. The idea of a buffer state was thus given up. The boundary between the French and Siamese possessions was made the river Mekong southwards to the rapids just below Stung-Treng, from which point the frontier diverged in a south-westerly direction to the coast. For the effect of the agreement upon Siam see SIAM. See CHINA (map) as to French railway projects. M. Doumer is the Governor-General of Indo-China, and the seat of government is at Hanoi.

**Inebriates Act.** See SESSION, sect. 58.

**Infant Life Protection Act, '97.** See SESSION, ed. '98.

**Institut de France.** See ACADEMY, THE FRENCH.

**Institute of Chartered Accountants in England and Wales.** Incorporated by royal charter May 11th, 1880. **Objects.** The elevation of the profession of public accountants as a whole, and the promotion of their efficiency and usefulness, by compelling the observance of strict rules of conduct as a condition of membership, and by setting up a high standard of professional and general education and knowledge, and otherwise. **Conditions of Membership.** Except in the case of persons who have been for not less than ten years in practice as public accountants, or who were in service as public accountants' clerks before March 21st, '82, the date of the first bye-laws, persons desiring to become members of the Institute must pass the preliminary examina-

tion, unless they have previously passed some equivalent examination; they must then be articulated for five years, and pass an intermediate examination after the expiration of half the term of service, and a final examination on the end of their service. In the case of graduates of a university, the term of service under articles is three years. **Officers:** President, John George Griffiths (Deloitte, Dever, Griffiths & Co.), 4, Lothbury, E.C.; **Secretary,** William Gethen Howgrave; **Librarian,** Edward Taylor; **Solicitors,** Messrs. Markby, Stewart & Co., 57, Coleman Street, E.C. **Hall and Offices,** Moorgate Place, London, E.C.

**Institute of Journalists.** See JOURNALISTS, INSTITUTE OF.

**Institute of Secretaries,** founded 1891. Has enrolled over 1400 members, and aims at the general advancement of the status of secretaries, and the promotion of personal and friendly intercourse. One of its objects is to ascertain the law and practice, and form a strong body of expert opinion, with the view of codifying and amending the Acts relating to Companies, and to watch legislation affecting the same. Secretaries of public companies, societies, institutions, etc., are eligible as fellows, and assistant secretaries, registrars, or clerks as associates. Examinations for membership as associate are held in June and December; no date has yet been fixed for examinations for membership as fellow. A Library and Reading-room has been opened, and an Employment Register is kept. **Organ,** *The Secretary's Journal*, monthly. **President,** Mr. John T. Denniston. **Secretary,** Mr. Russell Day, B.A., L.L.M. **Offices,** 19, Birchin Lane, Cornhill, E.C.

**Institution of Civil Engineers, The.** Founded Jan. 2nd, 1818, incorporated by royal charter June 3rd, '28, and received supplemental charters, with extended powers, Aug. 3rd, '87, and March 20th, '96. The object of the Institution is to further the advancement of mechanical science, and more particularly to promote the acquisition of that species of knowledge which is essential in the profession of a civil engineer. According to its constitution, it consists of members, corporate associates (called associate members), and honorary members. There are also attached to it non-corporate associates and students. It has recently adopted a scheme by which candidates for associate membership and studentships will in future be subject to examination, the subjects being general education and scientific knowledge befitting the profession of a civil engineer. These examinations will be open to non-members. The numbers of the several classes are: members 1919, associate members 3945, honorary members 20, associates 322, and students 902: total 7148. The session extends from the first Tuesday in November to the last Tuesday in April, the ordinary meetings being held on the Tuesday in each week. The record of the papers read and the discussions thereon at these meetings is embodied in the *Minutes of Proceedings*, which likewise contain other original communications presented to the Institution, as well as abstracts of papers in scientific Transactions and periodicals. Besides the ordinary meetings there are every fortnight during the session special supplemental meetings for students only. The gross receipts were £24,787 5s. 11d., including strict income £21,892 5s. 7d., capital £2428 13s., and

trust funds £466 7s. 4d. The funded property of the Institution amounts to £52,000, besides which it has under its charge trust funds of the nominal value of £17,092 os. 9d. It has a library of upwards of 30,000 volumes, including 730 of rare tracts, the number of which cannot be much less than 10,500. Secretary, Dr. J. H. T. Tudsbury. Offices, Great George Street, Westminster, S.W.

### INSURANCE.

The following article on Insurance in all its branches, and in every department of those branches, will be found to be thoroughly up to date, and as exhaustive as its limits allow. The article deals with five branches, viz. :—

- I. FIRE.
- II. LIFE.
- III. MARINE.
- IV. ACCIDENT AND FIDELITY GUARANTEE, etc.
- V. MINOR BRANCHES, AND EXTRAORDINARY FORMS OF INSURANCE.

#### I. FIRE.

Since the previous edition of this Annual was published, fire insurance companies have had a very bad time for business, as the fires have been more than in average corresponding years, and, if rumour is correct, several insurance companies, and among them some in the first rank, will show an adverse balance on the year's transactions. In the United Kingdom the most extensive conflagration was that which occurred at Glasgow on April 25th, '98, and which, after starting in a block of buildings in East Howard Street, rapidly spread from block to block and from street to street, until a large amount of property was involved and finally destroyed. The manner in which the flames leapt across the surrounding thoroughfares recalls the calamitous fire at St. Mary Axe, London, in '93. There has been a marked decrease in Liverpool cotton fires. The only one of importance was that which broke out in Atlas Street, on April 22nd, when about 200 bales were destroyed or damaged. Owing to the more general adoption of automatic sprinklers in cotton mills, these factories have not materially contributed to the yearly fire waste. A serious loss took place in a warehouse connected with Messrs. Barlow & Jones' mill at Bolton, and the destruction of Messrs. Booth & Sons' mill at Turton, near Bolton, which was an automatic-sprinklered risk. Several fires have occurred at print works. The most destructive happened at the Gateside print works, at Barrhead, near Glasgow, at the Dunmurry print works at Belfast, and on Messrs. Lee & Co.'s premises at Castleton, Lancashire. Several woollen and worsted mill fires have been recorded during the year, the most serious being at Wrigley & Parker's factory at Batley, Lobbey & Co.'s, Carlinghow, in the same neighbourhood, Watergate mill, Dewsbury, and Bective mill, near Wakefield. A fire also involving a very heavy loss occurred at the Welsh flannel mill, Holywell. The insurance companies have not, during the year, suffered much from flour-mill risks. The only fires of importance which happened were those in a mill at Bedminster, Somerset, and one at Woolton, Lancashire. On Aug. 1st a fire broke out in Norwich on premises occupied as rope works, and before it could

be extinguished a large quantity of adjoining property, including an extensive drapery establishment, was destroyed. In the same month the menageries of Mr. Cross, at Liverpool, were demolished, and several lions and other animals were burnt to death. No theatre fires of any consequence have occurred during the year; but a music hall at Dewsbury, known as Hart's Amphitheatre, was burnt out in June. The timber trade, has contributed its full quota of losses: many destructive fires occurred in saw mills, timber yards, and stores in various parts of the country. Printers have fairly maintained their reputation as hazardous risks, and it is therefore improbable that the insurance offices will, for the present at least, see their way to make any reduction in the heavy rates printers are required to pay. The only important wharf fire that happened was that at Hay's wharf, in Tooley Street, London, which occurred in June, and caused heavy losses to several insurance companies. Among other big fires may be mentioned a tannery at Yatton, Young's brewery at Elgin, Free, Rodwell & Co.'s malt mills at Mistley, Essex, Saltpans hotel, Saltpans, and Aspinall's paint works, New Cross, and a large fire in Tabernacle Street, London, destroying several buildings. The number of farm and stack fires has been unusually large, especially in the South and West of England. They have been mainly attributable to the defective manner in which the hay was got and ricked this season; but the ubiquitous tramp has been responsible for many. There have also been several mansion fires during the year, the most noteworthy being at Rendlesham Hall, Suffolk, the seat of Lord Rendlesham; Eynsham Hall, Oxon; Abington House, Lanark, the property of Sir E. A. Colebrook; "Argosy," near Armagh, the seat of Capt. Bond-Shelton, and Tempsford Hall, Tempsford, Beds, the seat of W. Dugald Stuart, Esq. Owing to the constitution of rural and urban district and parish councils, a large number of fire brigades have recently been established. Many of them have done good work; but there are a considerable number (and this remark also applies to some of the older-established brigades) which have made themselves conspicuous by their efforts to take advantage of the misfortunes of others, and to extort heavy and unreasonable charges from the insurance companies through their insured.

The insurance companies allow about 50 per cent. discount for sprinklers with other fire-extinguishing appliances in cotton mills, 30 per cent. for lace factories and flour mills, and often 25 per cent. for wood-working establishments. Only about 15 per cent. is generally allowed as discount for sprinklers in printing works, which is far less than that allowed to more hazardous trades, and this small percentage is justly regarded by printers as a considerable grievance. As there are several latent dangers from the electric light in buildings, it is very necessary that there should be no defective installation of such. Several Fire Offices have rules for avoiding these dangers, but they are often disregarded owing to the employment of inexperienced men for installations to save expense. The necessity of expert and scientific workmanship for this purpose is more necessary than ever, and it should always be done under the supervision of a practical

electrical engineer. In several large towns many buildings intended for dwelling-houses, and which have long been used as residences, are afterwards made to bear far beyond their strength the weight of heavy stocks or heavy vibrating machinery. In consequence of this use made of the buildings, fires therein frequently become very serious, and the losses are heavy. In a recent paper read at a meeting of the Insurance Institute of Yorkshire by Mr. J. H. Mills, Resident Secretary at Huddersfield of the Palatine Insurance Company, he stated that in fire insurance business within the United Kingdom there is no scheme to be more desired than the general periodical inspection of all manufacturing and other large fire risks. Such inspection is made by the London Salvage Corps, the Liverpool Salvage Corps, and the Glasgow Salvage Corps, in warehouse risks coming under the London Mercantile Tariff, the London and Manchester Warehouse Tariff, the Liverpool Mercantile Tariff, and the Glasgow Warehouse Tariff. He adds that "the losses under these tariffs have shown much improvement in recent years. Outside these three areas the companies for the most part rely upon the fitful, far between, and comparatively cursory visits of surveyors for knowledge of their risks. . . . Periodical general inspection by every office is impracticable. Concerted inspection by all the offices is sure to come. Many of the more serious losses from building fires have resulted from the insufficiency and unreliableness of public water supplies. The people of a district with excellent water supply and adequate public appliances for extinguishing fires have proportionately to pay as much for fire insurance as those who have not these advantages.

The aggregate premium income of fire offices in '97 amounts to about £18,870,920, as reported in *White's Insurance Register*, '98, and the losses to about £10,596,179. The number of companies in the United Kingdom whose business is entirely or mainly that of fire insurance is 52; 37 compose the London Salvage Corps; and 61 companies contribute towards the expenses of the Metropolitan Fire Brigade at the rate of £35 per million on the amount of property insured. The premiums and losses of the leading British fire insurance companies as given below are mentioned in the *Annual Insurance Digest*, '98, published at the *Post Magazine Office* in November.

## II. LIFE.

As the financial year with the great majority of life offices closes at the end of December, published reports of their position do not appear for some months subsequently. According to the returns relating to life assurance companies in '97 to the Board of Trade, and published in '98, the important particulars in the table opposite are notified:—

Of the British and Colonial companies transacting ordinary life assurance in the United Kingdom, the following, arranged alphabetically, receive an annual premium income of £100,000 and upwards—viz., Alliance; Atlas; British Empire; British Equitable; Caledonian; City of Glasgow; Clergy Mutual; Clerical, Medical and General; Colonial Mutual; Commercial Union; Eagle; Economic; Edinburgh; English and Scottish Law; Equitable; Equity and Law; Friends' Provident; General; Gresham; Guardian; Hand-in-Hand; Imperial; Law Life; Law Union and Crown; Legal and General; Life Association of Scotland; Liverpool and London and Globe; London and Lancashire; London Assurance; London Life; Metropolitan; National Mutual; National Provident; North British and Mercantile; Northern; Norwich Union; Pelican; Provident Clerks; Provident Life; Prudential (Ordinary); Refuge (Ordinary); Rock; Royal; Royal Exchange; Scottish Amicable; Scottish Equitable; Scottish Provident; Scottish Union and National; Scottish Widows' Fund; Standard; Star; Sun; Sun Life of Canada; Union; and United Kingdom Temperance. The yearly premium incomes of three of the United States of America companies are very much in excess of those of British life assurance companies. These American companies are the Equitable of the United States, the New York, and the Mutual Life of New York. The premiums of British and American companies, while they indicate the magnitude of the business done by them, are not always an approximate evidence of their merits.

Life assurance as transacted at the *Post Office* is not suited to the habits of the working classes, and the number of policies issued by it is therefore very small. According to the last annual report of the Postmaster-General for March 1st, '98, the number of Post Office

assurances for '97 was 849 for £48,017, as compared with 256 for £20,600 in '83. The number of immediate annuities granted in '97 was 2051 for £56,237, as compared with 770 for £14,141 in '83. The number of deferred annuities in '97 was 207 for £4009, as against 104 for £2120 in '83.

On the other hand, an enormous number of life policies are granted to the masses by industrial life assurance companies and collecting friendly societies; and this kind of insurance has prodigiously increased during the last twelve years—so much so that about half the popula-

tion of this country is insured in them. The following figures, according to the latest returns, show receipts of over £100,000 premium incomes of industrial companies and collecting friendly societies: viz., British Workman's and General, £555,168 (including ordinary); Liverpool Victoria Legal, £573,149; London, Edinburgh and Glasgow, £262,661; Pearl, £540,929 (including ordinary); Prudential, £4,793,591; Refuge, £882,370; Royal Liver, £465,137; Royal London, £362,493; Scottish Legal, £147,850; Wesleyan and General, £329,525 (including ordinary). About half the number of British life offices

grant immediate annuities; and lend on personal security with life assurance; and about 27 transact fire insurance. The Caledonian Insurance Company have introduced a new form of assurance, whereby in approved cases it will grant immediate life assurance without medical examination. The directors require the applicant under this method to lodge a proposal containing the usual information respecting his own health, history, and the causes of the death of his relatives; and although the directors reserve their right to communicate with the ordinary medical attendant of the proposer, they do not contemplate exercising this power in ordinary cases. The main safeguard on which the Company rely is the requirement that the transaction shall take the form of an endowment assurance—that is, an

assurance payable on the attainment of a selected age, or at death if this should occur previously; but with this variation from the ordinary endowment assurance—viz., that the amount payable on survivorship shall be double the amount payable at death. To meet the case of those who do not desire a cash benefit on reaching the selected age, there is provided instead of the endowment the option of a large paid-up policy or the exchange of an annuity for the endowment. Liberal cash values will be allowed for the surrender of these assurances at any time after payment of two years' premiums. The Company have reduced the whole of life Tables without profits. One or two other companies also assure without medical examination. Under the name of **Indemnity Assurance**, some life offices grant

policies at extraordinarily low premiums for sums payable at death if this event occur before the attainment of ages 45, 50, 55, or 60. These are practically temporary assurances of very long duration. Nothing will be paid under them if policy-holders die after the expiration of the term for which they are granted.

**Endowment Policies** payable at a given age or earlier in the event of death, answer a very important public requirement, and are granted by most of the life offices. They have greatly increased during the last eleven years. Better arrangements have been recently made for paying surrender values and reviving lapsed policies. Several important restrictions have also been removed in favour of policy-holders as regards travelling and residing abroad. Invalids can also have their lives insured on favourable terms.—**The Equitable Life Assurance Society**, or the Old Equitable, as it is generally called, started upon a new career on June 16th, '93, when a memorandum and articles of association were substituted for the deed of settlement, which had done good service for 130 years, but which had become antiquated and almost unworkable. The directors availed themselves of the new powers by issuing an Endowment Assurance prospectus containing the rates of premium on which they were prepared to issue this class of policy with full participation in the exceptionally large profits. Hitherto they had not been able to grant such policies. The plan has been still further extended by a scheme for guaranteeing interest at the rate of 5 per cent. on the sum assured, and bonuses from the date of maturity until death. This has been followed by an attractive prospectus containing a somewhat novel feature—namely, deferred assurance for children without medical examination. The assurance under this scheme does not come into force or enter for profits until the child attains twenty-one. Ten pounds a year paid in respect of a child less than twelve months old will secure for the child at the age of twenty-one a with-profit policy for £1000 payable at death, free from all restrictions as to residence or occupation, and for which he will only have to pay £10 a year. In the event of the child dying before twenty-one all the premiums paid will be returned without interest. In consequence of many adverse criticisms having been made on the use of the Northampton Table by the Old Equitable in its latest investigation, the directors have published a valuation by the Institute of Actuaries, H<sup>m</sup> and H<sup>m</sup> (\*) Tables and 3 per cent. interest, which is considered the highest standard for a company to adopt, and the result shows that the surplus was £1,782,497, being £584,727 more than the amount divided as profit. This Society offers, as it has ever done, the most ample security for the discharge of its liabilities, and a substantial guarantee for future profits. The new prospectus is a comprehensive guide, and should be studied by all who are thinking of assuring their life. The Society now grants immediate annuities. It previously only granted deferred annuities. The Royal Exchange Assurance, under the heading of **Settlement Endowment Policies**, has recently introduced a new scheme, which consists of an assurance upon the life of the survivor of husband and wife, combined with a deferred annuity payable to the husband on his attain-

ing an agreed age, and to the wife on her husband's death. The policy may be either a whole-term or an endowment assurance, and, if required, may share in profits. In the case of a whole-life policy the deferred annuity is payable to the wife only after the death of the husband. The amount of the annuity is fixed when the policy is granted, and may range from  $\frac{3}{4}$  to 5 per cent. on the sum assured, according to the wishes of the proposer. The premiums payable are regulated according to the percentage agreed upon. On the failure of both lives, the sum assured is paid to the husband's representatives to be distributed among the children or other beneficiaries as appointed by him, or, if no such appointment is made, "as provided in the policy itself." This scheme is adapted to, and obviates the necessity of, the ordinary form of settlement that secures a life interest to the wife, with remainder to the children, as appointed by the settler. It may also be stated that, contrary to the practice on the grant of an ordinary last-survivor policy, no evidence of the wife's health is necessary.

The Sun Life Office has introduced **Improved Tables of Endowment Assurance**. Under one table the assurance matures in the fifty-fifth, and in the other in the sixtieth year of age. The assurance money is also payable at death if this occurs before the maturing period. It has also introduced what it terms **The Perfect Protection Policy**, which means (a) that the policy cannot lapse as long as it has any surrender value; (b) if the assured has a breakdown in health he has no premiums to pay during the period of his incapacity; (c) if he becomes totally incapacitated the Society will not trouble him for any more premiums; (d) if he meets with a very serious accident the Society will pay him half the sum assured, keep the policy in force free of cost, and pay the balance of the policy at his death; (e) he can travel anywhere without paying an extra premium; (f) he can surrender his policy, and either receive a paid-up policy or withdraw its value in cash; (g) he can borrow money on his policy. It is stated that no other assurance office issues this policy. The **Immediate Bonus Plan** has been introduced by the Scottish Equitable Life Assurance Society. Under this scheme a table has been prepared under which members may pay very low premiums, while retaining the right to share in the profits. The payments for those using the table have been fairly adjusted, so as to put them on a footing of equality with members paying the higher ordinary premiums. The system of assurance called **Guaranteed Tontine Endowment** has been introduced, whereby double the amount assured is paid if the policy-holder survive the stipulated time for which his policy is granted. Other systems of Tontine Endowment also prevail.—**Pensions** are also granted by several life offices to secure an annual income payable during the later years of life. If the assured should die before that date the whole of his premiums and interest will be returned to his representatives.

The National Mutual Life Assurance Society has introduced a scheme of **Guaranteed 5 per cent. investment policies**, that provide for the sum assured becoming payable at the end of ten or twenty years after death, during which time a terminable annuity equal to 5 per cent. of the

sum assured is payable to the legal representatives of the deceased, and who can surrender both the sum assured and the annuity either on the failure of the life assured, or at any time within the specified period after such failure, the surrender value being greater than the sum assured. The benefits of the scheme can also be extended to endowment assurances on payment of a slightly increased premium. The British Empire Mutual Life Assurance Company have also introduced a new feature, under the title of **Children's Assurances**. In this method there are two scales of premiums. In one all that are paid are returnable if a child dies before twenty-one. In the other scale, which is lower in the amount of premiums payable, these are non-returnable. On the child attaining twenty-one the policy comes into full force as a policy of insurance. The Norwich Union Life Assurance Society also transact this business as regards adults as well as children. The British Empire Mutual likewise issue **Six-per-Cent. Investment Policies**, whereby an assured income is secured without fluctuation or loss of capital value. This scheme is specially suited for marriage and family settlements. Under the **Reversible Premium Plan**, which is a new one introduced by the Colonial Mutual Life Assurance Society in connection with old age pensions, the sum assured becomes payable at death, and the premiums cease at the age of sixty or sixty-five, as selected at the outset, and afterwards the society will return one premium each year as long as the policy-holder lives. For providing a fund for payment of **Death Duties** under the Finance Act of '94 several life offices insert a clause in their policies that if requested by the legal personal representatives of the assured, entitled to receive the policy moneys on grant of probate or letters of administration, they will either pay so much of the sum assured as will be enough to satisfy these duties to such representatives, or at their option pay the whole or so much of the policy moneys as shall be required for these duties to the Inland Revenue Commissioners or any other persons lawfully entitled to receive the same under the before-mentioned or any other statute. In consequence of these arrangements, executors and administrators are relieved from the necessity of realising the estate to provide the money for the payment of these heavy duties. An important and distinctive feature of the **Scottish Provident Institution** is what may be called the **Low Premium and Deferred Bonus** system. The premiums for policies granted by this society are considerably lower than the average rates of other offices, and thus a much larger sum can be assured than can be assured by the same premium in other offices. The particular feature of the scheme is that bonuses are reserved for division exclusively among those who survive the period at which their premiums with compound interest at 4 per cent. amount to the sum assured. More than half the policy-holders divide the bonuses between them, which are very large.

As there appears to be a demand for an assurance policy at a low rate of premium under which the holder shall not be excluded from bonus additions, the **Pelican Life Office** has made an arrangement which is described as **Bonus Policies at Minimum Premiums**. The rates are very little in excess of those for

without-profit policies. The reversionary bonus to be allotted to the policies is always to be 1 per cent. per annum less than that allotted to the ordinary full-premium policies. If the bonus should fall below 1 per cent. these policies will get nothing, but will rank for their share beyond that proportion when the distribution is more than that rate. The great advantage of this arrangement is that it involves no liability on the policy-holder. He is assured for a definite fixed sum, which cannot be reduced even if there is no bonus; nor can the premium be increased.

The **3-per-cent. Consols with Bonuses** of the Norwich Union Life Insurance Society appears to offer an eligible and safe investment. The **4 per cent. Guaranteed Increasing Policy**, recently introduced by this Company, appears to be much appreciated. Under this scheme the assured or his legal representative is entitled to a bonus of 4 per cent. annually during the continuance of the policy up to 25 years. If he should survive this period he will then be entitled to the following options if he insures for £1000: viz., (a) A cash payment of £1000, and a paid-up policy for the same amount; (b) A cash payment of £1500; (c) A paid-up policy for £2902, subject to health; (d) On a continuation of the premiums a policy for £4150, subject to health; (e) An annuity of £108 11s. 3d., payable half-yearly; (f) A paid-up policy for £1000, and an annuity for life of £72 7s. 6d.; (g) A cash loan value at the end of 5 years of £94, at the end of 10 years £220, at the end of 15 years £540, and at the end of 20 years £950. This example applies to a policy taken out by the assured at 25 years of age, but premiums and options of the like kind as far as is practically and equitably applicable and will be quoted on application to the Society.

Very liberal **Immediate Annuities** are granted by many life offices, but in consequence of the small rate of interest paid for first-class investments the consideration money or rates paid for these annuities has increased very considerably, and is likely to further increase in the near future.

In order to meet the difficulty which trustees have now in finding safe investments yielding a fair rate of interest, the Rock Life Assurance Company and the Westminster and General Life Assurance Association have adopted **Assurances to Secure an Income for Widows and Children** at low premiums.

The system of profit peculiar to the Rock Life is that larger bonuses are reserved for those policy holders who survive and cause a profit, a smaller share being reserved to those by whose earlier death there is a loss to the common fund.

The **Family Settlement Policies** of the North British and Mercantile Insurance Co., which come under this class of assurance, also answer a growing requirement. They avoid the necessity of appointing trustees for the widow, and secure to her during her life a fixed safe and remunerative investment of the funds provided by the assurance on the life of her husband. It is stipulated in the policy that on the death of the husband, the wife surviving, the Company will pay to her during her life interest on the sum assured at the rate of 5 per cent per annum. On the death of the survivor of husband and wife, the sum assured will be at once paid over to the executors of

the husband. If the husband and wife both die, leaving a child or children, and while any child is under age, the fund may, on the death of the survivor of the parents, either be at once paid over to the husband's executors, and the matter closed—or it may, if the husband have so directed at the outset, be left in the hands of the Company, until the youngest child attains twenty-one, the Company allowing interest at  $3\frac{1}{2}$  per cent. Power is reserved to the husband to revoke the foregoing provisions—in which case the sum insured would at his death be at once paid to his representatives or assigns. If it should be desired while husband and wife are both living to discontinue payment of premium, the Company will give to him either a cash surrender value, or a fully paid-up policy, securing a reduced amount of assurance and annuity. The husband alone is medically examined. The same Company also issues **Threefold Option Policies**. By this scheme the policy secures a capital sum payable at death or on the attainment of an age (say 55, 60, or 65) specified at the time the policy is effected; but the assured may, on attaining that age, choose to receive either—(1) Immediate payment of the capital sum; or (2) An annuity (equal in amount to interest on the capital sum at the rate of 4 per cent) payable during the remainder of his life—payment of the capital sum being deferred until his death; or (3) An annuity of larger amount (in lieu of capital and interest) payable during the remainder of his life. The **Investment Policies** granted by the Rock Life Assurance Company are likely to be much appreciated. By these policies small or large sums may be accumulated without any risk of losing the money, and the certainty of receiving back a sure and profitable return as regards sums down, annuities, marriage settlements, family endowments, educational annuities, and leasehold redemption funds; and the whole with or without life assurance. The Yorkshire Fire and Life Insurance Company have brought out a new table, giving **Endowment Insurance at Minimum Cost**, but with profits deferred until the attainment of the endowment age. The liberal options which are obtainable on the attainment of the endowment age are: 1. Payment of the full sum assured in cash, with bonuses. 2. The assurance to be continued for the original amount of the policy payable at death, the bonuses and the balance of the sums assured to be paid in cash. 3. A paid-up policy for an increased amount payable at death. 4. A paid-up policy, payable at death, for the original sum assured, and in addition a pension to be drawn for the remainder of life. 5. A pension for the remainder of life. 6. A pension to wife or child. 7. A deferred pension to commence at the death of the life assured, and be payable during the life of the widow or of a child. In addition to this table the Company have also brought out a new scheme of **Discounted Bonus**. This consists of the adoption of a new table of reduced premiums obtained by discounting bonus at the rate of £1 per cent. per annum (compound), whereby the actual premiums are reduced to a minimum almost equivalent to non-profit rates, but with the special advantage that should the assured attain a specified fixed age—say 30 years after the date of the policy—it will then participate in the profits for the whole period at the rate of the bonus declared over the £1 per cent. assumed; or, in other words, the difference between

£1 per cent. and, say, 30s. per cent. (which is below the average rate hitherto declared by the Yorkshire) would be credited in a lump sum to the policy. Assurances on **Invalid Lines**, called "Invalid Assurances," are effected by the Clerical, Medical and General Life Assurance Society. For conducting this class of business with fairness to the public, the regulations of the Society provide that of the seventeen directors eight at least are to be members of the medical profession. The system adopted for assuring invalid lives, while safe to the Society, is as favourable to the assured as the various risks will permit. Other companies also take these and other under-average life risks. **Non-forfeitable Endowment Assurances with Guaranteed Bonuses** are granted by the London, Edinburgh and Glasgow Assurance Company. The Sun Life Assurance Company of Canada issue among other policies **Coupon Bonds** which are very attractive. The rates for these are so low that a person can, it is stated, carry 40 per cent. more assurance than in the ordinary plans for the same money. The coupon bonds differ from other systems of assurance, because the amount assured, instead of being paid in one sum at the death of the assured, or at the maturity of the policy, is payable by the company in twenty equal annual instalments. A coupon to represent each of these is attached to the bond. The first coupon becomes due immediately at death, or at the end of the endowment term, and the other coupons are payable one each year thereafter to the assured, or if dead, to the beneficiaries named by him, until the whole twenty have been redeemed. One great advantage of this form of policy is that it avoids the trouble and risk of finding suitable investments for the assurance money which a wife may receive at the death of her husband. The bonds participate in the profits, and if money is urgently required during the twenty years, the coupons not then due will at any time be discounted by the Company. **Semi-Endowment Policies** are also granted by this Company. They differ from the ordinary endowment ones in the following manner. While an ordinary endowment contract provides for the payment of a fixed sum at the end of the term specified, or in the event of previous death, a semi-endowment policy provides for the payment of double the amount on the death of the assured before the expiration of the endowment period. One of such policies taken out by a person aged 30 next birthday for £1000, payable at the end of 20 years, would cost under the with-profit plan £33 9s. The amount payable on death during this interval would be £1000, but if the assured survived the endowment term the amount payable to him would be £500, exclusive of bonuses; which, if allowed to accumulate on the Reserve Dividend plan, would probably amount to £536. So that at the end of the term he would receive altogether about £1036, after paying to the Company £669.

**Assurances with Exemption from Payment of Premiums under circumstances involving temporary or permanent Incapacity.** There are many professional men, and others, whose incomes solely depend upon their ability to follow their occupations, to whom it would be a great advantage to effect assurances under conditions that should provide for the discontinuance of the premiums under their policies, in the

event of their becoming incapacitated, either by accident, or bodily or mental disorder, from continuing to earn their own livelihood. With the view to secure this advantage to the assured a German life office, many years ago, issued policies for this purpose, and so much was their scheme appreciated that the Law Life Assurance Society introduced it into the United Kingdom shortly afterwards. It now issues policies of this kind upon the lives of males above the age of 24, whose occupations do not involve undue exposure to risk, and who are found to be "assurable at ordinary rates. Under this scheme female lives are not accepted. This description of assurance is also transacted by the Scottish Accident Life and Fidelity Insurance Company, for, the **Exemption from Payment of Premiums on the life assured attaining the age of seventy, or whilst the assured may be temporarily or permanently incapable by accidental bodily injury or illness, or by mental disorder, from attending to his usual profession, business, or occupation.**

The Edinburgh Life Assurance Company have brought forward a scheme—the New "Edinburgh" Policy with Guaranteed Options. This is stated to be an extension of the principle of endowment assurance. The annual contributions at most ages between 20 and 40 is £40 per £1000, if payable for 25 years, and £50 per £1000 if payable for 20 years. An intending policy-holder is offered three options. The first, if selected, must be declared at the outset, but a choice between the second and the third may remain open until the end of the selected term. Option 1 includes £1000 at death if within the selected term, £45 annually for life after the selected term, and £1000 when that yearly payment ceases, whether by death or surrender, it being the option of the policy-holder to drop the same at any time after the end of the selected term and take the £1000 in cash. Option 2 comprises the £1000 at death if within the selected term, £1000 in cash at the end of such, and accumulated profits to those who survive the term. Under Option 3 £1000 is payable at death if within the selected term, £1500 to £2200 fully-paid-up assurance at the end of the term according to the age then attained, and accumulated profits to those who survive the term. The profits may either be taken in cash or applied to secure additional paid-up assurance. The same company has introduced an **Early Provident Scheme**, whereby parents who wish to secure to their children a future provision may effect policies under this arrangement at about half the usual rates. These assurances may be of the ordinary kind, with premiums payable for the whole life or ending at a fixed age; or they may be endowment assurances payable at a given age or at death if that sooner occurs. The assurance commences after 15 years, but if death happens in the meantime the premiums are returned. When the age is attained at which the assurance is to begin; the policy takes rank for bonuses at the same rates as those declared on policies effected at that age. A surrender value is guaranteed after the first three years, or a paid-up policy may be had instead. This Company has introduced new schemes for the assurance under more favourable terms of **Naval and Military Officers**. The Law Union and Crown Insurance Company have recently issued a new **Secured Option Policy**. The following example will show the working of such scheme.

A person aged 20 may, by paying £31 10s. per annum until he is 60, or until his death if earlier, secure £1000. If he should previously die, 5 per cent. per annum on £1000 would be paid to his representatives for 20 years, and the full sum of £1000 at such time as he would have attained 60. If he should survive this period he is entitled to receive in cash a **tontine bonus** representing his share of profits of the entire class, which are divided among survivors. Respecting the £1000 assured, he may either receive it immediately on reaching 60, take 5 per cent. per annum on it for the remainder of his life and leave it to his representatives, or accept in lieu of it an annuity of £100 for life. Again, instead of an immediate annuity, he may have one not commencing until he is 65 of £165 for the remainder of his life. Moreover, he may on satisfactory medical examination exchange the £1000 immediately payable for a fully paid policy of £1670 payable at death; or for one of £1290 payable at the end of five years or at death if earlier. The policy carries the further advantage, beyond those mentioned, that in the event of the assured being incapacitated for business by bodily or mental disorder for any continuous period exceeding six months while premiums are payable, a remission of premium is made for a period corresponding to the duration of the incapacity. For example, if an assured were disabled for a consecutive period of nine months previous to a year's premium falling due, only a quarter of such year's premium would be charged. Until recently life offices were not favourably disposed to assure **Women**, and would only grant them policies at premiums very much in excess of those charged to males. The New York Life Insurance Company, which transacts much assurance business in the United Kingdom, concedes the same benefits in respect of non-forfeiture, freedom from restrictions, etc., in female policies at the same premium rates as are charged to males. This is a very important experiment, which, as is alleged, is justified by the rapidly changing conditions of the female sex as regards their increasing professional and business occupations and other causes. Assurance companies are paying more attention to the rating of female lives, and are canvassing for policies by women. A large number of this sex in the United States is specially employed to solicit life assurance among female workers, and secure large numbers of them as policy-holders. In Great Britain it appears that the number of lady agents engaged to canvass women to assure their lives is on the increase, and it is stated that a great development in this pursuit may certainly be looked for in the near future. It appears from a recent article in the *Bankers' Magazine*, by Mr. A. G. Mackenzie, F.I.A., that the invested assets of Life Offices have now reached the enormous sum of £234,000,000 sterling, having doubled in the last 26 years. At this rate of progress they will amount to £500,000,000 by 1921, and in another quarter of a century to a thousand millions, and the rate of interest, which is declining, to £3 9s. per cent. by 1921. He adds that "in the not remote future" it is probable that 3 per cent. will be the highest rate of interest that a well-managed office will feel justified in assuming that it will earn in the future, "and it may be confidently hoped that this assumption will

result in a fair profit from interest being made for a good many years to come."

### III. MARINE.

This has, in '98, been in a worse condition than for several years, owing to many losses from foundering, stranding, and wrecks of ships. During recent years very low rates have been charged for insurance, which have been greatly inadequate to the risks involved. Such reduced rates have been occasioned by the influx of a great number of small marine insurance companies, who to get business have recklessly issued policies at such remarkably small premiums that they were not remunerative. Many first-class underwriters and insurance brokers condemn this practice as one that will become ruinous to marine insurance companies, since it has materially increased over-insurance of ships. In consequence of the prevalence of very low premiums for marine insurance during the last twelve years the large and old-established underwriting companies have refused to reduce their rates to anything like a level with those of the new companies, and hence the former have done much less business during this period than they previously did. For the last nine years, however, marine insurance brokers have become more careful in considering the security of the companies they insure with than formerly, and therefore have increased their policies with leading companies of old standing, so that the latter have considerably regained much of the business they lost owing to smaller and newly established companies of indifferent financial status insuring at lower rates. The result has been that, while the latter companies have effected less insurances, the leading companies have issued more policies. Of eighteen leading marine insurance companies in Great Britain, the oldest are the Royal Exchange and the London Assurance Corporation, both established in 1720; and the Alliance and Indemnity Companies, both founded in 1824. Very heavy claims have recently been paid for losses on all kinds of ships, and the rates for insurance of them have materially increased during the last six years.

The dividends paid upon some marine insurance companies' shares are mainly, and as to others are almost entirely, derived from the investment of capital and reserves. Several of such companies are more financial than insurance concerns. A large amount of marine insurance business is also done by private underwriters connected with Lloyd's. Marine insurances are generally effected through marine insurance brokers, who are an important class in London, Liverpool, and Glasgow. Claims are determined by average adjusters in difficult cases. One of the grievous evils in underwriting transactions is the use of so-called "honour policies," generally issued as insurances on prospective freight. The number of members engaged as underwriters at Lloyd's is about 560, who, with few exceptions, have lodged with the Committee security, either by deposit or approved guarantee, against the marine liabilities which they severally incur at Lloyd's. Several wealthy foreign marine insurance companies having branches in Great Britain do a large portion of business here. To satisfy the requirements of the coasting trade, a few marine insurance clubs have been established,

whose operations are governed by the principle of mutuality and co-operation.

About 50 per cent. of the total outgoings of underwriters on hulls is for average claims, and the remainder for total loss claims. According to the law of marine insurance relating to "constructive total loss," which shipowners agree is fair, the estimated market value of a ship, after repair, should be taken as a test of such loss, so that if the estimated cost of repairing a vessel is more than her market value after repair, she is constructively lost. Underwriters, however, demand that a valuation which is admitted to be far beyond the market value when the ship is sound, shall be fixed as the value below which, when the state of her damage may have entirely prejudiced her character in the market, she cannot be made a constructive total loss. Thus if a ship is offered for insurance at what her owners consider her market value, £15,000, the underwriters, for reasons connected with averages, ask for the ship to be valued at £20,000, and policies are taken out for her insurance accordingly. If the vessel strands in a bad position, and sustains serious damage whereby her repairs are estimated by the surveyors to cost £12,000, and it is also estimated that after she is repaired buyers, thinking that she might have latent structural injury, would not give more than £10,000 for her, underwriters wish to make not this sum, but £20,000—their own fancy valuation—the test of constructive total loss. The losses which Marine Insurance Companies have recently suffered from strandings have been materially increased by the new method in the construction of hulls.

### IV. ACCIDENT, AND FIDELITY GUARANTEE.

By far the most important change which has taken place in recent years by legislation between employers and employed has been caused by the *Workmen's Compensation Act*. The provisions of this Act, and the action taken by employers and the insurance companies in regard to it, are fully dealt with in the separate article on *WORKMEN'S COMPENSATION (q.v.)*.

1. *Accident, Personal.*—The business of this branch is done by nearly 40 companies, who for certain premiums insure the payment of periodical sums for total and partial temporary disablement, and other fixed amounts on death or on total or partial permanent disablement. The Railway Passengers Assurance Company was the first established, which was in 1849; but as regards premium income, the Ocean Accident and Guarantee Corporation takes the lead of all the Accident Companies. At the end of Dec. '97 this income was £334,102, as against £245,258 in '96, and £186,707 in '95. The premium income of the Employers' Liability Assurance Corporation for the year ending March 31st, '98, was £320,386, as against £314,173 of the year preceding; and the premium income of the Railway Passengers Assurance Company for '97 was £244,948 as against £240,129 for '96. Most accident insurance companies transact *Employers' Liability Insurance*, as well as 84 life assurance companies. Under the present law employers are indemnified against their liability to pay compensation for injuries to their workmen under the *Employers' Liability Act of '80*, and at common law up to the limit of three years' wages. The pre-

miums are calculated on an estimate of the annual wages paid by the employer. Very many accidents which occur during employment are such that no compensation can be recovered against the employer. Joint policies are therefore granted to give the full indemnity under the Employers' Liability Act and at common law, as before mentioned, and also grant compensation in all cases of accident during occupation. Many employers extend their insurance by joining with their workpeople under this system, so as to provide for every accident during occupation. The usual benefits under these joint policies to employees are one year's wages in the event of death, and weekly allowances varying from one-third to one-half of the weekly wages, for not exceeding twenty-six weeks, during total disablement. The premiums for these policies are paid in full by the employer, who, by arrangement with the workpeople, deducts from their weekly wages their contributions, which vary from  $\frac{1}{4}d.$  to  $3d.$  per week, according to occupation. Since the latter part of '05 several important additional benefits have been offered to the public by the Personal Accident Insurance Companies. At the end of '95, 21 of the companies out of 31 issued what is termed a "Combined Policy," offering a variety of benefits beyond the death and permanent and temporary disablement allowances of the older Accident policies. With these increased benefits, however, additional and necessary restrictions and safeguards have been adopted.

The **Tontine Bonus for Non-Claimants** is a system devised by the London, Edinburgh & Glasgow Assurance Company. Under this scheme the premiums payable by a policyholder who continues his assurance with the Company, and who makes no claim for compensation, will be considerably reduced after five years over and above the abatement allowed to all policy-holders, and it is possible that they will be eventually extinguished altogether, and the assured will at the same time retain the full benefit of his assurance in the event of subsequent injury.

**2. Fidelity Guarantee.**—This class of insurance dates back to '40, and was commenced to supersede the system of private suretyship, against which there are many objections, one of the principal being the necessity for continual inquiry into the financial position of the bondsmen. Companies' guarantees have gained much popularity among employers owing to the liberal manner in which claims are dealt with; and all the Government departments at home and abroad, the law courts, municipal corporations, local boards, etc., accept them in preference to private bonds. Guarantees are issued on behalf of all persons of good character, and very many firms require a guarantee society's security with every new member of their staff, because if it is obtained it is a proof that the employé has satisfactorily passed through the searching inquiries made into his antecedents. Among the principal causes leading to defalcations by employés are drink, women, and betting. So much is this the case, that a man with a clear record as to honesty and character will find it difficult to obtain a guarantee if there is a suspicion of weakness in the matter of sobriety. On the employers' side the leading cause of the defalcations referred to is either the want of a good system of accounts, or, if a good system,

negligence in its application. That opportunity makes the thief is the daily experience of guarantee societies, and any deficiency in the before-mentioned method of accounts is most seriously against the interests alike of employers and employed. These companies are not intended to render good accountants unnecessary, but to meet those losses which it is, and apparently always will be, unable to prevent. The rates of premium vary from 5s. to 40s. per cent., and are classified under the different employments. Length of service, position and means are all matters taken into consideration when fixing the premium to be paid. Any number of officials of an employer may be guaranteed under one policy. Additions and alterations are made by endorsement from time to time. This is a great convenience when there is a large staff. Within the last few years, premiums have been reduced 50 per cent., and the present tariff is drawn up on such moderate lines that the inducement for large firms to form their own guarantee fund is removed. The Guarantee Society, the Provident Clerks' and General Guarantee Association, and the London Guarantee and Accident Company, Ltd., have each paid hundreds of thousands of pounds in claims. The Ocean Accident and Guarantee Corporation, the Law Guarantee and Trust Society, the General Accident Assurance Corporation, the Palatine and other companies, have also paid large claims. One of the leading grievances of Fidelity Guarantee Insurance Companies is that they are not allowed more than a mere trifling percentage of the costs they incur for the prosecution of offenders. In addition to these companies, who insure employers generally against loss by their servants' dishonesty, there is a society called the "Bankers' Guarantee Trust Fund," to indemnify against loss by bank employés. The Society is divided into two branches, the British and the Foreign Guarantee Trust. The Bank of England and several of the leading railway companies have a fund contributed by the employés to secure their employers against loss by the dishonesty of the former. There is also a Local Government and a Post Office Fidelity Guarantee Society, to insure the honesty of the Local Government and Post Office employés. At present the only Insurance Company of importance whose premium income and expenses are not known to the public and the insurance world, is the Guarantee Society; and it is a cause of general astonishment that they are not published.

## V. MINOR BRANCHES, AND EXTRAORDINARY FORMS OF INSURANCE.

**1. Sickness.**—The Sickness, Accident, and Life Association answers a great requirement of the middle classes, and is particularly valuable to professional and business men. It pays weekly sums to those who are wholly or partially disabled from following their vocations on account of illness not resulting from accidents. This company also combines accident with health assurance. The Ocean Accident and Guarantee Corporation, the Northern Accident Insurance Company, the General Accident Assurance Corporation, the Palatine Insurance Company, the Acme Insurance Company, and the National Cycle and Motor-Car Insurance Company transact this business.

**2. Diseases.**—More than twenty companies

transact insurance against certain diseases, and make weekly allowances for temporary total disablement by scarlet, typhus or typhoid fevers, or smallpox. These allowances are extended to measles by eleven, and to diphtheria by ten companies.

3. The coupon system of insurance entitles persons who possess copies of specified newspapers, railway guides, etc., containing accident coupons, to the payment of certain sums for injuries mentioned therein; while some of these on other coupons promise to pay the next-of-kin or legal representatives of the holders who suffer death from certain accidents—which are generally those that happen in railway trains—within specified times, fixed sums, which vary very much according to chances of death from such occurrences. By far the greater part of this insurance is transacted by the Ocean Accident and Guarantee Corporation. It is also transacted by the General Accident Assurance Corporation, the Law Accident Insurance Society, the Sickness and Accident Assurance Company, the Northern Accident Insurance Company, and the Fine Arts Insurance Company.

4. Medical Attendance during Sickness is insured by the Globe Accident Insurance Company and the National Medical Aid Company and several industrial assurance companies.

5. Burglary and Housebreaking.—The companies which take risks against these felonies are the National Burglary Insurance Corporation, the Goldsmiths and General Burglary Insurance Association, the National Cycle and Motor-Car Insurance Company, the Norwich and London Accident Insurance Association, the National Accident Insurance Company, the Security Company, the Ocean Accident and Guarantee Corporation, the Law Accident Insurance Society, the General Accident Assurance Corporation, the Fine Art and General Insurance Company, the Empress Assurance Association, and the Credit Assurance and Guarantee Corporation. Some of these companies also insure against larceny or theft in houses. The risk of murder by burglars or housebreakers is now covered by the Goldsmiths and General Burglary Insurance Association by payment of a small additional premium to that of the burglary and house-breaking risk.

6. Transit Risks.—The Northern Accident Insurance Company, the Fine Art and General Insurance Company, and the Law Accident Insurance Society, insure against loss of property in transit.

7. Horses and Cattle and Insurance against Death by Accident and Disease is undertaken by the Horse, Carriage, and General Insurance Company, the Imperial Live Stock Insurance Corporation, the Vehicular Insurance Company, and the Lancashire and Yorkshire Accident Insurance Company.

8. Third Party Risks are taken by the Vehicular Insurance Company, the Northern Accident Insurance Company, the Ocean Accident and Guarantee Corporation, the Horse and Carriage and General Insurance Company, the Law Accident Insurance Society, the Sickness and Accident Assurance Association (outside London), the Lancashire and Yorkshire Accident Insurance Company, the General Accident Assurance Corporation, the Globe Accident Insurance Company, the Norwich and London Accident Insurance Association,

and the National Boiler and General Insurance Company.

9. Vehicular Risks are taken by nearly all the last-named companies, as well as the General Accident Insurance Corporation, and the Scottish Employers' Liability and General Insurance Company.

10. Hailstorm Insurance is transacted by the Norwich and London Accident Insurance Association, and the Nurserymen's, Market Gardeners', and General Hailstorm Insurance Company.

11. Machinery Insurance was originated some years ago. During '95 the Machinery Insurance Company was formed, to insure against all risks and accidents to machinery, except those resulting from fire or boiler explosion. The regular inspection and general maintenance of the machinery insured forms part of the Company's business. The Company also issues policies which cover loss of profits by fire on goods and merchandise of all kinds. The contract of fire insurance is one of indemnity only; when, therefore, the fire insurance company has repaired the damage done by fire or reinstated the buildings destroyed, the responsibility of that Company ceases. In the meantime, however, very serious losses are incurred by the insured on account of the partial or total suspension of the profits which but for the fire damage would have been earned. It is to safeguard the insured against such losses that the new profit policy has been introduced.

12. Steam Boiler insurance began by the establishment of the "Manchester Steam Users Association" in '54, and is transacted by nine companies. The Boiler Insurance and Steam Power Company, Ltd., now called the National Boiler and General Insurance Company, Ltd., was the first to combine insurance with inspection, a system which has now been very generally adopted. This business includes the insurance of boilers against explosion and against damage thereby to the surrounding property, and of the employers' liability risk under the recent statute for all accidents to the boilers covered by the conditions in the policies. The premiums vary from £1 per boiler for £100, to £5 or £6 for £1000. The Company also insure engines, both steam and gas.

13. Plate-glass insurance was first commenced in '52 by the Plate-glass Insurance Company. Many companies transact this business. The method generally followed in plate-glass insurance is to undertake to make good all breakages, the companies being entitled, by way of salvage, to the broken glass. The insurance is often undertaken by contract in private dwellings.

14. Mortgages, Debentures, and other Securities. The insurance of the holders of these valuables against loss of principal and interest, and other business of a kindred character, is effected by the Law Guarantee and Trust Society, the Liverpool Mortgage Insurance Company, the Ocean Accident and Guarantee Corporation, the Trustees, Executors, and Securities Insurance Corporation, the Law Accident Insurance Society, and the Credit Assurance and Guarantee Corporation.

15. Trusteeship and Executorship. In consideration of certain premiums, the Law Guarantee and Trust Society, the Ocean Accident and Guarantee Corporation, the Trustees, Executors, and Securities Insurance Corpora-

tion, and the Liverpool Mortgage Insurance Company, arrange to act as trustees or executors. Trusteeship by insurance companies has recently made considerable progress, not only under wills and marriage settlements, but for debenture holders.

16. **Pictures and other Valuable Objects of Art.** The owners of these are indemnified against loss from damage or destruction of such, by the Fine Art and General Insurance Company.

17. **Licence Insurance.** The Licences Insurance Corporation and the Law Guarantee and Trust Society insure licence-holders and other interested persons against loss or deprivation in the value of property incurred by the forfeiture or non-renewal of licences.

18. **Loss or Damage of Passengers' and Mariners' Luggage at Sea.** The Marine and General Mutual Life Assurance Society, the General Accident Assurance Corporation, and the Lancashire and Yorkshire Accident Insurance Company undertake these risks.

19. **Sinking Funds or Capital Redemption in connection with Leasehold Property.** Several life offices and the Ocean Accident and Guarantee Corporation issue policies for this purpose.

20. **Special Indemnities or Contingency Policies** are issued in almost any cases, when they are required, by several life offices, as well as by the Ocean Accident and Guarantee Corporation, the Law Guarantee and Trust Society, the Law Accident Insurance Society, and the Fine Arts and General Insurance Company. Most ordinary life assurance companies insure against issue of marriages, and on the other hand against a person dying without issue, when those events are improbable. Insurances are sometimes effected with ordinary life offices against such contingencies as a change of name, armorial bearings or religion, loss or recovery of reason, etc. The Law Guarantee and Trust Society, beyond granting policies for these objects, have done so with regard to defects in title to landed or other property: lost documents, missing beneficiaries, avoidance of voluntary settlement, and payment of annuities. Some of these risks are also insured by the Ocean Accident and Guarantee Corporation.

21. **Performance of Contracts.** The London Guarantee and Accident Company, the Fine Art and General Insurance Company, and the Credit Assurance and Guarantee Corporation insure the performance of contracts.

22. **Cycle Insurance** of different kinds is undertaken by several companies, etc.

23. **Credit Insurance.** The Credit Assurance and Guarantee Corporation issue policies (a) to secure the fullest credit for solvent and responsible traders of good character, and likely to be successful in their business; (b) to enable business men to obtain additional capital through their bankers or otherwise; (c) to guarantee trade bills and other ordinary commercial transactions between traders and others.

24. **Excess Bad Debt Insurance.** Policies are issued by the Ocean Accident and Guarantee Corporation for covering merchants and others against bad debts of short duration.

25. **Motor-Car Indemnity and Horseless Carriage Insurance** is carried on by the National Cycle and Motor-Car Insurance Company, the General Accident Assurance Corporation, and other companies.

26. **Chemists and Druggists' Indemnity Insurance** is undertaken by the Northern Accident
